Heritage Signature® Auction #1172

U.S. Coins

July 12-15, 2012 | Orlando

LIVE AUCTION Signature® Floor Sessions 1-3

(Floor, Telephone, HERITAGE Live!,™ Internet, Fax, and Mail)

Orange County Convention Center
West Concourse • Room 223AB
9800 International Dr. • Orlando, FL 32819

Session 1
Thursday, July 12 • 6:00 PM ET • Lots 3001–3912

Session 2
Friday, July 13 • 1:00 PM ET • Lots 3913–4618

Session 3
Friday, July 13 • 6:00 PM ET • Lots 4619–5218

HERITAGE Live!,™ Internet, Fax, & Mail only Sessions 4-5

Session 4
Saturday, July 14 • 12:00 PM CT • Lots 7001–8984

Session 5
Sunday, July 15 • 1:00 PM CT • Lots 8985–10617

LOT SETTLEMENT AND PICK-UP

Friday, July 13 • 10:00 AM – 1:00 PM ET
Saturday, July 14 • 9:00 AM – 12:00 PM ET

Extended Payment Terms available. Email: Credit@HA.com

Lots are sold at an approximate rate of 200 lots per hour, but it is not uncommon to sell 150 lots or 250 lots in any given hour.

This auction is subject to a 15% Buyer's Premium.

BIDDING METHODS:

HERITAGE Live!™ Bidding
Bid live on your computer or mobile, anywhere in the world, during the Auction using our HERITAGE Live!™ program at HA.com/Live

Live Floor Bidding
Bid in person during the floor sessions.

Live Telephone Bidding (floor sessions only)
Phone bidding must be arranged on or before Wednesday, July 11, by 12:00 PM CT.
Client Service: 866-835-3243.

Internet Bidding
Internet absentee bidding ends at 10:00 PM CT the evening before each session. HA.com/1172

Fax Bidding
Fax bids must be received on or before Wednesday, July 11, by 12:00 PM CT. Fax: 214-409-1425

Mail Bidding
Mail bids must be received on or before Wednesday, July 11.

Phone: 214.528.3500 • 800.872.6467
Fax: 214.409.1425
Direct Client Service Line: 866.835.3243
Email: Bid@HA.com

HERITAGE AUCTIONS HA.com

Dear Bidder:

Welcome to Summer FUN! We have brought together more than 2200 coins for our Floor Sessions from close to 200 consignors, plus more than 3500 Non-Floor Session lots also available for viewing. As you browse the catalog, keep an eye out for the auction's pedigreed collections, *The Color Collection, The Norva Collection, The Old Holder Collection,* and *The Lance Gage Collection*, as well as these selections from among our featured coins:

Lot 3008: A 1776 Continental dollar, CURRENCY in Pewter, AU55 PCGS.

Lot 3995: A 1937-D Three-Legged Buffalo nickel, MS66 PCGS.

Lot 4413: An 1893-S Morgan dollar, MS60 PCGS.

Lot 4708: An 1848 CAL. quarter eagle, AU58 NGC.

Lot 4973: A 1909 Indian half eagle, PR66+ PCGS, CAC.

Lot 5155: A 1907 High Relief, Wire Rim double eagle, MS66 NGC.

Heritage offers many ways to participate in its auctions no matter where you are: pre-bidding through HA.com, mail, fax, and e-mail, as well as day-of bidding by telephone and through our award-winning online platform, Heritage LIVE!™. If you can join us in Florida at the convention, of course, we invite you to bid in person. Make sure to visit our booth on the Bourse and say hello.

Bid well!

Sincerely,

Greg Rohan
President

Todd Imhof
Executive Vice President

COLONIALS

Noe-5 1652 Oak Tree Shilling

3001 **1652 Oak Tree Shilling Genuine PCGS. Crosby 2-D, Noe-5, W-470, R.2.** 69.28 gn. The PCGS number ending in .97 suggests Environmental Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VF specimen that has environmental damage. This slate and charcoal-gray example has clear reverse details though the tree is faint, as is the lower left obverse legend. Intermittently granular with a few areas of verdigris and a small edge flaw at 12 o'clock. The obverse is misaligned toward 7 o'clock. Listed on page 39 of the 2013 *Guide Book*. (#20)

1652 Pine Tree Threepence, Choice AU
Noe-34, Ex:Ford

3002 **1652 Pine Tree Threepence AU55 PCGS. Crosby 1-A1, Noe-34, W-630, R.4.** Ex: Ford. Pellets at trunk. 18.7 gn per Ford catalog appearance. Toned rich gunmetal-gray overall with glimpses of lighter tan-gold on the reverse. The centering favors the lower reverse and upper obverse, with a few letters on each side partly or mostly off the flan. All but the tip of the tree is present. A minimally abraded example of this scarce denomination. The centers are wavy due to rocker press manufacture. Listed on page 39 of the 2013 *Guide Book*. Population: 13 in 55, 2 finer (6/12).
Ex: F.C.C. Boyd Collection; John J. Ford, Jr. Collection, Part XII (Stack's, 10/2005), lot 139, which realized $8,625. (#21)

1652 Pine Tree Shilling, VF30
Noe-15, Small Planchet

3003 **1652 Pine Tree Shilling, Small Planchet VF30 PCGS. Crosby 24-N, Noe-15, W-830, R.5.** 66.98 grains. The surfaces combine gray-brown and dark steel-blue with lighter tan devices. Imperfectly centered, the tops of the legends are off the flan on both sides. Listed on page 39 of the 2013 *Guide Book*. (#24)

VF30 Small Planchet Pine Tree Shilling
Better Noe-15 Variety

3004 **1652 Pine Tree Shilling, Small Planchet VF30 PCGS. CAC. Crosby 24-N, Noe-15, W-830, R.5.** 66.06 gn. A medium to deep gray example of this important Early American silver type. Noe-15 is a very scarce variety noteworthy for its awkward lettering and die failure near 4:30 on the reverse. The present piece has mint clips that affect the upper legends though central elements are sharply defined. Listed on page 39 of the 2013 *Guide Book*. (#24)

1652 Pine Tree Shilling, XF45
Small Planchet Noe-29

3005 **1652 Pine Tree Shilling, Small Planchet XF45 PCGS. CAC. Crosby 14-R, Noe-29, W-930, R.3.** 71.29 grains. A nicely centered impression with most of the legends and part of the outer border visible on the flan, this attractive piece is toned in deep gray-brown with lighter gray on some of the devices. Listed on page 39 of the 2013 *Guide Book*. (#24)

3006 **1773 Virginia Halfpenny, Period MS64 Red and Brown PCGS. Newman 26-Y, R.2.** Orange-red dominates design recesses, while the centers and open fields are toned medium brown. This semi-prooflike near-Gem is void of contact, and provides exceptional eye appeal for an 18th century copper coin. Listed on page 45 of the 2013 *Guide Book*.(#241)

1776 Continental Dollar
Newman 2-C, CURRENCY Variant

3007 **1776 Continental Dollar, CURRENCY, Pewter Genuine NCS. Newman 2-C, W-8455, R.3.** In our opinion this piece has AU Details and shows environmental damage and has been cleaned. Struck in pewter, this is the plentiful variety with CURRENCY properly spelled. There are probably 300 to 400 surviving examples in all grades. This example has strong details with the sharpness of an AU specimen, exhibiting environmental damage and evidence of cleaning. The surfaces are light gray with a number of pits, mostly on the obverse. Heavy hairlines are also noted on the obverse, while the reverse seems to retain some luster. Listed on page 85 of the 2013 *Guide Book*. (#794)

1776 Continental Dollar, AU55
Newman 2-C
CURRENCY Spelling Variant

3008 **1776 Continental Dollar, CURRENCY, Pewter AU55 PCGS. Newman 2-C; W-8455, R.3.** Little evidence exists of the history of the Continental Currency coins, although it is certain that they were struck in 1776 as the date suggests. They were almost certainly produced in New York, and Michael Hodder believes they were minted in the late summer, just prior the British capture of the city in September. It is thought that these pieces were made to replace the paper dollar, and in fact, the New York paper money issue of August 13, 1776, omitted that denomination.

Although a few silver and brass impressions are known, nearly all surviving examples are pewter pieces. There was little silver available for coinage at the time, so most likely the pewter pieces were intended as dollar coins, equivalent to the Spanish Milled dollar. A proposed copper coinage was also rumored, according to an article in the June 27, 1776, issue of the *New York Journal*. The article was part of a "Letter from Philadelphia, Dated 25th June 1776:"

> We hear it is proposed, that after three months, the currency of all Copper Coin made of base metal, or wanting in weight, is to be totally suppressed, and that the rest is to pass at the rate of 15 for an eighth part of a Dollar. And if it shall appear that there is not a sufficiency for common use, that it will be all called in, and a new impression struck of Continental Copper Coin, of a larger size, twelve of which is to pass for an Eighth of a Dollar, after which no other Coppers are to pass current.

This Choice AU specimen is an outstanding representative of the 1776 coinage issue, with medium gray surfaces and lighter gray luster in the protected areas. A few scattered marks are expected, given the grade and age of this historic piece. A tiny planchet crack is noted at 3 o'clock on the obverse and at 7:30 on the rotated reverse. Listed on page 85 of the 2013 *Guide Book*. *Ex: Barrington Sale (Kingswood Auctions, Bowers and Merena, 8/1990), lot 6149; Dr. Joseph M. Seventko Collection; Atlanta Signature Sale (Heritage, 8/2001), lot 5111.* (#794)

1787 Massachusetts Half Cent, MS64 Brown
Ryder 4-C, W-5940

3009 **1787 Massachusetts Half Cent MS64 Brown PCGS. CAC. Ryder 4-C, W-5940, R.2.** This attractive Choice example offers glossy brown surfaces with no mentionable contact marks. The centers of both sides show just a touch of softness, but the coin is well-detailed in most areas. Listed on page 59 of the 2013 *Guide Book*. Population: 20 in 64 Brown, 10 finer (5/12). (#296)

3010 **1788 Massachusetts Cent, Period XF40 NGC. Ryder 1-D, W-6190, R.3.** Tan-brown overall with glimpses of deep gray in design recesses. Nicely defined and void of detractions. Listed on page 59 of the 2013 *Guide Book*.(#311)

3011 **1788 Massachusetts Cent, Period XF40 PCGS. Ryder 8-C, W-6260, R.3.** A well defined golden-brown representative with a mark-free appearance and minor planchet granularity on the obverse exergue. Tiny obverse rim nicks at 5 and 7 o'clock. Listed on page 59 of the 2013 *Guide Book*.(#311)

3012 **1787 Connecticut Copper, Muttonhead VF20 PCGS.** This medium brown piece is off center toward 10:30. The reverse has a minor rim ding at 11 o'clock. An early die state with bold legends. The strike is soft on the profile and LIB. Listed on page 61 of the 2013 *Guide Book*.(#343)

3013 **1786 New Jersey Copper, Narrow Shield, Straight Beam VF35 PCGS. CAC. Maris 16-L, W-4840, R.2.** The Protruding Tongue variety with a die break near the snout and a large die lump at 2:30 on the obverse. Gunmetal-blue fields accompany tan-brown devices. Listed on page 69 of the 2013 *Guide Book*. (#496)

3014 **1788 New Jersey Copper, Running Fox VF30 PCGS. CAC. Maris 77-dd, W-5535, R.2.** The late die state with heavy linear breaks on both sides. Some continue to collect this state as a separate variety, M. 78-dd, though the obverse die is the same. Well detailed with evenly microgranular golden-brown surfaces. Listed on page 71 of the 2013 *Guide Book*.(#524)

3015 **1785 Vermont Copper, VERMONTS VF20 PCGS. RR-2, Bressett 1-A, W-2005, R.2.** This medium brown copper is struck several degrees off center toward 3:30. The date is absent due to centering and a flan flaw at 6 o'clock. As often seen on Ryder-2, a tornado-shaped die break affects the plow. Listed on page 72 of the 2013 *Guide Book*.(#539)

3016 **1786 Vermont Copper, VERMONTENSIUM VF35 NGC. RR-7, Bressett 5-E, W-2025, R.3.** Medium brown with occasional deep gray at the borders. Impressively defined save for lightly struck areas at 4:30 on the obverse and 1:30 on the reverse. One small reverse rim nick at 12 o'clock. Listed on page 72 of the 2013 *Guide Book*.(#545)

1787 New Haven Restrike Fugio Cent
MS65 Red and Brown, Noticeable Red Remaining

3017 **1787 Fugio Cent, New Haven Restrike, Copper MS65 Red and Brown PCGS. CAC. Newman 104-FF, W-17560.** An impressive Gem with original bright orange-red luster at the borders and light, evenly mellowed brown central toning. Housed in a green-label PCGS holder. Sharply struck. A few small specks of carbon can be found with a loupe. Population: 14 in 65 Red and Brown, 5 finer (5/12). Listed on page 84 of the 2012 *Guide Book*. (#917)

1778-1779 Rhode Island Ship Token, AU58
W-1740, Wreath Below Ship

3018 **1778-1779 Rhode Island Ship Token, Wreath Below, Copper AU58 PCGS. Breen-1141, W-1740, R.4.** A small floral arrangement beneath the ship appears where VLUGTENDE previously appeared, the die reengraved after the first and second varieties were produced. Distinctive medium brown surfaces exhibit traces of high point wear, with light yellow peripheries. Listed on page 50 of the 2013 *Guide Book*. (#576)

3019 **1789 Mott Token, Thick Planchet, Plain Edge MS63 Brown PCGS. Breen-1020.** Late die state with a large break attached to the upper left corner of the clock on the obverse. Chocolate-brown and lustrous with a crimped reverse rim at 6:30 and a light planchet cutter mark (as made) at both centers. Listed on page 74 of the 2013 *Guide Book*.(#603)

3020 **1789 Mott Token, Thick Planchet, Plain Edge MS64 Brown NGC. Breen-1020.** The usual late die state with a large break at the top left corner of the clock, and with the associated sunken die with a convex appearance on the actual coin. The reverse, with the eagle, shows considerable weakness, also a result of the sunken die. This Choice Mint State piece has lovely medium brown surfaces with lighter tan, faded from original red. Listed on page 74 of the 2013 *Guide Book*.(#603)

3021 **1789 Mott Token, Thin Planchet, Engrailed Edge XF45 PCGS. Breen-1025.** The thin planchet, engrailed edge variety is much scarcer than its thick planchet, plain edge counterpart. An unblemished medium brown piece. From a late die state with a large break from the upper left corner of the clock and a soft impression on the eagle. Listed on page 74 of the 2013 *Guide Book*. (#607)

Choice Red Kentucky Token LANCASTER Edge, W-8810

3022 **(1792-94) Kentucky Token, LANCASTER Edge MS64 Red PCGS. Breen-1156, W-8810, R.5.** A peach-red near-Gem with infrequent traces of gunmetal-gray. Crisply struck and satiny with no visible marks. The 15-star pyramid on the reverse is built in order of admission to the union, with Kentucky appropriately placed atop. Listed on page 75 of the 2013 *Guide Book*. Population: 34 in 64 Red, 8 finer (6/12). (#625)

3023 **1794 Franklin Press Token MS64 Brown NGC. Breen-1165, W-8850, R.1.** Struck in London, this token emanated from a printing shop where Benjamin Franklin once worked, explaining its popularity with American collectors. This pleasing piece is lustrous with hints of light green peripheral toning over chocolate-brown surfaces. Census: 3 in 64 Brown, 1 finer (5/12). Listed on page 76 of the 2013 *Guide Book*.(#630)

Near-Mint Silver Castorland Medal Struck from Original Dies, W-9100

3024 **1796 Castorland Medal, Silver AU58 PCGS. W-9100, R.5.** Reeded edge. From both original dies, with no indication of a die bulge or crack near the NS in PARENS. Delicate die rust is noted near the vessel handle. Experts differ whether these attributes correspond to an original striking or a very early restrike. Well struck and prooflike with peripheral almond-gold and steel-blue toning. Listed on page 77 of the 2013 *Guide Book*. (#653)

3025 **1783 Washington & Independence Cent, Large Military Bust AU58+ PCGS. CAC. Baker-4, R.4.** This virtually Mint State Washington copper is void of relevant marks. The strike is good aside from the left margins. Listed on page 79 of the 2013 *Guide Book*.(#667)

3026 **1783 Washington & Independence Cent, Small Military Bust, Plain Edge AU58 NGC. Baker-4a, W-10155, R.5.** Deep walnut-brown toning embraces this scarce Small Bust Washington and Independence cent. Mint-made clash marks flank the portrait. Moderately granular near the forehead. Listed on page 79 of the 2013 *Guide Book*.(#670)

Baker-16, W-10630 1791 Washington Cent Small Eagle Reverse, MS66 Brown

3027 **1791 Washington Small Eagle Cent MS66 Brown PCGS. CAC. Baker-16, W-10630, R.3.** This splendid chocolate-brown Premium Gem retains glimpses of mint red within recessed areas such as the lettering and Washington's eye socket. Impressively preserved with minimal carbon. It appears that this sharply struck piece was set aside by the Westwood Mint instead of released into English circulation. Listed on page 81 of the 2012 *Guide Book*. Population: 4 in 66 Brown, 0 finer (5/12).
Ex: Benson Collection, Part II (Ira & Larry Goldberg, 2/2002), lot 25, which realized $8,050; The Liberty Collection of American Colonial Coinage, Part Three (Heritage, 5/2008), lot 2043, which realized $12,650. (#705)

3028 **1793 Washington Ship Halfpenny, Copper, Lettered Edge AU58 PCGS. CAC. Baker-18, W-10855, R.4.** A mildly prooflike ebony-brown example that has a bold strike and only minimal wear. The upper left reverse field is buckled, as always for the issue. Listed on page 83 of the 2013 *Guide Book*.(#734)

3029 **1795 Washington Grate Halfpenny, Small Buttons, Reeded Edge MS62 Brown PCGS. Baker-29D, W-10950, R.4.** An attractive example with satin luster, this piece shows considerable faded mint red on each side. The strike is typical with weakness at the top of the head. Faint curved lines on the upper and central obverse are as made and were present on the flan prior to the strike. Listed on page 83 of the 2013 *Guide Book*.(#749)

HALF CENTS

1794 C-9 Half Cent, XF40
High Relief Obverse

3030 **1794 XF40 PCGS. C-9, B-9, R.2.** The hair details show in high relief on this distinctive obverse die that was used for three different varieties. This obverse was used with three different reverse dies, and these High Relief varieties enjoy a separate Guide Book listing. While the C-9 is common, the other two varieties from this obverse die are rare. The light olive surfaces show delicate gold overtones, with scattered surface marks as expected. A few splashes of deeper olive appear on the obverse, with mahogany toning on the reverse. Our EAC grade VF30. (#1003)

3031 **1795 Plain Edge, Punctuated Date VG10 PCGS. C-4, B-4, R.3.** Manley Die State 2.0. A medium brown representative with impressively unblemished surfaces. Peripheral legends are sharp save for the ED in UNITED. The softly defined reverse center is characteristic of the die state. Our EAC grade Good 6.(#1012)

3032 **1795 Plain Edge VG8 PCGS. C-6a, B-6c, R.2.** Traces of a probable Talbot, Allum & Lee token undertype are faintly visible on the obverse margin near 2 o'clock and 7:30. An evenly struck tan-brown piece with a hint of granularity and faint marks near the C in CENT and the 7 in the date. Our EAC grade Good 6.(#1018)

1796 Half Cent, VG8
Rare With Pole C-2, B-2 Variety

3033 **1796 With Pole VG8 PCGS. C-2, B-2, R.4.** There are only two varieties, and Cohen-2 is easily identified by the pole on the obverse. The 1796 half cents are well-known as the rarest in the denomination, and when examples cross the auction block they are subject to spirited bidding. According to Mint records, only 1,390 pieces were struck—a diminutive number compared to the six-figure mintage of the previous year.

Deep chocolate-brown patina endows both sides. The surfaces have moderate porosity and scattered marks throughout. There are several areas of notable softness, namely the LI in LIBERTY, the UNI in UNITED, and several letters in HALF CENT. The central motif of Liberty, however, is clearly defined. This variety is seldom seen in any grade, and this piece will surely be treasured by a copper connoisseur. Our EAC grade Good 6. Population: 4 in 8, 19 finer (6/12).

Ex: Los Angeles Signature (Heritage, 8/2009), lot 1016. (#1027)

3034 **1802/0 Reverse of 1802 — Environmental Damage — NGC Details. Fine. C-2, B-2, R.3.** Manley Die State 2.0. A nicely defined deep brown example with evenly granular surfaces. Unlike several varieties of 1804 half cents, the 1802/0 C-2 is unknown in grades above XF. The finest certified by NGC is a VF30, and the second finest is a single VF20. Our EAC grade VG7.

3035 **1803 AU55 PCGS. CAC. C-1, B-1, R.1.** Manley Die State 3.0. This late die state example represents the usual state of these dies, with a bulge around the central obverse motif, and extensive reverse die cracks. Virtual Mint State sharpness is exhibited on both sides of this lovely olive and steel-brown half cent, with strong cartwheel luster. A small flaw is noted at the central reverse. Our EAC Grade XF45.(#1060)

3036 **1804 Crosslet 4, Stems — Double Struck, First Strike Off Center — VF20 NGC. C-9, B-8, R.2.** The first strike of this mint error medium olive and iridescent half cent was about 20% off center at 1 o'clock. The 4 from the first strike is visible in the drapery above the same digit from the second strike. Substantial additional detail from the first strike remains on both sides. Minor verdigris is visible on Liberty's face and upper hair details. Our EAC grade Fine 12.(#1069)

MS63 Brown 1804 Half Cent Crosslet 4, Stems, C-10

3037 **1804 Crosslet 4, Stems MS63 Brown PCGS. CAC. C-10, B-9, R.1.** Manley Die State 3.0, usual for the variety. A trace of border dentils appear on the obverse with none on the reverse of this late die state piece. The strike is bold with intermingled olive and steel surfaces. Free from detrimental marks though we note a pair of tiny spots beneath the hair ribbon. Our EAC grade MS60. (#1069)

3038 **1806 Small 6, No Stems AU58 NGC. C-1, B-3, R.1.** The obverse is olive-gray with hints of rose. The reverse is brick-red with glimpses of green-gold. Satiny and nicely struck. Smooth aside from a hair-thin mark through the L in LIBERTY. Our EAC grade XF45.(#1093)

3039 **1808 AU58 PCGS. C-3, B-3, R.1.** Manley Die State 3.0 with minimal dentilation, "very scarce." This sharply defined and satiny golden-brown near-Mint half cent is pleasing despite a slightly bright area on the cheek and a faded slender mark through the right top of the wreath. Our EAC grade XF40.(#1107)

3040 **1809 Circle XF40 NGC. C-4, B-1, R.2.** The "Circle" feature is a repunched digit with a large 0 over a smaller 0, giving the appearance of a circle inside that element. Traditionally called the "Circle in 0" variety, this obverse is identified as "LG/SM 0" on the NGC label. An attractive example, the bluish-brown surfaces showing only a few trivial marks. Our EAC grade VF30. (#1129)

3041 **1811 VF20 PCGS. C-2, B-2, Low R.3.** This better date half cent is deep gray-brown with unmarked surfaces. The lower reverse is mildly granular. The curls and leaves display wear consistent with the grade. Our EAC grade Fine 12.(#1135)

1825 C-2, B-2 Half Cent MS64 Brown

3042 **1825 MS64 Brown PCGS. C-2, B-2, R.1.** Although the bust and wreath are indistinct, there are no actual signs of wear on this chestnut and olive-brown half cent. Satiny surfaces host lighter tan peripheries, faded from original red. Our EAC grade MS60. Population: 18 in 64 Brown, 3 finer (6/12). (#1141)

3043 **1834 MS63 Red and Brown PCGS. C-1, B-1, R.1.** The only variety known for 1834, and this Select Mint State representative exhibits faded orange color with brown and iridescent toning. Scattered spots and surface marks are consistent with the grade. Our EAC grade AU55.(#1166)

3044 **1855 MS64 Red PCGS. CAC. C-1, B-1, R.1.** The most plentiful Braided Hair half cent with full red Mint color due to an old hoard that included hundreds of pieces. Most of those are widely distributed today and near-Gem examples such as this piece seldom appear in the market place. This lovely specimen is sharply defined with frosty orange luster and delicate blue toning. Our EAC grade MS64.(#1235)

1855 C-1 Half Cent, MS65 Red

3045 **1855 MS65 Red NGC. C-1, B-1, R.1.** The 1855 is arguably the easiest year of the Braided Hair series to locate with full red mint color, and even this issue is rarely seen so fine. This piece has frosty surfaces with deep orange luster and trivial flyspecks, usually more abundant than on this example. Our EAC grade MS64. Census: 10 in 65 Red, 0 finer (6/12). (#1235)

3046 **1857 MS64 Red and Brown PCGS. CAC. C-1, B-1, R.2.** Although Red and Brown or Red examples of the 1857 half cent are occasionally available, such pieces are elusive. This example is one of those with pale orange mint color and splashes of brown toning. The reverse is nearly full red. Our EAC grade MS63. Population: 37 in 64 Red and Brown, 0 finer (6/12).(#1240)

LARGE CENTS

Fine Details 1793 Chain Cent
AMERICA Reverse, S-3, B-4

3047 **1793 Chain AMERICA — Damaged — NGC Details. Fine. S-3, B-4, Low R.3.** The S-3 is the most accessible of the Chain cent die pairs, though still scarce regardless of condition. While the present example has a number of rim bruises and several interior digs, the level of remaining detail is pleasing. The reverse in particular has a boldly defined chain. Our EAC grade AG3.

1793 Wreath Cent, VF Details
S-8, B-13 Variety

3048 **1793 Wreath Cent, Vine and Bars — Corroded — ANACS Details. VF. S-8, B-13, R.3.** The medium to dark brown surfaces are uniformly granular, although all legends are bold and Liberty's major details are apparent. Each side has subtle rim bumps, more evident on the lower obverse. Our EAC grade Good 5.
Ex: FUN Signature (Heritage, 1/2006), lot 544; Palm Beach Signature (Heritage, 7/2009), lot 64. (#1347)

1793 S-6 Wreath Cent, VF20
Popular 'Sprung Die' Variety

3049 **1793 Wreath Cent, Vine and Bars VF20 PCGS. S-6, B-7, R.3.** A pleasing mid-range representative of this scarce die pairing. Each side shows minor rim crumbling and a degree of wear across the upper parts of the design. Solidly detailed in the shallow areas with few marks for the grade, though a minor rim bump appears above and to the left of the L in LIBERTY. Our EAC grade VG10.
Ex: ANA Signature (Heritage, 7-8/2008), lot 997; FUN Signature (Heritage, 1/2009), lot 171. (#1347)

3050 **1794 Head of 1794 VF20 NGC. S-61, B-53, R.4.** A nicely detailed dark mahogany cent with lighter gray-brown high points, this piece has a few minor rim bumps and moderate surface granularity. However, none of its imperfections prevent an NGC grade. Our EAC grade VG10.
Ex: 1981 EAC Sale (5/1981), lot 91.(#901374)

3051 **1794 Head of 1794 VF25 NGC. S-60, B-52, R.3.** Toned medium to deep brown with olive and rose tints on the high points. Only trivial marks are present, though the reverse is mildly granular left of ONE CENT. Evenly defined except for the Y in LIBERTY and the final A in AMERICA. Our EAC grade Fine 12.(#901374)

1794 S-44 Cent, VF30

3052 **1794 Head of 1794 VF30 PCGS. S-44, B-33, R.1.** This pleasing midgrade S-44 clearly shows the obverse die crack through the date and the reverse crack extends in from the border between S and O. Both sides show mottled chocolate and tan color with subdued surfaces that exhibit a slightly matte appearance. Our EAC grade Fine 15. (#901374)

1794 Large Cent, XF40
S-21, Medium Chocolate-Brown Surfaces

3053 **1794 Head of 1794 XF40 PCGS. S-21, B-5, R.3** Light but distinct wear is present over the high points of the medium chocolate-brown devices. Scattered abrasions are present on each side, including several on and near the portrait. Still, interesting eye appeal for this second-year large cent issue. Our EAC grade VF20.
Ex: FUN Signature (Heritage, 1/2009), lot 175. (#901374)

Very Scarce S-76a Lettered Edge
1795 Cent, Fine 12

3054 **1795 Lettered Edge Fine 12 PCGS. S-76a, B-4a, R.5.** Much scarcer than its Plain Edge S-76b counterpart. This medium brown representative has a sharp date, LIBERTY, and ONE CENT. The reverse peripheral legends are fully readable despite a few faint letters. Moderate edge dings at 2:30 on the obverse and 6 o'clock on the reverse are noted in addition to small pits near the 5 in the date. Our EAC grade VG7. (#1377)

3055 **1795 Plain Edge VF25 PCGS. S-76b, B-4b, R.1.** This Liberty Cap type coin displays considerable design detail. All legends are clear and the lower hair tresses are bold. The tan-brown fields and devices are moderately granular and void of visible marks. Our EAC grade Fine 12.(#1380)

3056 **1797 Reverse of 1797, Stems VF20 PCGS. S-140, B-22, R.1.** A medium brown representative with pleasing detail for the VF20 level. Evaluation beneath a lens reveals a few pinscratches on the left side of the wreath and above Liberty's shoulder. Our EAC grade Fine 12.(#1422)

Fine No Stems 1797 Cent
Better Sheldon-143 Marriage

3057 **1797 Reverse of 1797, No Stems Fine 12 NGC. S-143, B-31, R.5.** The vast majority of No Stems 1797 cents are Sheldon-131. However, the second 7 in the date touches the bust, which confirms the very scarce S-143 variety. This medium brown representative is evenly defined aside from softness of impression at the top of the wreath and the A in STATES. A minor edge knock at 5 o'clock on the reverse will identify the present example. Our EAC grade VG8. (#1425)

3058 **1798/7 VF20 PCGS. CAC. S-152, B-13, R.2.** A nicely detailed steel and olive-brown example with the usual quota of trivial handling marks expected for the grade. A thin scratch crosses the bust, and a few other heavier marks are visible. The left obverse field has a light die bulge. Our EAC grade Fine 12.
From The Norva Collection.(#1440)

3059 **1799/8 — Corroded — ANACS. AG Details, Net Fair 2. S-188, B-2, R.4.** Deep mahogany-brown with areas of powdery lime-green verdigris in selected protected areas. The surfaces are granular but no more than is usual for an example of AG sharpness. LIBERTY and AMERICA are bold, and the top half of the date is readable. Our EAC grade Fair 2.(#1446)

Rare 1799/8 Cent, S-188
Fine 15 Sharpness

3060 **1799/8 — Damaged, Corroded — ANACS. Fine 15 Details. S-188, B-2, R.4.** Considerably rarer than the normal date S-189 1799 variety. An early die state without reverse cracks. This key date cent has clear types and the legends are sharp except for OF. The tan-brown and stone-gray surfaces are granular and edge marks are evident on the obverse rim at 3:30. Our EAC grade Good 5. (#1446)

3061 **1799 Genuine PCGS. S-189, B-3, R.2.** The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AG specimen that has been scratched. Despite the description, this low grade cent has a full date, and clearly visible die chip on the reverse, a hallmark of all genuine 1799 Normal Date cents. Our EAC grade Fair 2.(#1443)

3062 **1804 Genuine PCGS. S-266a, B-1, R.2.** The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VF specimen that has been corroded. Both sides have moderate surface corrosion with evidence that the coin has been cleaned and recolored. The deep steel surfaces show traces of pinkish-orange. Our EAC grade Good 6.(#1504)

Better Date AU53 1809 Cent, S-280

3063 **1809 AU53 PCGS. S-280, B-1, R.2.** The sole die pairing for this better Classic Head date. Though located with little difficulty in well circulated grades, the 1809 is a prize at the AU level. The present cent displays ample golden-brown luster with gunmetal toning also prominent. Smooth overall despite faint marks near the O in ONE. The usual die state with cracks through the E in STATES. Our EAC grade XF40. (#1546)

1810/09 S-281 Cent, XF40

3064 **1810/09 XF40 PCGS. S-281, B-1, R.1.** Rich mahogany surfaces with a patch of chocolate surrounding the first two stars. An attractive, lightly circulated example of this popular *Guide Book* issue, showing violet and blue toning on the obverse device. Housed in a green label holder. Our EAC grade VF25 (#1553)

3065 **1811 VF20 PCGS. S-287, B-1, R.2.** The half cents and large cents of 1811 are scarce, semi-key dates, enjoying strong demand from date and variety collectors. This piece has reddish-tan and dark brown surfaces with a few scattered, grade-consistent marks on each side. Our EAC grade Fine 12.(#1555)

3066 **1812 Small Date XF40 NGC. S-290, B-2, R.1.** A pleasing example of the late die state that shows a raised ridge inside the reverse border, especially at the top. Both sides have smooth dark brown surfaces with trivial marks expected for the grade. Our EAC grade VF30.(#1561)

3067 **1816 MS62 Brown NGC. CAC. N-6, R.2.** A pleasing Mint State representative of a plentiful variety other than the usual N-2 Randall Hoard marriage. This lustrous piece shows full cartwheels with pleasing bluish-brown and golden-olive surfaces, hosting traces of original mint red. We place this coin among the top 20 known for the variety. Our EAC grade AU55.(#1591)

3068 **1817 13 Stars MS63 Red and Brown PCGS. N-14, R.1.** One of the common 1817 varieties with many Mint State survivors from the Randall Hoard. This example has considerable bright orange mint luster with minimal olive-brown toning and scattered dark spots as usual for coins from the hoard. Our EAC grade MS62. (#1595)

3069 **1822 MS60 Brown PCGS. N-5, R.2.** The stars are all flat, but the central motifs are sharp. Both sides have full cartwheel luster with medium olive surfaces and reddish-tan peripheries. Noticeable hairlines on each side prevent a higher grade. Our EAC grade AU50.(#1624)

3070 **1823/2 — Reverse Rim Damage — NGC Details. AU. N-1, R.2.** The rim damage on the reverse of this nicely detailed example is located at 4 o'clock, and only slightly affects the overall appearance. Nearly all 1823 large cents of both varieties are found in low grades, and any example in higher grades enjoys considerable demand. This piece blends olive-brown and steel on both sides with only trivial surface marks. Our EAC grade VF20.(#1630)

3071 **1832 Medium Letters MS62 Brown PCGS. N-1, R.2.** Pleasing chestnut surfaces exhibit satiny tan luster with a few splashes of darker toning, noticeably at the E in ONE. A sharp central strike is evident, with flat stars and flowlines extending the reverse letters to the border. Our EAC grade AU55.(#1690)

3072 **1834 Large 8, Large Stars, Medium Letters — Environmental Damage — NGC Details. VF. N-5, R.5.** The 1834 N-5 die marriage is the rarest business strike large cent of the date, and it is instantly identified as the only variety of 1834 with the point of the highest leaf left of center below the final S. Both sides combine olive-brown and mahogany with slight surface roughness at the lower reverse. Our EAC grade Fine 12.(#1702)

3073 **1835 Small 8 and Stars MS63 Brown PCGS. N-5, R.2.** A noticeably blunt strike fails to diminish the eye appeal of this Select Mint State piece, a coin that should have garnered the Red and Brown designation as about one-third of the original orange luster remains. A splash of dark toning is evident at the top of the head. Our EAC grade MS60.(#1717)

3074 **1839 Type of 1840 MS62 Brown PCGS. N-8, R.1.** Newcomb-8 is the first Petite Head die marriage and the sole 1839 variety of the subtype. Fortunately for collectors it can be found with patience in Mint State. Chocolate-brown and glossy with a few distributed tiny marks. Our EAC grade AU55.(#1817)

3075 **1848 MS64 Brown PCGS. CAC. N-27, R.2.** Grellman Die State a. It has been more than six year since Heritage offered an Mint State example of N-27. The present near-Gem is medium brown overall with occasional areas of light tan color. One shallow strike-through (as made) above the ribbon but otherwise outstanding. Our EAC grade AU55.(#1883)

1848 N-2 Coronet Large Cent, MS67 Brown Glowing Surfaces, Faint Traces of Red Still Visible

3076 **1848 MS67 Brown NGC. N-2, High R.1.** Grellman Die State d, a late state with a number of fine reverse die cracks. This example with broadly repunched 18 on the obverse has richly luminous surfaces that are primarily blue-brown, though violet-rose elements are visible at the margins, particularly on the reverse, and a spot of truer "brown" within the E of CENT. In terms of the NGC *Census Report*, only a single MS67 Red and Brown example trumps this MS67 Brown coin, which is itself the sole coin certified at that level (6/12). Our EAC grade MS63.
Ex: Henry T. Hettger; McCawley & Grellman/Superior (6/1998), lot 582; R.S. Brown, Jr.; McCawley & Grellman/Superior (6/2002), lot 497; Goldberg Pre-Long Beach (2/2011), lot 262. (#1883)

3077 **1849 MS64 Brown PCGS. N-6, R.1.** Grellman Die State c. Rich ocean-blue and rose-red toning emerges when this chocolate-brown example is confronted with light. An unabraded and spot-free near-Gem with two tiny but interesting strike-throughs on the obverse rim at 4:30. Our EAC grade MS60.(#1886)

3078 **1853 MS65+ Brown PCGS. CAC. N-20, R.3.** Grellman Die State a. 1853 cents are fairly plentiful in high grade, but most such pieces are N-18, N-19, or N-25. A Newcomb-20 in the present exceptional quality is an important find for the late date large cent specialist. Predominantly chocolate-brown with vestiges of orange-gold in reverse crevices. Our EAC grade MS62.(#1901)

3079 **1853 MS64+ Red and Brown PCGS. CAC. N-25, R.1.** Many examples of the middle die state survive, thanks to a large hoard. Like most survivors, this example has nearly full orange mint luster with only slight fading to light brown. Our EAC grade MS64.
From The Color Collection. (#1902)

3080 **1857 Large Date MS64 Red and Brown PCGS. N-1, R.1.** Grellman Die State b. Orange-red fills the reverse field and is also present on the field near Liberty's profile. Toned dark gray around the hairbun and left ribbon end. A good strike for this final large cent date. Our EAC grade MS60.(#1929)

3081 **1857 Small Date MS64 Red and Brown NGC. N-4, R.1.** Grellman Die State c. Ample orange-gold outlines design elements though open areas are brown. Nearly mark-free with a couple of small spots. Strike-throughs near the E in ONE and the T in CENT are as made. Our EAC grade MS62.(#1932)

FLYING EAGLE CENTS

1856 Flying Eagle Cent, MS62
Snow-3 Variety

3082 **1856 MS62 PCGS. Snow-3.** The upright of the 5 in the date is recut along the left side, and the reverse is the High Leaves subtype. The obverse legends are strike doubled, and the peripheral design elements and legends are somewhat softly struck. Prooflike gold color illuminates the devices and margins, while the fields have mellowed in dusky chestnut-brown hues. Business strikes of this famous issue are scarcer than the proofs, especially those of the Snow-9 variety. Population: 36 in 62, 88 finer (6/12).
Ex: Santa Clara Sale (Heritage, 11/2000), lot 6664; New York Signature (Heritage, 7/2004), lot 5108. (#2013)

3083 **1857 MS64 PCGS. CAC.** Pinkish-red hues alternate with tinges of brown and gold on this attractive near-Gem 1857, which shows little evidence of contact or other distractions, save for a couple of tiny flecks on the reverse. A wispy die crack runs laterally through the top of the eagle's extended upper wing. Nice for the type. (#2016)

Gem 1857 Flying Eagle Cent
Doubled Die Obverse, FS-101

3084 **1857 Doubled Die Obverse MS65 NGC. Snow-4, FS-101.** The die doubling is strongest on the tip of the tail and the CA in AMERICA. The missing wingtip subtype distinguishes FS-101 from the similar FS-105. The present lustrous Gem is nicely struck and impressively devoid of contact. One minor retained lamination (as made) is right of the ribbon. (#2016)

3085 **1858 Large Letters MS64+ NGC.** High Leaves, Closed E in ONE. Conservatively assessed as a near-Gem, this satiny Flying Eagle type coin has a crisp strike, an absence of marks, and only one trivial spot beneath the N in CENT.(#2019)

1858 Large Letters Flying Eagle Cent
Lustrous and Colorful Gem Surfaces

3086 **1858 Large Letters MS65 NGC.** High Leaves. Closed E in ONE. The Large Letters subtype can also be considered the Type of 1857 as it was a holdover from the previous year. The bright, lustrous, gray-lilac surfaces display a significant presence of reddish patina over each side. The strike is strong throughout, and there are no obvious impairments. (#2019)

3087 **1858 Small Letters MS64 PCGS. CAC.** Low Leaves, Closed E in ONE. A lustrous golden-tan near-Gem. Only minor marks are detected, and the strike is good with any softness relegated to the cotton leaves.(#2020)

PROOF FLYING EAGLE CENT

Choice Proof 1856 Flying Eagle Cent

3088 **1856 PR64 PCGS. CAC. Snow-9.** An intricately struck and satiny representative of this coveted and historically important issue. Dusky orange-gold surfaces show hints of gunmetal toning along with a few pinpoint flecks near the O in ONE. A small strike-through (as made) is noted at 12 o'clock on the reverse. The Snow-9 cents are believed to be proof restrikes from the late 1850s, made to meet demand from collectors scrambling for examples. Though technically a pattern, the 1856 is widely regarded as the first and rarest date of the small cent denomination, and has always been listed as a regular issue in the *Guide Book*. Certified in a green label holder. (#2037)

INDIAN CENTS

3089 **1859 MS64 NGC.** The strike is sharp throughout, and the surfaces are golden with a slight reddish tinge. Several spots are scattered over the reverse, and that side also displays a couple of interesting planchet cracks that have filled in with blackish debris.
Ex: FUN Signature (Heritage, 1/2012), lot 4136.(#2052)

3090 **1859 MS64 PCGS. CAC.** This sharply detailed one-year type coin represents the first year of the Indian design, and the only year with the laurel wreath on the reverse. The brightly lustrous champagne-gold surfaces show few signs of contact.(#2052)

1859 Indian Cent, Gem Uncirculated Much-Needed for Type Purposes

3091 **1859 MS65 PCGS.** A pleasing tan-gold Gem representative of this issue, technically a one-year subtype, with a pointed bust on the obverse and a laurel wreath on the reverse. This attractive example boasts an incredibly sharp strike, with all four ribbon diamonds plain and each feather tip crisply delineated. Bright mint luster radiates from each side, and there are only light flecks noted under a glass. PCGS has graded 16 pieces numerically finer (6/12).
Ex: Dallas Signature (Heritage, 10/2006), lot 151. (#2052)

3092 **1860 Pointed Bust MS64 PCGS. CAC. FS-401.** A caramel-gold near-Gem of this scarce transitional subtype. Lustrous and unabraded with exceptional eye appeal for the grade. A slender mint-made lump beneath the shield provides a die marker. (#2056)

3093 **1865 Fancy 5 MS64+ Red PCGS. CAC.** Lustrous peach-orange surfaces are lustrous and close to a Gem grade in terms of contact, but a few scattered flecks, while not overt, seem to be the grade limitation. This piece is nonetheless sharply struck and attractive, with the reverse noticeably rotated counterclockwise, nearly 45 degrees. Population: 2 in 64+ Red, 53 finer (6/12). (#2084)

3094 **1866 MS64 Red and Brown PCGS. CAC.** Both sides of this Choice Mint State cent retain considerable bright orange mint luster, with splashes of blue-brown and violet patina. A lovely specimen for the Indian cent connoisseur.(#2086)

3095 **1866 MS65 Red and Brown NGC. CAC.** An attractive Gem, with sharply detailed design elements and vibrant mint luster. The well-preserved surfaces are mostly red, with just a trace of light brown on both sides. Census: 102 in 65 Red and Brown, 24 finer (6/12).(#2086)

3096 **1867 MS65 Red and Brown NGC. CAC.** The 1867 Indian cent is a better date in the series and examples in Gem condition are scarce. This sharply detailed Gem displays a mixture of original red and light brown patina with only a few microscopic specks of carbon.(#2089)

3097 **1867 MS64 Red PCGS.** The brightly lustrous red surfaces of this attractive Choice specimen show just a touch of light brown patina, and the design elements are well-detailed. Population: 66 in 64 Red, 21 finer (6/12).(#2090)

3098 **1868 MS66 Red and Brown NGC.** Well struck, including the diamonds and most of the feather tips, with luminous salmon, mushroom-brown, and olive surfaces. An attractive Premium Gem survivor. Census: 14 in 66 Red and Brown, 0 finer (5/12). (#2092)

3099 **1870 MS64 Red and Brown PCGS. CAC.** Bold N. The design elements of this attractive Choice example show sharp definition throughout and the lustrous surfaces display a mixture of original red and light brown toning. Richard Snow considers MS64 Red and Brown the Optimal Collecting Grade for this issue. *From The Norva Collection.* (#2098)

3100 **1870 MS65 Red and Brown PCGS. CAC.** Shallow N. This sharply struck, satiny, and unabraded Gem is mostly pumpkin-gold though Liberty's cheek and neck are toned brown and a few ebony freckles are scattered.(#2098)

3101 **1870 MS66 Red and Brown NGC.** Shallow N. This fully struck high grade and low mintage Indian cent offers vibrant luster and exceptional preservation. The centers are pink-gold though the obverse margin is olive-green. Encased in a former generation holder.(#2098)

3102 **1871 MS63 Brown PCGS. CAC.** Bold N. The surfaces of this sharply detailed Select specimen display many areas of original red, especially on the reverse. Only a few minor contact marks are evident. Population: 45 in 63 Brown, 42 finer (5/12). *From The Norva Collection.* (#2100)

3103 **1872 MS62 Red and Brown PCGS. CAC.** Bold N. Next to the famous 1877 issue, the 1872 Indian cent is the most difficult date of the series to locate in attractive, problem-free condition. This well-detailed MS62 example displays lustrous surfaces, with mixed red and brown toning, and a scattering of minor contact marks. *From The Norva Collection.* (#2104)

3104 **1872 MS64 Red and Brown PCGS. CAC.** Bold N. This attractive Choice Indian cent displays well-detailed design elements and brightly lustrous surfaces that show a mixture of original red and light brown patina. Only minor signs of contact are evident. (#2104)

1873 Closed 3 Indian Cent, XF45
Snow-1, Doubled LIBERTY

3105 **1873 Doubled LIBERTY, Closed 3 XF45 PCGS. Snow-1, FS-101.** A lovely olive-brown Choice XF, this piece shows every letter of LIBERTY sharply doubled, characteristic of the important variety. There are two varieties of doubled obverse die 1873 Indian cents, both with a Closed 3 date logotype. The other variety shows slight doubling on the first L only. (#2115)

3106 **1877 — Edge / Rim Damage — Genuine PCGS.** In our opinion, this coin has the details of an VF specimen that has edge damage. Blended chocolate-brown and apple-green toning embraces this nicely detailed key date cent. All letters in LIBERTY are clear. The rims display minute distributed depressions but the coin has no other noticeable detractions.

3107 **1877 VF25 PCGS.** LIBERTY is legible although portions of the BER are worn. The deep brown surfaces are relatively unmarked. Traces of dark verdigris may be found with a glass in the recessed areas. *Ex: Dallas Signature (Heritage, 12/2005), lot 113.* (#2127)

3108 **1877 VF35 NGC.** A Choice VF example of the key to the Indian cent series, this moderately worn specimen retains most of its original design detail, with glossy brown surfaces and a few minor abrasions.(#2127)

1877 Indian Cent, XF40
Elusive High-Grade Circulated Example

3109 **1877 XF40 NGC.** Light wear diminishes the fine detail, leaving the major design elements clearly visible. This attractive example has smooth medium brown surfaces with trivial, grade-consistent marks. Collectors seeking a nice 1877 Indian cent rarely have an opportunity to acquire a higher grade circulated piece, as those that entered circulation stayed there until they were worn nearly smooth. Circulated survivors are usually in VG or lower grades. (#2127)

About Uncirculated 1877 Cent
Minimally Circulated Key-Date Survivor

3110 **1877 AU50 PCGS.** While Uncirculated 1877 cents may be the Holy Grail for many Indian cent collectors, a well-detailed AU example undoubtedly is more attainable to a wider range of collectors. This piece appears to have even brown patina until closely examined, then a slightly variegated coloration emerges. A shallow planchet depression is located to the right of the E in ONE on the reverse, but is only noticeable with magnification. (#2127)

1877 Indian Cent, AU58
Considerable Mint Red Remains

3111 **1877 AU58 PCGS.** This is an 1877 that will excite many collectors. Apparently this coin was minimally handled over the years as there is just the slightest evidence of friction. Each side also retains a significant amount of original red luster. The shallow bottom to the N in ONE confirms this coin as having been struck from the dominant die pairing in this key year. (#2127)

1877 Indian Cent, MS62 Brown
Eye-Appealing Midgrade Example

3112 **1877 MS62 Brown PCGS. CAC.** This midgrade key 1877 Indian cent will fit well into a Mint State set at a more reasonable price than a Gem or near-Gem example, yet it retains much of the eye appeal of those higher-graded coins. There are no obvious distractions on either side, and carbon is absent. The surfaces are light brown with traces of faded red around the margins. A couple of marks on the cheek and strike softness on the ribbon and some feather tips account for the grade.
From The Norva Collection. (#2127)

1877 Indian Cent, MS64 Red and Brown
Popular Key Issue

3113 **1877 MS64 Red and Brown PCGS. CAC.** Destined for an advanced Registry collection, this key Indian cent retains about half of its original orange mint color, faded to bluish-brown in the fields and on the central devices. The strike is typical, showing slight weakness on the feather tips and outer leaves of the wreath. (#2128)

3114 **1886 Type One MS66 Red and Brown NGC.** The last headdress feather points between I and C in AMERICA, identifying the Type One design. This sharply detailed Premium Gem offers vibrant mint luster and mostly red surfaces, with a few traces of brown. Census: 8 in 66 Red and Brown, 0 finer (6/12).(#2155)

1895 Indian Cent, MS67 Red
Tied for Finest Certified

3115 **1895 MS67 Red NGC.** Well-defined and carefully preserved, a Superb Gem that offers remarkably fresh copper-orange surfaces with occasional hints of rose. One of the finest known representatives of this high-mintage issue, tied for the finest Red piece graded by either NGC or PCGS (6/12), and ideal as a 19th century type coin. (#2192)

3116 **1899 MS66 Red PCGS. CAC.** Minor repunching is noted on the 18 in the date. Highly lustrous and well struck with peach-gold and olive-green toning. Virtually void of carbon, and visible marks are confined to faint grazes near the N in ONE. Housed in a green label holder.(#2204)

3117 **1900 MS66 Red NGC.** Premium eye appeal is blatant on this piece, with mellow red and jade intermingling with glowing luster. This coin is sharply struck and shows some bold die clash marks on each side. The single carbon fleck on the reverse right wreath is not overt. Census: 80 in 66 Red, 8 finer (6/12).(#2207)

3118 **1902 MS66 Red NGC.** A lovely cherry-red Premium Gem type coin. Lustrous and boldly struck with a mark-free appearance and only trivial carbon. Certified in a prior generation holder. (#2213)

3119 **1903 MS66 Red PCGS. CAC.** A spectacular Premium Gem, with well-detailed design elements and fully original red surfaces that radiate vibrant mint luster. Population: 69 in 66 (3 in 66+) Red, 5 finer (6/12).(#2216)

3120 **1906 MS66 Red NGC.** Eagle Eye Photo Seal, card included. This well struck high grade cent displays potent luster and an absence of abrasions. Minute obverse carbon precludes perfection. Census: 36 in 66 Red, 1 finer (6/12).(#2225)

1908-S Indian Cent, MS65 Red
First Branch Mint Small Cent

3121 **1908-S MS65 Red PCGS.** This low-mintage Gem Red 1908-S has beautiful sun-gold luster and a precise strike. The surfaces are devoid of abrasions, and only a few minuscule tan freckles deny perfection. A slender band of russet and apple-green appears at 10:30 on the reverse. Certified in a green-label holder with an Eagle Eye Photo Seal and card. (#2234)

Gem Red 1908-S Indian Cent
Spectacular Surfaces

3122 **1908-S MS65 Red PCGS.** The first S-mint Indian cent, the 1908-S is perhaps underrated due to the fervent demand for 1909-S cents of both Indian and Lincoln designs. This Gem Red example displays bright, blazing original orange-red surfaces — spectacular coloration, although the usually seen softness of strike is evident. PCGS has seen 36 Red submissions finer (6/12). (#2234)

1908-S Indian Cent
MS65 Red

3123 **1908-S MS65 Red PCGS. CAC.** Although the feather tips lack definition, as does the ribbon bow on the reverse, this satiny and highly lustrous Gem has incredible light orange mint luster with pristine surfaces that show only minor spots above the date. An exceptional example for an advanced collection. (#2234)

3124 **1909-S MS64 Brown PCGS. CAC.** The 1909-S Indian cent is a low-mintage issue from the final date of the design. This well-detailed Choice example displays pleasing light brown patina, with occasional areas of original red. Population: 44 in 64 Brown, 6 finer (5/12).
From The Norva Collection. (#2238)

3125 **1909-S MS64 Red and Brown NGC.** Orange-gold color outlines the legends and devices, while the devices have pleasing dusky tan patina. A nicely struck near-Gem with virtually immaculate surfaces and excellent eye appeal. The lowest mintage business strike small cent, if patterns are excluded.(#2239)

3126 **1909-S MS64 Red and Brown PCGS. CAC.** An attractive Choice example of this low-mintage key, with well-detailed design elements and strong mint luster. The surfaces display a mixture of original red and light brown patina, with a few hints of lilac. (#2239)

PROOF INDIAN CENTS

1862 Indian Cent, PR66
Only One Finer PCGS Coin

3127 **1862 PR66 PCGS. CAC.** Shades of greenish-gold and lilac patina blanket the moderately reflective surfaces of this Civil War era proof. The design elements are sharply detailed in most areas, with strong definition on the headdress feathers. From a tiny proof mintage of 550 pieces. Population: 28 in 66, 1 finer (6/12). (#2259)

1864 No L Indian Cent, PR67 Brown
None Certified Finer

3128 **1864 Bronze No L PR67 Brown NGC.** Attractive shades of violet and lilac toning enhance the well-preserved, brightly reflective surfaces of this incredible Superb Gem. The design elements display razor-sharp definition in all areas. Only 150 No L proof Indian cents were minted in 1864. Census: 4 in 67 Brown, 0 finer (6/12). (#2276)

1865 Indian Cent, PR65 Red
Scarce Early Issue With Original Color

3129 **1865 PR65 Red PCGS.** Housed in a green-label PCGS holder, this glittering Gem proof exhibits bold design definition on both sides, with satiny luster on the devices in a deeply mirrored frame of orange mint color. Both sides are exceptionally attractive with slight mellowing of the mint red on the devices. Population: 8 in 65 Red, 1 finer (5/12). (#2284)

1869 Indian Cent, PR66 Cameo
Major Condition Rarity

3130 **1869 PR66 Cameo NGC.** This issue is one of the most difficult for collectors to obtain in the higher Mint State grades and more difficult in proof. This robust Red Cameo example contrasts boldly with the lackluster proofs of this date that are sometimes seen with unexciting color and subdued fields. Its surfaces boast bright, even red color, and the fields are as deeply mirrored as proofs from the 1890s. Razor-sharp detail is another of the coin's attractions. Census: 2 in 66 Cameo, 1 finer (6/12). (#82296)

1875 Indian Cent, PR65 Red
Rarely Seen Finer

3131 **1875 PR65 Red PCGS.** With just 700 pieces struck, the 1875 proof cent poses a significant challenge, particularly with fully Red surfaces. The lemon and orange shadings of this Gem create lively eye appeal, and the mirrors are deeply reflective. The strike is complete throughout, and only a single flyspeck is noted just left of 12 o'clock on the obverse rim. Population: 13 in 65 Red, 2 finer (6/12). (#2314)

Select Proof 1877 Cent

3132 **1877 PR63 Brown PCGS.** Bold N in ONE. A fully struck Select specimen of the coveted series key. The deep brown surfaces exhibit golden-brown and apple-green once rotated beneath a light. Only minute carbon is noted, and the eye appeal appears to surpass the third party grade. Certified in an old green label holder. (#2318)

Select Proof 1877 Indian Cent
Attractive Red and Brown Surfaces

3133 **1877 PR63 Red and Brown PCGS.** The 1877 Indian cent is the rarest issue of the series in business-strike format, putting intense pressure on the small proof mintage of 900 pieces to satisfy collector demand. This sharply detailed Select example displays a mixture of original red and light brown patina, with strong visual appeal. (#2319)

In-Demand 1877 Cent, PR64 Red and Brown

3134 **1877 PR64 Red and Brown PCGS.** This near-Gem proof is sharply struck overall, despite minor weakness on the forward feather tips. The reverse is particularly sharp. A small curving mark in the left field is the only mentionable sign of contact. The surfaces are deeply mirrored and eye-appealing, olive-brown with significant portions of mint red remaining. (#2319)

3135 **1879 PR65 Red PCGS.** From light copper-gold to deeper peach, this Red Gem keeps within the boundaries and offers great beauty. Appreciably reflective through a majority of the fields. Population: 43 in 65 Red, 34 finer (6/12).(#2326)

3136 **1880 PR65 Red PCGS.** This Gem proof 1880 cent is fully struck with flashy mirrors and a hint of cameo contrast. The obverse is sun-gold, while the reverse displays sunset-orange. Impressively preserved. Population: 61 in 65 Red, 23 finer (6/12).
Ex: Summer FUN (Heritage, 6/2008), lot 237; Long Beach Signature (Heritage, 2/2011), lot 3087.(#2329)

3137 **1886 Type One PR64 Red PCGS.** The proof 1886 Indian cents were apparently about evenly split between Type One and Type Two examples, unsurprising given the typical life of a proof die. This lustrous piece is predominantly orange with a small planchet indent on the lower reverse, apparently as made, and carbon is absent. Population: 20 in 64 Red, 31 finer (6/12).(#2347)

3138 **1889 PR66 Red and Brown NGC.** Both sides are deeply contrasted and the reverse on its own would likely garner a Red designation, with sunset-orange prevailing. The obverse is equally lovely but shows some purplish hues blending in with gold and orange. This Premium Gem is sharply struck and free of apparent contact.(#2355)

3139 **1900 PR66 Red NGC.** Cherry-red and orange-gold with the richest hues on the obverse. Fully struck and void of contact or carbon. A tiny strike-through (as produced) below the F in OF.(#2389)

3140 **1903 PR66 Red and Brown NGC.** The deeply reflective fields of this impressive Premium Gem shine through layers of dark violet and brown toning, with a few traces of original red. The design elements display razor-sharp definition. Census: 22 in 66 Red and Brown, 12 finer (6/12).(#2397)

1905 Superb Gem Red Proof Indian Cent Among the Finest Known

3141 **1905 PR67 Red NGC.** A delicate blend of copper-gold, orange, and light green is seen over both sides of this Red Superb Gem, and the strike is strong throughout, as one would expect from a proof. The surfaces are impeccably preserved, rounding out the picture of this coin's outstanding eye appeal. Census: 6 in 67 Red, 0 finer (6/12). *Ex: Long Beach Signature (Heritage, 5/2008), lot 2413; Houston Signature (Heritage, 12/2010), lot 3236.* (#2404)

3142 **1909 PR66 Brown NGC.** The strike is razor-sharp on this Premium Gem proof, which despite the Brown designation shows intermingled purple and pink hues throughout both sides. The eye appeal is obvious, making this last-year proof Indian a nice start for a challenging complete Brown proof run. Census: 16 in 66 Brown, 0 finer (6/12).(#2414)

LINCOLN CENTS

3143 **1909 VDB MS67 Red PCGS. CAC.** A brightly lustrous example of this one-year type issue. Textured surfaces are carefully preserved with multidimensional copper color accented in pale canary-gold. PCGS has certified only one numerically finer specimen (6/12). (#2425)

3144 **1909-S VDB AU55 NGC.** An attractive Choice AU specimen of this important key, with smooth brown surfaces and well-detailed design elements. The all-important VDB initials are boldly defined. (#2426)

3145 **1909-S VDB MS63 Brown PCGS. CAC.** Medium brown overall though vestiges of the initial brick-red illuminate the margins. Precisely struck and surprisingly free from marks or spots. Housed in an old green label holder.(#2426)

3146 **1909-S VDB MS64 Brown NGC.** This frosty and lustrous near-Gem has olive-brown on both sides, with splashes of blue toning and noticeable original orange mint luster. An attractive example of this highly popular issue that will appeal to a wide range of collectors.(#2426)

3147 **1909-S VDB MS63 Red and Brown PCGS.** A sharply detailed and frosty specimen, this Select Mint State example has mostly bright orange luster with splashes of violet-brown toning, primarily on the obverse. Faint slide marks prevent a higher grade. (#2427)

3148 **1909-S VDB MS63 Red and Brown PCGS.** Intricately struck and lustrous with minimally mellowed honey-gold and peach-red surfaces. A fingerprint fragment at the denomination and faint contact on the reverse exergue. Housed in a first generation holder. (#2427)

3149 **1909-S VDB MS63 Red and Brown PCGS.** The original mint red has evenly mellowed over both sides of this lightly abraded example of what is undoubtedly the most widely known of all Lincoln cents.(#2427)

3150 **1909-S VDB MS64 Red and Brown PCGS.** Considerable olive toning appears on both sides, only slightly subduing the light golden-orange mint luster still present on this Choice Mint State cent. The surfaces are pleasing and show few marks or spots of any sort.(#2427)

3151 **1909-S VDB MS64 Red and Brown PCGS.** About half of the obverse is covered with a woodgrain effect, although the reverse shows only a touch of the same fabric. Gold fades to brown on the obverse, with purple prevailing on the reverse. The strike is sharp throughout, and no carbon is visible.(#2427)

3152 **1909-S VDB MS64 Red and Brown PCGS. CAC.** Gold, green, and orange compete for territory on this near-Gem with scattered brownish flecks, not carbon, that comprise the color designation. This strike through the central reverse is somewhat soft, unusual for the issue.(#2427)

1909-S VDB Cent, MS66 Red and Brown Brightly Lustrous, Minimal Brown

3153 **1909-S VDB MS66 Red and Brown NGC.** Technically this is a Red and Brown coin, but there is just the slightest suggestion of brown on each side. Both sides are primarily still full red, giving the coin its superior mint luster and high-gloss finish. The strike is strong throughout, and there are just the tiniest specks of carbon present, visible only with a strong magnifier. Census: 43 in 66 Red and Brown, 0 finer (6/12).
From The Old Holder Collection. (#2427)

Gem 1909-S VDB Lincoln Cent
Key Issue With Red Surfaces

3154 **1909-S VDB MS65 Red PCGS.** The 1909-S VDB is the most sought-after regular issue of the Lincoln cent series. This delightful Gem is sharply detailed, with bold initials, and vibrant mint luster. The unmarked surfaces are fiery original red, with only a few microscopic specks of carbon visible on close inspection. (#2428)

1909-S VDB Cent
Sharply Struck Red Gem

3155 **1909-S VDB MS65 Red PCGS.** The numismatic marketplace simply cannot get enough Gem Red 1909-S VDBs to go around, and they are always enthusiastically received at auction. This example is pristine and thoroughly engaging, although the surfaces show a slightly deeper red color than normally seen. A single dark fleck appears on the reverse rim, at the L in PLURIBUS. The strike is sharp, as usual for the issue. (#2428)

1909-S VDB Cent, MS66 Red
Bright Sparkling Surfaces

3156 **1909-S VDB MS66 Red PCGS Secure.** It may be little realized today, but the debut of the 1909 Lincoln cents broke longstanding Mint traditions and ushered in a new era of numismatic design. It was our first president, George Washington, who opposed the "monarchical" depiction of his image on U.S. coinage in the earliest days of the U.S. Mint; portraits of Liberty prevailed for more than 100 years thereafter. The Lincoln cent design of 1909 was occasioned by the 100th anniversary of the birth of the "Great Emancipator."

It is fitting that a Mint tradition more than a century old should be broken with the Victor D. Brenner portrait of Lincoln on the lowest circulating coinage denomination, a coin for all Americans. The 1909-S VDB cent is the key among business strikes of the four first-year Lincolns from Philadelphia and San Francisco, and the 1909-S is a semikey. This is a splendid, original orange-red example with a slight yellow hue, as often seen. The strike is strong throughout and the surfaces are almost carbon-free. (#2428)

3157 **1909-S S Over Horizontal S MS65 Red and Brown PCGS.** Cents of both types from 1909 show streaky planchets from improper mixture of the copper alloy. This is abundantly evident on this piece, but the mint luster glows and rolls around each side. Always a popular variant with the sideways S beneath the dominant S. Population: 36 in 65 (1 in 65+) Red and Brown, 2 finer (6/12). (#92433)

3158 **1909-S S Over Horizontal S MS65 Red PCGS.** An amazing Gem with satin luster, this example has fully brilliant golden mint color with a sharp strike, full on the reverse. A few inconsequential specks are noted on each side.(#92434)

3159 **1911-D MS65 Red PCGS.** A radiant orange-gold Gem with vibrant luster, clean surfaces, and a crisp strike. This early Denver Mint issue is scarce in the present quality. Housed in a green label holder.(#2446)

3160 **1912 MS66 Red PCGS.** A lovely 1912 Lincoln showing fiery golden-orange luster. Both the strike and overall eye appeal are everything one expects for the grade. Population: 86 in 66 (2 in 66+) Red, 7 finer (6/12).(#2452)

3161 **1912 MS66 Red PCGS. CAC.** This early series Premium Gem displays sharply detailed design elements and vibrant mint luster, with virtually pristine surfaces. A few accents of lilac and light brown mix with the predominate orange-red patina. Population: 86 in 66 (2 in 66+) Red, 7 finer (6/12).(#2452)

3162 **1912-D MS65 Red PCGS.** This early branch mint Gem features dynamic luster, a precise strike, and lovely pumpkin-gold color. Occasional minute carbon is found at the margins.
Ex: FUN Signature (Heritage, 4/2007), lot 1755.(#2455)

3163 **1912-D MS65 Red PCGS.** Only one hand is required to count the tiny flyspecks on each side of this Gem, and that is good as the other hand will be needed to hold the glass while they are counted. Both sides have a bold strike and the surfaces exhibit frosty orange mint luster.(#2455)

3164 **1912-S MS64 Red PCGS.** A Choice honey-gold early branch mint cent. Both sides teem with luster and are undisturbed by contact. A few minute obverse flecks determine the grade. Certified in a first generation holder.
Ex: Long Beach Signature (Heritage, 9/2005), lot 1036, which realized $805.(#2458)

3165 **1913 MS66 Red PCGS Secure. CAC.** This attractive sunset-orange Premium Gem is an attractive alternative to one of the few Superb Gems graded at PCGS — six, if you can find one. The surfaces boast generous luster and eye appeal and are free of mentionable distractions, with a good strike. Population: 62 in 66 Red, 6 finer (6/12).(#2461)

3166 **1913-D MS65 Red PCGS.** This Gem 1913-D is primarily red-orange with a couple of accents of ice-blue scattered about, and the surfaces are well-struck overall. A loupe reveals minor carbon, undistracting but requiring note, the largest fleck on the rear shoulder. PCGS has certified only 13 Red pieces finer (6/12). (#2464)

3167 **1913-S MS64 Red PCGS.** Olive-gold and fire-red with satin luster and a pleasing mark-free appearance. A good strike except for incompleteness on the upper left reverse. This conditionally challenging early branch mint cent is housed in an old green label holder.(#2467)

3168 **1914-D XF45 NGC.** A popular key date in the series, the 1914-D Lincoln cent is avidly collected in all grades. This lightly circulated example displays evenly colored brown surfaces with only minor abrasions.(#2471)

3169 **1914-D AU53 NGC.** The sharply detailed design elements of this sought-after key Lincoln cent show only the slightest trace of wear, with light brown surfaces that display a few isolated hints of original red.(#2471)

3170 **1914-D AU55 NGC.** An appealing and relatively high-grade example of a desirable date that shows minimal wear. The fields are uneven with areas of granularity around the bust from die wear. The reverse shows visible "ghosting" of Lincoln's back and shoulder. Overall brown is suffused with subtle hints of faintest red. (#2471)

3171 **1914-D AU55 PCGS.** Traces of wear appear on the high points of this attractive mahogany-brown key Lincoln cent. Scattered marks are evident on both sides, with a few minor reverse scratches. (#2471)

3172 **1914-D Genuine — Environmental Damage — PCGS. Unc Details.** A single noticeable carbon spot is present in the right obverse field, along with other fly specks on each side. Otherwise, this is a splendid example of the key 1914-D cent with brilliant light orange luster and only slight mellowing to light brown. (#2471)

1914-D Lincoln Cent, MS63 Brown
Key Date in High Grade

3173 **1914-D MS63 Brown PCGS. CAC.** The 1914-D Lincoln cent is a low-mintage key date, seldom encountered in Mint State grades. This attractive Select specimen displays a mixture of original red and light brown patina, with one noticeable carbon spot in the left obverse field. The design elements are sharply detailed throughout. Population: 57 in 63 Brown, 54 finer (6/12).
From The Norva Collection. (#2471)

1914-D Cent, MS63 Red and Brown
Considerable Mint Red Remains

3174 **1914-D MS63 Red and Brown PCGS.** The center of the obverse is mellowed, and the reverse shows the same lessening of the original mint color in the fields. However, the surfaces overall are glossy with the usual matte-like finish. There are no obvious or distracting abrasions to account for the MS63 designation. This piece represents an excellent opportunity to acquire this well-known key issue with considerable remaining mint luster. (#2472)

3175 **1914-S MS64 Red and Brown PCGS. CAC.** A few hints of light brown toning mix with the original red patina, but the slightly granular surfaces of this well-detailed Choice example are lustrous, and show no signs of carbon. PCGS has graded only 17 numerically finer specimens (6/12).(#2475)

3176 **1914-S MS64 Red and Brown PCGS. CAC.** A sharply detailed Choice example of this lower mintage date, with well-preserved light brown surfaces that show hints of original red. PCGS has graded only 17 numerically finer specimens (5/12).
From The Norva Collection.(#2475)

3177 **1914-S MS64 Red PCGS.** While the 1914-D is a well-known key Lincoln cent issue, the 1914-S is another important issue in the early Lincoln series, and this near-Gem is a boldly detailed example with brilliant orange and gold mint luster, showing a dark toning splash at the right reverse rim.(#2476)

3178 **1915 MS65 Red PCGS.** Two small spots on the obverse rim at about 7 o'clock are the only distractions on this otherwise virtually perfect Lincoln cent has brilliant orange luster and bold design motifs. An exceptional example for the connoisseur. (#2479)

3179 **1915 MS66 Red PCGS.** Splendid eye appeal is the chief attribute of this Premium Gem Red 1915 Philadelphia cent, an issue that might surprise collectors with its elusiveness in such a grade. The surfaces boast an exceedingly sharp strike, although a loupe reveals a few minuscule flecks and scattered minor contact consistent with the grade.(#2479)

3180 **1915-S MS64 Red and Brown PCGS.** Ex: Benson. Blended brick-red and forest-green embrace this satiny and conditionally scarce early branch mint near-Gem. The strike is exemplary, both sides are unabraded, and only a few flecks limit the grade. (#2484)

Choice 1915-S Lincoln Cent
Rare Example With Red Surfaces

3181 **1915-S MS64 Red PCGS. CAC.** The 1915-S Lincoln cent was not heavily saved by contemporary collectors, making it one of the most elusive issues in the early mintmarked series in high grade. This sharply detailed Choice example exhibits blazing red surfaces, with a few lilac highlights and a couple of microscopic carbon specks. Population: 52 in 64 Red, 32 finer (6/12). (#2485)

3182 **1916-D MS65 Red and Brown PCGS. CAC.** The obverse has considerable orange luster with pale blue toning and the reverse is mostly deep steel with hints of orange on this sharply detailed example. Tied for the finest Red and Brown example certified at PCGS. Population: 39 in 65 Red and Brown, 0 finer (5/12). (#2490)

3183 **1916-D MS64 Red PCGS. CAC.** The surfaces are full red overall with a slight yellowish tinge on the obverse. The obverse also displays a pronounced matte-like finish. Very pleasing, especially for the grade.(#2491)

3184 **1917 MS66 Red PCGS Secure. CAC.** A splash of reddish-gold appears on Lincoln's portrait, with similar toning on the reverse of this otherwise brilliant and lustrous orange Premium Gem. Rarely are examples found finer, with only 17 higher grade pieces appearing in the PCGS *Population Report* (6/12).(#2497)

3185 **1918 MS66 Red PCGS.** The 1918 Lincoln cent was produced in large numbers, but few survivors display the sharply detailed design elements and lustrous original red surfaces of the present coin. PCGS has certified only 14 numerically finer specimens (5/12). (#2506)

3186 **1918 MS66 Red PCGS.** Most of the early P-Mint Lincolns have high mintages with low survival rates in Gem or finer grades with fully brilliant orange luster, and the 1918 is no exception. This piece is fully brilliant with bright orange luster and excellent design features. PCGS has only certified 14 finer examples (6/12). (#2506)

3187 **1918-D MS65 Red and Brown PCGS.** Apple-green dominates the obverse while the reverse is primarily ruby-red. Intricately struck and essentially mark-free. Encased in an old green label holder. Population: 22 in 65 Red and Brown, none finer (6/12). (#2508)

1918-S Cent, MS65 Red
A Condition and Color Rarity

3188 **1918-S MS65 Red PCGS.** The typical Mint State 1918-S cent is Brown or Red and Brown, with poorly struck design elements. David Lange, in *The Complete Guide to Lincoln Cents*, states that "any fully red coin is a rarity, while fully red *and* fully struck gems are extremely rare." Only 200 or so Uncirculated 1918-S cents have been assigned the fully Red status by PCGS and NGC, but precious few of them are at the Gem level.

The present Red Gem exhibits a better-than-average strike; the only noticeable softness appears on the lower right side of the right wheat stalk. Lustrous orange-gold color dominates minimally abraded surfaces. Some light toning spots are scattered over each side. Population: 15 in 65 Red, 0 finer (5/12). (#2512)

3189 **1919 MS66+ Red PCGS. CAC.** This boldly defined and highly attractive Premium Gem has frosty orange luster with few microscopic fly specks on each side. Destined for a high grade collection of Lincoln cents.(#2515)

3190 **1919 MS67 Red PCGS.** Dazzling cartwheel luster and swaths of finest microgranularity enrich both sides of this beautifully struck postwar date. A coin with more intense visual appeal would be hard to imagine, and in fact PCGS has graded only 15 finer Red examples of this date (6/12).(#2515)

3191 **1919-S MS64 Red PCGS.** The 1919-S Lincoln cent is easy to locate in lower grades, but sharply detailed specimens with red surfaces, like the present coin, are quite challenging. A few traces of light brown color can be detected amidst the lustrous original red. PCGS has graded only 21 finer coins within the designation (5/12).(#2521)

3192 **1920-D MS65 Red PCGS.** Satiny luster occupies the smooth, unblemished surfaces of this elegant Gem. Original orange-tan color is accompanied by faint and slender toning streaks on the reverse, and there are a few flyspecks on each side of the piece. In an old green label holder. PCGS has graded only seven finer Red pieces (6/12). *Ex: Long Beach Signature (Heritage, 2/2003), lot 5395, which realized $2,280.*(#2527)

3193 **1920-D MS65 Red PCGS.** Ex: Tom Mershon Collection. A beautiful orange-gold Gem of this conditionally scarce branch mint issue. A loupe reveals only minor carbon and inconsequential contact. *Ex: St. Louis Central States (Heritage, 5/2005), lot 5334, which realized $1,840.*(#2527)

3194 **1920-S MS64 Red PCGS.** Bright cartwheel luster and a boldly detailed strike distance this piece from others of the date that were often carelessly produced from more outworn dies. Here is a San Francisco coin combining both visual and technical quality. PCGS has graded only nine Red coins finer (6/12).(#2530)

3195 **1920-S MS64 Red PCGS.** Streaks of violet toning appear on the brilliant light orange surfaces of this frosty near-Gem. The strike is somewhat indistinct as expected for the issue. Population: 84 in 64 Red, 9 finer (6/12).(#2530)

3196 **1922 No D Strong Reverse VF20 PCGS. FS-401.** Die Pair 2. The brown surfaces show slight yellowish streakiness over each side, probably from improper mixture of the bronze alloy. Evenly worn, only the usual handling marks from circulation are evident. (#3285)

3197 **1922 No D Strong Reverse VF30 PCGS. FS-401.** Die Pair 2. Even but extensive is seen over each side. The brown surfaces are slightly glossy, and abrasions are minimal and inoffensive. (#3285)

3198 **1922 No D Strong Reverse VF30 PCGS. FS-401.** Die Pair 2. Attractive reddish-brown surfaces, the only noticeable spots are a couple located on the reverse; otherwise, even wear over the devices with the wheat stalks still clearly defined.(#3285)

3199 **1922 No D Strong Reverse XF45 PCGS. FS-401.** Die Pair 2. A minimally abraded deep chocolate-brown example of this famous and rare Lincoln variety. TRUST is faint but the second 2 in the date is crisp, as is the reverse design.(#3285)

3200 **1922 No D Strong Reverse — Whizzed — NGC Details. AU. FS-401.** Die Pair 2. This key date cent had only a brief stint in commerce but the reverse is whizzed, as the letters in ONE CENT display evidence of moved metal. The obverse is apple-green and tan-gold while the reverse is brick-red.(#3285)

1922 No D Cent, FS-401, AU50
Strong Reverse Variety, Sharp Obverse

3201 **1922 No D Strong Reverse AU50 NGC. FS-401.** Die Pair 2. Despite trivial surface marks and light rub as expected for the grade, this glossy specimen offers exceptional eye appeal. While the reverse is bold as always, the obverse is substantially sharper than usual. A wonderful example for an advanced Lincoln cent collection. (#3285)

1922 No D Cent, AU55
Strong Reverse, FS-401

3202 **1922 No D Strong Reverse AU55 PCGS. FS-401.** Die Pair 2. The Strong Reverse variety has bold detail on that side of the coin, and it is the reverse that carries the most weight when grading. Only slight wear is visible on each side, although the combination of that wear and a weak obverse results in flat details on Lincoln's profile. This attractive chestnut and olive example has wonderful surfaces and excellent eye appeal. (#3285)

1922 Weak Reverse Cent, MS64 Red and Brown
Die Pair 3, Just a Trace of the D Remains

3203 **1922 No D Weak Reverse MS64 Red and Brown PCGS. CAC.** Die Pair 3, identifiable by the weak second 2 in the date and the distended O in ONE. Generous amounts of mint red cling to the surfaces — most of the obverse, and the periphery on the reverse — unusual for any 1922 No D cent. The central obverse is chiefly ice-blue, and the reverse has more variegated central color. As always seen (and diagnostic), the reverse is soft due to both the strike and prolonged die use, particularly on the wheat stalks, where about half the detail is absent. As is sometimes the case with this die pair, the ghost of a mintmark can be seen under magnification. This coin is tied with a small handful of Weak Reverse coins at PCGS for the finest numerically certified, regardless of color designation. A real prize for the Lincoln cent specialist. Population: 9 in 64 Red and Brown, 0 finer (5/12).
Ex: ANA Signature (Heritage, 7-8/2008), lot 1213; FUN Signature (Heritage, 1/2010), lot 2441. (#2541)

3204 **1923 MS66 Red PCGS.** Sharply struck with vibrant luster and rich red-orange surfaces. Carefully preserved and enticing with only the most trivial of flaws. PCGS has graded just 13 finer Red representatives (6/12).(#2545)

3205 **1923-S MS64 Red and Brown PCGS.** A small, active spot appears in the lower left obverse field, with a few other flyspecks on each side of this Choice Mint State piece. Although described as Red and Brown, this softly defined specimen has full faded mint brilliance.(#2547)

3206 **1923-S MS64 Red and Brown PCGS. CAC.** This well-detailed Choice Lincoln cent shows some streaks of light brown toning mixed with the lustrous original red. Close inspection reveals no mentionable distractions. PCGS has graded fifteen numerically finer specimens (6/12).(#2547)

3207 **1923-S MS64 Red PCGS.** For the issue, this near-Gem has a decent strike and is well preserved. The red-brown color is quite rich, with some dappled patina in the obverse fields, and bright iridescence near the borders.(#2548)

3208 **1924-D MS64 Red and Brown PCGS.** A dusky and shimmering Choice better date cent. Mostly fire-red but hints of gunmetal-gray are present, as are a few pinpoint flecks. Housed in a first generation holder.(#2553)

3209 **1924-D MS65 Red and Brown NGC.** This scarce, semikey issue has an impressively low mintage of only 2.5 million pieces. The original red patina is covered on each side by a subtle iridescence. One spot of note is located at 6 o'clock near the reverse rim. (#2553)

3210 **1925-D MS65 Red and Brown PCGS. CAC.** Labeled Red and Brown, but there is actually very little brown present on either side of this Gem. For a 1925-D, this is a remarkably attractive and well-produced coin. The strike shows the usual softness and there are few post-striking impairments. Population: 21 in 65 Red and Brown, 0 finer (6/12).(#2562)

3211 **1925-S MS64 Red NGC.** The surfaces are primarily orange-red, with a better-than-average strike for the issue and some scattered minor flecks. The 1925-S Lincoln cent in Gem Red condition is a notable rarity, making this piece worthy of serious consideration. Census: 50 in 64 Red, 6 finer (6/12).(#2566)

3212 **1926 MS67 Red PCGS. CAC.** This formidable Superb Gem provides exuberant luster, and abrasions of any size appear to be completely absent. Carbon is equally difficult to find. Well-struck and desirable. Population: 83 in 67 Red, 0 finer (5/12). (#2569)

3213 **1926 MS67 Red PCGS. CAC.** Ex: Joshua and Ally Walsh. Rich orange, olive, and ruby tints adorn the margins, while the remainder of this lustrous and unabraded Superb Gem offers consistent light gold color. As the devices are well struck, only the infrequent tiny carbon fleck denies perfection.
Ex: Joshua and Ally Walsh Collection of United States Cents (Heritage, 1/2006), lot 233, which realized $1,667.50.(#2569)

3214 **1926-S MS64 Brown PCGS.** Well-struck with dark brown surfaces that show a single isolated spot of verdigris.. The luster is a bit subdued by the patina. On the reverse, the fields and devices are extremely clean. Population: 46 in 64 Brown, 4 finer (5/12).
Ex: Long Beach Signature (Heritage, 2/2003), lot 5416. (#2573)

3215 **1926-S MS63 Red and Brown PCGS.** Mostly red, this Select Mint State piece has a few old toning splashes, and exhibits pale orange luster. The strike is typically soft on this semikey issue. (#2574)

3216 **1926-S MS64 Red and Brown NGC.** The apricot-gold reverse is close to fully Red. The obverse offers similar color but has mellowed slightly to rose-tan. Lustrous and essentially unabraded with a typical strike on the reverse periphery. Certified in a former generation holder.(#2574)

3217 **1927-S MS64 Red PCGS.** Both sides of this brilliant Choice Mint State piece show minor carbon spots and trivial marks that prevent a higher grade. The strike is above average, and the satin surfaces are fully lustrous with light orange color. Only 16 finer Red specimens are PCGS certified (6/12).(#2584)

3218 **1928-D MS65 Red PCGS.** A copper-red Gem with booming luster and mark-free surfaces. The reverse exergue has a hint of olive and rose. Sharply impressed except for the O in ONE. Housed in an old green label holder. Population: 77 in 65 Red, 11 finer (6/12).
Ex: Houston Signature (Heritage, 12/2009), lot 149, which realized $2,530.(#2590)

1928-S Cent, Glowing MS66 Red Among the Finest, Ex: Jack Lee

3219 **1928-S MS66 Red PCGS.** Regular S Mintmark. An underrated issue in the upper grades for decades, until certified population data revealed just how rare top-tier examples were. Interestingly, David Lange and Q. David Bowers have dramatic differences of opinion on lower-level Mint State pieces; while Bowers is dismissive of the coins in his *Guide Book of Lincoln Cents*, claiming them to be "common in all grades up to about MS-64 BN and RB," Lange perceives them differently, writing in his *Complete Guide to Lincoln Cents* that "Mint State coins are quite scarce, irrespective of quality."

The two authors agree, however, that the better Red survivors are elusive. Bowers describes sharply struck Red Gems as "rarities," while Lange goes even further, proclaiming that "fully struck, fully red gems are essentially unknown ..." The advent of Registry collecting spurred greater interest in this San Francisco issue, and at Gem and better levels, particularly MS66, the 1928-S cent has achieved considerable popularity.

The Red Premium Gem presented here displays fully lustrous orange-gold surfaces that offer a subtle lilac overtone. The design elements are generally sharply impressed by the standards of this issue, showing just minor softness on the AM of AMERICA, and the surfaces are carefully preserved, with no flaws warranting individual mention. This is one of just five MS66 Red examples graded by PCGS (5/12), and the collector who misses this opportunity may have to wait years for the chance to acquire another.
Ex: Central States Signature (Heritage, 4/2006), lot 652; Jack Lee Estate Lincoln Cent Registry Set (Heritage, 12/2008), lot 195. (#2593)

3220 **1931-S MS66 Red PCGS.** Rose-peach in the fields with subtle green-orange tints over the centers. Well-defined with striking eye appeal, and tied for the finest Red example known to PCGS (6/12). (#2620)

3221 **1931-S MS66 Red NGC.** Well struck and fully lustrous, with rich orange-red color, a few wispy traces of carbon in the fields, and blemish-free surfaces on both obverse and reverse. None have been graded any higher by NGC. Census: 23 in 66 Red, 0 finer (6/12). *Ex: Palm Beach Signature (Heritage, 11/2004), lot 299.* (#2620)

Choice Red Doubled Die Obverse 1936 Cent, FS-101

3222 **1936 Doubled Die Obverse Type One MS64 Red PCGS. FS-101.** The strongest of the three major 1936 doubled die obverse varieties. All obverse legends are clearly doubled. A fire-red and olive-gold near-Gem with potent luster and a full strike. A few pinpoint flecks near LIBERTY and faint marks near the profile limit the grade. Population: 7 in 64 Red, 12 finer (6/12). (#82650)

3223 **1936 Doubled Die Obverse Type Two MS64 Red PCGS Secure. CAC. FS-102.** FS-102 features strong die doubling on the date, though other obverse legends are lightly doubled relative to FS-101. This is a beautiful pumpkin-gold near-Gem with a sharp strike and exemplary surfaces.(#92650)

3224 **1941 Doubled Die Obverse MS65 Red PCGS. FS-101.** DDO-1. This date is replete with doubled die, five in all. This is the most pronounced with strong doubling on TRUST and LIBERTY. The surfaces are bright, glowing red with minimal specks of carbon or abrasions. Population: 15 in 65 Red, 13 finer (6/12). (#92695)

In-Demand 1944-D/S Cent, MS66 Red FS-511, Strong Overmintmark

3225 **1944-D/S MS66 Red PCGS. CAC. FS-511.** Although this Premium Gem Red piece is certified in a green-label holder that far predates PCGS' certification of *Cherrypickers'* varieties, this piece, merely identified as "1944-D/S" on the insert, is clearly an example of the strong overmintmark, FS-511, rather than the weaker FS-512. The broad sweep of the top loop of the undermintmark S is clearly discernible above the top of the subsequent D, and remnants of the S also appear within the D. The FS-511 is far more elusive and in demand than the FS-512. This piece shows distraction-free golden-orange surfaces that are well-struck as a bonus, an absolutely top-notch example of this *Guide Book*-listed variety. For 1944-D/S, Population: 10 in 66 (1 in 66+) Red, 0 finer (5/12). (#2728)

3226 **1945 MS67 Red PCGS.** Ex: Omaha Bank Hoard. This remarkable Superb Gem has retained all of its initial orange-gold bloom despite the passage of many decades. Precisely struck and virtually free from carbon. Population: 48 in 67 Red, none finer (6/12). (#2734)

3227 **1946-S/D MS65 Red PCGS. CAC. FS-511.** Trumpet tail S. Rich peach-red color dominates this lustrous and virtually unabraded Gem. The strike shows minor inexactness near the O in ONE. Population: 14 in 65 Red, 3 finer (6/12).(#37843)

Bright Red 1950 Lincoln Cent, MS67
Far Finer Than Usual

3228 **1950 MS67 Red PCGS.** Sol Taylor reported that this issue "tends to be dull red, average die state, and average luster." That is not the case here. The surfaces are bright red throughout. The strike is strong and there are a couple of minor marks that can be made out with a loupe. A couple of reverse spots are noted. Population: 18 in 67 Red, 0 finer (6/12).
Ex: Central States Signature (Heritage, 4/2012), lot 3379. (#2779)

3229 **1950-D MS67 Red PCGS.** The 1950-D Lincoln cent issue is surprisingly elusive in MS67 Red, as the high-speed production of 335 million pieces placed the emphasis on quantity rather than quality. This Superb Gem displays none of the problems of strike or carbon that plague most examples, offering brilliant luster over problem-free, deep orange-red surfaces. Population: 32 in 67 Red, 0 finer (6/12).(#2782)

3230 **1955 Doubled Die Obverse Genuine PCGS. FS-101.** The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been cleaned. The orange-red and lemon-gold color is unnatural and the obverse field is bright and hairlined with a possibly smoothed area near the profile.(#2825)

3231 **1955 Doubled Die Obverse AU55 NGC. FS-101.** Satiny dark brown surfaces retain traces of luster appearing as lighter tan inside the borders. Both sides show the usual scattered contact marks expected at the grade. This pleasing Choice AU specimen should generate multiple bids.
From The Lance Gage Collection.(#2825)

3232 **1955 Doubled Die Obverse AU55 ANACS. FS-101.** A briefly handled but partly lustrous example of this famous and dramatic mint error. The medium brown fields and devices lack any mentionable marks.(#2825)

3233 **1955 Doubled Die Obverse AU58 ANACS. FS-101.** The brown surfaces retain generous amounts of mint luster, especially around the devices. A couple of larger abrasions are noted, one on each side, but overall the surfaces are quite pleasing.(#2825)

1955 Doubled Die Cent MS62 Brown
Glossy Surfaces, Lightly Marked

3234 **1955 Doubled Die Obverse MS62 Brown ANACS. FS-101.** Most 1955 Doubled Die cents show some brown or at least mellowing of the original mint luster. This piece exhibits even brown patina over each side with strong underlying glossiness from the mint red that has long since faded. Numerous small abrasions are scattered over each side, but are only noticeable when closely examined. (#2825)

1955 Doubled Die Cent, MS64 Red and Brown
The Devices Are Outlined in Original Red

3235 **1955 Doubled Die Obverse MS64 Red and Brown PCGS. FS-101.** Significant portions of mint red remain on each side of this high-grade survivor. Many 1955 Doubled Die cents were found in cigarette vending machines in the Boston area, and as a result were handled. Even if just briefly handled, the original mint luster was disrupted and subsequently dulled. The only mark that would explain the MS64 grade is a diagonal abrasion across the high point of Lincoln's cheek bone. (#2826)

1955 Doubled Die Cent, MS65 Red
Rare in Gem and With Full Mint Luster

3236 **1955 Doubled Die Obverse MS65 Red NGC. FS-101.** The discovery of the 1955 Doubled Die Obverse cents happened quite soon after their release, prompting a national craze for the new variety in an era when such coins were considered and collected as FIDOs — freaks, irregulars, defectives, and oddities. But the 1955 Doubled Die mania died down shortly afterward, mostly because collectors did not know how to properly value the new, weird coins. The 1955 Doubled Die nonetheless created a spark that the 1960-P and -D Small Date and Large Date cent varieties fanned into a bonfire, creating a new class of error and variety collectors. Today's *Cherrypickers' Guides* and variety certification at the third-party grading agencies are modern outgrowths of the new collecting craze. This pleasing Gem displays glowing, only slightly subdued satiny reddish patina — a well-matched appearance over both sides. A problem-free example of this challenging modern issue. Census: 4 in 65 Red, 1 finer (5/12).
Ex: Long Beach Signature (Heritage, 10/2001), lot 5659. (#2827)

3237 **1960-D/D Small Over Large Date, FS-101 MS66 Red PCGS.** DDO. Of the 90 different varieties of the 1960-D Large Date cents, this has to be the most interesting. The mintmark is widely repunched north and just touches the 9 in the date. The overdate is plainly evident with only light magnification. The surfaces are bright, even red and problem-free.(#37965)

3238 **1972 Doubled Die Obverse MS66 Red PCGS. CAC. FS-101.** The Cherrypickers' Guide lists nine different doubled die varieties of 1972 cents, but FS-101 is easily the strongest and also the one listed in the *Guide Book*. A lustrous orange-gold Premium Gem with an exemplary strike and exceptional preservation. (#2950)

Rare Close AM 1992-D Cent
FS-901, MS64 Red and Brown

3239 **1992-D Close AM MS64 Red and Brown PCGS. FS-901.** Lincoln cent specialists are aware that proof dies during much of the 1990s and 2000s differed in design from business strikes. The distance between the feet of the AM in AMERICA is a pick-up point, as is the distance between the FG initials and the memorial. One die pair intended for proof production was inadvertently used for commercial Denver strikes, and due to the high attrition rate of modern cents, only a few examples have been located. This is a lustrous orange-gold near-Gem with minimal carbon and the look of a finer grade.

PROOF LINCOLN CENTS

Distraction-Free 1909 VDB Proof Cent Matte PR64 Red and Brown

3240 **1909 VDB PR64 Red and Brown PCGS.** The matte proof Lincoln cents (MPLs, as series fans call them) have experienced a remarkable resurgence in recent years, likely attributable to a number of factors: certain knowledgeable dealer-collectors who more or less specialize in the series; the publication of the Kevin Flynn reference titled *Lincoln Cent Matte Proofs*; and the centennial of the Lincoln cent which arrived in 2009, coinciding, of course, with the bicentennial of the birth of President Lincoln.

The 1909 VDB proof is at the forefront of popularity within the series, and examples bring strong prices at auction. (Flynn also asserts that far fewer were actually released than the usually seen figure of 1,194 pieces.) This specimen shows the sculptural detail and square rims that only a matte proof can show so boldly. Equal amounts of mint red remain on each side, with no mentionable spots or other distractions and only a sprinkling of brown in the centers. Population: 30 in 64 (2 in 64+) Red and Brown, 38 finer (5/12). (#3301)

3241 **1909 PR65 Red PCGS.** This stunning Gem matte proof exhibits brilliant orange luster with deeper red overtones. While a few minuscule carbon specks are present, they are trumped by the outstanding eye appeal.(#3305)

3242 **1911 PR66 Red and Brown PCGS.** Flawless smooth coppery-red surfaces distinguish this matte proof with a mintage of 2,411 pieces. The edges are mathematically square and both the beard and the hair near Lincoln's ear are fully detailed. The reverse exhibits a more tawny red. Population: 17 in 66 Red and Brown, 1 finer (5/12).(#3310)

3243 **1914 PR65 Red and Brown PCGS.** Light brown toning appears over faded orange mint luster with blue and violet overtones contributing to excellent eye appeal. Minor carbon specks are evident on each side as so often encountered. Population: 53 in 65 Red and Brown, 33 finer (5/12).(#3319)

3244 **1915 PR64 Red and Brown NGC.** Although a number of small carbon flecks appear on each side, this Choice matte proof has navy-blue toning over brilliant orange mint luster, with satiny surfaces characteristic of the striking method. A pleasing example. Census: 15 in 64 Red and Brown, 45 finer (6/12).(#3322)

1916 Lincoln Cent, PR64 Red and Brown Final Matte Proof Issue

3245 **1916 PR64 Red and Brown PCGS.** From a tiny mintage of 1,150 pieces, the 1916 proof Lincoln cent is a scarce issue in Choice condition, with Red and Brown surfaces. This impressive specimen displays razor-sharp definition on all design elements, and the matte surfaces show an evenly mixed patina of original red and light brown. Population: 46 in 64 Red and Brown, 66 finer (5/12). (#3325)

1916 Matte PR65 Red and Brown Low-Mintage Final Year of Issue

3246 **1916 PR65 Red and Brown PCGS.** Only 600 proofs were struck in 1916, the final year for matte proof production. This piece is mostly brown, but significant portions of underlying red are also apparent. The matte surfaces are coarsely granular, and the strike details display pinpoint sharpness. Population: 52 in 65 (1 in 65+) Red and Brown, 14 finer (5/12). (#3325)

Red and Brown 1916 Matte Proof Cent
Premium Gem Surfaces

3247 **1916 PR66 Red and Brown PCGS.** This is a spectacular Premium Gem proof with the usual matte surfaces seen on the earliest proof Lincoln cents. It is sharply struck as expected, with squared rims and bold lettering. The obverse has considerable deep orange mint color with deep bluish-brown and lilac toning in the center. The reverse is only slightly mellowed. Population: 13 in 66 (1 in 66+) Red and Brown, 1 finer (5/12).
Ex: Long Beach Signature (Heritage, 6/2006), lot 443. (#3325)

1916 Lincoln Cent, PR64 Red
Final Matte Proof Issue

3248 **1916 PR64 Red PCGS.** From the final matte proof mintage of just 1,150 pieces, the 1916 Lincoln cent is an elusive issue with the Red designation. This sharply detailed Choice example exhibits original red surfaces, with a few hints of light brown and lilac toning. Population: 13 in 64 Red, 13 finer (6/12). (#3326)

1936 Lincoln Cent, PR66
Rare Brilliant Finish Cameo

3249 **1936 Brilliant PR66 Cameo NGC.** Doubly important both as a first year of modern proof issue, as well as a cameo in a series that is not known for field-to-device contrast. This lovely coin has full cherry-red coloration and deeply mirrored fields on each side. The devices are moderately frosted and seem even more so against the illimitable depth of reflectivity in the fields. There are no mentionable marks or spots on either side of this important coin. Census: 2 in 66 Red Cameo, 0 finer (5/12). (#83335)

Superb Gem Proof 1951 Lincoln Cent
Spectacular Cameo Specimen

3250 **1951 PR67 Cameo PCGS.** Fully struck frosty design elements contrast starkly with the deeply reflective fields to create a memorable Cameo effect on this delightful Superb Gem Lincoln cent. The surfaces are blazing original red, with no hint of toning or carbon. Population: 10 in 67 Cameo, 1 finer (6/12). (#83362)

3251 **1955 PR68 Cameo PCGS.** This magnificent Lincoln cent displays virtually perfect original surfaces, with deep mirrors and profoundly contrasted design elements that have a distinct three-dimensional quality. Population: 16 in 68 (1 in 68+) Cameo, 0 finer (6/12). (#83374)

3252 **1955 PR67 Deep Cameo PCGS.** The deeply mirrored orange-red surfaces of this magnificent Superb Gem contrast dramatically with the needle-sharp design elements to produce the coveted deep cameo effect. Population: 26 in 67 Deep Cameo, 6 finer (6/12). (#93374)

3253 **1955 PR67 Deep Cameo PCGS.** The deeply reflective fields of this pristine Superb Gem contrast profoundly with the razor-sharp design elements, and the reddish-orange surfaces show no trace of toning. Population: 26 in 67 Deep Cameo, 6 finer (6/12). (#93374)

PR68 Red Deep Cameo 1960 Small Date Cent
Tied for Finest at PCGS

3254 **1960 Small Date PR68 Red Deep Cameo PCGS.** Small Date Lincoln cents of 1960 are far scarcer than their Large Date counterparts, both in business strike and proof. This top-shelf example from the latter format has fresh copper-gold luster and strong contrast with only a few flyspecks. Population: 35 in 68 Red Deep Cameo, 0 finer (5/12). (#93392)

TWO CENT PIECES

1864 Two Cent Piece, MS64 Red and Brown
Scarcer Small Motto Variety

3255 **1864 Small Motto MS64 Red and Brown PCGS. CAC.** The 1864 two cent piece was the first business-strike issue to include the motto IN GOD WE TRUST, and the Small Motto variety is much more difficult to locate than its Large Motto counterpart. This sharply detailed Choice example exhibits mostly red surfaces, with vibrant mint luster and a few hints of light brown patina on the reverse. Population: 82 in 64 Red and Brown, 43 finer (5/12). (#3580)

Choice 1864 Two Cent Piece
Small Motto, With Red and Brown Surfaces

3256 **1864 Small Motto MS64 Red and Brown PCGS. CAC.** The luster and larger amounts of mint red both appear more on the reverse, while the obverse is a bit muted and more of a dusky orange-purple. A loupe reveals a few dark flecks scattered over each side, but this remains an attractive near-Gem example of this popular key to the two cent series. Population: 82 in 64 Red and Brown, 43 finer (6/12). (#3580)

Gem 1864 Small Motto Two Cent Piece
Only Four Finer Red and Brown PCGS Coins

3257 **1864 Small Motto MS65 Red and Brown PCGS.** An attractive Gem example of the first year of this odd denomination, this coin represents the elusive Small Motto type. The design elements are sharply detailed throughout, with pleasing surfaces that show a mixture of original red and light brown patina. Population: 39 in 65 Red and Brown, 4 finer (5/12). (#3580)

1866 Two Cent, MS65 Red
Top-Notch Eye Appeal, Seven Finer at PCGS

3258 **1866 MS65 Red PCGS.** Gem Red two cent pieces, except for the 1864 Large Motto and 1865, are seldom seen as one advances through the later issues in the series. This specimen of the 1866 is one of 47 submissions in Gem Red at PCGS, and only seven are finer, all in MS66 Red (6/12). The surfaces are problem-free as expected, displaying even medium red color and top-notch eye appeal. (#3590)

1867 Two Cent Piece, MS62 Brown
Doubled Die Obverse, FS-101

3259 **1867 Doubled Die MS62 Brown NGC. FS-101.** The motto is strongly doubled, in fact, the strongest doubling in the series. While relatively available in lower circulated grades, the DDO is scarce in mint condition. The surfaces are lightly speckled, but consistently brown over both sides. The striking details are well defined overall with the exception of the high points on several leaves on the obverse. Census for DDO: 5 in 62 Brown, 4 finer (6/12). (#3594)

3260 **1870 MS64 Red and Brown PCGS. CAC.** A lovely Choice Mint State piece housed in a green-label PCGS holder, this example has weak obverse details, but virtually full orange mint brilliance, only fading slightly to light brown.(#3607)

3261 **1871 MS65 Red and Brown PCGS.** Uniform brightness results from the ample overall luster that covers both sides of this late-date example of a short-lived denomination. The strike is generally forceful including the horizontal and vertical stripes at obverse center. Population: 28 in 65 Red and Brown, 0 finer (5/12). (#3610)

1872 Two Cent, MS65+ Red
Low-Mintage Circulation Strike

3262 **1872 MS65+ Red PCGS.** This MS65+ Red 1872 two cent from PCGS is clearly among the finest survivors of this last, low-mintage business strike issue in the series, produced to the extent of a meager 65,000 pieces. (The 1873 two cents were proof-only issues, whether original or restrike.) The "Crime of '73" the following year would introduce sweeping changes in U.S. coinage, including eliminating the bronze two cent and the silver three cent and half dime denominations. Golden-red luster covers each side, with only the tiniest traces of carbon. The strike is boldly detailed, about as nice as ever seen outside of proofs. PCGS has certified only three Red pieces finer, all MS66 (5/12). (#3614)

PROOF TWO CENT PIECES

3263 **1866 PR64 Red and Brown NGC. CAC.** A flashy and razor-sharp near-Gem with lime and fire-red color. One small spot clings to a vertical shield stripe. A meager 725 proofs were struck. Housed in an old prehologram holder.(#3631)

3264 **1869 PR65 Red and Brown NGC. CAC.** Considerable orange mint color remains on both sides of this delightful Gem proof, with accompanying sky-blue and violet toning. Both sides have reflective, lightly mirrored fields. Census: 52 in 65 Red and Brown, 27 finer (5/12).(#3640)

3265 **1869 PR64+ Red PCGS. CAC.** A high-end Choice example, with original red surfaces and razor-sharp definition on the design elements. Only 600 proof two cent pieces were struck in 1869. Population: 44 in 64 (1 in 64+) Red, 52 finer (6/12). (#3641)

1873 Two Cent Piece, PR65 Red and Brown
Closed 3 Original Example

3266 **1873 Closed 3 PR65 Red and Brown NGC.** The proof-only 1873 comes in Closed 3 and Open 3 varieties. The Closed 3 pieces were struck the same year as the date, while the slightly scarcer Open 3 examples are classified as restrikes. The present Gem is a Closed 3 Original striking, and it displays a full strike along with butter-gold and orange-red iridescence. Census: 60 in 65 Red and Brown, 36 finer (6/12). (#3652)

1873 Two Cent, PR64 Red and Brown
Open 3 Restrike

3267 **1873 Open 3 PR64 Red and Brown PCGS.** The last two cent issue, one of several denominations abolished under the "Crime of '73." The Open 3 two cents are much rarer than their Closed 3 counterpart and are considered restrikes. Breen's *Proof Encyclopedia* opines that only one is seen for every nine or 10 of the Closed 3s. The clearest diagnostic, besides the numeral difference, is the here-obvious die line running horizontally from the left base of the T in TRUST. The hazy reflective surfaces are primarily orange-red, with brown device high points. There is little obvious carbon, although a tick appears in the lower wreath on the reverse. Population: 62 in 64 (1 in 64+) Red and Brown, 22 finer (6/12). (#3655)

THREE CENT SILVER

3268 **1854 MS64 PCGS.** This powder-gray Type Two three cent silver shows the usually seen die clashing on each side, but the obverse radial die cracks are unusual. Only minor ticks amid good luster preclude a Gem grade.(#3670)

Premium Gem 1859 Trime
Only Two Finer Coins at NGC

3269 **1859 MS66 NGC.** The 1859 three cent silver coin enjoyed an ample mintage of 364,200 pieces, but few survivors can match the quality of this delightful Premium Gem. The design elements are sharply detailed throughout and satiny mint luster shines through attractive shades of gold and lavender patina. Census: 15 in 66, 2 finer (5/12). (#3677)

1863 Three Cent Silver, MS64
Low-Mintage Civil War Era Issue

3270 **1863 MS64 PCGS.** Mellow shades of champagne-gold and lavender toning blanket the prooflike surfaces of this sharply detailed Choice specimen. Only 21,000 business-strike three cent pieces were struck in 1863, at the height of the Civil War. Housed in a green label holder. Population: 19 in 64, 31 finer (6/12). (#3682)

Gem 1866 Trime
Rare Issue in High Grade

3271 **1866 MS65 PCGS.** The 1866 three cent silver coin claims a mintage of just 22,000 pieces, and many examples were undoubtedly melted in 1873, when the denomination was discontinued. This attractive Gem is well-detailed, with obvious clash marks on both sides. Dusky shades of blue and champagne-gold toning enhance the lustrous surfaces. Population: 8 in 65, 17 finer (5/12). (#3686)

3272 **1871 MS64+ PCGS. CAC.** The Type Three three cent silvers have one line bordering the star, as here. This 1871 business strike is noticeably prooflike, not a surprise given the production of 3,400 pieces. The pinkish-gold surfaces are highly reflective in the fields and show little evidence of contact, although the center obverse is a trifle soft. Population: 20 in 64 (1 in 64+), 41 finer (6/12). (#3692)

3273 **1871 MS65 NGC.** A mere 3,400 business strikes were produced in 1871. Because of the low mintage the die polish did not have a chance to wear off and the fields on this piece greatly resembles a proof. The striking details, however, are less-than-complete. Deep cobalt-blue over each side.(#3692)

PROOF THREE CENT SILVER

1863/2 Three Cent Silver, PR66
Rare Civil War Era Overdate

3274 **1863/2 PR66 NGC.** The 1863/2 overdate is very rare in high grade. This powerfully struck example displays rich cobalt-blue and russet toning with virtually no imperfections evident. A small planchet flaw is noticed between the first and second "I" on the reverse in the Roman numeral denomination and is mentioned for complete accuracy. (#3713)

Gem Proof 1864 Trime
Only Seven Finer Cameo Coins at PCGS

3275 **1864 PR65 Cameo PCGS.** The deeply reflective surfaces of this impressive Gem are patinated in attractive shades of champagne-gold and lavender-gray. The sharply detailed frosty design elements provide bold Cameo contrast, and close inspection reveals only minor contact marks. Population: 15 in 65 Cameo, 7 finer (6/12). (#83714)

Premium Gem Proof 1865 Trime
Only 500 Examples Struck

3276 **1865 PR66 NGC.** This low-mintage date had a proof emission limited to only 500 pieces. Unlike many proof three cent silver pieces from this decade, this piece does not have heavy toning. Its brilliant surfaces allow the bright proof mirrors to strongly flash over each side. A curious die crack is seen on the obverse at 7 o'clock. Census: 16 in 66, 7 finer (6/12). (#3715)

3277 **1866 PR65 PCGS.** A sharply detailed Gem from a tiny proof mintage of 725 pieces, this coin displays reflective surfaces under light champagne-gold and blue patina. Population: 25 in 65, 20 finer (6/12).
From The Norva Collection.(#3716)

3278 **1867 PR65 NGC.** Stunning eye appeal is the hallmark of this 1867 Gem proof Type Three trime, an issue rare in both proof and business strike format. Generous luster proceeds from aqua centers ceding to saffron and gold at the obverse rim, while the reverse center is pink merging with aqua. The strike is full over unclashed dies.(#3717)

3279 **1868 PR65 PCGS.** Deep aqua and pink hues prevail on each side of this pristine and well-struck Gem Type Three proof. Only 600 pieces were made in proof format to complement the 3,500 business strikes. Population: 44 in 65 (1 in 65+), 11 finer (6/12). (#3718)

3280 **1870 PR64 PCGS.** Attractive shades of golden-brown and cerulean-blue patina enliven the reflective surfaces of this sharply detailed Choice specimen. Population: 85 in 64 (1 in 64+), 48 finer (6/12).
From The Norva Collection.(#3721)

3281 **1872 PR63 Cameo PCGS. CAC.** The sharply detailed design elements contrast boldly with the deeply mirrored fields to produce an intense Cameo effect, while a few hints of champagne-gold toning enliven the surfaces. Population: 6 in 63 Cameo, 25 finer (6/12).
From The Norva Collection.(#83723)

3282 **1872 PR64 Cameo NGC.** Faint hairlines are barely visible beneath the vivid gold, russet, violet, and blue toning of this near-Gem, and those imperfections keep this piece from a higher grade. Both sides are lightly toned at the centers, permitting full viewing of the field to device contrast. Census: 7 in 64 Cameo, 10 finer (6/12).(#83723)

3283 **1873 PR63 PCGS.** A few wisps of champagne-gold and lavender toning grace the reflective surfaces of this well-detailed Select specimen. From a minuscule proof mintage of just 600 pieces.
From The Norva Collection.(#3724)

3284 **1873 PR64 Cameo PCGS.** This proof-only near-Gem displays modest cameo contrast and light almond-gold toning. The surfaces are fully struck and impressively free from hairlines. Population: 23 in 64 Cameo, 12 finer (6/12).
Ex: Boston ANA (Heritage, 8/2010), lot 4041.(#83724)

THREE CENT NICKELS

1866 Three Cent Nickel, MS66+
Only Two Numerically Finer Coins at PCGS

3285 **1866 MS66+ PCGS. CAC.** Unusually vibrant mint luster is the outstanding visual characteristic of this high-end Premium Gem. The design elements are sharply detailed and prominent clash marks are evident in the obverse field. A few hints of champagne-gold toning enhance the surfaces of both sides. Population: 27 in 66 (1 in 66+), 2 finer (6/12). (#3732)

3286 **1870 MS66 PCGS.** Very few high grade business strikes are still extant out of the 1.3 million pieces struck in 1870. Diagonal die striations are seen in the fields, and the otherwise brilliant surfaces show light streaky golden patina on each side. Population: 15 in 66, 0 finer (6/12).(#3736)

3287 **1873 Closed 3 MS65 PCGS.** Bold clash marks show on each side of this pinkish-gold Gem business strike three cent nickel, a problem-free and lustrous high-end example of the Closed 3 mintage, produced in the last year of the three cent silver. Population: 32 in 65, 10 finer (6/12).(#3739)

3288 **1873 Open 3 MS64 PCGS. CAC.** An attractive Choice example of the 1873 three cent nickel, with an Open 3 in the date. This well-detailed specimen shows a little softness on the centers, with vibrant mint luster under shades of champagne-gold and nickel-gray toning. Population: 36 in 64, 18 finer (6/12).
From The Norva Collection.(#3740)

3289 **1876 MS65 PCGS. CAC.** The 1876 three cent nickel is not a proof-only issue — those are the 1877 and 1878 — but it is a low-mintage production of 160,000 pieces, and Gems are elusive. This satiny powder-gray piece shows some interesting die polishing lines and a couple of minor planchet flaws, as made, along with good eye appeal, a bold strike, and little evidence of contact. Population: 29 in 65, 4 finer (6/12).(#3744)

1883 Three Cent Nickel, MS62
Scarce Business Strike

3290 **1883 MS62 PCGS.** Among the most overlooked series in the 19th century are business strike three cent nickels and Shield nickels. Observe in our auctions how few business strikes are offered compared to proofs. The 1882 actually has a "large" mintage for the decade, but only 22,000 pieces were struck. The only truly common coin is the 1881. This is an unquestioned strike for circulation. Evidence of planchet flaking can be seen in the right obverse field. There is no reflectivity evident and the coin is mostly brilliant. Population: 8 in 62, 23 finer (6/12). (#3751)

3291 **1887 MS65 NGC.** Token mintages were the order of the day for the three cent nickel after 1881 — 5,000 business strikes, in the case of the 1887. This Gem is virtually pristine in terms of contact, with powder-gray surfaces sporting a light golden overlay. A small dark fleck near the first column on the reverse is unbothersome. Census: 25 in 65, 3 finer (6/12).(#3755)

PROOF THREE CENT NICKELS

3292 **1867 PR65 Cameo PCGS.** Light cameo contrast appears on each side of this lovely specimen. Contrasting proofs from the first few years of three cent nickel production are rarely encountered. This piece has delicate champagne toning over its light gray surfaces. Population: 25 in 65 Cameo, 20 finer (6/12).(#83763)

3293 **1868 PR66+ ★ Cameo NGC.** This spectacular high-end Premium Gem displays brilliant reflective fields that contrast intensely with the frosty portrait and wreath. The central reverse displays parallel roller marks, as produced. Census: 2 in 66+ ★ Cameo, 11 finer (6/12).(#83764)

3294 **1869 PR65 Cameo PCGS.** Razor-sharp definition is evident on all design elements of this boldly contrasted Gem, with rich mint frost and deeply mirrored fields. A few hints of champagne-gold toning grace the obverse. Population: 35 in 65 Cameo, 10 finer (6/12). (#83765)

3295 **1869 PR66 Cameo PCGS.** The frosty devices of this spectacular Premium Gem proof contrast starkly with the deeply reflective surfaces, which are delicately toned in attractive shades of champagne-gold and lavender. Population: 7 in 66 Cameo, 3 finer (6/12).(#83765)

3296 **1870 PR66+ Cameo NGC. CAC.** Sharply detailed throughout, with pleasing frosty texture on the design elements and deeply reflective fields, this high-end Premium Gem exhibits bold cameo contrast. Census: 21 in 66 (1 in 66+) Cameo, 1 finer (6/12). (#83766)

3297 **1871 PR65 PCGS. CAC.** This delightful Gem proof is patinated in delicate shades of champagne-gold and nickel-gray, with hazily reflective fields and sharply detailed design elements. Population: 95 in 65, 27 finer (6/12).(#3767)

3298 **1877 PR63 PCGS. CAC.** Wisps of dusky gold toning grace the reflective surfaces of this sharply detailed Select specimen, from a minuscule proof mintage of just 510 pieces. The surfaces show only minor signs of contact.
From The Norva Collection.(#3773)

3299 **1878 PR65 Cameo NGC. CAC.** A magnificent Gem proof that displays startling black-on-white cameo flash when the coin is tilted in the light. A few wisps of light gold toning visit the surfaces. Census: 45 in 65 Cameo, 78 finer (6/12).(#83774)

3300 **1878 PR66 Cameo NGC.** This delightful Premium Gem displays bold contrast between the sharply detailed design elements and the reflective fields. A few hints of light gold toning enhance the unmarked surfaces. Census: 52 in 66 (1 in 66+) Cameo, 26 finer (6/12).(#83774)

3301 **1883 PR67 Cameo NGC.** Soft golden hues complement bold field-device contrast on this Superb Gem proof, devoid of visible contact and fully struck. Breen describes this as a possible overdate, with "die file marks in 883" and "curve of 2 (?)" in the 3. Census: 18 in 67 Cameo, 5 finer (6/12).(#83779)

3302 **1884 PR67 Cameo PCGS. CAC.** Pristine, completely untoned mirrors are bolstered in their appeal with the presence of nicely frosted devices. The surfaces are sharply defined throughout with no distracting abrasions, as expected of the Superb Gem grade. Population: 21 in 67 Cameo, 2 finer (6/12).
Ex: Atlanta ANA (Heritage, 4/2006), lot 226.(#83780)

3303 **1885 PR66+ Cameo NGC. CAC.** This spectacular high-end Premium Gem exhibits bold cameo contrast between the sharply detailed frosty design elements and the reflective fields. Census: 39 in 66 (1 in 66+) Cameo, 11 finer (6/12).(#83781)

3304 **1887/6 PR65 Cameo PCGS.** The early die state proof is designated as a "Strong Overdate" by PCGS, since later die state specimens show scant evidence of the underdigit 6. The 88 in the date also shows recutting. Fully struck and flashy with a wisp of golden-gray toning.(#83784)

3305 **1888 PR66 Cameo PCGS. CAC.** Pinkish-gold patina, deep contrast, and an absence of any mentionable surface distractions make this Premium Gem Cameo proof among the few finest survivors from the issue, a sharply struck and appealing example. Population: 48 in 66 Cameo, 8 finer (6/12).(#83785)

3306 **1888 PR65+ Deep Cameo PCGS. CAC.** An amazing high-end Gem, with profound cameo contrast between the frosty devices and the deeply mirrored fields. Population: 1 in 65 (1 in 65+) Deep Cameo, 4 finer (6/12).(#93785)

3307 **1889 PR66+ Cameo NGC. CAC.** The fields of this high-end Premium Gem are deeply mirrored and contrast dramatically with the frosty design elements. Census: 20 in 66 (2 in 66+) Cameo, 11 finer (6/12).(#83786)

EARLY HALF DIMES

3308 **1794 — Surfaces Tooled — Genuine PCGS. XF Details. V-3, LM-3, R.4.** Much original detail remains intact on this lightly worn specimen, despite the noted problem. The pleasing silver-gray surfaces yield to darker blue-steel hues at the peripheries. (#4250)

Near-Mint 1794 Half Dime
V-4, LM-4 Variety

3309 **1794 AU58 NGC. V-4, LM-4, R.4.** There are four varieties of 1794 half dimes, all of which are believed to have been struck in 1795. The first recorded delivery of half dimes was on March 30, 1795 and totaled 7,756 pieces. Breen (1988) writes that this figure likely included all 1794-dated half dimes and a small number of 1795-dated issues. An additional 78,660 half dimes were struck that year, which places the mintage of the 1794 at less than one-tenth of its 1795 counterpart. The certified population data reveals a 3:1 ratio, but when one accounts for resubmissions of the rare and highly desirable 1794, the true ratio likely comes closer to that implied by the mintages.

This near-Mint specimen is mostly lavender with hints of gold and pink toning on both sides. A number of prominent die cracks are seen along with several obverse clash marks. There are no individually significant abrasions. Of the four varieties combined, NGC has certified 19 pieces in AU58 with 49 finer examples (6/12). (#4250)

3310 **1795 — Surfaces Tooled — Genuine PCGS. V-10, LM-2, R.7.** In our opinion, this coin has the details of a VF specimen that has tooled surfaces. LM-2 is an extremely rare variety missing from most specialized holdings of the short-lived Flowing Hair series. This example has been whizzed and is retoned deep golden-gray and ocean-blue, but all letters, stars, and berries are crisp and much hair and wing detail is present.

1795 Half Dime, V-4, LM-10, VF25
Attractive, Lightly Abraded Surfaces

3311 **1795 VF25 PCGS. CAC. V-4, LM-10, R.3.** The position of star 15 joined to the bust, and the pattern of no inner berries with one outer berry under the left wing indicates the LM-10 variety. This evenly worn piece retains some interior detail on the major design elements and the lightly abraded surfaces display attractive blue and gray patina.
From The Norva Collection. (#4251)

VF35 1795 Half Dime, V-4, LM-10
Well-Detailed and Problem-Free

3312 **1795 VF35 PCGS. V-4, LM-10, R.3.** The 1795 Flowing Hair half dime claims a mintage of 78,660 pieces, with 10 die varieties known for the date. This coin represents the LM-10 variety, with star 15 joining the bust and no inner and one outer berry under the left wing. This well-detailed Choice VF example shows some dramatic clash marks on the obverse and problem-free silver-gray surfaces. (#4251)

3313 **1796 LIKERTY Genuine PCGS. V-1, LM-1, R.3.** The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a good specimen that has been lightly damaged, corroded, and cleaned. Splashes of dark blue-gray toning appear on the silver surfaces of this piece, with corrosion, pit marks, and hairlines.(#94254)

1797 Draped Bust Half Dime, VF30
Rare V-3, LM-3 Die Pair

3314 1797 16 Stars VF30 PCGS. CAC. V-3, LM-3, R.5. The 1797 half dimes exist with three distinctly different obverse layouts having 13 stars, 15 stars, and 16 stars. The 15 Stars coins were struck first from leftover 1796 dies, the 16 Stars coins were next, and finally the 13 Stars coins came last. This pleasing VF30 specimen has a blend of tan, gray, and steel surfaces with adequate detail for the grade and pleasing surfaces. Population: 4 in 30, 37 finer (6/12). (#4259)

V-1, LM-1 1800 Draped Bust Half Dime, VF25
First Heraldic Eagle Date

3315 1800 VF25 NGC. CAC. V-1, LM-1, R.3. Gunmetal-gray fields contrast with slate device high points. The shield lines are separated, and UNUM is bold. The reverse is unabraded, and the left obverse has only a few faint, thin marks. 1800 was the first date of the Heraldic Eagle type, an early series readily collectible by *Guide Book* variety aside from the rare 1802. (#4264)

1800 Half Dime, V-1, LM-1, MS64+
Eye-Appealing, Lustrous Surfaces

3316 1800 MS64+ PCGS. CAC. V-1, LM-1, R.3. The Mint engraver used a small "o" punch twice to make the 8 in the date on this oddity. The V-1, LM-1 variety is rather easily recognized not only by the large, misshapen 8 but also by the lack of the LIBEKTY feature and stars 1 and 2 showing weak lower points. This was the only use of this distinctive obverse. The reverse shows a leaf touching the left diagonal of the last A in AMERICA, and the last T in STATES has an upright over the left edge of cloud 3. The top of the eagle's beak touches a star point. This was the first use of this reverse, along with the exceedingly rare V-3, LM-2. The present near-Gem shows some of the light die clashing and cracking around the date, the digits 00 in particular. The lustrous surfaces show a light pinkish-gray overlay, melding into charcoal bits at a couple of areas in the shield on the reverse. The eye appeal is excellent, and there are no mentionable marks or other distractions. Population for the issue: 13 in 64 (1 in 64+), 6 finer (5/12). (#4264)

1800 Draped Bust Half Dime, VF30
V-2, LM-3, LIBEKTY Variety

3317 **1800 LIBEKTY VF30 PCGS. V-2, LM-3, R.4.** Characterized by the broken top of R in LIBERTY and the uneven height of the top three arrowheads on the reverse. The popular LM-3 *Guide Book* variety is a very scarce die marriage, but examples in circulated grades can be located with patience. The present coin retains much original detail and shows the cud at 7 o'clock on the obverse. Population: 6 in 30, 31 finer (6/12). (#4265)

3318 **1801 — Surface Damage — Genuine PCGS. V-1, LM-2, R.4.** In our opinion, this coin has the details of a VG specimen that has been bent and scratched. Wavy from a dig near the chin that flattens a portion of the reverse near the right scroll end. Scratches are noted on the shield and beneath the branch stem. The upper right obverse rim is hairlined.(#4267)

3319 **1801 VG10 PCGS. V-1, LM-2, R.4.** Deep lavender-gray and lime-green toning blankets this lightly abraded rare date half dime. The centers are softly impressed, but ample hair detail remains. No sign exists of the heavy arc-shaped die crack seen on late strikes of this scarce variety.(#4267)

1805 V-1, LM-1 Half Dime, XF40
Second-Rarest Draped Bust Issue

3320 **1805 XF40 PCGS. V-1, LM-1, R.4.** The only dies for this difficult date. Pleasing tobacco-brown and powder-blue enriches the surfaces, which are smooth aside from a couple of faded thin marks on the field beneath the chin. Luster brightens the hair, wings, and legends. The usual strike for the 1805, with softness noted on the bust truncation and opposite on the upper right reverse. A scant 15,600 pieces were struck, since bullion depositors preferred the more convenient half dollar. The final date of the Draped Bust type, and the rarest date with the exception of the famous 1802. Population: 5 in 40, 11 finer (5/12).
From The Norva Collection. (#4272)

BUST HALF DIMES

Colorful 1831 Half Dime, MS66
V-1, LM-6

3321 **1831 MS66 NGC. CAC. V-1, LM-6, R.1.** Apple-green and rose-gold enrich this coruscating and sharply impressed Premium Gem. The fields display clash marks (as coined) but lack any visible abrasions. Attributable by the position of the branch stem past the serif of the C in 5 C. Census: 34 in 66, 13 finer (3/12). (#4278)

3322 **1832 MS64 PCGS. V-1, LM-3, R.1.** Medium stone-gray and almond-gold toning graces satiny and unblemished surfaces. The strike is full save for slight merging of detail at the left shield border.
Ex: Long Beach Signature (Heritage, 5/2008), lot 15, which realized $1,092.50.(#4279)

3323 **1837 Small 5C AU58 PCGS. CAC. V-2, LM-4, R.3.** The final Capped Bust half dime date has five die varieties, but only a single scarce marriage represents the *Guide Book* Small 5C listing. Aquamarine and lilac toning enriches the present crisply struck and lightly abraded example.(#4290)

3324 **1837 Small 5C MS63 PCGS. V-2, LM-4, R.3.** The sole Small 5C reverse die used in 1837 appeared with only one obverse. This scarce variety has a separate Guide Book listing and enjoys strong demand. This Select Mint State piece exhibits frosty luster with delicate gold toning. The top of the left facing wing is poorly defined. Population: 6 in 63 (1 in 63+), 5 finer (6/12). (#4290)

1837 Capped Bust Half Dime, MS63+
Small 5C, V-2, LM-4

3325 **1837 Small 5C MS63+ PCGS. CAC. V-2, LM-4, R.3.** Only one die variety is known for the Small 5C reverse, and the surviving population from that die pair must meet demand from variety specialists, date collectors, and type collectors. Both sides have excellent eye appeal despite trivial marks. The surfaces are frosty and fully lustrous. Population: 6 in 63 (1 in 63+), 5 finer (5/12). (#4290)

SEATED HALF DIMES

1837 Seated Liberty Half Dime, MS66
No Stars, Large Date

3326 **1837 No Stars, Large Date (Curl Top 1) MS66 NGC.** The No Stars obverse design was only struck during 1837 on Philadelphia half dimes and in 1838 on the New Orleans issue, making this date extremely important to type collectors. This sharply detailed Premium Gem displays satiny mint luster and dusky silver-gray toning. Census: 87 in 66 (1 in 66+), 16 finer (5/12). (#4311)

3327 **1838 Large Stars, No Drapery MS66 NGC.** The large mintage of 2.2 million 1838 dimes occasioned at least 15 die varieties listed in Valentine. This piece shows repunching most prominent on stars 1, 3, and 7. The satiny surfaces are silver-gray in the centers with iridescent rim toning. A small luster graze in the lower reverse field is the only mentionable contact. A super and well-struck example of the issue.(#4317)

3328 **1839-O No Drapery AU58 PCGS. CAC.** The toning is light and the mint luster nearly complete over each side. Sharply struck throughout. A couple of interesting, heavy die cracks are seen on the left side of the obverse.(#4320)

3329 **1840 No Drapery MS65 PCGS. CAC.** Strong, swirling luster enlivens the pink and gold accented surfaces of this sharply struck and remarkably appealing Gem. Carefully preserved and attractive overall. Population: 18 in 65, 17 finer (5/12).(#4321)

3330 **1851 MS66 PCGS.** This lovely Premium Gem is fairly well-struck save for a couple of the right-side stars on the obverse. The silver centers complement original aqua and russet tones, and there are no mentionable contact marks. Population: 12 in 66, 4 finer (6/12). (#4347)

1852-O Half Dime, Satiny MS64
Scarce in All Grades

3331 **1852-O MS64 PCGS. CAC.** The 1852-O has a deceptively high mintage of 260,000 pieces. We say deceptively high because the majority struck were melted in 1852 and early 1853 as they were worth more melted than their face value. That situation was remedied in February 1853, but for silver coins produced in the early 1850s widespread melting renders mintages largely irrelevant. Scarce in all grades, and especially challenging in mint condition, only 13 other pieces have been so graded by PCGS and NGC combined with 12 finer (5/12). The satiny surfaces of this coin are brilliant throughout and the striking details are fully detailed on each side. Light die clash marks are the only mentionable "flaws" on the obverse or reverse.
Ex: Long Beach Signature (Heritage, 9/2007), lot 882. (#4350)

3332 **1853-O No Arrows — Improperly Cleaned — NGC Details. VF.** The date is lightly struck, but this rare date New Orleans half dime lacks noticeable marks and has a sharp LIBERTY. The green-gray surfaces are subdued by a moderate cleaning.(#4352)

3333 **1855-O Arrows MS64 PCGS.** Al Blythe calls the 1855-O Arrows "scarce in all grades" and this near-Gem is boldly clashed on each side, with excellent eye appeal created by generous luster and pink and teal patina. Interesting die cracks appear on each side, most prominent through the right-side obverse stars. Population: 14 in 64, 10 finer (6/12).(#4361)

3334 **1857-O MS64 NGC. CAC.** Rich cream-gray, autumn-brown, and gunmetal-blue toning encompasses this crisply struck near-Gem. From clashed dies but devoid of abrasions. Encapsulated in a former generation holder.(#4366)

3335 **1857-O MS66 NGC.** Rich mint luster radiates from each side of this colorful Premium Gem, largely russet and pinkish-gold on each side. Singular marks are absent but the strike is a bit soft on portions of the wreath. Census: 29 in 66, 4 finer (6/12). (#4366)

3336 **1860 MS66 PCGS. V-4.** The 1 and 0 are both repunched on this Premium Gem. Both sides have frosty surfaces with ivory luster and pleasing gold toning. Population: 56 in 66 (2 in 66+), 35 finer (6/12).(#4377)

3337 **1862 MS65 PCGS. CAC.** Prominent clash marks are visible in the obverse and reverse fields of this boldly struck Gem Civil War half dime. Both sides have rich gold and iridescent toning over frosty silver luster.(#4381)

1863 Half Dime, Highly Lustrous MS66
Low-Mintage Date

3338 **1863 MS66 PCGS. CAC.** Only 18,000 circulation strikes were produced, a mintage low enough to warrant the production of restrikes around 1870. The originals, such as this coin, show plainly doubled 18 digits in the date. This is a wonderfully lustrous example. The centers are almost brilliant with golden-brown toning around the margins, and the strike is strong throughout. Population: 14 in 66, 18 finer (5/12). (#4382)

3339 **1866-S MS64 PCGS. CAC.** Unlike many, this example has a bold mintmark. Both sides of this ivory near-Gem exhibit frosty mint luster with wisps of champagne toning. A strong strike is noted with faded clash marks in the fields. Population: 9 in 64, 9 finer (6/12).(#4389)

3340 **1867 MS62 NGC.** Only 8,000 business strike half dimes were struck at Philadelphia in 1867, and survivors are elusive in all grades. This lovely Mint State specimen is full brilliant and untoned with mirrored fields and lustrous devices. The strike is weak at the upper left reverse, and clash marks in the fields provide ample evidence that this is a business strike and not a proof. A vertical reverse scratch prevents a higher grade. Census: 11 in 62, 53 finer (6/12).(#4390)

3341 **1867 MS63 PCGS.** A meager mintage of 8,000 Seated Liberty half dimes was achieved at the Philadelphia Mint in 1867. This well-detailed Select specimen displays traces of satiny luster, under dark green and purple toning. Population: 15 in 63, 46 finer (6/12). (#4390)

3342 **1867 MS64 PCGS.** The low mintage of 8,000 pieces for the business strike 1867 half dimes is made obvious by the prooflike nature of this near-Gem, deeply reflective in the fields and lightly gold-toned. Die clashing on the obverse is incredibly bold, adding to the broad appeal for many collectors. Population: 29 in 64, 17 finer (6/12).(#4390)

3343 **1868 MS65 Prooflike NGC.** Blatant field reflectivity and a crisp strike combine to provide an appearance deceptively similar to a proof. Delicate gold toning visits undisturbed surfaces. Census: 1 in 65 Prooflike, 1 finer (6/12).(#4392)

PROOF SEATED HALF DIMES

1856 Seated Half Dime, PR63
Low-Mintage Early Proof

3344 **1856 PR63 PCGS. CAC.** From an unrecorded, but undoubtedly small mintage, probably no more than 30-40 specimens of the 1856 proof Seated Liberty half dime are still extant today. This attractive Select example exhibits sharply detailed design elements and moderately reflective fields, with pale blue and gold patina. Population: 7 in 63, 7 finer (6/12). (#4434)

1856 Half Dime, PR65
Rare Pre-1858 Proof Issue

3345 **1856 PR65 NGC.** In general, the Mint did not record the mintages of proof coins issued before 1858, but all production totals were extremely small. Walter Breen estimated only 30-40 specimens of the 1856 Seated Liberty half dime were still extant in 1989. This sharply detailed Gem displays moderately reflective fields under light gold and blue patina. Census: 6 in 65, 5 finer (5/12). (#4434)

3346 **1862 PR65 NGC.** A delightful Gem proof, with deeply reflective surfaces, under champagne-gold and gray patina. From a tiny proof mintage of 550 pieces. Census: 20 in 65, 23 finer (6/12). (#4445)

3347 **1865 PR64 Cameo NGC. CAC.** The sharply detailed design elements seem to float on the deeply mirrored fields of this spectacular Choice example. The surfaces are graced by shades of champagne-gold and blue toning. Census: 13 in 64 Cameo, 17 finer (6/12). *From The Color Collection*.(#84448)

1865 Half Dime, PR65+ Cameo
Iridescent Toning, Low-Mintage Date

3348 **1865 PR65+ Cameo PCGS. CAC.** Both proofs and business strikes of the 1865 half dime were struck from the same pair of dies. This is a popular and very scarce date with only 13,000 circulation strikes produced, thus placing extra date pressure on the proofs. This is an unquestioned proof as seen by the deeply mirrored fields and noticeably frosted devices, the cameo effect apparent even through the lovely iridescent toning seen over each side. Population: 5 in 65 (1 in 65+) Cameo, 7 finer (5/12). (#84448)

1867 Half Dime, Superb Gem Proof
Rich, Variegated Toning

3349 **1867 PR67 PCGS. CAC.** A sharply detailed Superb Gem proof Seated Liberty half dime, with reflective surfaces under mottled shades of gray, champagne-gold, and cerulean-blue toning. A shallow, barely discernable mark is located to the right of the date, from the base of the rock to the rim. Only 625 proof half dimes were struck in 1867. Population: 5 in 67, 0 finer (5/12). (#4450)

1867 Half Dime, PR66+ Cameo
Only One Coin Finer at PCGS

3350 **1867 PR66+ Cameo PCGS. CAC.** The design elements of this high-end Premium Gem are sharply detailed and frosty throughout, providing intense Cameo contrast with the reflective fields. The well-preserved surfaces are blanketed in shades of golden-brown and cerulean-blue, with outstanding eye appeal. Population: 6 in 66 (2 in 66+) Cameo, 1 finer (6/12). (#84450)

3351 **1868 PR65 PCGS.** From a mintage of just 600 pieces, this proof Seated Liberty half dime displays moderately reflective surfaces and sharply detailed design elements, with light blue and green toning. Population: 20 in 65, 12 finer (6/12).(#4451)

3352 **1868 PR65 NGC.** Deep shades of blue and iridescent toning enhance the eye appeal of this elusive Gem proof. Both sides are sharply struck. The obverse has mirrored fields around frosty devices, while the reverse has a satiny look. Census: 23 in 65, 19 finer (6/12).(#4451)

1868 Seated Half Dime, PR66 Cameo
Only One Numerically Finer Coin at PCGS

3353 **1868 PR66 Cameo PCGS. CAC.** Attractive shades of peach, champagne-gold, and crimson toning enliven both sides of this delightful Premium Gem. The design elements are sharply detailed and richly frosted, providing stark contrast with the reflective fields. Only 600 proof Seated Liberty dimes were struck in 1868. Population: 6 in 66 (1 in 66+) Cameo, 1 finer (6/12). (#84451)

1868 Half Dime, PR66 Ultra Cameo
None Certified Finer at NGC

3354 **1868 PR66 Ultra Cameo NGC.** A small mintage of 600 proof Seated Liberty half dimes was achieved in 1868, and few survivors can match the quality of the present coin. The sharply detailed design elements contrast profoundly with the deeply mirrored fields, and wisps of champagne-gold toning add to the terrific eye appeal. Census: 3 in 66 Ultra Cameo, 0 finer (6/12). (#94451)

3355 **1873 PR65+ PCGS. CAC.** This stunning Gem proof is an amazing representative of the final year for the denomination, with deep blue and iridescent toning over fully mirrored fields that create slight cameo contrast with the lustrous devices. A fine hairline is noted at the upper obverse. Population: 35 in 65 (1 in 65+), 16 finer (6/12).(#4456)

EARLY DIMES

1801 Draped Bust Dime, VF20
Very Scarce JR-1 Variety

3356 **1801 VF20 NGC. JR-1, R.4.** Only two die marriages are known for this Jefferson-era date. A large A in STATES distinguishes JR-1 from the rare JR-2. A majority of letters in E PLURIBUS UNUM are clear, and the eagle's wings and shield display pleasing detail. Cream-gray overall with darker toning in design recesses. Census: 1 in 20, 22 finer (6/12). (#4471)

1801 JR-2 Dime, XF40
Rarer of Two Varieties

3357 **1801 XF40 PCGS. JR-2, R.5.** This date is best described as a very scarce issue, a semikey as they are sometimes called. Two varieties are known, and JR-2 is slightly rarer than JR-1. This delightful example has excellent surfaces for the grade, with satiny fields that host a lovely display of pale blue, gold, and iridescent toning. *From The Norva Collection.* (#4471)

Bold AU 1801 Dime, JR-1

3358 **1801 AU50 NGC. JR-1, R.4.** The large A in STATES identifies the more available of the two 1801 die marriages. This better date Heraldic Eagle dime displays iridescent sun-gold and lavender toning with freckles of cobalt-blue along the left obverse margin. The centers show moderate inexactness of impression though peripheral elements are crisp. One slender obverse mark seen near star 13. (#4471)

1802 JR-2 Dime, Fine 15
Second Rarest Draped Bust Issue

3359 **1802 Fine 15 PCGS. JR-2, R.5.** The Draped Bust, Heraldic Eagle series, coined from 1798 to 1807, has several key issues. The rarest is 1804, including two known varieties, followed by 1802, with four varieties that are all scarce or rare. This example has light gray toning blended with lighter silver-gray, showing delicate gold and pale blue overtones. Although lightly marked, the surfaces are far finer than expected for the grade.
From The Norva Collection. (#4472)

1803 Draped Bust Dime, VF30
JR-3 Variety

3360 **1803 VF30 PCGS. JR-3, R.4.** A dove-gray early dime that has bold lettering throughout E PLURIBUS UNUM, along with considerable hair and plumage definition. The strike is generally crisp, although the hair beneath the ear and the right half of the shield is incompletely brought up. The B in LIBERTY is extremely faint, as struck from a partly clogged die. Unabraded aside from a few light horizontal marks on Liberty's head. (#4473)

1804 JR-1 Dime, 13 Stars Reverse, VF30
Exceptional Surfaces

3361 **1804 13 Stars on Reverse VF30 PCGS. JR-1, R.5.** Two die varieties are known for 1804 dimes, having either 13 or 14 stars on the reverse. Both varieties are considered R.5, meaning that the surviving population ranges from 30 to 75 coins each. More important, that means there are less than 150 surviving 1804 dimes in all grades, making this issue as rare as coins such as the 1796 half dollar or 1794 dollar, although demand for the dime is less. However, date collectors and variety specialists create sufficient demand that examples are nearly impossible to find in the marketplace. This Choice VF piece has pleasing surfaces with deep gold, violet, and gunmetal-blue toning on each side. It is also an exceptional coin for the variety and date, with only 18 finer PCGS and NGC coins certified (6/12).
From The Norva Collection. (#4474)

1805 JR-2 Dime, XF40
Four Berries Reverse

3362 **1805 4 Berries XF40 PCGS. JR-2, R.2.** Two varieties are easily identified by counting either four berries in the branch for JR-2, or five berries in the branch for JR-1. Both varieties are listed in the *Guide Book*, ensuring strong demand. The surfaces of this pleasing piece show mottled silver, pewter-gray, and steel-blue toning, with trivial, grade-consistent marks.
From The Norva Collection. (#4477)

1805 Four Berries Reverse Dime
JR-2, AU53

3363 **1805 4 Berries AU53 PCGS. JR-2, R.2.** The Four Berries variety of 1805 dime is slightly more plentiful than the Five Berries reverse, although neither variety is rare. Minor lamination is noted on the reverse of this satiny and still lustrous example. Both sides have rich sky-blue and pale gold toning.
From The Norva Collection. (#4477)

Well-Struck 1805 4 Berries Dime, MS62
Satiny and Virtually Mark-Free

3364 **1805 4 Berries MS62 NGC. JR-2, R.2.** This Draped Bust type coin has moderate, pleasing, original toning with golden-brown fields separating cobalt-blue borders from the gunmetal-gray devices. This piece is well-struck for the issue with softness chiefly confined to the shield center. The surfaces are satiny and impressively free from marks, save for one tiny obverse rim bump noted at 9:30 solely to provide an identifier.
Ex: Long Beach Signature (Heritage, 2/2012), lot 3309.
From The Color Collection. (#4477)

1807 Draped Bust Dime, AU58
JR-1, Only Dies for the Date

3365 **1807 AU58 PCGS. CAC. JR-1, R.2.** Only one variety is known for the 1807 Draped Bust dime, with a mintage of 165,000 pieces. The present coin shows little actual wear, but the dies were overworked during the extensive production run. Consequently, the peripheral details were weakly impressed. The central details remain clear, and the surfaces are bright and original. Some areas of greenish-gray toning are evident at the rims. Population: 26 in 58, 89 finer (6/12). (#4480)

BUST DIMES

3366 **1811/09 VF35 NGC. JR-1, R.3.** The reverse die is shattered as often seen. This overdate is the only dime variety produced in 1811, and surviving examples are scarce. This piece has original gray-brown toning with lighter tan on the high points. (#4487)

3367 **1814 Large Date AU50 PCGS. JR-2, R.3.** Medium golden-brown and olive toning occasionally cedes to deeper russet patina near the rims. A sharp example of this underappreciated variety, which is several times scarcer than JR-3 and perhaps merits reclassification as an R.4.(#4488)

1822 Capped Bust Dime
JR-1, Only Dies for the Date

3368 **1822 Genuine PCGS. JR-1, R.3.** The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VF specimen that has been damaged and corroded. Still an excellent representative of the elusive 1822 Capped Bust dime, the single issue most often missing from a date collection. Both sides have a combination of steel toning and lighter gray-tan devices.

1822 Capped Bust Dime, VG10
JR-1, Only Dies for the Date

3369 **1822 VG10 PCGS. CAC. JR-1, R.3.** From a reported mintage of 100,000 pieces, the 1822 Capped Bust dime is a scarce date in the series, with only a single known die variety. This pleasing VG10 example shows the uneven peripheral strike usually seen on this issue, but all major design elements are still present, though much interior detail has worn smooth. Population: 5 in 10, 32 finer (5/12).
From The Norva Collection. (#4497)

3370 **1823/2 Large Es AU53 PCGS. JR-3, R.2.** Golden-brown peripheries bound slate-gray fields and devices. Though lightly circulated, the present Bust dime displays noticeable luster and has no detrimental abrasions.(#4499)

3371 **1824/2 XF45 PCGS. JR-1, R.3.** Two 1824/2 overdate dime varieties are known from a single obverse die, and the JR-1 is scarce, while the other variety, JR-2 is rarer. This Choice XF has light silver-gray surfaces with faint gold toning and tan high points. A lovely piece that retains traces of its mint luster. Population: 5 in 45, 28 finer (6/12).(#4502)

3372 **1824/2 AU53 NGC. JR-1, R.3.** Straw-gold and ocean-blue toning endows this minimally abraded and typically struck Bust dime. The more available of only two 1824-dated marriages. The knob and downstroke of the underdigit 2 are evident.(#4502)

3373 **1828 Small Date AU58 NGC. JR-1, R.2.** Golden-russet and electric-blue deepen toward the borders of this partly lustrous near-Mint example. Smooth save for unobtrusive marks near the first two stars. Struck from prominently clashed dies.(#4510)

Choice Small Date 1828 Dime, JR-1

3374 **1828 Small Date MS64 PCGS. CAC. JR-1, R.2.** Predominantly cream-gray although the peripheries display dappled golden-brown. Precisely struck and satiny with a mark-free reverse and only minimal obverse contact. Only two different 1828 die varieties are known, and due to distinct date sizes, each receives a separate *Guide Book* listing. Population: 4 in 64, 4 finer (6/12). (#4510)

1829 JR-2 Dime, MS64
Ideal Type Candidate

3375 **1829 Large 10C MS64 PCGS. JR-2, R.2.** Housed in a green-label PCGS holder, this Choice Mint State 1829 dime has full mint frost with ivory luster beneath gold and sea-green toning. The strike is sharp with full star details on the obverse. The eagle's claws show only slight weakness. Here is a remarkable opportunity for the advanced collector, suitable for a specialized variety collection, or a date or type set. (#94511)

3376 **1832 MS61 PCGS. JR-2, R.2.** A lustrous pearl-gray type example that boasts a bold strike and no detrimental marks. A good value relative to its scarcity in Mint State.
Ex: Milwaukee Central States (Heritage, 5/2010), lot 7947, which realized $1,265.(#4521)

1833 Capped Bust Dime, JR-9, MS64
Attractive Multicolor Toning

3377 **1833 MS64 PCGS. CAC. JR-9, R.2.** Two points of star 13 are close to the curl, and the letters TED in UNITED are progressively higher, identifying the JR-9 variety. This attractive Choice example displays sharply detailed design elements and lustrous surfaces, with pleasing shades of champagne-gold and powder-blue toning. Population: 45 in 64 (1 in 64+), 20 finer (6/12). (#4522)

3378 **1834 Large 4 MS62 PCGS. JR-5, R.1.** This nicely struck representative is mostly dusky stone-gray but has chestnut-gold patina near the rims. Refreshingly void of marks save for one faint line near star 2.(#4526)

3379 **1835 MS63 NGC. CAC. JR-1, R.1.** Rich lavender-gray and sea-green toning embraces this intricately struck and mark-free Select Mint State dime. A formidable type coin from the later years of the popular Capped Bust series.(#4527)

Smooth Gem JR-1 1835 Dime

3380 **1835 MS65 NGC. JR-1, R.1.** The U in UNITED is repunched, a prime diagnostic for the available JR-1 marriage. The present lightly toned Gem has only a hint of golden-gray patina near the rims. Both sides are devoid of detractions and the strike is intricate across all design elements. Census: 19 in 65, 6 finer (6/12). (#4527)

SEATED DIMES

1838-O No Stars Dime, MS64, Fortin-101 Obverse Rim Cud

3381 **1838-O No Stars MS64 PCGS. CAC. Fortin-101.** The 1838-O Seated dime is noteworthy as the only mintmarked No Stars issue of the series, made in the first year of production for the New Orleans Mint. The mintage was a moderate 406,034 pieces, and while Philadelphia would produce the later Stars Obverse dimes in 1838, New Orleans' first Stars Obverse mintage would be the 1839-O. The Fortin-101 is among the Gerry Fortin Top 100 varieties, distinguished (sometimes) by obverse rim cuds at 2 and 4 o'clock, although the present piece only shows a cud at 2 o'clock. The strike is full on the obverse and slightly soft on the reverse, in the leaves of the wreath. Deep gray-blue and rose toning covers each side, and the surfaces are problem-free. Bright, glowing mint luster beneath the patina is a fitting complement. Population: 13 in 64, 5 finer (5/12). (#4564)

3382 **1838 Small Stars MS64 NGC. FS-801, Fortin-101a.** The reverse doubled die is clearest at the bottom of the D in DIME. Apart from the interest created by the doubled die, this is a charming early Seated dime with deep reddish-golden and deepest blue tones over bright silvery luster. For all varieties, Census: 12 in 64, 10 finer (6/12).(#4569)

1838 Seated Liberty Dime, MS66
Partial Drapery Variant

3383 **1838 Partial Drapery MS66 NGC.** The Partial Drapery is not an actual die variant that has anything to do with drapery. It is the result of a clashed die from the E in DIME. Nevertheless, the tradition of including it is a strong one, and so it remains a part of the Seated dime series. The "partial drapery" is strong on this piece, as is the overall striking definition. The mint luster is frosted and each side has medium intensity gray-lilac and golden-rose toning. Census: 4 in 66, 2 finer (6/12). (#4570)

3384 **1839 No Drapery MS63 NGC. CAC.** Although we find no obvious match at Gerry Fortin's www.SeatedDimeVarieties.com website, the die crack on the reverse from the left upper wreath, through (ST)AT(ES) and to the rim, is bold and blatant, and another smaller crack runs from the first T directly upward. Original russet and blue toning complements an especially sharp strike. A couple of minor scrapes appear below the bowknot. (#4571)

1840 No Drapery Dime, MS66
Brilliant and Problem-Free

3385 **1840 No Drapery MS66 PCGS. CAC.** The 1840 is one of the more frequently encountered early issues among No Drapery dimes. Several varieties display weakness on the ON in ONE on the reverse, including the die pairing here. The surfaces are brilliant, problem-free, and remarkably sharp except for the localized area mentioned. Population: 6 in 66, 2 finer (6/12). (#4573)

3386 **1843-O VF30 PCGS. CAC.** The 1843-O Seated Liberty dime is seldom encountered in grades above VF. This lightly worn specimen retains much original detail, with pleasing pinkish-gray patina and only minor abrasions. Population: 9 in 30, 21 finer (6/12).(#4584)

1843-O Dime, Choice VF
Very Scarce Issue

3387 **1843-O VF35 PCGS. CAC.** The 1843-O is very scarce in all grades, but especially so better than VF. This piece does not show the usually seen softness on the bottom of the wreath, most likely because wear has "caught up" with the softness that was probably once there. Pale gray surfaces with charcoal surrounding the devices.
From The Norva Collection. (#4584)

3388 **1844 XF40 PCGS.** Shades of blue-steel and champagne-gold toning blanket the minimally abraded surfaces of this lightly worn Seated Liberty dime. Population: 20 in 40, 33 finer (6/12). (#4585)

3389 **1844 XF40 PCGS. CAC.** A lightly circulated specimen of this low-mintage date, with traces of mint luster showing beneath pleasing shades of green, gold, and purple toning. Population: 20 in 40, 33 finer (6/12).
From The Norva Collection.(#4585)

3390 **1845-O XF40 PCGS.** Only one die pair is known for this very scarce issue despite a reported mintage of 230,000 pieces. The present well defined and blemish-free example has an untoned center bounded by forest-green and tobacco-brown patina. Population: 7 in 40, 15 finer (6/12).(#4587)

1846 Seated Liberty Dime, XF40
Low-Mintage Key

3391 **1846 XF40 PCGS. CAC.** The 1846 Seated Liberty dime boasts a tiny mintage of 31,300 pieces, and most examples seen grade no better than VF. This attractive XF40 specimen displays vivid shades of greenish-gold toning at the peripheries, while the centers are primarily silver-gray. The surfaces remain lustrous and only light wear shows on the devices. Population: 4 in 40, 22 finer (6/12).
From The Norva Collection. (#4588)

3392 **1849-O AU50 PCGS.** The 1849-O Seated Liberty dime is an elusive issue, especially in grades above the XF level. This lightly circulated example retains a few traces of original mint luster under light gray and gold toning. Population: 9 in 50, 25 finer (6/12). (#4592)

3393 **1853 No Arrows MS64 PCGS.** Golden-russet and apple-green patina enriches this intricately struck and unmarked near-Gem. Certified in a green label holder. Population: 18 in 64, 30 finer (6/12).
Possibly ex: Herbert M. Bergen (Kreisberg & Cohen, 10/1979); The Twin Leaf Collection (Heritage, 4/2009), lot 125.(#4599)

3394 **1856-S VF35 PCGS. CAC.** This Choice VF specimen is lightly toned in attractive shades of champagne-gold and lavender. The design elements show a touch of wear, but all letters in LIBERTY remain legible. Population: 5 in 35, 27 finer (6/12).
From The Norva Collection.(#4613)

3395 **1856-S AU50 PCGS.** This is the first year of dime production at the fledgling San Francisco Mint that opened just two years earlier. Mint records show a production of 70,000 pieces, but survivors are rare. This piece has pale gold and iridescent toning over light gray-brown surfaces. Population: 7 in 50, 13 finer (6/12).
From The Color Collection.(#4613)

3396 **1857 MS65 NGC.** Shades of battleship-gray and golden-tan toning enliven the well-preserved surfaces of this well-detailed Gem. The 1857 Seated Liberty dime is seldom encountered in high grade. Census: 37 in 65, 13 finer (6/12).(#4614)

3397 **1857 MS65 PCGS.** This spectacular Gem exhibits sharply detailed design elements and vibrant mint luster, under attractive shades of golden-brown and blue patina. Population: 17 in 65, 2 finer (6/12).
From The Color Collection.(#4614)

1857-O Seated Liberty Dime, MS65
Large O Variety

3398 **1857-O MS65 PCGS. CAC.** Two mintmark styles are known for the 1857-O Seated Liberty dime, one with a Large O and the other with a Medium O. This coin represents the more available Large O variety. This sharply detailed Gem offers vibrant mint luster and attractive blue and gold patina, with outstanding eye appeal. Population: 12 in 65, 10 finer (5/12). (#4615)

3399 **1859-S — Surface Tooled — Genuine PCGS. XF Details.** Only 60,000 Seated Liberty dimes were coined at the San Francisco Mint in 1859, and collectors prize this date in all grades and conditions. This lightly worn specimen has some details strengthened by the noted tooling.(#4621)

1860-O Dime, VF20
Key New Orleans Issue

3400 **1860-O VF20 PCGS.** Only one obverse/reverse die pairing was used to strike the 40,000 1860-O dimes. This is a pleasing, lower-grade example that generally displays light gray surfaces with deeper gray accents around the devices and peripheries. Close examination shows a few light pinscratches between ONE and DIME as the only surface distractions (and these are not visible without a loupe).
From The Norva Collection. (#4632)

3401 **1863 VG10 PCGS. CAC.** Mintages were generally small during the Civil War years, and Seated Liberty dime production was limited to a mere 14,000 pieces at the Philadelphia Mint in 1863. This VG10 specimen is well-worn, but problem-free, with hints of gold and pink toning. Population: 1 in 10, 39 finer (6/12).
From The Norva Collection.(#4637)

Gem 1863 Seated Liberty Dime
Low-Mintage Civil War Issue

3402 **1863 MS65 NGC.** Only 14,000 business-strike Seated Liberty dimes were struck at the Philadelphia Mint in 1863, indicative of the harsh financial climate of the Civil War. This delightful Gem is sharply detailed, with vibrant mint luster and brilliant surfaces. Census: 10 in 65, 8 finer (6/12). (#4637)

3403 **1863-S AU58 NGC.** An impressive example, and seldom encountered so fine, despite the 157,500 coin mintage. Both sides have virtually full silver luster with no toning. The strike is sharp, and only trivial marks appear on the frosty surfaces. Census: 4 in 58, 13 finer (5/12).(#4638)

3404 **1863-S AU58 PCGS. CAC.** Strongly lustrous with just a touch of rub on surfaces splash-toned green-gold, sage, and blue-gray. Pleasing detail for this challenging Civil War-era issue. Population: 2 in 58, 12 finer (6/12).(#4638)

1864-S Dime, MS65
Mostly Brilliant Surfaces

3405 **1864-S MS65 NGC.** This frosty San Francisco Gem from the Civil War era is mainly silver-white with light green-gold elements scattered on the obverse and a slightly deeper version of the same color on the reverse. A shallow luster scrape below the word DIME on the reverse contributes to the grade. Census: 2 in 65, 2 finer (6/12). (#4640)

3406 **1865 VF25 PCGS.** The 1865 Seated Liberty dime is an elusive date, from a Civil War mintage of just 10,000 pieces. The design detail is incomplete in some areas, but all letters in LIBERTY are bold. The surfaces display pleasing purple and dove-gray toning. Population: 4 in 25, 32 finer (6/12).
From The Norva Collection.(#4641)

Select 1867-S Seated Dime
Rare Issue in Mint State Grades

3407 **1867-S MS63 NGC.** The 1867-S Seated Liberty dime claims a mintage of 140,000 pieces, small in absolute terms, but not unusual in the context of the series. Attractive Select specimens, like the present coin, are seldom encountered. The design elements are sharply detailed, and the creamy surfaces radiate satiny mint luster. Census: 1 in 63, 7 finer (6/12). (#4646)

1869 Prooflike Dime, MS67
The Only Prooflike Certified

3408 **1869 MS67 Prooflike NGC.** NGC has graded exactly five 1869 dimes as Superb Gems, including this piece, the only Prooflike example certified there (6/21). Both sides offer strong reflectivity in the fields, with contrasting frostiness on the devices. Light silver centers give way to hints of gold-orange near the rims. (#4649)

1871-CC Seated Liberty Dime, VG10
Sought-After Low-Mintage Issue

3409 **1871-CC VG10 PCGS. CAC.** The 1871-CC Seated Liberty dime boasts a low mintage of 20,100 pieces, and even well-worn specimens are prized by collectors. This evenly worn VG10 example retains all major design features, although some of the interior detail has worn smooth. Population: 3 in 10, 24 finer (6/12).
From The Norva Collection. (#4654)

1872-CC Dime, VG10
Low Availability in All Grades

3410 **1872-CC VG10 PCGS. CAC.** The mintage of 35,480 pieces tells most of the story about the scarcity of this issue, in addition to the popularity of silver coinage in the West. The combination of these two factors explains the general unavailability of the 1872-CC. This extensively worn example has only one noticeable mark, from the lower reverse field across the wreath. The surfaces are original and uncleaned.
From The Norva Collection. (#4657)

1872-CC Seated Dime, VF30
Scarce Low-Mintage Issue

3411 **1872-CC VF30 PCGS.** A textbook example of the grade, this piece has light gray fields and darker charcoal tones in the protected areas, amplifying the remaining details. With a low mintage of only 35,480 pieces, this in-demand issue is quite scarce. A bit of roughness is noted on the reverse at 2 o'clock, but there are no other deviations from what one would expect. Population: 5 in 30, 21 finer (6/12). (#4657)

1873-CC Arrows Dime, VG10
Key Seated Dime Issue

3412 **1873-CC Arrows VG10 PCGS.** Well-known as a key to the Seated dime series, along with the 1874-CC, only 18,791 pieces were struck of the 1873-CC. This piece shows even wear over the design elements. The light to medium gray patina is only interrupted by a darker stain of unknown origin just right of the date.
From The Norva Collection. (#4666)

1873-CC Seated Dime, VF35
Popular Arrows Type

3413 **1873-CC Arrows VF35 PCGS.** Not only is the 1873-CC Arrows dime one of the most challenging of all Seated dime issues, but a quick check of Heritage's Permanent Auction Archives also reveals that many known examples are impaired in some way. While most surviving examples appear to have been cleaned, scratched, corroded, repaired, damaged, and so on, this noteworthy exception displays only balanced wear and pleasing yellow and blue overtones against light- to-medium gray surfaces. A great Choice VF selection for the dedicated collector of Carson City minor silver. Population: 6 in 35, 11 finer (6/12).
Ex: Long Beach Signature (Heritage, 2/2005), lot 6216. (#4666)

1874-CC Arrows Dime, VG10
Key Issue to the Series

3414 **1874-CC Arrows VG10 PCGS.** The 1874-CC Arrows dime issue's mintage is given as 10,817 pieces both in *The Mint on Carson Street* and the current 2013 *Guide Book*. All known examples of the 1874-CC dime were produced from the same die pair, showing the arrows slanting up noticeably on either side of the date. The reverse has a diagnostic die crack through the CC mintmark, with the second C placed higher in the die than the first. This well-worn example shows an even wear pattern over each side. More important are the problem-free, uncleaned surfaces. Pale gray patina appears over each side with a slight undertone of reddish color.
From The Norva Collection. (#4669)

1874-CC Seated Liberty Dime, VF Details
Low-Mintage Key

3415 **1874-CC Arrows — Obverse Scratched — NGC Details. VF.** From a mintage of 10,817 pieces, the 1874-CC Arrows dime is the undisputed key to the Seated Liberty series (discounting the uncollectible 1873-CC No Arrows, known by a single specimen). The issue is prized by collectors in all grades and conditions. This coin is typical of the usual example seen, with moderate, even wear on both sides and pleasing gray patina. A few short scratches near Liberty's head are the only problems noted. (#4669)

1875 Dime, Deeply Toned MS67

3416 **1875 MS67 NGC. CAC.** The mid-1870s saw uniformly large mintages of Seated Liberty dimes from the Philadelphia Mint, and the 1875 date was struck to the tune of 10.3 million pieces. Of course, survivors in Superb Gem condition are very rare. NGC has certified seven examples in MS67, with none finer; while PCGS has graded only four Superb Gems, with none finer (5/12). The present coin is sharply struck, but the dies were lapped to the point that the first S in STATES is incomplete. The surfaces are enhanced by lovely blue, lavender and golden-brown patina on both sides. (#4672)

3417 **1876 MS66 PCGS.** Type One Reverse. Light walnut-brown and stone-gray toning enrich this lustrous high grade Seated type coin. Unabraded and prominently clashed with an area of prooflike surface on the upper left reverse. Housed in a first generation holder. Population: 18 in 66 (1 in 66+), 3 finer (6/12).(#4679)

3418 **1879 MS65 PCGS.** A prooflike Gem with flashy fields and an absence of marks. Untoned and nicely struck. A scant 14,000 pieces were issued, due to unprecedented silver dollar production. Housed in a first generation holder.(#4687)

3419 **1879 MS66 PCGS. CAC. Breen-3415, Fortin-104a, R.4.** The 18 in the date is sharply repunched. A flashy and brilliant Premium Gem with nearly flawless preservation. Certified in a green label holder. Just 14,000 business strikes were issued.(#4687)

3420 **1879 MS66 PCGS. CAC.** This well-detailed Premium Gem displays shades of champagne-gold and violet toning, with bright satiny mint luster and strong visual appeal. From a mintage of just 14,000 pieces. Population: 55 in 66 (3 in 66+), 23 finer (5/12). *From The Color Collection*.(#4687)

1879 Prooflike Seated Dime, MS67 ★
Brilliant, Flashy Surfaces

3421 **1879 MS67 ★ Prooflike NGC.** This date is often found as Prooflike, which should be little surprise given the low mintage of 14,000 business strikes, due to heavy silver dollar production. Even so, NGC's Star designation for eye appeal is well-justified on this frosty white coin, with noticeable reflectivity evident in the fields and especially deep on the reverse. The surfaces are virtually unabraded. Distinguishable from a proof by an area of incomplete strike on the upper left wreath end. Census in Prooflike: 4 in 67, 2 of which have the Star designation, 1 finer (5/12). (#4687)

3422 **1883 MS66 PCGS. CAC.** A dusky peach-red Premium Gem with potent luster and a pristine appearance. The strike is good though not complete. Housed in an old green label holder. Population: 53 in 66, 11 finer (6/12).(#4691)

1885 Dime, MS67 ★
Prooflike Obverse

3423 **1885 MS67 ★ NGC.** This obverse of this silver-white coin radiates the powerful flash of a proof, the reverse is bright with semiprooflike cartwheel luster. At this level, the 1885 represents significant conditional rarity. A full strike creates a sharp wire rim and full head on Liberty. The frosty silver of the reliefs and boldly gleaming prooflike fields are brilliant. Census: 13 in 67, (4 in 67★), 1 finer (5/12). (#4694)

Select 1885-S Seated Liberty Dime
Key S-Mint issue

3424 **1885-S MS63 NGC.** The 1885-S is the key date to the San Francisco Seated dimes. While rare in any grade, it becomes extremely difficult in Mint State. Variegated gunmetal-blue, red, and silver-gray patina covers both sides. Generally well struck and revealing just a few minor handling marks. Census: 4 in 63, 10 finer (6/12). (#4695)

3425 **1886 MS65+ PCGS. CAC.** This high-end Gem displays vibrant satiny mint luster under attractive shades of antique-gold and ice-blue patina. The design elements are well-detailed and the fields show only minor contact marks. Population: 77 in 65 (2 in 65+), 35 finer (6/12).
From The Color Collection.(#4696)

PROOF SEATED DIMES

1860 Legend Obverse Dime, PR66 Cameo
First Year of Type

3426 **1860 PR66 Cameo NGC.** First year of the Legend Obverse type, a far greater number of proofs were struck than the Mint could actually sell. This is an all-brilliant example that has brightly reflective fields that contrast nicely against the frosted devices. Census: 7 in 66 Cameo, 8 finer (6/12). (#84753)

3427 **1864 PR66 Cameo NGC.** This silver-white, moderately contrasted 1864 proof dime shows no obvious color and no post-strike contact, but a loupe reveals myriad tiny planchet indents in the fields, as made, since they struck out on the devices. The 1864 dime is rare even as a business strike, of which only 11,000 were made. Census: 6 in 66 Cameo, 6 finer (6/12).(#84757)

3428 **1865 PR64 PCGS.** The striking of dimes, business strikes or proofs, was an exercise in futility during the Civil War. This opening entry in the series saw 500 proofs and 10,000 business strikes made; both are rare. This near-Gem proof shows deep blue and pink patina on both sides, with no obvious contact but softness at the date. Population: 30 in 64, 15 finer (6/12).(#4758)

3429 **1865 PR65 NGC.** Rose-red, tan-gold, and aquamarine hues enrich this flashy and sharply struck Gem. Void of contact marks or technical imperfections. Just 500 proofs were issued. Housed in a seldom-seen pre-hologram NGC holder. Census: 17 in 65, 10 finer (6/12).(#4758)

3430 **1866 PR66 NGC.** Deep cherry-red, apple-green, and peach-gold encompass this precisely struck and flashy Reconstruction-era proof. The reverse is immaculate and the obverse field displays only wispy contact.
Ex: Chicago Signature (Heritage, 8/2011), lot 3568.(#4759)

3431 **1867 PR65 Cameo NGC.** A touch of lemongrass toning at the right obverse and reverse adds color to otherwise silver-white surfaces. Gleaming fields meet thick frost at the limits of the devices. Census: 6 in 65 Cameo, 7 finer (6/12).(#84760)

3432 **1869 PR65 NGC.** Delightfully toned in shades of pale green and cerulean-blue, this sharply detailed Gem displays deeply mirrored fields with no mentionable distractions. From a tiny proof mintage of 600 pieces. Census: 28 in 65, 11 finer (6/12).(#4762)

3433 **1869 PR64 Cameo NGC.** Lilac-purple centers cede to sky-blue at the rims of this appealing near-Gem. A loupe reveals no mentionable contact amid generous luster and considerable contrast. Census: 4 in 64 Cameo, 11 finer (6/12).(#84762)

1874 Arrows Dime, PR65
Two-Year Type

3434 **1874 Arrows PR65 PCGS.** Struck for only two years, the 1873 and 1874 Arrows type is highly sought after by collectors. This fully struck example is covered with deep blue-green and golden toning, but the color has little effect on the underlying proof mirrors. Surprisingly scarce in Gem condition. Population: 17 in 65, 9 finer (6/12). (#4770)

3435 **1874 Arrows PR64 Cameo PCGS. CAC.** Appreciably toned overall, mostly gold in the centers with blue and lilac elements along the margins. This distinctly contrasted specimen offers a colorful choice for its short-lived Arrows type. Population: 11 in 64 Cameo, 0 finer (6/12).(#84770)

1874 Seated Dime, PR66 Cameo
Tied for Finest Certified at NGC

3436 **1874 Arrows PR66 Cameo NGC.** High quality examples of the short-lived 1873 to 1874 Arrows type are always in demand. This Premium Gem Cameo proof is just such a coin with brilliant silver surfaces and excellent contrast between the fields and devices. Census: 4 in 66 Cameo, 0 finer (5/12).
Ex: Baltimore Signature (Heritage, 3/2009), lot 877 (#84770)

3437 **1875 PR66 NGC.** Carefully preserved and colorful, this Premium Gem proof has a green, blue, and violet obverse with similar colors at the reverse margins, supplemented by gold and peach. The reverse shows a hint of contrast. Census: 16 in 66, 3 finer (5/12). (#4772)

3438 **1875 PR66 Cameo PCGS.** Pinkish-gold and aqua compete with untoned silver-white areas on this Premium Gem proof, with bold contrast despite the moderate patina. Some roughness appears on the highest points of Liberty's head and cap, the deepest areas of the die which failed to strike up completely, and several small, lumpish die defects appear on Liberty's arm and body. Population: 3 in 66 Cameo, 1 finer (6/12).(#84772)

3439 **1876 PR65 Cameo NGC. Fortin-103, R.4.** The E in DIME is lightly die doubled, likely due to use of both Type One and Type Two hubs during production of the reverse die. A boldly struck and bright Gem with mirrored fields and peripheral tan-gold and sea-green toning.(#84773)

3440 **1879 PR65 PCGS.** Forest-green and pinkish hues compete for space on the obverse, with the pinkish hues winning out on the reverse. There is little sign of contact, but some strike weakness occurs together at the lower reverse on the bowknot. (#4776)

3441 **1880 PR66 NGC.** A gorgeous Premium Gem representative of this popular proof issue, which has a generous mintage of 1,355 pieces yet is conditionally rare any finer. Peach-gold obverse toning is ringed in blue, the same color (mixed with green) that is present on the profoundly mirrored reverse. Census: 34 in 66, 17 finer (6/12). *Ex: Sacramento ANA (Heritage, 3/2011), lot 3370.*(#4777)

3442 **1881 PR66 PCGS.** Deeply toned and luminous beneath deep green-gold and gunmetal-blue patina. This Premium Gem proof is carefully preserved but softly struck on Liberty's head. Population: 11 in 66, 5 finer (6/12).(#4778)

3443 **1882 PR64 Cameo PCGS. CAC.** The palest pastel pink hues prevail on the obverse among subtle hints of jade, while the reverse sports a near-brilliant center with gold and jade at the rim. Both sides are carefully preserved and fully lustrous, with good contrast. Population: 26 in 64 Cameo, 29 finer (6/12).(#84779)

1882 Seated Dime, PR67 ★ Cameo
Only Three NGC Coins in Higher Grade

3444 **1882 PR67 ★ Cameo NGC.** The 1882 proof Seated Liberty dime claims a mintage of 1,100 pieces, small in absolute terms, but fairly generous for a 19th century proof. This sharply detailed Superb Gem is incredibly well-preserved, with noticeable Cameo contrast between the frosty devices and the reflective fields. The surfaces are blanketed in shades of attractive champagne-gold and cobalt-blue patina. Census: 4 in 67 ★ Cameo, 3 finer (5/12). (#84779)

3445 **1883 PR65 PCGS. CAC.** The well-preserved surfaces of this well-detailed Gem are deeply reflective, under spectacular shades of cerulean-blue and champagne-gold patina. Population: 41 in 65, 41 finer (6/12).
From The Color Collection.(#4780)

1884 Dime, Lightly Contrasted PR67

3446 **1884 PR67 PCGS Secure.** The business strike 1884 Seated dime production was plentiful at more than 3.3 million pieces, but only 875 proofs were struck, down considerably from some earlier proof mintages in the series. This Superb Gem proof offers moderate surface contrast, mostly brilliant but with an even layer of golden color on each side. The strike is sharp over surfaces that are virtually contact-free. Population: 11 in 67 (1 in 67+), 3 finer (6/12). (#4781)

3447 **1885 PR65 PCGS.** Violet, blue, lavender, and lilac-gold hues prevail on this later proof Seated dime. It is pleasingly detailed overall, if a trifle soft on Liberty's head, and has excellent surface quality. Population: 54 in 65, 38 finer (6/12).(#4782)

3448 **1886 PR65 PCGS.** Gold-orange and violet hues are roughly concentric on the obverse and more dappled on the reverse. A luminous Gem proof with strong all-around eye appeal. Population: 34 in 65, 24 finer (6/12).(#4783)

3449 **1886 PR65 Cameo PCGS.** Delicate gold toning resides over fully mirrored fields and lustrous devices on this Gem Cameo proof. Both sides are attractive and appealing with bold design definition. Population: 13 in 65 Cameo, 5 finer (6/12).(#84783)

3450 **1887 PR65 PCGS.** A deeply toned Gem proof exhibiting blue, sea-green, and gold toning that subdues the cameo contrast. Sharply struck. Population: 30 in 65, 10 finer (6/12).(#4784)

3451 **1889 PR65 PCGS.** A well-detailed specimen, with hazy reflective fields, under gray, gold, and blue patina. From a mintage of 711 pieces. Housed in a green label holder. Population: 28 in 65, 20 finer (5/12).(#4786)

3452 **1889 PR66 PCGS.** Green-to-gold and dusky orange shadings are prominent on this Premium Gem proof, which saves its strongest reflectivity for the reverse. Sharply struck and appealing. Population: 14 in 66, 6 finer (6/12).(#4786)

BARBER DIMES

3453 **1892 MS66 NGC. CAC.** Iridescently toned peach-gold and aqua-green with the deepest shades on the reverse. Lustrous and crisply struck with only delicate contact on the cheek. Housed in a prior generation holder. Census: 65 in 66, 22 finer (6/12). (#4796)

3454 **1895 MS64 PCGS.** Deep shades of greenish-gold and violet patina adorn the peripheries of this delightful Choice example, while the well-preserved centers remain mostly brilliant. Population: 31 in 64 (1 in 64+), 27 finer (6/12).
From The Color Collection.(#4806)

3455 **1895-S MS64+ PCGS.** An impressive near-Gem, this scarce Barber dime has frosty silver luster with ivory surfaces and splashes of lovely iridescent toning over part of the obverse. Faint planchet drawing lines are evident on the obverse, and scattered marks appear on both sides. Population: 30 in 64 (2 in 64+), 7 finer (6/12).(#4808)

Gem 1895-S Barber Dime
Only Two Finer Examples at NGC

3456 **1895-S MS65 NGC.** Like many branch-mint issues of the 19th century, the 1895-S Barber dime was not heavily saved by collectors, and high-grade examples are rare in today's market. This impressive Gem exhibits sharp definition on all design elements, with satiny mint luster and wispy shades of gold and lavender-gray patina. Census: 5 in 65, 2 finer (6/12). (#4808)

3457 **1900 MS66 PCGS. CAC.** An amazing Premium Gem, one of only a few exceptional survivors from a mintage of more than 17 million coins. Both sides have light gold toning at the centers with lime-green and iridescent peripheries. Population: 8 in 66, 4 finer (6/12). (#4821)

1907-D Barber Dime, MS66
Only Two Finer Coins at PCGS

3458 **1907-D MS66 PCGS. CAC.** The 1907-D Barber dime claims a substantial mintage of more than 4 million pieces, but few examples were saved, and high grade specimens are rare in today's market. This attractive Premium Gem displays creamy surfaces, with intense satiny mint luster, and sharply detailed design elements. Population: 6 in 66, 2 finer (6/12). (#4843)

3459 **1907-S MS64 PCGS. CAC.** This well-detailed Choice specimen is vividly patinated in shades of lilac, champagne-gold, and lavender-gray, with satiny mint luster underneath. Population: 23 in 64, 8 finer (6/12).(#4845)

3460 **1912 MS66 NGC.** Untoned silvery areas compete with deep aqua and jade areas on this splendid Premium Gem coin, which boasts a bold strike and no mentionable contact, even under a loupe. Census: 33 in 66 (2 in 66+), 9 finer (6/12).(#4860)

1913 Superb Gem Dime
Only Three Others So Graded

3461 **1913 MS67 NGC.** The 1913 dime, with a mintage approaching 20 million pieces, is readily available in all grades through Gem, though Premium Gems become scarce. Superb Gems such as the current offering are seldom encountered. Delicate champagne-gold toning is accented with sky-blue, and sharp detail is seen on the devices. Both sides are immaculately preserved. NGC has seen only four at this level and none finer, while PCGS has graded none above MS66 (6/12). (#4863)

PROOF BARBER DIMES

3462 **1892 PR65 NGC.** This blinding ice-white first-year Gem proof Barber dime appears close to a Cameo designation, but in any case its eye appeal is superb, with a sharp strike and bold reflectivity. Suggestions of color appear only under a loupe. Census: 45 in 65, 66 finer (6/12).(#4875)

3463 **1893 PR64 Cameo PCGS.** This Choice proof 1893 Barber dime displays impressive cameo contrast between the sharply detailed frosty devices and the brightly mirrored fields. Traces of light gold toning are evident, and eye appeal is outstanding. Population: 12 in 64 (1 in 64+) Cameo, 43 finer (6/12).
Ex: Heritage (12/2008), lot 1145; Heritage (4/2011), lot 3336. (#84877)

1894 Dime, PR66 Cameo
Strongly Contrasted

3464 **1894 PR66 Cameo PCGS. CAC.** Eye appeal is over and above what is expected for the grade level. The fields are deeply reflective and glassy with strongly contrasting mint frost over the devices. The obverse is completely brilliant, the reverse nearly so. A couple of luster scrapes are all that prevent an even higher grade. Population: 16 in 66 (1 in 66+) Cameo, 2 finer (6/12). (#84878)

3465 **1895 PR64 Cameo PCGS.** The design elements of this impressive Choice proof show razor-sharp definition and rich mint frost that contrasts boldly with the deeply reflective fields. The surfaces are graced by delicate shades of green and lavender patina. Population: 15 in 64 Cameo, 37 finer (6/12).(#84879)

3466 **1895 PR64 Cameo PCGS. CAC.** There is extra date pressure on the proof dimes from 1895 because of the scarcity of high-grade business strikes. The deep, glassy fields seen here contrast sharply with the frosted devices. Light, mostly peripheral toning on each side. Population: 15 in 64 Cameo, 37 finer (6/12). (#84879)

3467 **1895 PR66 Cameo PCGS. CAC.** A hint of gold patina visits this crisply struck and exemplary proof dime. Perfect aside from a solitary tiny fleck at 10 o'clock at the reverse. Just 880 proofs were struck.(#84879)

3468 **1895 PR64 Ultra Cameo NGC. CAC.** Profound reflectivity is a match for the thick frost on this near-Gem, and the result is an outstanding Ultra Cameo effect. Gleaming silver-white surfaces show minor faults that are trivial in the context of the overall eye appeal. This piece and a remarkable PR67 Ultra Cameo are the only two with the top designation in the NGC Census (6/12). (#94879)

3469 **1896 PR65 NGC.** The obverse of this Gem proof exhibits an iridescent blend of blue, violet, and gold, with deep gunmetal-blue toning over the entire reverse. Census: 37 in 65, 62 finer (5/12). (#4880)

1896 Dime, PR67 Cameo
Wonderfully Contrasted Example

3470 **1896 PR67 Cameo NGC.** This incredible Superb Gem Barber dime exhibits razor-sharp definition on the frosty design elements that seem to float on liquid reflective fields. The brilliant centers yield to shades of champagne-gold patina at the peripheries. Eye appeal is tremendous. Census: 10 in 67 Cameo, 2 finer (5/12). (#84880)

3471 **1897 PR66 Cameo PCGS.** Only 731 proof Barber dimes were struck in 1897, and Premium Gems with cameo contrast are rare. This specimen is lightly toned in attractive shades of gold, with frosty, sharply detailed devices set against deeply reflective fields. Population: 21 in 66 (3 in 66+) Cameo, 12 finer (6/12).
Ex: Heritage (7/2011), lot 3446.(#84881)

1897 Barber Dime, PR68 Cameo
None Certified Finer

3472 **1897 PR68 Cameo NGC.** Of the 731 proofs struck in 1897, this is one of the finest. The fields are deeply mirrored, as expected, and the devices noticeably frosted. The combination gives the desired cameo effect across both sides. Light golden and ice-blue toning is seen over each side, speckles here and smoothly textured there. An interesting, high-grade type piece. Census: 3 in 68 Cameo, 0 finer (6/12). (#84881)

3473 **1897 PR65 Deep Cameo PCGS.** Profound contrast between the thick, frosted devices and the exceptionally deep fields. Most of each side is brilliant with the exception of pale golden peripheral color. Population: 3 in 65 Deep Cameo, 2 finer (6/12). (#94881)

1898 Barber Dime, Richly Toned PR67

3474 **1898 PR67 PCGS.** Deep forest-green patina consumes the obverse. The reverse displays plum-mauve, stone-gray, and jade-green. This razor-sharp Superb Gem is immaculate and an ideal representative of the Barber type within a collection of originally toned proofs. A meager 735 proofs were produced. (#4882)

3475 **1898 PR65 Cameo NGC.** This delightful Gem proof Barber dime displays the coveted Cameo contrast between the frosty design elements and the deeply mirrored fields. A few hints of gold and violet toning accent the well-preserved surfaces. Census: 11 in 65 Cameo, 51 finer (5/12).(#84882)

3476 **1898 PR66 Cameo NGC.** Excellent contrast is evident on both side of this lovely Premium Gem Cameo proof with brilliant silver surfaces and no evidence of toning. A minuscule luster break is noted on Liberty's cheek. Census: 19 in 66 Cameo, 32 finer (5/12). (#84882)

3477 **1899 PR65 Cameo PCGS. CAC.** Gorgeous luster runs across both sides of this Gem proof, with intense field-device contrast and rim toning in amber complementing quicksilver centers. Population: 13 in 65 (2 in 65+) Cameo, 12 finer (6/12).(#84883)

1899 Barber Dime, PR66 Cameo
Conditionally Elusive

3478 **1899 PR66 Cameo PCGS.** This Barber dime issue is seldom seen in such high grade or with Cameo surfaces. This Premium Gem displays deep mirrorlike fields that complement nice mint frost over the devices. A light shade or two of gold separates this piece from full brilliance. A curving contact on Liberty's cheek is probably the grade-limiter. Population: 9 in 66 (2 in 66+) Cameo, 3 finer (6/12). (#84883)

3479 **1900 PR65 Cameo PCGS.** Faint apricot toning visits this fully struck and well preserved Gem. The portrait is thickly frosted, and the wreath also demonstrates contrast with the reflective reverse field. Population: 11 in 65 Cameo, 24 finer (6/12). (#84884)

1900 Gem Proof Deep Cameo Dime
Popular Turn-of-the-Century Date

3480 **1900 PR65 Deep Cameo PCGS.** While only a moderately scarce date among proof Barber dimes, the 1900 has an enduring popularity as the first date of the 20th century. This is a lovely example that has bright, untoned centers that are surrounded by deep golden-brown peripheral color. The devices display stark contrast set against the deep mirrors in the fields. Population: 2 in 65 Deep Cameo, 3 finer (6/12). (#94884)

3481 **1903 PR65 NGC.** The surfaces are highly reflective and gold-tinged front and back, with deeper claret and copper hues near the rim. This piece appears close to a Cameo designation, particularly on the reverse. Census: 44 in 65, 45 finer (6/12).(#4887)

3482 **1903 PR65 PCGS.** Intensely toned with grass-green rim toning that swiftly gives way to blue-violet. The fields on each side remain lustrous and even flashy through the patina. Population: 37 in 65 (1 in 65+), 27 finer (6/12).(#4887)

3483 **1904 PR65 PCGS. CAC.** Pinkish-purple centers cede to aqua at the rims on each side of this Gem proof 1904 dime, still reflective despite the moderately intense color. The well-struck surfaces appear unmarked, even under a loupe. Population: 39 in 65, 36 finer (6/12).(#4888)

3484 **1904 PR64 Cameo PCGS.** Boldly contrasted for the time and primarily silver. The most prominent toning is an orange-brown splash centered on the second A of AMERICA. Population: 9 in 64 Cameo, 8 finer (6/12).(#84888)

3485 **1905 PR65 Cameo PCGS Secure.** This fully struck pearl-gray Gem is pristine save for a few minor flecks near the date. Population: 15 in 65 (1 in 65+) Cameo, 16 finer as Cameo, none certified as Deep Cameo (6/12).(#84889)

1905 Barber Dime, PR67 Cameo
Among the Finest Certified

3486 **1905 PR67 Cameo NGC.** One of 727 proofs struck, of which a minority exhibit Cameo contrast of finely frosted reliefs and deepest mirror fields. Razor-sharp detail extends to the smallest design features of Liberty's laurels and the leaves comprising the reverse wreath. Some researchers have placed the 1905 among the more collectible of the proof Barber dates but this is emphatically not the case with Cameo examples. Census: 8 in 67 Cameo, 1 finer (5/12). (#84889)

3487 **1906 PR64+ Cameo PCGS.** Pale blue-violet outer toning also has a hint of gold. Minimally patinated interiors supply above-average contrast, particularly on the portrait side. Population: 10 in 64 (1 in 64+) Cameo, 17 finer (6/12).(#84890)

3488 **1909 PR65 PCGS.** Dappled pink, lavender, and blue daubs proceed from each side of this attractive and well-struck Gem proof, which retains moderate contrast and reflective mint luster underneath the patina. A nice coin for the grade. Population: 31 in 65, 46 finer (6/12).(#4893)

3489 **1909 PR65 Cameo NGC.** Gold-to-green tints appear at the margins, but the interiors are almost exclusively silver. The coin's considerable field-to-device contrast is more prominent on the obverse. Census: 6 in 65 Cameo, 9 finer (6/12).(#84893)

1911 Barber Dime, PR67
Fabulous Multicolored Toning

3490 **1911 PR67 PCGS. CAC.** Let's assume extraordinarily clean surfaces are a given for a PR67. What sets this coin apart from the other 10 PR67s certified by PCGS is the rich, multicolored toning. The obverse truly is multicolored, not just two or three shades, but colors too numerous to list in a catalog description. The reverse is a bit less so with blue and violet the dominant colors. The fields are bright and highly reflective, serving to further enhance the splendid iridescence. The devices are also noticeably frosted and contrast against the depth of mirroring in the fields, but with the colors present this is not immediately apparent. (#4895)

3491 **1911 PR65 Cameo PCGS. CAC.** A melange of soft ice-blue, yellow-gold, lavender, and reddish-gold visits each side of this Gem Cameo, and an exacting strike delivers sharp definition to the design features. A fine linear mark is noted between the date and U of UNITED. *Ex: Heritage (11/2011), lot 3419.*(#84895)

TWENTY CENT PIECES

3492 **1875 MS62 PCGS.** Only 36,900 twenty cent pieces were struck at the Philadelphia Mint in 1875. This attractive MS62 specimen displays well-detailed design elements and brightly lustrous surfaces, with traces of green and blue toning.(#5296)

3493 **1875-CC XF45 NGC.** A lightly circulated but minimally marked stone-gray example of this popular Carson City type issue. Much scarcer than its San Francisco counterpart.(#5297)

3494 **1875-CC XF45 PCGS. CAC.** The 1875-CC is the only collectible Carson City issue in this short-lived denomination. It shows problem-free wear and subtle olive-gold flush on both sides. A pleasing Choice XF example.
From The Norva Collection.(#5297)

3495 **1875-CC AU58 PCGS. CAC.** A generally lustrous borderline Uncirculated Carson City type coin. Sea-green and steel-blue toning graces both sides. The strike is a little above average with weakness on Liberty's leg, the top of the left facing wing, and the lower obverse border. Minor marks are confined to the field above the eagle.(#5297)

3496 **1875-CC — Improperly Cleaned — NGC Details. Unc.** Essential to a Carson City type set, the 1875-CC is in demand even in well circulated condition. This example is unworn but lackluster from dipping. Nicely struck and mark-free with hints of golden-brown at the margins.

1875-CC Twenty Cent Piece, MS62
Lustrous and Deeply Toned

3497 **1875-CC MS62 PCGS.** This only-collectible-CC-twenty cent piece is better struck than most with strong definition on Liberty's head and the top of the eagle's wing. The lustrous surfaces are partially subdued by deep gray-rose toning that covers each side. There are no obvious or detracting abrasions on either side. (#5297)

1875-CC Twenty Cent Piece, MS62+
Popular Mintmark Type Coin

3498 **1875-CC MS62+ NGC.** The twenty cent denomination was only minted for two years at the Carson City Mint, and the 1876-CC is a classic rarity, making the 1875 issue the only realistic choice for mintmark type collectors. This high-end MS62 specimen is well-detailed and lustrous, with only minor signs of contact. (#5297)

Select 1875-CC Twenty Cent Piece
Important Carson City Type Issue

3499 **1875-CC MS63 NGC.** The 1876-CC twenty cent piece is a major rarity, leaving the 1875-CC as the only reasonable choice for Carson City type collectors seeking an example of this odd denomination. This attractive Select specimen displays well-detailed design elements and satiny mint luster, under powdery gold and lavender toning. (#5297)

Choice 1875-CC Twenty Cent Piece
Sought-After CC-Mint Type Issue

3500 **1875-CC MS64 PCGS.** A few streaks of dark amber toning mix with shades of gold and lavender-gray on the well-preserved surfaces of this pleasing Choice twenty cent piece. The design elements are well-detailed, with a touch of softness on the eagle's breast. The 1875-CC claims a mintage of 133,290 pieces, and is much more difficult to locate than its San Francisco counterpart. PCGS has graded only 24 numerically finer coins (6/12). (#5297)

3501 **1876 MS61 PCGS.** At first glance the surfaces on this 1876 twenty cent appear battleship-gray, but a strong lamp reveals glints of aqua, copper, and orange on each side, attractive but still somewhat impeding the mint luster. There are no mentionable marks.(#5299)

PROOF TWENTY CENT PIECES

1875 Twenty Cent Piece, PR67 Cameo
Numerically Tied for Finest

3502 **1875 PR67 Cameo NGC.** This first-year issue of the twenty cent piece had a remarkably high mintage of 2,790 proofs. Obviously most were not preserved as well as this Superb Gem, and most never had the Cameo finish seen on this piece. Only two other pieces have been so graded by NGC and there are two Star coins in this grade. There are no Plus coins, and no Ultra Cameo pieces have been certified. There is one non-Cameo PR67 that has been graded (6/12). This piece is similar to the Star coins we have handled, all of which show rich red and cobalt-blue toning around the margins. This Superb example also has red-tinted centers with bright, sparkling mirrored fields. (#85303)

Select Proof 1877 Twenty Cent Piece
Only 510 Pieces Struck

3503 **1877 PR63 ANACS.** One of just 510 pieces struck for this lowest-mintage proof twenty cent issue, and a richly toned beauty at that. Bold blue-green outer toning and rich rose-gray centers overwhelm the light hairlines and similar concerns affecting the mirrored fields. Housed in a small-format ANACS holder.
Ex: Boston ANA Signature (Heritage, 8/2010), lot 4629. (#5305)

1878 Twenty Cent Piece, PR55
Final Proof-Only Issue

3504 **1878 PR55 PCGS. CAC.** The short-lived twenty cent denomination was discontinued after 1878, with a final proof-only mintage of just 600 examples. The issue is scarce-to-rare in all grades today. This well-detailed specimen shows signs of light circulation, with dull proof surfaces under attractive shades of blue and gray patina.
From The Norva Collection. (#5306)

Fully Struck Gem 1878 Twenty Cent

3505 **1878 PR65 PCGS.** Silver luster mingles underneath a mottled layer of patina on this Gem proof 1878 twenty cent, the last year of the strange and unpopular denomination. The centers offer copper hues, which transition intermittently to aqua at the rims. The strike is full throughout. Population: 25 in 65, 12 finer (6/12). (#5306)

Gem Proof 1878 Twenty Cent
Dark Multicolor Toning

3506 **1878 PR65 PCGS.** The twenty cent denomination came to an end in 1878, with a final proof-only production of just 600 pieces. This attractive Gem exhibits sharply detailed design elements that show some undesignated elements of contrast with the mirrored fields. Darkly toned in shades of grayish-gold and cerulean-blue. Population: 25 in 65, 12 finer (6/12). (#5306)

EARLY QUARTERS

1796 B-1 Quarter, VF Details
Scarcer of Two Varieties

3507 **1796 — Repaired, Whizzed — NGC Details. VF. B-1, R.4.** For a coin that is such a staple today, the quarter denomination got off to a slow start. While other silver denominations such as the half dollar and dollar were first struck in 1794, the quarter did not make its debut until 1796, when it had a paltry mintage of 6,146 pieces total, and there was no encore until 1804. By that time, the standard reverse device for silver had changed from an eagle-in-a-wreath to a larger heraldic eagle behind a shield, and so the quarters of 1796 form a one-year type. This is the scarcer B-1 variety that is identifiable by the date being more centered than the "High Date" B-2. The surfaces are light gray overall with underlying brightness from whizzing. The devices are surrounded by deeper, almost charcoal-gray patina around the devices. (#5310)

1804 B-1 Quarter, Fine Details
Obverse Lamination

3508 **1804 — Planchet Flaw — Genuine PCGS. Fine Details. B-1, R.4.** The Low 4 distant from the drapery identifies this variety. Minor planchet lamination defects are evident at the right obverse of this pleasing piece. Both sides have medium gray fields, deepening to navy-blue at the borders, with lighter tan-gray devices. A small imperfection is noted on the reverse rim at 11 o'clock. (#5312)

3509 **1806/5 VG10 PCGS. B-1, R.2.** This mostly stone-gray early quarter has glimpses of olive and charcoal near the rims. There are no consequential marks and the peripheral legends are bold.
From The Norva Collection.(#5315)

3510 **1806 Fine 12 PCGS. CAC. B-9, R.1.** Tompkins Obverse Die State 2. The die crack runs from the rim through the 1 in the date upward into the lower hair. This is a medium steel-gray piece with heavy, even wear and a few grade-consistent scrapes on each side.
From The Norva Collection.(#5314)

3511 **1806 VF20 PCGS. B-3, R.1.** Tompkins Die State 2/1. Stone-gray, almond-gold, and forest-green grace this unmarked Draped Bust Quarter. The centers were softly impressed but peripheral elements are well brought up.(#5314)

BUST QUARTERS

Uncirculated 1815 Quarter, B-1
Enigmatic 'E' Counterstamp

3512 **1815 "E" Counterstamp MS61 NGC. B-1, R.1.** Since the 1870s, numismatists have been confounded by the "E" or "L" counterstamps sometimes found on 1815 and 1825 quarters. All four combinations are known, but the 1815 "E" is the most encountered. The most credible theory states the counterstamps were placed by the Harmony commune in Pennsylvania circa 1832 to divide wealth between two competing factions. The present example has peripheral chestnut toning, smooth surfaces, and ample luster. (#5321)

3513 **1818/5 VF30 PCGS. B-1, R.2.** Autumn-gold and electric-blue congregate at the margins, though the rest of the present luminous midgrade quarter displays lighter golden-gray patina. Impressively free from relevant marks.
From The Norva Collection.(#5323)

3514 **1819 Small 9 VF25 PCGS. CAC. B-3, R.1.** Medium golden-brown and stone-gray toning enriches this problem-free VF type representative. A later die state with a diagonal die crack through the bust tip and the 1 in the date.
From The Norva Collection.(#5325)

3515 **1820 Small 0 VF30 PCGS. CAC. B-4, R.2.** A richly toned representative with orange and apple-green shades at the margins and gunmetal-gray patina on the centers. The upper-left obverse displays moderate marks.
From The Norva Collection.(#5328)

3516 **1821 VF35 PCGS. B-3, R.2.** A later die state with a radial crack through star 12. Navy-blue and autumn-gold margins accompany cream-gray fields and devices. A minimally abraded Choice VF example.
From The Color Collection.(#5331)

3517 **1822 VF25 PCGS. B-1, R.2.** Generally cream-gray with occasional shades of charcoal toning. Most of the plumage detail is present, though the curls display wear. Thin marks near star 2 and the R in PLURIBUS are unimportant to the grade.
From The Norva Collection.(#5332)

1822 B-2 Quarter, VG10
Blundered Reverse, 25 over 50C

3518 **1822 25/50C VG10 PCGS. B-2, R.4.** The engraver started entering 50 C on this reverse die and quickly realized his mistake, repunching a 25 over the 50 to create the proper 25 C denomination. Production must have been small, as survivors are scarce in all grades with only 50 to 60 examples known. Mint records show a production of 64,080 quarters in 1822, and it is likely that less than 10% of those were from the B-2 die pairing. This lovely specimen shows smooth deep gray fields with lighter gray-tan devices. Population: 3 in 10, 8 finer (6/12). (#5333)

3519 **1824/2 VG8 PCGS. B-1, R.3.** The only 1824 variety is a popular overdate that adds demand for the limited number of surviving examples. Both sides have mostly light silver-gray devices with deep steel-toning splashed in the fields.(#5335)

1824/2 Capped Bust Quarter, B-1, VF30
Low-Mintage Better Date

3520 **1824/2 VF30 PCGS. B-1, R.3.** The mintage of 1824/2 Capped Bust quarters was not recorded, but Steve Tompkins speculates that the 16,000 pieces delivered on December 31, 1823 might represent the entire production of 1824-dated coins. Only one die variety is known for the date. This evenly worn specimen retains all major design features in outline, and most of the interior detail is still present. The surfaces display pleasing gray, gold, and steel-blue patina. Population: 10 in 30, 45 finer (5/12).
From The Norva Collection. (#5335)

Choice VF 1824/2 Quarter, B-1

3521 **1824/2 VF35 PCGS. CAC. B-1, R.3.** Deep gunmetal-gray toning encompasses unblemished surfaces. The eagle's plumage is well defined, though the wingtips and claws exhibit wear. The sole 1824-dated die variety. Very scarce, although overshadowed by its rare and famous 1823 predecessor. Population: 10 in 35, 35 finer (6/12). (#5335)

3522 **1825/4/2 XF45 PCGS. B-2, R.2.** Easily the most plentiful of three known varieties of 1825 quarters, each from a different overdate obverse. This piece is highly attractive despite scattered marks. Traces of luster are still visible beneath the deep blue, gray, and gold toning. Scattered marks are consistent with the grade.
From The Norva Collection.(#5336)

3523 **1825/4/3 AU53 PCGS. B-2, R.2.** This is the most commonly seen 1825 quarter variety and it is usually available in nearly any grade a collector could want. Both sides of this attractive AU specimen have frosty silver luster with brilliant, untoned surfaces, showing faint tan on the slightly worn design high points. A lovely example for a specialist, or date or type collector.(#5336)

3524 **1828 VF35 PCGS. CAC. B-1, R.1.** Deep gunmetal-gray and forest-green toning encompasses this minimally abraded Choice VF Bust quarter. The curls and wingtips show wear but ample plumage is retained.
From The Norva Collection.(#5342)

3525 **1831 Small Letters AU55 PCGS. CAC. B-4, R.1.** Golden-brown and gunmetal-blue patina embraces this lightly circulated Bust quarter. Luster shimmers from design recesses and no marks merit mention save for a small cluster beneath Liberty's jaw. (#5348)

3526 **1836 AU55 NGC. B-3, R.1.** Nicely pronounced, diagnostic die cracks appear on the obverse. Silver-gray color appears at the centers, while the peripheries are toned to blue and gold. A few trivial marks are evident on the obverse, including minuscule scratches below the eye.(#5355)

SEATED QUARTERS

3527 **1838 No Drapery AU53 PCGS.** A bluntly struck but minimally worn No Drapery Seated quarter with generous luster through the fields. Interiors have rose-to-violet patina, while the margins are green-to-gold.(#5391)

High-End Near-Gem 1838 Seated Quarter
Two-Year No Drapery Subtype

3528 **1838 No Drapery MS64 PCGS. CAC.** The year 1838 saw the last of the Capped Bust quarters, made to the extent of 366,000 pieces before being superseded by the new Seated Liberty design of the No Drapery subtype, which would last only through 1840. Philadelphia would make 466,000 of the new quarters in this transitional year. This near-Gem example displays much mint frost on both sides amid generous luster over surfaces that are still mostly untoned, save for a hint of gold. Few marks appear on either side, and this piece offers high-end eye appeal — a coin that would not easily be improved technically or aesthetically. Population: 32 in 64 (1 in 64+), 6 finer (5/12). (#5391)

3529 **1841 AU53 PCGS.** Traces of mint luster shine beneath the dark gray and blue toning on this well-detailed and lightly circulated Seated Liberty quarter. Population: 1 in 53, 29 finer (6/12). (#5399)

1842-O Small Date Quarter, VF35
Original Surfaces

3530 **1842-O Small Date VF35 PCGS. CAC.** The Small Date 1842-O quarter is significantly scarcer than its Large Date counterpart. It is very scarce in AU and Uncirculated condition, and this Choice VF represents excellent value for the collector of this interesting series. The surfaces are completely original, showing deep gray surfaces with pale gray accents over the high points. There are no marks worthy of mention on either side. Population: 3 in 35, 7 finer (5/12).
From The Norva Collection. (#5403)

3531 **1843-O Large O Fine 12 PCGS.** Only one die marriage is known of this scarce variety. The difference in the size of the mintmark is obvious. The deep blue-gray surfaces are accented by light reddish patina over the devices.(#395927)

3532 **1847-O VF35 PCGS.** The 1847-O quarter is scarce in all grades, and always flatly struck on Liberty's head, as here. This Choice VF piece displays prevailing gray color with dabs of pink and aqua on the obverse. The reverse shows a few minor scrapes and a network of interesting die cracks indicating a long-in-use die. Population: 6 in 35, 24 finer (6/12).
From The Norva Collection.(#5411)

1849-O Quarter, VF30
Low-Mintage and Condition Rarity

3533 **1849-O VF30 PCGS. CAC.** The mintage of the 1849-O is estimated at only 16,000 pieces. Its actual production number was rolled into the mintage for the 1850-O, thus making the mintage an educated guess. It is scarce in all grades, and progressively more so in AU and finer condition. This is a problem-free example whose surfaces are deep gray with sharply contrasting, almost-brilliant accents over the high points of the design.
From The Norva Collection. (#5414)

3534 **1851-O VF25 PCGS.** Produced in the meager extent of 88,000 pieces, the 1847-O quarter is usually seen well-circulated. This VF25 piece shows grayish-gold, attractive surfaces with the moderate wear expected but no singular marks. Population: 4 in 25, 21 finer (6/12).
From The Norva Collection.(#5418)

3535 **1853 Arrows and Rays MS62 PCGS.** A luminous Mint State example of the one-year type, softly struck on the obverse stars but with decent all-around eye appeal. Faintly gold-gray surfaces show a few small dots and dashes of charcoal patina.(#5426)

1853 Quarter, MS64
Arrows and Rays
Single Year Type Coin

3536 **1853 Arrows and Rays MS64 PCGS.** A dusky silver-gray example of this one-year type, solidly struck and impressively devoid of abrasions. The weight of the half dime through half dollar was reduced in 1853 to return the denominations to circulation. Arrows and rays were added to distinguish the new-tenor quarters and halves from earlier 1853 strikes, though the latter feature was dropped for the 1854 and later issues. (#5426)

1853 Arrows and Rays Quarter
Nearly Brilliant MS64 Example

3537 **1853 Arrows and Rays MS64 PCGS.** While the Arrows and Rays type was only produced for one year, collector demand for this issue is partially satisfied by the considerable mintage of 15.2 million pieces. This mintage, of course, was because the new subsidiary coinage contained a slightly diminished amount of silver, which necessitated flooding the channels of commerce with the new coins. This is a brightly lustrous example that is almost completely untoned. Sharply struck in most areas and devoid of any mentionable abrasions. (#5426)

3538 **1854-O Huge O Good 6 NGC. Briggs 1-A, FS-501.** The uncommonly large New Orleans mintmark is oval and broad with a narrow, tall center. Much scarcer than its slender Large O counterpart, despite an unusual selection of the variety in the present auction. The peripheral legends are readable on this well circulated stone-gray example.(#5434)

≠

1854-O Arrows Quarter, VF25
Rare Huge O Variety

3539 **1854-O Huge O VF25 PCGS. Briggs 1-A, FS-501.** A moderately worn slate-gray representative of this well-known *Guide Book* variety. On the reverse, the gargantuan mintmark affects the R of QUAR and the D of DOL, an important diagnostic. None of the small, scattered handling marks visible on this example distract. Population: 2 in 25, 22 finer (6/12). (#5434)

Rare Huge O 1854-O Quarter
XF Sharpness

3540 **1854-O Huge O — Improperly Cleaned — NGC Details. XF. Briggs 1-A, FS-501.** It is an exaggeration to claim that the mintmark resembles a Yap stone, but it is crude and oversized. Philadelphia made all dies in the 19th century, and presumably forgot to enter the mintmark prior to shipment to New Orleans, where the mintmark was likely entered by hand on the reverse die as an expediency. A faintly hairlined cream-gray example with pleasing sharpness and one small mark near the AM in AMERICA. (#5434)

3541 **1856-S VF30 PCGS.** This midrange piece is largely medium-gray but has a few reddish-orange areas, most notably at the right obverse rim. Lightly abraded overall with a few pinscratches in the fields around Liberty. Despite a mintage of more than a quarter-million pieces, the 1856-S quarter is a condition rarity at the VF30 level. Population: 4 in 30, 32 finer (6/12).(#5440)

1857 Quarter, Toned and Semireflective MS67 ★
Wonderful No Motto Type Coin

3542 **1857 MS67 ★ NGC.** Splashes of electric-blue and orange-gold dominate this shimmering and carefully preserved Superb Gem. The stars and dentils are needle-sharp, although the arrow fletchings and Liberty's chest shows moderate incompleteness of strike. Both sides show considerable field reflectivity. Struck from clashed dies. Even though the 1857 quarter dollar is considered available, Superb Gems are seldom encountered. Census: 20 in 67 (1 in 67+), 1 finer (5/12).
Ex: Central States Signature (Heritage, 5/2005), lot 6861, which realized $8,050. (#5442)

1858-S Quarter Dollar, VF35
Early S-Mint Key

3543 **1858-S VF35 PCGS.** Deep gray-brown and iridescent toning masks a few trivial hairlines and other handling marks on this Choice VF specimen. The obverse is nicely detailed and the reverse is fully XF. Here is an extremely important opportunity for the specialist to acquire a key issue that seldom appears in finer grades. Population: 5 in 35, 24 finer (6/12). (#5447)

1859-S Quarter, Original VF30

3544 **1859-S VF30 PCGS. CAC.** The 1859-S quarter is unaccountably scarcer than its mintage of 80,000 pieces would indicate, and as Larry Briggs points out in his series reference: "Most ... seem to have a problem of some sort." This is an evenly worn example, but there are a couple of scrapes on the neck and head of Liberty. (#5450)

1860-S Quarter, VF35
Conditionally Rare

3545 **1860-S VF35 PCGS.** One of the important rarities in the San Francisco series of Seated quarters, this Choice VF survives from a mintage of 56,000 coins, nearly all that spent countless years in circulation. The western economy was starved for small change during the gold rush, and nearly all silver and small gold coins minted in San Francisco entered circulation and remained in use for many years.

The average certified grade of the 1860-S is only VF20. This piece has pleasing medium and dark gray patina with a few splashes of lighter silver-gray on the devices. Population: 1 in 35, 4 finer (6/12). (#5453)

Outstanding 1861 Quarter, MS66

3546 **1861 MS66 NGC.** Type Two Obverse and Reverse. A magnificent Premium Gem from the first year of the Civil War. This coin displays vibrant luster and razor-sharp definition on all design elements. The surfaces are mostly brilliant, with just a touch of champagne-gold toning near the rims. Only trivial field grazes deny numismatic perfection. Census: 10 in 66, 3 finer (6/12). (#5454)

3547 **1861-S — Improperly Cleaned — NGC Details. XF.** Bands of artificial-looking but not unattractive color bathe both sides of this coin, a pinkish-orange intermingled with forest-green. Some minor planchet roughness appears, but there are few singular marks for the grade level. XF examples of the 1861-S are rare, a low-mintage issue of 96,000 pieces.(#5455)

3548 **1862-S XF45 PCGS.** Scarce even in XF, only 67,000 pieces were struck at a time when many U.S. silver and gold coins were exported or melted. Light, even wear is seen over each side. The only mark of note is actually a small planchet flake on the cheek of Liberty. Gray patina with deeper olive margins.(#5457)

1864-S Quarter, VF25
Scarce, Low-Mintage Issue

3549 **1864-S VF25 PCGS.** The 1864-S is a much sought-after issue in the Seated quarter series. The mintage of 20,000 pieces explains much of its popularity and scarcity in all grades. This example is evenly worn over each side and the surfaces are light gray with deeper gray accents around the peripheries. Problem-free with no unsightly marks.
From The Norva Collection. (#5460)

1864-S Seated Liberty Quarter, XF40
Low-Mintage Civil War Era Date

3550 **1864-S XF40 PCGS.** Only 20,000 Seated Liberty quarters were struck at the San Francisco Mint in 1864, making the date scarce-to-rare in all grades today. This lightly worn XF specimen displays pleasing gray patina, with a few traces of mint luster on the devices. Population: 5 in 40, 8 finer (6/12). (#5460)

1865 Quarter, MS63
Elusive Mint State Survivor

3551 **1865 MS63 PCGS.** The upright of the 1 is lightly repunched. Sharply struck and satiny with tobacco-brown and cobalt-blue toning across the margins. A scant 58,800 pieces were struck for this Civil War issue, and most survivors are noticeably worn. Population: 9 in 63, 6 finer (6/12). (#5461)

3552 **1866 Motto AU50 PCGS. CAC.** The 1866 Motto quarter is a low-mintage rarity and an issue in great demand, struck in the amount of only 16,800 pieces. The reverse here, as always on business strikes, shows much flatness through the centers, particularly on the reverse. This piece is, however, only lightly worn and retains much luster over orange-gold surfaces. Population: 1 in 50, 26 finer (6/12).
From The Norva Collection.(#5468)

3553 **1866-S Fine 12 NGC.** The 1866-S Motto quarters have a S mintmark on the reverse that was reused on the 1867-S and 1869-S (but not on the 1868-S), with a large, crisscrossing die scratch through the lower loop. This is a problem-free piece — unusual in itself — that merely shows extensive circulation wear. (#5469)

3554 **1868 VF35 PCGS. CAC Gold Label.** The CAC gold label on this coin should serve to focus collector attention, but the coin is especially appealing, showing no mentionable contact on either side and a wealth of remaining detail on grayish-gold surfaces.
From The Norva Collection.(#5472)

3555 **1869 XF40 PCGS. CAC.** Lightly circulated and deeply toned. Denim-gray patina overall with a darker gunmetal-blue hue that is most prominent along the lower obverse and above the ST in STATES on the reverse. Population: 7 in 40, 15 finer (6/12). (#5474)

3556 **1869-S VF35 PCGS.** The silver-gray surfaces show deeper charcoal accents around some of the peripheral devices. The reverse die was used first in 1866, again in 1867, and third for this issue, with a filled lower loop on the mintmark. The surfaces show moderate wear but no singular marks. Population: 9 in 35, 24 finer (6/12).(#5475)

3557 **1870 AU58 PCGS.** Good field-device contrast appears on both sides of this lightly circulated silver-white piece, from a low mintage of 86,400 coins. A loupe reveals some light field marks along with a good strike. Population: 6 in 58, 19 finer (6/12).(#5476)

1871 Seated Quarter, MS64
Underrated Issue in High Grade

3558 **1871 MS64 NGC. CAC.** The 1871 Seated Liberty quarter is a highly underrated issue, especially in high grade. This attractive Choice example offers sharply detailed design elements and vibrant mint luster, with well-preserved surfaces that show just a few wisps of gold and pink toning. Census: 6 in 64, 6 finer (6/12). (#5478)

3559 **1871-S VF20 PCGS. CAC.** Silver-gray, gold-tinged surfaces cede to charcoal-gray around the device edges. Moderate wear is consistent with the grade, but much eye appeal remains, and no mentionable marks appear. Nice for the grade.
From The Norva Collection.(#5480)

3560 **1873 Closed 3 VF20 PCGS.** The pinkish-gray surfaces show considerable grade-consistent wear on this piece, from a mintage of 40,000 coins. A loupe reveals a few scattered abrasions, none overly severe. Population: 1 in 20, 24 finer (6/12).(#5484)

1873 Closed 3 No Arrows Quarter, VF30
Scarce, Heavily Melted Issue

3561 **1873 Closed 3 VF30 PCGS. CAC.** The Closed 3 No Arrows quarter from 1873 is actually much scarcer than its already low mintage of 40,000 pieces would indicate as a significant number were melted. The surfaces of this coin display even light gray-rose patina with a few light, but individually insignificant marks on each side. *From The Norva Collection.* (#5484)

3562 **1876 MS64 PCGS. CAC.** Type Two Reverse. A lustrous golden-gray Choice Seated type coin. The strike is good and the obverse field displays only wispy abrasions.(#5501)

3563 **1876 MS65 PCGS.** Type Two Reverse. This well-detailed Gem shows just a touch of softness on the stars, with satiny mint luster and attractive shades of pale gold and blue patina. Population: 45 in 65 (1 in 65+), 28 finer (6/12).(#5501)

3564 **1876 MS65 PCGS. CAC.** Type Two Reverse. The golden-tan and stone-gray toning is more evident on the obverse than on the reverse. A lustrous and undisturbed Gem. Well struck save for a few star centers.(#5501)

3565 **1876-CC MS64 PCGS.** Type Two Reverse. Large CC. Scattered surface marks are visible beneath blue and iridescent toning on both sides of this lovely near-Gem. Reflective fields, light contrast, and a bold strike add to the eye appeal. An important opportunity for the advanced Seated quarter collector. Population: 48 in 64, 15 finer (6/12).(#5502)

3566 **1877 MS64 PCGS.** This sharply struck near-Gem shows good luster remaining on both sides, which also display bold die clashing. The obverse is silver-white with glints of gold, while the reverse shows sharp cameo contrast amid pinkish-gold color. (#5504)

1878-CC Quarter
The Only PCGS MS64+

3567 **1878-CC MS64+ PCGS. CAC.** The obverse is cracked and the reverse is rusted, suggesting that production was pushed beyond reasonable die life. This beautiful near-Gem has frosty silver luster with a dusting of gold on the obverse, and deeper gold and iridescent toning on the reverse. A sensational example with impressive eye appeal. Population: 62 in 64 (1 in 64+), 26 finer (6/12). (#5509)

3568 **1878-S AU50 PCGS.** The 1878-S is a scarce issue, and even more challenging than its mintage of 140,000 pieces would indicate. Attractive peripheral gold toning with a few splashes of steel are noted on each side of this otherwise light silver-gray example. Population: 2 in 50, 17 finer (6/12).(#5510)

1879 Seated Liberty Quarter, MS66
High-Quality Low-Mintage Issue

3569 **1879 MS66 PCGS.** Only 13,600 Seated Liberty quarters were struck in 1879, but a surprising number of high-grade specimens have survived. This well-detailed Premium Gem shows the typical touch of softness on Liberty's head. The surfaces display a mixture of satiny mint luster and prooflike reflectivity, under light shades of gold and lavender patina. Population: 38 in 66 (1 in 66+), 20 finer (5/12). (#5511)

3570 **1881 MS64 NGC.** Stars 5 through 8 are incomplete, otherwise the strike is bold and the fully lustrous surfaces enveloped in light golden toning. A scarce, low-mintage (12,000 business strikes) issue that appears less frequently in Mint State than in proof. *Ex: ANA Signature (Heritage, 8/2001), lot 5910.* (#5513)

Premium Gem 1884 Seated Quarter
Only 8,000 Examples Struck

3571 **1884 MS66 PCGS. CAC.** The mintage of business-strike Seated Liberty quarters in 1884 was a meager 8,000 pieces, making the date scarce-to-rare in all grades. This sharply detailed Premium Gem displays virtually pristine fields with vibrant satiny mint luster. Population: 22 in 66 (3 in 66+), 9 finer (5/12). (#5516)

1886 Quarter, MS64
Low Business Strike Mintage

3572 **1886 MS64 PCGS.** The low mintage of business strikes explains why so many 1886 quarters exhibit semiprooflike and prooflike fields, as seen here. Each side is mostly brilliant with a few streaks of milky patina evident when closely examined. The strike details are strong in all areas except the top of the head of Liberty. Population: 23 in 64, 24 finer (6/12). (#5518)

1886 Seated Liberty Quarter, MS66
Only Two Numerically Finer Coins at PCGS

3573 **1886 MS66 PCGS.** The 1886 Seated Liberty quarter boasts a low business-strike mintage of just 5,000 pieces. High-grade specimens frequently have prooflike surfaces and have often been incorrectly cataloged as proofs in the past. This spectacular Premium Gem is well-detailed, with a mixture of satiny mint luster and prooflike reflectivity, and traces of light gold toning. Population: 14 in 66 (1 in 66+), 2 finer (5/12). (#5518)

1887 Quarter, MS66
Only 10,000 Pieces Struck

3574 **1887 MS66 PCGS. CAC.** The 1887 continues the low-mintage tradition seen throughout the 1880s with only 10,000 business strikes produced. Early strikes for circulation can be confused with the more common proofs, but the most telltale characteristics for business strikes are weakness of strike on the stars and the horizontal die scratch in the vertical shield lines on the obverse. The fields are moderately reflective on this piece, but also contain a generous amount of cartwheel luster. The surfaces are essentially unmarked, and the centers are almost brilliant with light golden peripheral color. Population: 32 in 66, 4 finer (5/12). (#5519)

3575 **1888 MS66 PCGS. CAC.** From a mintage of just 10,000 pieces, this well-detailed Premium Gem displays vibrant satiny mint luster and attractive greenish-gold toning. Population: 39 in 66, 10 finer (6/12).(#5520)

3576 **1889 MS65 PCGS.** The brilliant centers of this sharply detailed Gem yield to attractive shades of gold at the peripheries. From a mintage of just 12,000 pieces. Population: 37 in 65, 64 finer (5/12). (#5522)

Premium Gem 1890 Quarter
Multicolor Reverse Toning

3577 **1890 MS66 PCGS.** This spectacular Premium Gem has intensely lustrous surfaces with brilliant mint frost. The obverse is mostly untoned, showing peripheral iridescence, and the reverse is deeply toned in rainbow shades. Housed in a green label holder. Population: 21 in 66, 20 finer (6/12). (#5523)

3578 **1891-O Fine 15 PCGS. CAC.** Only 68,000 quarters were struck at the New Orleans Mint in 1891, the last year of the Seated Liberty design. This evenly worn specimen displays pleasing gray patina, problem-free surfaces, and a bold LIBERTY on the banner. Population: 9 in 15, 47 finer (6/12).(#5525)

3579 **1891-O VF20 PCGS. CAC.** Moderate wear appears on each side consistent with the grade, but there is no singular contact and the coloration is a delightful orange-gold with blue and green accents. Population: 6 in 20, 41 finer (6/12).
From The Norva Collection.(#5525)

3580 **1891-S MS65 PCGS. CAC.** Vibrant satiny mint luster shines through attractive shades of gold and lavender toning on this well-detailed Gem. The 1891-S Seated Liberty quarter is seldom encountered in Gem condition. Population: 14 in 65, 6 finer (5/12).(#5526)

PROOF SEATED QUARTERS

1856 Quarter, Attractively Toned PR64
Ex: Pittman

3581 **1856 PR64 PCGS. CAC.** Ex: Pittman. An unknown but small number of proofs were struck of the 1856 quarter. In the 1998 Pittman catalog, Akers estimated that 30 pieces were extant of the 1856 quarter. That is probably still a reliable estimate of survivors. The fields are nicely reflective, even through the significant toning seen on each side. The obverse is light golden with deep blue around the margin, while the reverse is even cobalt-blue. Minimal problems for the grade with only light hairlines evident beneath the toning.
Purchased by John Pittman from Wayte Raymond 5/14/1946 for $25; Pittman II (Akers, 5/1998), lot 1333. (#5552)

1856 Quarter, PR64 Cameo
Very Scarce Pre-1858 Proof Striking

3582 **1856 PR64 Cameo PCGS.** Upright 5. A rare pre-1858 Seated quarter proof, struck in an unknown but presumably small quantity; Larry Briggs put the number at "25+" in his reference. All are of the Upright 5 variety. This silvery piece shows much appeal and blatant contrast despite a few hairlines, scrapes, and other contact in the fields, none of it particularly bothersome. Original russet and steel-blue patina appears around the rims. The reverse appears close to a Deep Cameo designation. Of the couple of dozen proofs believed known of the 1856 quarter, this is one of only four pieces certified in PR64 Cameo by PCGS and none are finer (6/12). (#85552)

3583 **1859 PR64 PCGS.** Only 800 proof Seated Liberty quarters were struck in 1859. This impressive Choice specimen is sharply detailed, with attractive shades of blue and gold toning over the reflective fields. Population: 50 in 64, 12 finer (5/12).(#5555)

Deeply Contrasted 1859 Quarter
PR66 Cameo, Essentially Contact-Free

3584 **1859 PR66 Cameo PCGS. CAC.** The reported mintage for the proof 1859 Seated quarter was 800 pieces, but this untoned, thoroughly contrasted example is clearly among the few finest survivors. The deeply mirrored fields flash against thick mint frost, providing abundant eye appeal. A few linear areas in the planchet that are not level with the rest of the surface, appearing under a loupe, are more typically seen on 19th century aluminum pattern coins than on planchets for silver proofs. Otherwise, this piece is fully struck and essentially devoid of contact. Population: 3 in 66 Cameo, 1 finer (6/12). (#85555)

3585 **1861 PR64 PCGS.** The 1861 proof Seated Liberty quarter claims a generous mintage of 1,000 pieces, but some of these were never distributed and were destroyed after the end of the year. This sharply detailed specimen exhibits deeply reflective fields and a few traces of light gold toning. Population: 30 in 64, 9 finer (6/12). (#5557)

3586 **1862 PR63 NGC.** Darkly toned in shades of azure and green, the deeply reflective fields of this attractive Select proof show noticeable elements of contrast with the sharply detailed devices. Census: 26 in 63, 70 finer (6/12).(#5558)

3587 **1864 PR64 PCGS.** This fully struck specimen displays noticeable cameo contrast, but medium caramel-gold toning precludes any such designation. Carefully preserved and undeniably scarce, since only 470 proofs were struck for this Civil War date. The reverse is minutely die doubled, most evident on the Q in QUAR. Population: 57 in 64, 15 finer (6/12).(#5560)

3588 **1870 PR65 Cameo NGC.** Iridescent shades of champagne-gold and cerulean-blue patina do not obscure the bold contrast between the frosty design elements and the deeply mirrored fields. Census: 9 in 65 Cameo, 6 finer (6/12).(#85569)

1872 Gem Proof Quarter
Brilliant and Moderately Contrasted

3589 **1872 PR65 PCGS. CAC.** The relatively generous mintage of 182,000 business strike quarters indicates a greater availability than is actually the case for this year, as many were lost in the 1873 silver melt. This leaves a larger number of proofs available in high grades for the date. This is an all-brilliant example that is deeply mirrored in the fields with noticeably frosted devices, although no cameo contrast is noted on the insert. Population: 14 in 65, 9 finer (5/12). (#5571)

3590 **1876 PR64 PCGS.** A pleasingly mirrored centennial-year proof with mild contrast but sharp eye appeal. Golden patina with a hint of green is prominent in the fields. Population: 44 in 64, 25 finer (5/12).(#5577)

3591 **1879 PR64 NGC.** Gold, peach, and blue patina shifts from near-transparent to virtually opaque. The fields are more appreciably reflective on the obverse. NGC has graded 74 non-Cameo examples as PR65 or better (6/12).(#5580)

1880 Quarter, PR67 Cameo
Strongly Contrasted, Peripherally Toned

3592 **1880 PR67 Cameo NGC.** Type One Reverse. The fields show remarkable depth of reflectivity and the devices are heavily frosted on each side. Given the relatively small mintage of 1,355 proofs it is surprising that more Cameo proofs are not known. At this grade level only 14 other pieces have been certified by NGC with four finer (6/12). Both sides are evenly matched in appearance with brilliant centers that are surrounded by thin rings of golden-brown and blue at the margins. (#85581)

3593 **1882 PR65 PCGS.** Subtle blue, violet, and green hues embrace this Gem proof, which gleams through the patina. Sharply struck and pleasingly preserved, an attractive specimen in all respects. Population: 34 in 65, 27 finer (6/12).(#5583)

1882 Quarter, Superb Gem Proof
Strong Cameo Contrast

3594 **1882 PR67 Cameo NGC.** Sometimes the distinction between business strike and proof is blurred on quarters and halves struck in the 1880s, all low total mintage years. This is an unquestioned proof. The fields are exceptionally deep in mirrored reflectivity and the devices are thickly frosted. Most of each side is brilliant with occasional dabs of deep golden-brown and blue at the margins. Census: 9 in 67 Cameo, 1 finer (6/12). (#85583)

1883 Quarter, PR65 Deep Cameo
Starkly Contrasted, Finest Certified

3595 **1883 PR65 Deep Cameo PCGS. CAC.** There were 1,039 proofs struck of this low total-mintage date, and this is clearly one of the finest known. The 1883 proof quarter has several distinguishing characteristics, including the remnants of a previously punched 83 in the dentils below the date, and on the reverse recutting on the vertical shield lines. This is an all-brilliant proof that exhibits profound depth of mirroring in the fields and heavily frosted devices, which yield stark contrast. This is the only such coin certified by PCGS and none are finer (6/12). (#95584)

1884 Seated Quarter, PR66 Cameo
Sparkling Silver-White

3596 **1884 PR66 Cameo NGC.** Stark silver-white surfaces provide beauty along with a needle-sharp strike. In addition to a low business strike production, this late Seated date saw only 875 proofs struck. The survival rate in the highest grades assures that the date ranks among the rarities of the series. Census: 12 in 66 Cameo, 10 finer (5/12). (#85585)

3597 **1885 PR64 Cameo NGC.** This pearl-gray specimen exhibits substantial contrast between the luminous design and the smooth fields. A lens locates inconsequential flecks. From a proof mintage of just 930 pieces.
Ex: Orlando Summer FUN Signature (Heritage, 7/2011), lot 3531. (#85586)

3598 **1886 PR63 Cameo PCGS.** Despite the presence of faint hairlines and contact marks that limit the grade, this splendid Select Cameo proof has excellent eye appeal. The centers are bright silver with faint champagne toning on the reverse, surrounded on both sides with deep steel and iridescent toning. Population: 14 in 63 Cameo, 31 finer (6/12).(#85587)

3599 **1887 PR64 PCGS.** Deep gold and iridescent toning masks the mirrored fields and lustrous devices of this Choice proof. The reverse has a small dusky area that further subdues the underlying eye appeal.(#5588)

3600 **1889 PR64 NGC.** Thickly toned with windows of reflectivity through intense layers of gold, peach, and blue patina. Faintly hairlined but majestically appealing. Census: 46 in 64, 53 finer (6/12).
Ex: Heritage (2/2011), lot 3581.(#5590)

3601 **1889 PR65 PCGS.** Spectacular shades of cobalt-blue and greenish-gold patina enliven the pristine surfaces of this sharply detailed Gem. From a tiny proof mintage of 711 pieces. Population: 19 in 65, 17 finer (6/12).(#5590)

1890 Seated Quarter, PR66 Deep Cameo
Low Mintage of 590 Pieces

3602 **1890 PR66 Deep Cameo PCGS.** The 1890 proof Seated Liberty quarter was produced to a high standard of quality, and this spectacular Premium Gem is one of the finest survivors from the mintage of just 590 pieces. The deeply mirrored fields contrast profoundly with the richly frosted, sharply detailed devices. Wisps of light gold toning enhance the well-preserved surfaces of both sides. Population: 2 in 66 Deep Cameo, 5 finer (6/12). (#95591)

BARBER QUARTERS

3603 **1892 MS65 NGC.** Type Two Reverse. Attractive shades of champagne-gold, blue, and lavender-gray patina blanket the well-preserved surfaces of this sharply detailed Gem. The Barber design was introduced in 1892, making the date an important one for type purposes.
From The Color Collection.(#5601)

1892-O Quarter, MS66+
Notable Conditional Rarity

3604 **1892-O MS66+ PCGS. CAC.** Type One Reverse. Details of Liberty's laurel wreath and hair and the eagle's claws are exceptionally sharp. Diffuse red-gold toning joins hints of clear blue around the rims for outstanding visual quality. A scarce New Orleans issue, and far more so in the higher Mint State ranks. Population: 13 in 66 (4 in 66+), 3 finer (5/12). (#5602)

3605 **1894-S MS64 PCGS.** The design elements of this Choice Barber quarter are sharply detailed throughout, and the lustrous surfaces show only a few minor contact marks. Both sides are toned in attractive shades of gold and violet. Population: 47 in 64 (1 in 64+), 19 finer (5/12).
From The Color Collection.(#5609)

3606 **1896-S Good 6 PCGS Secure.** This low-mintage Barber quarter has long been considered one of the keys to the series. This piece has endured years in the channels of commerce, but it remains uncleaned. Light gray surfaces deepen around the margins, a few shallow marks are seen in the center of the reverse. (#5615)

1898-O Quarter, MS64
Scarcer New Orleans Issue

3607 **1898-O MS64 NGC.** Faint red-gold enriches smooth silver surfaces. The strike is generally strong, especially in the obverse details. Careful examination reveals a trace of weakness on the eagle's right talons. This New Orleans date is among the scarcest issues of the Barber series, especially in the highest Mint State grades. Census: 9 in 64, 7 finer (5/12). (#5620)

3608 **1899-O MS64 PCGS.** Scarcer than the mintage of 2.6 million pieces indicates. This is a brightly lustrous example that retains much brilliance and is accented by the occasional dab of turquoise and charcoal patina. Sharply struck. Population: 19 in 64, 15 finer (6/12).(#5623)

1901-S Barber Quarter, AG3
Problem-Free Key Date

3609 **1901-S AG3 PCGS.** The 1901-S Barber quarter is one of the keys to the series, and collectors prize examples in all grades and conditions. This problem-free specimen shows more wear on the reverse, where the rim, denomination, and legend are mostly worn smooth. The date and mintmark remain intact and easily legible. (#5630)

1901-S Barber Quarter, AG3
Well-Worn, But Still Popular Key Issue

3610 **1901-S AG3 PCGS Secure.** A key issue in the Barber quarter series, the 1901-S is avidly collected, even in well-worn condition. The rims and peripheral design elements are worn smooth in many places on this AG3 example, but the date, mintmark, and motto remain easily legible. Pleasing blue-steel patina in the fields mixes with dove gray in other areas. (#5630)

1901-S Quarter, VG8
Undisputed Key to the Series

3611 **1901-S VG8 PCGS.** This heavily circulated key Barber quarter shows even wear over each side. The only mentionable surface distractions are a few shallow planchet flakes out of the right obverse field. Otherwise the surfaces are light gray with a hint of reddish patina and darker charcoal accents around the margins. (#5630)

Key 1901-S Barber Quarter, VG8

3612 **1901-S VG8 NGC.** The key 1901-S Barber quarter is a prized issue in any grade, from a tiny mintage of just 72,664 pieces. This attractive VG8 specimen retains much deep detail on the central devices and the rims are still unbroken. The only distraction on the light gray surfaces is a shallow staple scratch behind Liberty's eye. (#5630)

Gem 1902-O Barber Quarter
Only Seven Finer PCGS Coins

3613 **1902-O MS65 PCGS. CAC.** Like most turn-of-the-century Barber quarters, the 1902-O is quite rare in high grade. This well-detailed Gem features semiprooflike surfaces that shine through mottled green, blue, and gray toning. The fields show only insignificant signs of contact. Population: 10 in 65, 7 finer (5/12). (#5632)

3614 **1904-O MS63 NGC.** Deep gunmetal-gray toning blankets this shimmering and unabraded better date Select Barber quarter. Housed in a former generation holder. Census: 11 in 63, 37 finer (6/12).(#5638)

3615 **1906 MS65 PCGS.** Radiant cartwheel luster emanates from silver-white surfaces with accents of gold and pink, more prominent on the reverse. This coin is fully struck and shows little distraction other than a tiny dark fleck in the center obverse.(#5642)

3616 **1906 MS66 PCGS.** The frosty powder-gray surfaces show dabs of copper-colored patina scattered about the obverse, while the reverse is largely untoned. Neither side shows any mentionable contact, although the upper-right shield corner is strike-challenged, as usual for the type. Population: 21 in 66, 2 finer (6/12). (#5642)

3617 **1907-S MS64 PCGS. CAC.** Hints of tan-gold color visit highly lustrous surfaces that exhibit well defined motifs. A few grade-defining marks are noted on Liberty's cheek and neck. Population: 16 in 64, 21 finer (5/12).(#5648)

3618 **1910-D MS64 PCGS.** This well-detailed Choice specimen shows a touch of softness on the obverse stars and the eagle's claws. Both sides radiate vibrant mint luster and no mentionable flaws are present. Population: 32 in 64, 28 finer (6/12).(#5658)

3619 **1913-S — Surface Damage — Genuine PCGS. VF Details.** A moderately worn specimen of this low-mintage key, with dark gray and amber patina in the fields and silver-gray devices. One long cut on Liberty's profile is noted.(#5666)

3620 **1916-D MS65 NGC.** Radiant cartwheel luster proceeds from each side of this Gem 1916-D Barber quarter despite a moderate layer of pinkish patina. A loupe reveals scattered accents of aqua as well as numerous contact marks on the cheek and shield.(#5674)

3621 **1916-D MS66 NGC.** This frosty silver-white Premium Gem boasts flowing luster and immaculate, untoned surfaces on both sides, an excellent example for last-year-of-type collectors or merely those attempting to assemble a fine set. Census: 47 in 66, 9 finer (6/12).(#5674)

PROOF BARBER QUARTERS

Cameo Superb Gem Proof
Type Two 1892 Quarter

3622 **1892 PR67 Cameo PCGS.** Type Two Reverse, as are most (but not all) proof 1892 quarters. This fully struck and immaculate Superb Gem has an essentially brilliant obverse. The reverse displays faint olive-gray toning. Cameo frost is obvious on both sides though the portrait exhibits the most prominent contrast with the glassy fields. (#85678)

3623 **1894 PR64+ PCGS Secure.** The surfaces are pinkish with teal accents and scattered silver-white patches on this appealing near-Gem proof, a well-struck coin that shows no mentionable contact, even under a loupe. The strike stops just short of full. (#5680)

3624 **1896 PR65 NGC. CAC.** Rose-red and jade-green tints emerge when this richly patinated Gem proof Barber type coin is rotated beneath a light. Intricately struck and void of spots. Certified in a prior generation holder.(#5682)

Fully Struck Premium Gem Proof 1898 Quarter
Excellent Example for Type

3625 **1898 PR66 PCGS.** This splendidly contrasted Premium Gem proof 1898 Barber quarter would undoubtedly rate a Cameo designation, were it not encased in a green-label holder that predates the use at PCGS. This piece is essentially untoned save for a suggestion of gold on each side, with thick mint frost and reflective fields. The strike is full, and no mentionable contact appears. A super example for type. (#5684)

3626 **1898 PR66 Cameo NGC.** Ice-blue and pinkish-gold vie for obverse space on this stunningly contrasted coin, with some mottled purple in the right field. The reverse is lighter-colored, showing golden hues with a single dark spot on the lower margin. Census: 17 in 66 Cameo, 33 finer (6/12).(#85684)

1900 Quarter, PR66 Cameo
Powerful Silver Mirrors

3627 **1900 PR66 Cameo PCGS. CAC.** One of 912 proofs struck, this quarter is nearly flawless with assertive silver surfaces showing a wisp of clearest gold. All design features are razor-sharp, including the motto scroll which doubles back and identifies the Type 2 reverse. Few survivors of this proof issue can compete with this coin's overwhelming quality. Population: 15 in 66 Cameo, 7 finer (5/12). (#85686)

1901 Quarter, Sharply Contrasted PR66 Cameo

3628 **1901 PR66 Cameo NGC.** The 1901 can be viewed as the "last chance" for collectors to obtain a Cameo example of the Barber quarter. Beginning in 1902 the method of manufacture for proofs changed to an all-brilliant finish, greatly reducing the possibility and availability of contrasted coins. This nicely cameoed proof is brilliant throughout, thus further enhancing the white-on-black finish. Problem-free, as expected from a coin in this grade. Census: 8 in 66 Cameo, 17 finer (6/12). (#85687)

1904 Barber Quarter, PR66
Only 670 Examples Struck

3629 **1904 PR66 PCGS.** Only 670 proof Barber quarters were struck in 1904, and examples in Premium Gem condition are rare in today's market. This delightful Premium Gem is sharply detailed throughout, with deeply mirrored fields that are blanketed in attractive shades of champagne-gold and blue toning. Housed in a green label holder. Population: 25 in 66, 10 finer (5/12). *From The Color Collection*. (#5690)

3630 **1905 PR64 NGC.** A slight tinge of uniform gold color appears on the reflective surfaces, and the reverse on its own would undoubtedly garner a Cameo designation. Even under a loupe there are no visible marks. Nice for the grade and fully struck. (#5691)

3631 **1905 PR65 PCGS.** This reflective Gem proof shows little contrast on the obverse, which exhibits mottled pink, sage, olive, and charcoal hues with much underlying brilliance. The reverse shows more contrast and less color, mostly pinkish-gold. A nice coin for the grade. Population: 55 in 65, 42 finer (5/12).(#5691)

3632 **1907 PR64 PCGS.** From a tiny mintage of just 575 pieces, this impressive proof Barber quarter displays a mottled pattern of blue, gray, and gold toning over deeply mirrored fields and well-detailed devices. Population: 53 in 64, 41 finer (5/12).(#5693)

Premium Gem Proof 1907 Barber Quarter
Rare Cameo Example

3633 **1907 PR66 Cameo PCGS. CAC.** Proof coins of this era seldom display the strong Cameo contrast seen on this delightful Premium Gem. The design elements are richly frosted and the fields are brightly reflective, with no mentionable distractions. Only 575 proof Barber quarters were produced in 1907. Population: 13 in 66 (1 in 66+) Cameo, 6 finer (6/12). (#85693)

3634 **1908 PR64+ PCGS.** A high-end Choice proof, from a mintage of just 545 pieces, this attractive specimen displays sharply detailed design elements, deeply reflective fields, and intermingled shades of green and blue toning. Population: 53 in 64 (1 in 64+), 63 finer (6/12).(#5694)

3635 **1913 PR64 PCGS.** Darkly toned in shades of violet and gray, the fields of this attractive Choice example show bright reflectivity in sheltered areas around the sharply detailed devices. Population: 47 in 64 (2 in 64+), 71 finer (5/12).(#5699)

Patinated PR66 1914 Quarter
Lowest Proof Mintage of Type

3636 **1914 PR66 PCGS.** Rotating this deeply patinated proof coin beneath a light reveals iridescent ocean-blue, lavender, and yellow-gold undertones. Fully struck and free from contact. The 1914 is the lowest mintage proof date of the series yet trades for only a modest premium over type. A meager 380 pieces were issued. (#5700)

1914 Quarter, PR66 Cameo
Series Low Mintage of Only 380 Proofs

3637 **1914 PR66 Cameo NGC.** The 1914 proof quarter is memorable for its low mintage of only 380 proofs. Of the few high-grade survivors, this must be one of the finest. Each side is brilliant and the fields display unfathomable depth of reflectivity. Set against this deep mirroring are frosted devices, creating the always-attractive cameo effect. The only "flaws" we see are Mint-created, a series of what appear to be water stains in the upper right obverse field, similar to those seen on early Peace dollars. Census: 10 in 66 Cameo, 4 finer (6/12). (#85700)

EARLY HALF DOLLARS

Rare 1794 Half Dollar, O-104a
Choice Good

3638 **1794 Good 6 NGC. O-104a, R.5.** Perhaps best attributed as intermediate between O-104 and O-104a, since the cud over the ER in AMERICA is present, yet the bisecting crack across the obverse described by Overton is absent. Most peripheral legends are bold, with the exception of the date, which is faint. The portrait is well outlined while the eagle is worn and has a shallow depression on the upper legs. (#6051)

3639 **1795 2 Leaves — Surfaces Tooled — Genuine PCGS. O-119, R.4.** In our opinion, this coin has the details of a VF specimen that has been tooled and whizzed. This chestnut-gold and lime-green example displays swirling faint marks characteristic of whizzing. Microgranular with smoothed fields. A collectible example of the desirable introductory Flowing Hair type.(#6052)

3640 **1795 2 Leaves VG10 PCGS. O-105, R.3.** Although considerably worn, this early half dollar is extremely attractive with pewter-gray surfaces and delicate rose overtones. Although a few minuscule marks are noted, primarily on the reverse, the surfaces are remarkable for the grade.(#6052)

3641 **1795 2 Leaves Fine 12 NGC. O-116, R.4.** This medium gray toned specimen has a slightly curved line of dark steel on the obverse, with minor marks on each side. Faint parallel adjustment marks are visible at the central obverse.(#6052)

3642 **1795 2 Leaves — Repaired — NGC Details. Fine. O-110, R.4.** Star 5 and the numeral 9 have been recut, identifying the very scarce O-110 variety. Evidence of repair can be seen at the date and on the corresponding area on the reverse. The design elements retain some interior detail and all major features are present, at least in outline.

3643 **1795 2 Leaves — Improperly Cleaned — NGC Details. Fine. O-104, R.4.** A die lump below the lower point of star 15 identifies the very scarce O-104 variety. The evenly worn design elements retain some interior detail and the surfaces display attractive gray, blue-steel, and golden-brown toning.

3644 **1795 2 Leaves — Improperly Cleaned — NGC Details. VF. O-109, R.4.** The very scarce O-109 variety is identified by the 9x8 pattern of berries in the wreath, with two berries inside the wreath under each wing. The devices show moderate even wear and the surfaces have toned in pleasing shades of dove-gray and golden-brown after the noted cleaning.

3645 **1795 2 Leaves — Damaged, Scratched, Cleaned — NGC Details. VF. O-131, R.4.** Despite the noted problems, this coin retains much of its original detail and the surfaces display silver-gray patina. The O-131 variety is identified by the 7x9 arrangement of the berries in the wreath, with two inside and one outside the wreath under both wings.(#6052)

3646 **1795 2 Leaves — Improperly Cleaned — NGC Details. VF. O-113a, R.4.** The remnants of an E can be seen below the A in STATES, and a die crack joins the letters in LIBERTY at the tops, identifying the very scarce O-113a variety. This coin retains a significant amount of original detail and the surfaces are still attractive, despite the noted cleaning.

3647 **1795 2 Leaves — Repaired, Artificially Toned — NGC Details. VF. O-119, R.4.** The very scarce O-119 variety is confirmed by the 9x9 arrangement of the berries in the wreath and the leaf touching the base of I in UNITED. Much original detail remains in Liberty's hair and the eagle's wings.

1795 Flowing Hair Half Dollar, VF35
Very Scarce O-117a Variety

3648 **1795 2 Leaves VF35 PCGS. O-117a, R.4.** The obverse has a die crack from the bust to border, between the date and star 15, with a faint branch crack to the tops of 95 confirming the Overton variety. This example appears to be conservatively graded, with hints of luster apparent in the protected areas. The surfaces have light gray toning with splashes of ivory on the high points. A pleasing example of the issue, seldom found in finer grades. (#6052)

XF Details 1795 Half Dollar, O-116
Two-Year Flowing Hair Type

3649 **1795 2 Leaves — Improperly Cleaned — NGC Details. XF. O-116, R.4.** The gunmetal-gray surfaces are mildly glossy, but this Flowing Hair type coin has pleasing sharpness and no noticeable abrasions. The right reverse margin displays a few unobtrusive adjustment marks, as made. Prominently clashed near LIBERTY and UNITED. (#6052)

1802 O-101 Half Dollar, XF45
The Only Die Variety

3650 **1802 XF45 PCGS. CAC. O-101, R.3.** The only known die variety for 1802 half dollars is the O-101 marriage, usually found in lower grades than this Choice XF. Mint records indicate a production of 28,890 coins, and the current rarity suggests that less than 500 survive today. The 1802 is the scarcest date in the Draped Bust half dollar series that was struck from 1801 to 1807. Both sides have pleasing gray surfaces with delicate gold overtones and traces of luster in the protected areas. Trivial surface marks are evident on both sides, entirely consistent with the grade. (#6065)

3651 **1803 Large 3, Large Reverse Stars VF35 NGC. CAC. O-103, R.3.** The O-103 die pair is the only combination of a Large 3 obverse and Large Reverse Stars. This pewter-gray and iridescent toned example has an attractive, natural appearance with trivial marks on each side.(#6066)

3652 **1803 Large 3, Large Reverse Stars XF40 PCGS. O-103, R.3.** Powder-blue centers are encompassed by wheat-gold margins. Ample luster outlines design elements. This better-date Draped Bust half lacks consequential abrasions aside from one brief horizontal mark on the field near the chin.(#6066)

3653 **1805 VF35 PCGS. CAC. O-106, High R.3.** Deep cream-gray and cobalt-blue patina embraces this pleasing Choice VF type coin. No relevant marks are encountered, and the strike is even except for the stars opposite the bust tip.(#6069)

1805 O-109b Half Dollar, AU58
Terminal Die State
Possibly Finest of the Variety

3654 **1805 AU58 PCGS. CAC. O-109b, R.7.** The terminal die state with a retained cud on ITE, later than any die state mentioned in Overton. Other reverse cracks are also prominently visible. We believe that less than a dozen examples of this terminal state exist in all grades, and this piece is easily the finest. In fact, it is apparently the finest known O-109 half dollar, according to information available to us. It is better than anything listed in Stephen Herrman's auction guide, and it is finer than the best piece listed in the Overton census. Both sides have considerable luster with light gray surfaces and splashes of dusky gold toning on the reverse. (#6069)

Beautifully Toned XF45 1806/5 Half, O-103

3655 **1806/5 XF45 PCGS. CAC. O-103, R.2.** On this Choice XF coin there is as of yet no sign of the reverse die crack that characterizes the late-state O-103a. Beautiful patina includes olive and gold in the centers, ceding to copper notes at the rims. Muted luster clings underneath the moderate patina.
From The Color Collection. (#6077)

1806/5 O-103 Half Dollar, AU50
Above Average Grade

3656 **1806/5 AU50 PCGS. O-103, R.2.** A knobbed 6 is punched over a 5 on this previously unused obverse die, and that feature combined with the solid union of star 13 and the drapery identifies this die. Three reverse dies were married to this single obverse, and the O-103 reverse has a die chip in the field below the R in AMERICA. This lovely AU example is deeply toned steel-blue, gray, and gold, with traces of luster. This intermediate state specimen has a die crack through two points of star 1 to the middle hair curls. There is no evidence of the reverse crack appearing on late states. A lovely specimen, having excellent eye appeal. Population: 13 in 50, 24 finer (5/12). (#6077)

1806/5 Draped Bust Half, AU50
O-103 Variety, Obverse Die Crack

3657 **1806/5 AU50 PCGS. O-103, R.2.** Weak milling and a die crack from the obverse rim at 7:30 to the curls identities the O-103 variety. A lightly toned representative with almond and pearl shades. The reverse periphery displays a whisper of gray verdigris. Luster invigorates the margins, curls, and wings. Marks are nearly absent. The strike is good at the centers, although the stars and upper right reverse show moderate softness. Population: 13 in 50, 24 finer (6/12). (#6077)

3658 **1806 Knobbed 6, Large Stars VF30 PCGS. O-105, R.2.** The only Knob 6, Large Stars Overton marriage. Gunmetal-blue and cream-gray embrace this early half dollar. Marks are limited to a few wispy abrasions within the shield. The strike is intermittently soft, usual for the Draped Bust type.(#6074)

3659 **1806 Knobbed 6, Large Stars XF40 NGC. CAC. O-105a, R.2.** Deep golden-brown and powder-blue patination encompasses this minimally abraded and attractive representative. A good strike for the type with softness opposite the bust tip on the clouds near OF.(#6074)

3660 **1806 Pointed 6, Stem XF40 PCGS. O-121, R.4.** This example is likely among the dozen finest for the scarce O-121 die marriage with deep blue-gray patina and lighter tan on various high points of the obverse and reverse. Both sides exhibit a slightly mottled appearance.(#6071)

3661 **1807 Draped Bust VF30 PCGS. O-105, R.1.** A large die break between the ED in UNITED is present, and often associated with O-105a, but the variety cannot be designated as O-105a because the F in OF is perfect. This midgrade stone-gray representative is generally smooth but has an occasional hair-thin mark. (#6079)

3662 **1807 Draped Bust VF35 PCGS. O-105, R.1.** The leaf below I has its point below the space between I and C, a diagnostic feature of this common variety. Housed in a green-label PCGS holder, this example has light gray and iridescent toning over surfaces that show a few faint hairlines.(#6079)

Choice AU 1807 Draped Bust Half
O-110a, Light Peripheral Toning

3663 **1807 Draped Bust AU55 NGC. O-110a, R.3.** This partly lustrous Bust half is untoned except for a partial band of golden patina on both borders. A few faint hairlines are noted on the left obverse, but overall abrasions are inconsequential for the grade. A good strike with any softness relegated to the area near the eagle's head. (#6079)

BUST HALF DOLLARS

1807 50/20 Half Dollar, O-112
Choice XF With Light Peripheral Toning

3664 **1807 Large Stars, 50 Over 20 XF45 PCGS. O-112, R.1.** Ex: Witham. Characterized by two normal feet on the 1 in the date, and star 1 that points between denticles. Orange-gold toning fills the margins, while the centers are stone-gray and glimpses of cobalt-blue and ruby-red emerge near the rims. Moderate marks are noted near the eagle's beak and on Liberty's forehead. (#6086)

1807 Capped Bust Half, AU58
Blundered Reverse, O-112

3665 **1807 Large Stars, 50 Over 20 AU58 NGC. O-112, R.1.** The late die state with lengthy reverse cracks. The sole Overton marriage of the 1807 Capped Bust, Small Stars *Guide Book* listing. Luster dominates the borders of this moderately toned example. Golden-brown and slate-gray fill the centers and cede to peripheral apple-green. Lightly impressed on portions of the devices. Faint thin marks are noted between stars 4 and 5 and beneath the eagle's right (facing) wing. (#6086)

Near-Mint 50 Over 20 1807 Bust Half
O-112, Large Stars

3666 **1807 Large Stars, 50 Over 20 AU58 PCGS. O-112, R.1.** An unabraded Borderline Uncirculated example from the first year of the Capped Bust design. The familiar Overton variety with a blundered denomination. The pearl-gray centers and chestnut-gold margins exhibit noticeable mint luster. Population: 26 in 58, 20 finer (6/12). (#6086)

3667 **1807 Capped Bust, Large Stars VF25 PCGS. O-114, R.3.** Four die varieties are known for the 1807 Capped Bust half dollars, and each carries its own Guide Book listing. A few minor rim disturbances are evident on the obverse of this grayish-olive and steel specimen. Lighter silver appears on portions of the design motifs.(#6088)

Near-Mint 1808/7 Half Dollar, O-101
Multicolor Toning

3668 **1808/7 AU58 NGC. O-101, R.1.** Attractive shades of ocean-blue, lime-green, peach-gold, and rose-red visit much of this momentarily circulated and overdated Bust half. A few faint marks are noted near the profile, but the surfaces are predominately unabraded. Luster fills the margins and devices. (#6091)

1808 O-108 Half Dollar, AU58
Just Outside the Census

3669 **1808 AU58 PCGS. O-108, R.3.** Housed in a green-label PCGS holder, this brilliant silver near-Mint specimen has delicate gold and turquoise peripheral toning with frosty mint luster. The strike is typical, showing weakness at the central reverse. Probably just missing the condition census, this piece is still a candidate for an advanced collection. (#6090)

3670 **1809 Normal Edge AU55 NGC. O-105, R.2.** A lustrous Choice AU example with antique-golden peripheral toning. A diagnostic die crack connects the letters at the left reverse.(#6092)

3671 **1809 Normal Edge AU55 NGC. O-102, R.1.** A partly lustrous Choice AU representative with light straw-gold toning and an even strike. No abrasions are detected, though we note the straight row of clash marks beneath the scroll that is always present on O-102.(#6092)

3672 **1809 Normal Edge AU58 PCGS. O-102a, R.1.** This late die state specimen exhibits obverse die cracks at the date and across the bust to the stars at the left. This lovely near-Mint specimen is outside the condition census, but remains important to specialists. Both sides have nearly full luster with original violet and sea-green patina, showing a few splashes of brighter silver.(#6092)

3673 **1810 AU55 PCGS. O-101a, R.1.** Numerous peripheral die cracks allow for prompt attribution. Luster dominates the borders, eagle, and curls of this appealing Choice AU Bust half. Mostly untoned though the margins display rose-red and navy-blue. (#6095)

3674 **1811 Large 8 AU58 NGC. O-104a, R.1.** A long die crack circles the bust to the right. On this later die state, an additional crack ensues from the rim to stars 3 through 5 and Liberty's forecurl. This is a delightful near-Mint example that seems quite close to Mint State. Vibrant plum, emerald-green, and iridescent toning covers both sides, and there are mere traces of high-point wear. The only notable abrasion is a shallow one in the upper right reverse field, behind the eagle's head.(#6096)

3675 **1811 Small 8 AU53 PCGS. CAC. O-111, R.1.** A die defect on Liberty's neck identifies this variety. Both sides have light silver beneath champagne toning within a peripheral blue and gold frame. A lovely example of the early die state.(#6097)

3676 **1812 AU58 PCGS. O-110, R.1.** A lovely and satiny near-Mint half. Light gold toning graces the left obverse field, while the reverse is close to brilliant. Smooth and crisply struck with a few sets of overlapping clash marks, as made.
Ex: FUN Signature (Heritage, 1/2008), lot 1463, which realized $1,610.(#6100)

3677 **1813 AU55 PCGS. CAC. O-108, R.3.** This Choice AU piece shows ample eye appeal amid bold luster, with silver-white centers complementing daubs of jade and pinkish-gold near the rims on each side. The early die state lacking the later crack, although both sides are boldly clashed.(#6103)

1814 Half Dollar, MS62
O-104a, Late Die State

3678 **1814 MS62 PCGS. O-104a, R.2.** The low second 1 in the date, the center dot on crossbar 5, and the low 50 C. confirm the variety, while the obverse and reverse cracks affirm the later die state. Soft luster emanates from silver-gray surfaces that yield cobalt-blue, lavender, and gold-tan peripheral patination. Solidly struck, a small mark on the cheekbone is of minor consequence.
Ex: Long Beach Signature (Heritage, 9/2007), lot 1475, which realized $3,450; FUN Signature (Heritage, 1/2009), lot 2804. (#6105)

Still-Lustrous 1815/2 Half, XF45
O-101, Excellent Eye Appeal

3679 **1815/2 XF45 NGC. O-101, R.2.** Aquamarine, orange-gold, and plum-mauve embrace this key-date half dollar. Only a single die marriage is known, limited to a mintage of 47,150 pieces; most Capped Bust dates have a mintage of more than 1 million coins. The present Choice XF representative shimmers with luster near the rims, and a loupe fails to reveal any obvious abrasions. From the usual prominently clashed state of the dies, with pink, aqua, and gold hues prevailing amid excellent eye appeal.
Ex: Boston ANA (Heritage, 8/2010), lot 4865.
From The Color Collection. (#6108)

3680 **1817 181.7 AU50 NGC. O-103, R.2.** The Punctuated Date variety with a small raised dot between the second 1 and the 7, visible only on earlier die state coins such as this one. The device high points are light gray with medium gray fields and deep steel-gray peripheries.(#6110)

3681 **1817 AU58 PCGS. O-110, R.2.** Rich autumn-gold, emerald-green, cobalt-blue, and slate-gray encompass this momentarily circulated half dollar. Smooth save for one thin horizontal mark on the left obverse field. The profile is strike doubled. Certified in a green label holder.(#6109)

3682 **1819 AU58 PCGS. O-109, R.2.** This lustrous near-Mint half dollar is mostly pearl-gray but has iridescent peach-gold and apple-green at the margins. Smooth aside from thin marks on the chin and above star 11.(#6117)

3683 **1820 Square Base Knob 2, Large Date AU55 NGC. O-105a, R.3.** The obverse exhibits all the die cracks described in Overton for the scarce late die state. Considerable luster remains on the gray-gold surfaces of this Choice AU coin.(#6122)

3684 **1820 Square Base No Knob 2, Large Date AU55 PCGS. O-106, R.1.** Glimpses of butter-gold adorn the peripheries but this Capped Bust half is mostly brilliant. Substantial luster fills the stars, letting, and devices. Exceptional quality for the AU55 level. Housed in a green label holder.(#6123)

3685 **1821 AU58 PCGS. O-105a, R.1.** This amber-gold and gray piece is quite close to Mint State, with a sharp strike and essentially full luster remaining. The reverse adds notes of forest green. The later die state shows the crack extending left and right on the reverse from TAT.(#6128)

3686 **1822 AU58 PCGS. O-105, R.3.** Minor reverse die cracks are described in Overton. This near-Mint example has an incredible strike with bright silver surfaces and full satin luster. A hint of peripheral iridescence is noted at the borders. Edge 22: FIFTY CENTS OR LF A DOLLAR.(#6129)

3687 **1823 Patched 3 AU53 NGC. O-101a, R.3.** A large 3 leans to the right with a patch at its right center. Hints of champagne luster appear over frosty silver surfaces with excellent eye appeal. (#6133)

3688 **1823 AU58 PCGS. O-105, R.1.** This golden-brown and stone-gray Borderline Uncirculated silver type coin has sweeping luster and an even strike. A loupe fails to locate any noticeable marks. (#6131)

3689 **1824 AU58 PCGS. O-111, R.2.** A bold double profile is evident from the forehead to the neck and below, a striking anomaly that is often seen on this variety. This near-Mint specimen exhibits brilliant satin luster with faint champagne toning at the centers and deeper gold and iridescent peripheries.(#6137)

3690 **1828 Curl Base 2, Knob AU58 PCGS. CAC. O-107, R.2.** Dappled peach-gold, apple-green, and slate adorn this generally lustrous and momentarily circulated Bust half dollar. Marks are minor despite a few wispy grazes beneath UNUM. (#6149)

1829 Small Letters Half Dollar, MS64
O-105, Probably Among the Top Ten Known

3691 **1829 Small Letters MS64 NGC. O-105, R.1.** This is one of the plentiful early half dollar varieties, yet it is seldom seen so fine. We place this example among the top 10 that survive of the 1829 O-105 half dollar. It has mostly sharp details with slightly reflective fields beneath vivid gold and iridescent toning. (#6154)

1830 Small 0 Half Dollar, O-104
Colorful, Satiny MS64

3692 **1830 Small 0 MS64 PCGS. CAC. O-104, R.3.** Apple-green and golden-brown shades grace the obverse of this satiny Choice Bust half. The reverse is steel-gray with hints of aquamarine and autumn-gold. The fields are unabraded and the portrait shows only trivial contact. Well struck save for a few star centers. A colorful and top-notch example of the type.
From The Color Collection. (#6156)

1831 Capped Bust Half Dollar, MS65
Popular O-108 Variety

3693 **1831 MS65 PCGS. CAC. O-108, R.1.** The 1831 Capped Bust half dollar claims a mintage of more than 5.8 million pieces, with 20 die varieties known for the date. This delightful Gem represents the available O-108 variety, with the characteristic curved line below the Y in LIBERTY. The well-detailed design elements are complemented by brightly lustrous surfaces and attractive champagne-gold and violet patina. Population (for the date): 51 in 65, 5 finer (5/12).
From The Color Collection. (#6159)

Colorful Choice 1832 Half Dollar
Small Letters, O-102

3694 **1832 Small Letters MS64 NGC. O-102, R.1.** Iridescent peach-gold, ruby-red, and navy-blue toning endows the obverse. The reverse displays only faint apricot patina. This lustrous Choice half is free from abrasions and will please the most finicky collector. O-102 is a "laced lips" variety and is also attributed by a tine from the right wingtip.
From The Color Collection. (#6160)

3695 **1833 MS62 NGC. O-109, R.3.** A lightly toned and lustrous half dollar with an unmarked appearance and pleasing eye appeal. Moderate inexactness of strike is seen on a couple of right-side stars and the IB in PLURIBUS.(#6163)

3696 **1833 MS63 NGC. O-108, R.1.** This Select Mint State piece has satiny luster beneath gray-gold toning with outstanding peripheral iridescence. A pleasing piece that is close to the condition census. (#6163)

3697 **1833 MS63 NGC. O-102, R.1.** Dusky powder-blue centers are bounded by caramel-gold margins. The major devices are sharply struck though stars 1 to 4 are lightly impressed. No marks are remotely consequential.(#6163)

1833 O-104 Half Dollar, MS64

3698 **1833 MS64 PCGS. O-104, R.1.** Frosty luster on both sides of this Choice Mint State half dollar shine through original golden-gray toning that gathers along the borders. The peripheral details are typically weak on this example, but fail to diminish the wonderful eye appeal. (#6163)

Gem 1834 Half Dollar, O-108
Large Date, Small Letters

3699 **1834 Large Date, Small Letters MS65 NGC. O-108, R.2.** The pearl-gray toning at the centers gradually cedes to autumn-gold and navy-blue near the borders. This attractively patinated Gem displays impressive cartwheel sheen and is without any remotely detracting abrasions. Well struck except for the stars. NGC has certified just one piece as O-108 in MS65 (as of 6/12) although others such as the present coin may reside in unattributed holders. (#6165)

3700 **1834 Small Date, Small Letters MS62 NGC. O-115a, R.4.** Late dies with minimal dentilation and no evidence of recutting on the 0 in 50 C. Attractively toned with apple-green margins and a window of brilliance at the centers bounded by a narrow ring of autumn-brown.(#6166)

3701 **1835 MS61 NGC. O-101, R.1.** This frosty Mint State piece has full luster with delicate gold toning and deeper high point patina. Trivial marks and faint hairlines prevent a higher grade. (#6168)

3702 **1836 Lettered Edge VF20 PCGS. O-121, High R.5.** A gap in the dentils between stars 8 and 9, along with the position of star 12, and the extension of the lower feather on the reverse, confirm the O-121 attribution. Far rarer than any other 1836 variety, the O-121 remains high R.5 with only about 40 examples known. This mid-grade specimen has light gray devices with deeper gray fields and only trivial imperfections.(#6169)

3703 **1836 Lettered Edge MS62 NGC. O-107, R.4.** Deep pumpkin-gold and navy-blue toning encompasses this satiny final-year Lettered Edge half dollar. Lightly abraded save for a small reverse rim nick at 4:30. Portions of the motifs are softly defined. (#6169)

3704 **1836 Lettered Edge MS63 PCGS. CAC. O-112, R.1.** This smooth and satiny half dollar displays lovely medium almond-gold, power-blue, and olive-green toning. Well struck except for variety-characteristic softness on the UR in PLURIBUS.(#6169)

REEDED EDGE HALF DOLLARS

1836 Capped Bust Half, AU Details
First Reeded Edge Issue, Judd-57

3705 **1836 Reeded Edge — Scratches — NGC Details. AU. Judd-57.** The 1836 Reeded Edge half dollar claims a small mintage of 1,200 pieces. Although most numismatists consider this a business-strike issue, the 1836 Reeded Edge half has been adopted as part of the U.S. pattern series as well. This lightly circulated example is well-detailed and retains much original mint luster under attractive gray, gold, and blue-steel patina. A few long, thin scratches in the upper reverse field constitute the noted problem. (#6175)

3706 **1839-O — Improperly Cleaned — NGC Details. AU.** This New Orleans Capped Bust half is cream-gray overall with caramel-gold margins. Subdued and slightly glossy from cleaning with a smoothed area on Liberty's neck. The mintmark is widely repunched south, usual for the '39-O.(#6181)

SEATED HALF DOLLARS

1839 No Drapery Half, Choice AU
Challenging Type Coin

3707 **1839 No Drapery AU55 NGC.** Slight friction over the high points blends in with softness of strike in the centers, a feature that is always seen on No Drapery halves. Noticeable portions of mint luster remain around the devices. The surfaces are remarkably clean and mostly brilliant with just a hint of pale reddish patina on each side. Census: 19 in 55, 49 finer (6/12). (#6230)

3708 **1846 6 Over Horizontal 6 XF45 PCGS. FS-301.** A dramatic and very scarce *Guide Book* blundered date that shows a 6 punched over a "lazy" 6. The small rim die breaks beneath the date are as made. The slate-gray surfaces display ample luster and are free from distracting abrasions.
Ex: Baltimore Signature (Heritage, 3/2009), lot 8748, which realized $1,035.(#6254)

3709 **1849-O MS61 NGC. WB-13, R.3.** Bill Bugert's new reference on early New Orleans half dollar varieties shows a thin diagonal die crack from Liberty's right (left facing) shoulder, through the head to the border at 12:30, diagnostic of WB-13, a rather plentiful variety. This example appears slightly finer than the plate coin in that reference. Both sides have sharp details with full satin luster beneath gold and iridescent toning. Faint hairlines and other scattered marks limit the grade.(#6263)

3710 **1850 XF40 PCGS. WB-102.** The recut 0 at the lower right is diagnostic of the variety. An attractive example with light gray surfaces and peripheral iridescence. Trivial marks include a faint scratch in the upper reverse field.
From The Norva Collection.(#6264)

3711 **1851 XF45 PCGS. WB-101.** The Normal Date variety has a small rust lump near the top of the first 1. This Choice XF specimen is mostly light silver-gray with hints of peripheral toning.
From The Norva Collection.(#6266)

Choice 1851 Seated Liberty Half
Only Four Finer Coins at NGC

3712 **1851 MS64 NGC.** A spidery die crack travels from star 1 to the rock on this well-detailed Choice example. The central devices are strongly impressed, but some of the stars are a little soft. The pleasing surfaces are toned in shades of silver-gray and blue-steel, with underlying original mint luster. Census: 24 in 64, 4 finer (6/12). (#6266)

3713 **1852 — Cleaning — Genuine PCGS. XF Details.** The 1852 has a meager mintage of 77,130 pieces. The 1849 California Gold Rush changed the gold-to-silver ratio, which led to hoarding and melting of silver coinage. This well defined pearl-gray survivor is only lightly abraded but subdued by a moderate cleaning.
From The Norva Collection.(#6268)

3714 **1852 XF40 PCGS.** The 1852 Seated Liberty half dollar is even more difficult to locate than its small mintage of 77,130 pieces would suggest. It is likely that many specimens were melted after the weight change in 1853. This well-detailed example retains traces of mint luster, under greenish-gold and lavender-gray toning. Population: 4 in 40, 71 finer (6/12).(#6268)

1853 Arrows and Rays Half, MS64
Frosty One-Year Type Coin

3715 **1853 Arrows and Rays MS64 NGC.** The arrows at the date and rays on the reverse signified a weight reduction for the subsidiary silver coins in 1853, that change intending to promote circulation of those coins. Previously, the smaller silver coins were hoarded as the silver value had risen above face value. This Choice Mint State piece has frosty silver luster with delicate champagne toning and strong design definition on each side. NGC has only certified 41 finer examples of this conditionally scarce issue (6/12). (#6275)

3716 **1854-O Arrows MS63 PCGS.** This sharply detailed Select specimen displays vibrant satiny mint luster, under attractive champagne-gold and pink patina. The 1854-O Arrows half dollar is always popular with mintmark type collectors.(#6280)

3717 **1855-S Arrows VF30 PCGS.** The San Francisco Mint only struck gold coins during its introductory year, but issued quarters and halves in 1855. Those silver pieces were needed in Gold Rush commerce, and PCGS has yet to certify any of the half dollars as Mint State. The present coin has cream-gray centers and golden-brown margins. Six letters in LIBERTY are sharp, and marks are limited to a few pinscratches on the reverse.
Ex: Heritage (11/2011), lot 3419.(#6284)

3718 **1856 MS62 PCGS. CAC. WB-101.** Housed in a green-label holder, this pleasing piece has brilliant and frosty silver luster with weakness at the upper obverse and lower reverse. Wispy champagne toning appears on both sides. This is the Normal Date variety. Population: 12 in 62, 30 finer (6/12).(#6287)

3719 **1857-S XF45 PCGS. Large S.** A golden-brown and gunmetal-gray Choice XF example of this early and scarce San Francisco emission. Well-defined and only lightly abraded with traces of luster in design recesses.
Ex: Heritage (11/2011), lot 3420.(#6292)

Premium Gem 1859-O Half Dollar
Brightly Frosted and Virtually Unimprovable

3720 **1859-O MS66 PCGS. CAC.** The 1859-O Seated half dollar saw a prodigious production exceeding 2.8 million coins, and the 1860-O and 1861-O coinages were each large as well. But the shadow of Civil War lay over the Southern facility, and after 1861 no more half dollars would be struck until the 1892-O Barber half. The present Premium Gem 1859-O is sharply defined throughout, displaying bright mint frost below gray-rose central toning that turns blue at the margins. A barely visible luster graze appears in the left obverse field, and a series of milling marks on the reverse, below the lowest arrowhead, are strictly in accord with the grade. Population: 7 in 66 (1 in 66+), 1 finer (5/12). (#6297)

1861 Seated Liberty Half, MS65+
Attractive Multicolor Toning

3721 **1861 MS65+ PCGS. CAC.** The first year of the Civil War saw a large mintage of nearly 2.9 million Seated Liberty half dollars produced at the Philadelphia Mint, but few specimens have survived with the high technical quality and outstanding visual appeal of the present coin. This high-end Gem is well-detailed and lustrous, with attractive shades of gold and blue toning. Population: 17 in 65 (1 in 65+), 15 finer (5/12). (#6302)

3722 **1865 MS62 PCGS. CAC.** Housed in a green-label PCGS holder, this satiny champagne toned specimen has splashes of vivid orange and blue toning. A scarce issue coined at the end of the Civil War. There appears to be a small defect between two dentils below the 6, although this is not the WB-103 variety described with an Errant 6 in the denticles. Population: 3 in 62, 24 finer (6/12). (#6313)

3723 **1866-S No Motto VF25 PCGS.** Violet-gray and steel hues overall with several deep spots prominent on the reverse. An important midrange example of the final No Motto half dollar issue, mintage 60,000 pieces. Population: 15 in 25, 64 finer (6/12). (#6315)

3724 **1866-S No Motto VF30 PCGS. WB-1.** A single No Motto variety is known for this transitional year that also saw the production of nine documented With Motto varieties. The reverse die was also used in 1865. This later die state specimen has heavy clash marks inside the vertical shield stripes on the reverse. While the strike is lacking, the surfaces are pleasing with attractive gray-gold toning. Population: 12 in 30, 52 finer (6/12).
From The Norva Collection.(#6315)

3725 **1866 Motto MS61 NGC. WB-104 (Head 2).** The second doubled obverse die listed as WB-104 in the Wiley-Bugert Seated half dollar reference, and extremely rare in Mint State. Liberty's profile and hair details are sharply doubled, as are the adjacent stars, pole, and cap. We have only handled a few of these, and the present piece is possibly the second finest in any of our auctions. Both sides have rich gold and iridescent toning over bold design features with full satin luster.(#6319)

VF Details 1870-CC Half Dollar, WB-1
Always-Popular First-Year Issue

3726 **1870-CC — Cleaning — PCGS Genuine. VF Details. WB-1.** Large CC. This first-year issue from Carson City has a low survivorship of perhaps 200 or so pieces out of the 54,217 struck. Consistent with the WB-1 variant, partial drapery can faintly be seen below Liberty's elbow. The effects of cleaning are largely subdued by the deep gray patina that covers each side. Only the slightest abrasions can be detected with magnification.

1871-CC Half, Problem-Free XF40

3727 **1871-CC XF40 PCGS. WB-1.** Large CC. Easily attributed by the second C in the mintmark that is significantly higher than the first. Of the seven die marriages known for the issue, probably no more than 100 exist today of each pairing. The gray-blue surfaces are several shades lighter over the design high points, except in the left obverse field where a darker grease stain is seen between stars 2 and 3 that extends into the field. Clean and problem-free.
From The Norva Collection. (#6331)

1872-CC Half Dollar, Choice XF
Surprisingly Scarce Considering the Mintage

3728 **1872-CC XF45 PCGS. WB-7, R.4.** This variety is characterized by the weak die crack along the bottom of the date, a tiny lump on the eagle's left (facing) leg, and a die crack through the bottom of UNIT in UNITED. After a slow start in 1870, the mintage of CC halves picked up rapidly until more than a quarter million were struck in 1872. This is an essentially untoned example that retains generous amounts of luster around the margins. (#6334)

1873 Arrows Half, MS64+
Toned and Sharply Defined

3729 **1873 Arrows MS64+ PCGS. CAC.** Both sides of this near-Gem Seated half dollar exhibit subdued gold toning with splashes of ebony over its silver-gray surfaces. The design elements are bold and the eye appeal is excellent. So far, this is the only second 1873 Arrows half dollar awarded the PCGS Plus designation. Population: 31 in 64 (2 in 64+), 14 finer (6/12). (#6343)

3730 **1873-CC Arrows VF30 PCGS. CAC. WB-101.** Small CC. A caramel-gold and stone-gray midgrade example of this scarce and early Carson City issue. Refreshingly free from marks, though we note one minor obverse rim ding at 3:30.(#6344)

3731 **1874 Arrows MS62 NGC.** Large Arrowheads. Gold and pink overtones grace matte gray interiors, while the margins move sharply to blue hues. Lustrous and eye-catching with few deep marks.(#6346)

1874-CC Half Dollar, VF20
Scarce Carson City Issue

3732 **1874-CC Arrows VF20 PCGS. WB-3.** Most easily attributed by the "cow lick" over the eagle's head. Probably 300-350 individual coins are extant today out of the mintage of 59,000 pieces. The medium gray-blue interiors are surrounded by charcoal-gray at the margins. A few straight scratches over the obverse devices can be made out with a magnifier.
From The Norva Collection. (#6347)

3733 **1876-CC MS62 NGC. CAC.** The prooflike surfaces of this sharply detailed Seated Liberty half dollar are graced by attractive shades of greenish-gold and light blue patina. Census: 14 in 62, 52 finer (6/12).(#6353)

1877 Seated Half Dollar, MS66+
Colorfully Toned

3734 **1877 MS66+ PCGS. CAC.** Clear red-gold edged in pale peripheral blue covers both sides of this fully struck coin. A solid berry over H in HALF identifies a Type Two reverse. Here is as colorful and appealing a specimen as might be desired. Population: 19 in 66 (2 in 66+), 2 finer (5/12). (#6355)

1877-CC Seated Half, MS64
Many Interesting Die Cracks

3735 **1877-CC MS64 PCGS. CAC.** Type One Reverse, Medium CC. The 1877-CC Seated Liberty half dollar was produced in large numbers, but the coins circulated widely and few high-quality examples were saved. This well-detailed Choice specimen offers lustrous surfaces with only minor signs of contact. An extensive network of die cracks shows on the peripheries of both sides. Population: 44 in 64, 20 finer (5/12). (#6356)

3736 **1878 MS63 PCGS. CAC.** The design elements of this attractive Select specimen are well-detailed, with just a touch of softness on the stars. The surfaces radiate satiny mint luster, under shades of gold, lavender, and blue toning. Population: 16 in 63, 30 finer (6/12).(#6358)

3737 **1879 MS62 PCGS. CAC.** From a tiny mintage of 4,800 pieces, this delightful MS62 example displays well-detailed design elements and semiprooflike surfaces, under shades of lime-green and cerulean-blue patina.(#6361)

3738 **1879 MS63 PCGS.** Type Two Reverse. A satiny and sharply struck pearl-gray piece with the appearance of a finer grade despite a few delicate obverse hairlines and a faint reverse spot at 3 o'clock. A scant 4,800 business strikes were coined. Encased in an old green label holder.
Ex: Long Beach Signature (Heritage, 5/2008), lot 711, which realized $1,380.
From The Old Holder Collection.(#6361)

3739 **1881 MS63 NGC.** Golden border-toning yields to silver-and-gray interiors that show appreciable reflectivity, especially in the protected areas. Well-defined but lightly abraded devices exhibit significant frost. Census: 10 in 63, 43 finer (6/12). (#6363)

1881 Half Dollar, Multicolored MS65

3740 **1881 MS65 PCGS.** Only 10,000 strikes for circulation were produced in 1881. This, of course, places great date pressure on the few high-grade examples known. As one would expect from such a low mintage the fields are bright and semiprooflike, glowing brightly through the multicolored toning that covers each side. Minimally abraded. Population: 9 in 65, 13 finer (6/12). (#6363)

3741 **1883 AU55 PCGS. CAC.** There are no varieties recorded for this issue, and it is believed that a single die pair was employed for all 8,000 examples minted. This Choice AU piece has satin luster beneath blue and iridescent toning with scattered marks on each side.(#6365)

3742 **1884 MS63 PCGS.** Both sides of this impressive piece have brilliant silver surfaces. The strike is bold throughout, with full head details on the obverse. The surfaces are prooflike with excellent contrast, at first glance resembling a proof. Population: 20 in 63 (1 in 63+), 72 finer (5/12).(#6366)

3743 **1885 XF40 PCGS. CAC.** Only 5,200 business-strike Liberty Seated half dollars were struck in 1885. This attractive XF example displays lightly abraded surfaces and pleasing bluish-gray patina. Population: 3 in 40, 89 finer (6/12).
From The Norva Collection.(#6367)

3744 **1886 MS64 PCGS.** Medium intensity grayish-orange toning with cobalt-blue accents on the obverse yields to grayish-blue patination on the reverse. Both sides display soft luster, are well struck, and are minimally abraded. Population: 30 in 64, 14 finer (6/12).(#6368)

3745 **1887 XF40 PCGS.** Only light wear shows on the high points of this attractive Seated Liberty half dollar. The surfaces display light greenish-gold toning, and traces of prooflike reflectivity remain in sheltered areas. From a mintage of just 20,000 pieces.
From The Norva Collection.(#6369)

Gem Business Strike 1888 Half
Seldom Seen So Fine

3746 **1888 MS65 PCGS.** The mintage of business strike Seated halves in 1888 went *up* to 12,001 pieces, but it is difficult to find a Gem example such as the present piece. Mottled gray-blue toning is scattered about each side, complementing the strong underlying mint luster. The surfaces are relatively unmarked, consistent with the grade. Population: 22 in 65, 21 finer (6/12). (#6370)

MS65 1890 Seated Liberty Half
Only 12,000 Pieces Struck

3747 **1890 MS65 PCGS.** This well-detailed Gem displays just a touch of softness on Liberty's head and the eagle's claws. The mostly brilliant, well-preserved surfaces exhibit a combination of satiny mint luster and prooflike reflectivity, with a few traces of golden-tan toning. Population: 16 in 65 (1 in 65+), 16 finer (6/12). (#6372)

PROOF SEATED HALF DOLLARS

3748 **1863 PR63 NGC.** Shades of cerulean-blue and grayish-gold patina grace the surfaces of this attractive Select proof, with most of the color on the obverse. The design elements exhibit razor-sharp definition throughout. Census: 30 in 63, 41 finer (6/12). (#6417)

3749 **1866 Motto PR64 Cameo PCGS.** Razor sharp definition shows on the frosty design elements of this Choice proof Seated Liberty half, with boldly contrasting deeply mirrored fields. Population: 11 in 64 (2 in 64+) Cameo, 5 finer (6/12).(#86424)

3750 **1869 PR63 NGC.** Gold-toned at the margins with a violet-gray skein down through Liberty's cap and on to her knee. Lightly hairlined but largely pleasing with a modicum of contrast. (#6427)

1874 Arrows Half, PR66
Attractively Toned, Nicely Mirrored

3751 **1874 Arrows PR66 PCGS. CAC.** Ex: Teich Family Collection. The Arrows type is always in demand by collectors across the three denominations where this device was used in 1873-1874. Only 700 proof Arrows halves were struck. This example is deeply mirrored and the interior of each side exhibits rich reddish patina with blue around the margins. The devices are sharply struck throughout and there are no obvious or detracting contact marks on either side. This much sought-after type is also a condition rarity with only three other pieces so graded by PCGS and two finer (6/12). (#6435)

3752 **1878 PR64 NGC.** Tinges of cobalt-blue toning reside along the borders of this attractive gold toned Choice proof. Both sides are fully mirrored with sharp details and satin devices. (#6439)

3753 **1879 PR63 PCGS. CAC.** The considerable field-device contrast on each side seems sufficient to merit a Cameo designation, but there is none. The surfaces are deeply reflective and pinkish-golden-tinged throughout, with well-frosted devices. Light field hairlines account for the grade.(#6440)

1880 Seated Liberty Half, PR66+
Only Two Finer PCGS Coins

3754 **1880 PR66+ PCGS.** Proof sets were in high demand in 1880 because of a widespread, but short-lived, speculation in Trade dollars, which were only available in proof format. As a result, the 1880 proof Seated Liberty half dollar enjoyed a generous mintage of 1,355 pieces. Few survivors can match the quality and visual appeal of this high-end Premium Gem, with sharply detailed design elements, deeply mirrored fields, and spectacular shades of champagne-gold and cerulean-blue toning. Population: 15 in 66 (1 in 66+), 2 finer (5/12). (#6441)

3755 **1881 PR64 PCGS. CAC.** Peach-gold borders accompany brilliant fields and frosty devices. Cameo contrast is significant, especially on the obverse, though no such designation is on the insert since the coin is encapsulated in a green label holder.(#6442)

3756 **1884 PR63 PCGS.** This sharply detailed Select specimen displays vivid shades of golden-brown toning, with a peripheral ring of cobalt-blue on both sides. The fields are deeply reflective, under the patina. Population: 73 in 63, 96 finer (6/12).(#6445)

1884 Half Dollar, PR66
Scarce, Low-Mintage Date

3757 **1884 PR66 PCGS.** Notable in both proof and business strike formats, the 1884 had a total mintage of only 5,275 pieces, of which only 875 were proofs. This moderately mirrored example has lovely multicolored rose, aquamarine, and purple toning in varying degrees on each side. A sharply struck Premium Gem. Population: 10 in 66, 3 finer (6/12). (#6445)

1886 Half Dollar
Reflective PR64 Cameo

3758 **1886 PR64 Cameo PCGS.** Seated halves from the decade of the 1880s are eagerly sought due to low mintages alike for proofs and business strikes. This near-Gem proof displays deeply reflective fields complementing sharp contrast against the devices. The centers are nearly brilliant, accented with deeper rose and cobalt hues at the rims. Population: 18 in 64 Cameo, 13 finer (6/12). (#86447)

3759 **1887 PR63+ PCGS.** The deeply reflective fields host attractive shades of lime-green and lavender-blue toning on the obverse, while the reverse displays champagne-gold and gray hues. The design elements are well-detailed and only minor signs of contact are evident. Population: 41 in 63 (1 in 63+), 91 finer (6/12). (#6448)

3760 **1887 PR64 NGC.** Iridescent shades of golden-brown and violet toning grace the reflective surfaces of this delightful Choice proof, with sharply detailed design elements and exquisite eye appeal. Census: 40 in 64, 46 finer (6/12).(#6448)

Reflective Gem Proof 1887 Half

3761 **1887 PR65 PCGS.** The mintage of a meager 5,000 business strikes for the 1887 Seated half complements the proof production of 710 coins. This Gem proof example features deep patina over each side in variegated shades of blue, gold, and rose, yet the fields throughout are still deeply reflective. Population: 25 in 65, 8 finer (6/12). (#6448)

Gem Cameo Proof 1888 Seated Half
Elusive With Cameo Contrast

3762 **1888 PR65 Cameo NGC.** The 1888 proof Seated Liberty half dollar boasts a mintage of 832 pieces and Gem examples, with the Cameo designation, are quite elusive. This sharply detailed Gem exhibits startling Cameo contrast between the frosty devices and the mirrored fields. A few hints of green and blue toning are present at the rims. Census: 15 in 65 Cameo, 1 in 65+ Cameo, 9 finer (5/12). (#86449)

3763 **1889 PR63 PCGS.** The field-device contrast is more blatant on the reverse of this mostly untoned silver-white piece. The strike is full on both sides, and minor field hairlines rather than blatant contact account for the grade.(#6450)

Gem Proof 1889 Seated Liberty Half
Rare Cameo Specimen

3764 **1889 PR65 Cameo NGC. CAC.** Accents of pale blue and green toning grace the peripheries of this spectacular Gem, with deeply mirrored fields that contrast dramatically with the frosty, sharply detailed design elements. From a tiny proof mintage of 711 pieces. Census: 3 in 65 Cameo, 3 finer (6/12). (#86450)

1890 Seated Half, PR64+ Cameo
Only 590 Pieces Minted

3765 **1890 PR64+ Cameo PCGS. CAC.** Only 590 proof Seated Liberty half dollars were struck in 1890, and high-end Choice examples, like the present coin, are seldom encountered with Cameo contrast. This delightful specimen displays rich mint frost on the devices and deeply mirrored fields that provide a startling black-on-white Cameo flash when the coin is tilted in the light. Population: 13 in 64 (1 in 64+) Cameo, 14 finer (6/12). (#86451)

BARBER HALF DOLLARS

1892 Half Dollar, MS66
First-Year Barber Issue

3766 **1892 MS66 NGC. CAC.** Widely save and available in the better grades of Uncirculated, this is a richly toned Premium Gem. Each side displays layers of gray, blue, and rose toning. The underlying mint luster is strong and thickly frosted, and the only marks of any note (with a magnifier) are on the lower portion of the shield. Census: 33 in 66, 8 finer (5/12). (#6461)

3767 **1892-O MS61 PCGS.** The 1892-O was the first New Orleans half dollar issue minted since before the Civil War. This lustrous representative is only minimally abraded for the grade and is moderately toned in pearl-gray and caramel-gold.
Ex: Long Beach Signature (Heritage, 6/2011), lot 3673. (#6462)

3768 **1892-S AU53 NGC.** Only minor circulation wear separates this piece from Mint State, and the reverse is particularly well-contrasted. A scattering of marks appears on each side under a loupe, more so on the obverse than reverse.(#6464)

3769 **1892-S AU55 NGC.** The 1892-S Barber half dollar is popular with mintmark type collectors as the first date of the design. This Choice AU specimen is well-detailed and lightly abraded. The surfaces are blanketed in shades of champagne-gold and gray toning, with traces of prooflike reflectivity in sheltered areas. Census: 10 in 55, 87 finer (6/12).(#6464)

3770 **1893-S MS61 NGC.** The 1893-S Barber half dollar claims a mintage of just 740,000 pieces. This well-detailed Mint State example is darkly toned in dusky shades of gray, gold, and amber. Census: 5 in 61, 40 finer (5/12).
From The Color Collection.(#6467)

1893-S Half Dollar, MS63

3771 **1893-S MS63 PCGS.** A few tiny chatter marks appear on the obverse, with a faint hairline on the cheek, and planchet drawing marks also present. The reverse is pristine and virtually Gem quality. This highly attractive Select Mint State piece has brilliant silver luster beneath delicate champagne toning. Population: 24 in 63 (1 in 63+), 23 finer (6/12). (#6467)

3772 **1895-O MS63 NGC.** Deep gold, olive, russet, and aqua tones blend on both sides of this sharply struck piece. There are no singular marks, but the right shield corner is soft, as usual, and the deep color mutes the luster. Census: 7 in 63, 27 finer (6/12). (#6472)

1896 Half Dollar, Beautifully Toned MS65 Underrated Issue

3773 **1896 MS65 PCGS.** The 1896 half is much scarcer than its mintage of 950,000 would indicate. It is especially challenging in the better grades of Uncirculated. This Gem has especially pronounced mint luster, plainly evident even through the crimson-gray central color and blue-green peripheries. Sharply struck. Population: 13 in 65, 4 finer (6/12). (#6474)

Choice AU 1896-O Half Scarce, Semikey Issue

3774 **1896-O AU55 NGC. CAC.** The semikey status of the 1896-O half has long been recognized by specialists. In part this is due to the low mintage of only 924,000 pieces. It is also due to the lack of collectors for this mint's products in the 1890s. Uncirculated examples are particularly scarce. This Choice AU piece is one of the few available for collectors who specialize in Almost Uncirculated Barber halves. This piece shows just a trace of friction, generous remaining mint luster, light gray patina overall that deepens around the margins. (#6475)

1896-S Half Dollar, Brilliant MS64+ A Dazzling Example of This Semikey

3775 **1896-S MS64+ PCGS.** The 1896-S half is a one of the best-known condition rarities in the Barber half series. This upper-end MS64 displays swirling cartwheel luster and dazzling, brilliant surfaces. The strike is full throughout, and the only grade-limiting marks are a pair on Liberty's profile. This piece lacks the often-seen roller marks on the face of Liberty. Population: 28 in 64 (2 in 64+), 13 finer (6/12). (#6476)

3776 **1897-O VF35 PCGS. CAC.** From a small mintage of 632,000 pieces, this Choice VF example displays pleasing dove-gray patina and no serious abrasions. The design elements retain much interior detail and LIBERTY is fully legible. Population: 15 in 35, 71 finer (6/12).
From The Norva Collection. (#6478)

3777 **1897-S XF40 PCGS.** This midgrade circulated 1897-S should make many a Barber half specialist's heart leap for joy, with excellent eye appeal over steel-gray surfaces tinged with gold. No mentionable distractions appear, even under a loupe, and plenty of bold detail remains.(#6479)

1897-S Half, Highly Lustrous MS63 Low-Mintage Issue

3778 **1897-S MS63 PCGS.** The mintage for the 1897-S was one of many in the series that was less than a million, with 933,900 pieces struck. But it appears there was little interest in setting aside examples, high-grade or otherwise, at the time of issue. This is a highly lustrous half whose surfaces are mostly brilliant with just the slightest tinge of gray-brown patina. A few light abrasions on the obverse explain the grade. Population: 8 in 63, 34 finer (6/12). (#6479)

3779 **1899-S MS62 NGC.** Bright, satiny mint luster is covered with just a slight layer of yellowish-rose patina. Sharply struck except on the eagle's tail feathers.(#6485)

3780 **1900 MS64 PCGS.** This sharply detailed Choice specimen is darkly toned in shades of blue-steel, gray, and golden-brown. Vibrant mint luster shines through the toning. Population: 49 in 64, 32 finer (6/12).
From The Color Collection. (#6486)

Gem 1902 Barber Half Dollar Only Seven Finer Coins at PCGS

3781 **1902 MS65 NGC.** Despite a mintage of over 4.9 million pieces, the 1902 half dollar is a rarity in Gem and better grades, since it was little-saved at the time of release. This example has strong and satiny luster beneath colorful toning, gold and silver-gray at the central obverse with blue-green and violet shadings elsewhere. Census: 8 in 65, 7 finer (5/12).
Ex: Summer FUN Signature (Heritage, 7/2009), lot 663.
From The Color Collection. (#6492)

Gem 1902-S Barber Half Dollar
Only 10 Finer Coins at PCGS

3782 **1902-S MS65 PCGS. CAC.** Like many turn-of-the-century issues from the San Francisco Mint, few examples of the 1902-S Barber half dollar were saved by collectors. Gem specimens are very rare today. This attractive Gem displays sharply detailed design elements and vibrant mint luster, with a few hints of green and blue toning. Population: 5 in 65, 10 finer (5/12). (#6494)

3783 **1905-O MS64 PCGS. CAC.** The 1905-O is seldom seen nice. This is certainly the exception. The surfaces are bright and exhibit uncharacteristic frosted mint luster. The untoned centers are surrounded by light reddish patina at the margins. The only fault we see on this lovely coin is softness of strike in the center of the reverse.(#6502)

3784 **1907 MS63 NGC.** This nice type coin has significant gray patina on the obverse with golden-rose toning at the margin, while the reverse is more brilliant than not. Well, but not fully struck. Minimally abraded for an MS63.(#6508)

1908-D Half Dollar, MS65
Early Denver Issue

3785 **1908-D MS65 PCGS.** A well-produced specimen of this midseries Denver Mint issue, the present Gem boasts moderate cartwheel luster under a light layer of grayish-gold patina accented by ice-blue and russet accents. A well-struck piece despite the usual problem area on the reverse. Population: 24 in 65, 12 finer (6/12). (#6513)

1908-O Barber Half Dollar, MS66
Only Six Finer Coins at NGC

3786 **1908-O MS66 NGC.** The well-preserved surfaces of this attractive Premium Gem are patinated in shades of gray, golden-brown, and cerulean-blue, creating a dazzling play of colors. The design elements are well-detailed and the surfaces radiate satiny mint luster. Census: 9 in 66, 6 finer (6/12). (#6514)

1908-S Barber Half, Lightly Toned MS65
Scarce, Underrated Issue

3787 **1908-S MS65 PCGS. CAC.** An underrated issue in the Barber half dollar series, the 1908-S is seldom seen in Gem condition, much less in finer grades. The surfaces on this Gem are mostly silver-white in the centers, ceding to a melange of russet and lilac near the rims. The strike is sharp, just missing fully struck status. Population: 9 in 65, 6 finer (6/12). (#6515)

3788 **1915-D MS64 PCGS.** The bright, essentially brilliant surfaces are gold-kissed and yield radiant luster and well-struck devices on this near-Gem 1915-D half. A few small marks on Liberty's cheek, neck, and on the shield preclude a higher grade.
Ex: Long Beach Signature (Heritage, 2/2005), lot 7178. (#6533)

PROOF BARBER HALF DOLLARS

3789 **1897 PR64+ Cameo PCGS. CAC.** This PR64+ Cameo piece appears on the cusp of both Gem and Deep Cameo designations, with intense contrast, profound eye appeal, and little evidence of color beyond a suggestion of gold on the obverse. Population: 28 in 64 (1 in 64+) Cameo, 30 finer (6/12).(#86544)

1897 Barber Half Dollar
Dazzling PR68 Ultra Cameo

3790 **1897 PR68 Ultra Cameo NGC.** The reverse exhibits spectacular contrast between the ice-white devices and the darkly mirrored field. The obverse contrast is nearly as remarkable, although the borders show light milky-gray toning. The strike is complete on the often-soft fletchings and claws, and even the right shield corner has pleasing definition. Pristine aside from a brief thin mark beneath obverse star 7, which will identify future appearances of this impressive proof Barber type coin, among the finest survivors from an issue of 731 pieces. Census: 12 in 68 Ultra Cameo, 1 finer (5/12). (#96544)

3791 **1899 PR64+ Cameo PCGS.** Here's the question: What does it take to get a Deep Cameo designation? This piece has exceptional, stark contrast on each side. The centers are brilliant with light golden-brown margins.(#86546)

3792 **1899 PR64 Cameo PCGS. CAC.** This brilliant silver-white piece displays sharp field-device contrast, with the reverse verging on Deep Cameo. The surfaces are virtually mark-free and appear on the cusp of an even finer grade, although the right shield corner is somewhat softly struck. Population: 15 in 64 (3 in 64+) Cameo, 26 finer (6/12).(#86546)

1900 PR66+ Cameo Barber Half
Always-Popular Date

3793 **1900 PR66+ Cameo PCGS. CAC.** The production of 912 proofs is nowhere near enough to satisfy collector demand for this popular date. This is an especially attractive example that exemplifies what Cameo contrast is all about. The fields are unfathomably deep and the devices heavily frosted, the combination yields stark contrast on each side. The centers are brilliant with a light ring of golden around the margins. Population: 14 in 66 (4 in 66+) Cameo, 5 finer (6/12). (#86547)

Toned PR66+ 1901 Half Dollar

3794 **1901 PR66+ PCGS. CAC.** Dappled ocean-blue dominates the obverse of this needle-sharp and immaculate specimen. The reverse exhibits faint autumn-gold patina except at the margins, which offer deeper forest-green shades. The eagle displays obvious frost but the obverse toning pattern precludes a Cameo designation. Only 813 proofs were produced. (#6548)

3795 **1902 PR64+ PCGS. CAC.** Stone-white and precisely struck with spot-free surfaces. Both the portrait and eagle exhibit moderate frost but the white-on-black contrast falls just short of a Cameo designation.(#6549)

Gem Proof 1902 Barber Half Dollar
Only 777 Pieces Struck

3796 **1902 PR65 PCGS.** From a minuscule mintage of 777 pieces, the 1902 proof Barber half dollar is seldom encountered in Gem condition. This attractive specimen is sharply detailed in most areas, but a touch of softness shows on the right shield point. The reflective fields exhibit traces of light gold toning. Population: 26 in 65, 31 finer (5/12). (#6549)

Childs' Gem Proof 1908 Half

3797 **1908 PR65 PCGS.** Ex: Childs. Lightly dappled rose-red, olive-green, and tan-gold toning graces this fully struck and flashy Gem. The icy motifs demonstrate obvious contrast, though the 1999 certification preceded the Cameo designation for proof Barber halves. Likely purchased directly from the Mint by C.F. Childs, who extended the collection inherited from his father Walter Childs. *Ex: Walter H. Childs Collection (Bowers and Merena, 8/1999), lot 412.* (#6555)

3798 **1911 PR64 NGC.** Rich forest-green, cobalt-blue, and tobacco-brown toning enriches this well struck Choice proof. One spot is noted beneath the A in STATES.(#6558)

1911 Half Dollar, PR66+ Cameo
Peripheral Toning

3799 **1911 PR66+ Cameo PCGS.** Seldom encountered with cameo contrast in any grade, the availability is further limited by the mintage of only 543 proofs. This lovely piece has deeply mirrored fields on each side and significant mint frost covering the devices. The brilliant centers are surrounded by pale rings of golden-brown and blue at the margins of each side. Population: 14 in 66 (2 in 66+) Cameo, 4 finer (6/12). (#86558)

1913 Barber Half, PR65
Reflective, Contrasted Surfaces

3800 **1913 PR65 PCGS.** The 1913 Philadelphia Barber half has such a low mintage of 188,000 pieces that proofs fill in the slots in many a collection. Gem proofs are seldom seen: PCGS has seen 28 in 65 with 28 finer (6/12). This example features deeply reflective fields with noticeable contrast against the devices. Even, light golden-rose toning covers each side. (#6560)

1914 Barber Half Dollar, PR64 Cameo
Only 380 Pieces Struck

3801 **1914 PR64 Cameo PCGS. CAC.** Bold Cameo contrast, unusual on coins of this era, is immediately apparent when viewing this delightful Choice proof half dollar. The design elements are sharply detailed and richly frosted, and the brilliant fields are deeply reflective. Eye appeal is outstanding. Population: 5 in 64 Cameo, 6 finer (6/12). (#86561)

EARLY DOLLARS

3802 **1795 Flowing Hair, Three Leaves AG3 PCGS. B-5, BB-27, R.1.** The bar in the field, near the top curl, is discernible on close inspection, identifying this popular variety. A well-worn, but problem-free, example of this important Flowing Hair type issue. (#6852)

1795 Flowing Hair Dollar, Fine 15
Three Leaves Reverse, B-5, BB-27

3803 **1795 Flowing Hair, Three Leaves Fine 15 PCGS. B-5, BB-27, R.1.** The diagnostic diagonal bar in the upper left obverse field is clearly evident on this example. Both sides have medium to dark pewter-gray patina with faint gold and blue overtones. Myriad surface marks are evident, and they are consistent with the grade. A splendid specimen for the modest grade.
From The Norva Collection. (#6852)

1795 B-7, BB-18 Dollar, VF Details
Flowing Hair, Three Leaves

3804 **1795 Flowing Hair, Three Leaves — Improperly Cleaned — NGC Details. VF. B-7, BB-18, R.3.** The mottled light silver-gray and deep steel surfaces suggest some type of environmental damage prior to the cleaning event that left myriad hairlines on each side. Minor rim imperfections are noted. This piece should prove affordable for the budget-conscious collector seeking a nicely detailed Flowing Hair dollar. (#6852)

1795 Flowing Hair Dollar, VF35
Popular B-5, BB-27 Variety

3805 **1795 Flowing Hair, Three Leaves VF35 NGC. B-5, BB-27, R.1.** Bowers-Borckardt Die State II. The "bar" in the field, near the top curl, identifies the BB-27 variety. The lightly abraded surfaces of this Choice VF specimen are a pleasing silver-gray color, with hints of golden-tan. A few minor rim bruises are present, but no adjustment marks, and the devices retain a significant portion of their original detail. (#6852)

Famous Three Leaves 1795 Dollar
B-5, BB-27, MS61

3806 **1795 Flowing Hair, Three Leaves MS61 NGC. B-5, BB-27, R.1.** Bowers-Borckardt Die State II, with the die crack off the left wreath stem not reaching the rim. The B-5, BB-27 is the most common of the 1795 dollar die pairs regardless of design variety or subvariety, which induces price pressure from type collectors whether or not they tackle subvarieties such as the Two or Three Leaves versions of Flowing Hair dollars (the other five Three Leaves die pairs are scarce or rarer, for example). Better circulated and Mint State representatives of the B-5, BB-27 experience a magnified version of this pressure.

This example is a warmly lustrous MS61 that illustrates many of the typical characteristics of its die pair. The Bowers-Borckardt reference notes that "most early die states show striking weakness at the centers." Certainly this coin is not strong on the interiors, yet the luster flow is undisturbed even at seemingly detail-lacking zones such as the eagle's breast. The long, raised "bar" between star 5 and the uppermost flowing curl in Liberty's hair is a prominent diagnostic for the obverse die and thus the die pair.

Several colors add life to the gray base, including orange, gold, and green elements. A few small spots of charcoal toning also are present, more on the reverse. While the piece shows wispy flaws and a few deeper marks such as the near-vertical abrasion behind Liberty's eye, this coin's all-around eye appeal is better than the MS61 designation might suggest. Census: 13 in 61, 38 finer (5/12). (#6852)

1795 Flowing Hair Dollar, AU58 Example
Two Leaves, B-1, BB-21

3807 **1795 Flowing Hair, Two Leaves AU58 NGC. B-1, BB-21, R.2.** The Flowing Hair design was retired in 1795, in favor of the Draped Bust motif, but the Philadelphia Mint achieved a staggering mintage of 160,295 Flowing Hair silver dollars before the changeover took place. Since 1794 dollars are so rare and expensive, the 1795 enjoys great popularity with type collectors. There are 17 die varieties known for this date and type, with another two varieties of the 1795 Draped Bust design. The present coin is a representative of the BB-21 variety, with the 7 in the date punched over an errant 1. While BB-21 is a reasonably available variety, examples in near-Mint condition are quite scarce.

The present coin is a sharply struck near-Mint specimen, with only slight wear showing on the eagle's breast and leg. The pleasing surfaces are primarily silver-gray, with strong highlights of gold and steel-blue. A few light adjustment marks are visible on the obverse center. (#6853)

1795 B-1, BB-21 Flowing Hair Dollar
Mint Inserted Silver Plug

3808 **1795 Flowing Hair, Silver Plug — Surface Damage — Genuine PCGS. B-1, BB-21, R.2.** The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VG specimen that has surface damage. both sides show mottled toning with heavy scratches and myriad pin-point ticks.

A Mint-made silver plug is clearly outlined at the center of the obverse with slight evidence on the reverse. While the B-1 die marriage is the second commonest of 1795 Flowing Hair dollars, this variety is rarely encountered with a silver plug. (#6854)

Silver-Plugged 1795 Flowing Hair Dollar Midgrade Example, Very Fine, B-1, BB-21

3809 **1795 Flowing Hair, Silver Plug VF20 NGC. B-1, BB-21, R.2.** Two Leaves Reverse. Several varieties of early U.S. dollars are known with Mint-inserted silver plugs, a Mint artifice that, unlike planchet adjustment marks which were used to bring overweight planchets down to standard, were the inverse, used to bring underweight blanks up to par. The B-1, BB-21 die pairing with silver plug was only discovered recently, in 1993. The five prominent hair curls behind Liberty's head identify the obverse, with an extra light curl below the third one down. The Two Leaves reverse displays a berry under the right side of the last A in AMERICA. This piece shows a nice midgrade circulated appearance, with the plug clearly visible amid pinkish-gray surfaces. A small round indent in the planchet appears on the obverse, above the 9, and some faint pinscratches appear on the lower bust. (#6854)

Popular Silver Plug 1795 Flowing Hair Two Leaves Dollar, B-1, BB-21, VF30

3810 **1795 Flowing Hair, Silver Plug VF30 NGC. CAC. B-1, BB-21, R.2.** Two Leaves Reverse. While many silver-plugged 1795 dollars have small or hard-to-see plugs, this piece not only has the plug more visible on the obverse, where it can be displayed easily, but covering a large and well-defined area with clear separation of the hair detail on the plug's left curve. Otherwise this is a generally pleasing midrange example of the most available 1795 Two Leaves die pair, medium-gray with an orange-cast and scattered abrasions on the interiors. The rims have taken a few hits, such as the depression near star 8 on the obverse and a sizable nick between the E and R of AMERICA. (#6854)

1795 Flowing Hair Dollar, XF40
B-4, BB-14, Silver Plug

3811 **1795 Flowing Hair, Silver Plug XF40 PCGS Secure. B-4, BB-14, R.3.** Two Leaves Reverse. It is thought the the 1795 B-4, BB-14 dollar was struck early in the year, with one known example struck over a 1794 silver dollar, and others known with Mint-inserted silver plugs, an experiment that only took place in 1794 and 1795.

A complete outline of the silver plug is visible on the reverse of this example, with no evidence visible on the obverse. Careful study is necessary to view the plug, as a few random surface scratches are also visible at the same location. Both sides have delicate gold toning with light gray accents. (#6854)

1795 B-14, BB-51 Dollar, VF35
Draped Bust 'Set Left'

3812 **1795 Draped Bust, Off Center VF35 NGC. B-14, BB-51, R.2.** Two varieties are known for the 1795 Draped Bust silver dollars, having the central obverse figure centered, or left of center on the coin. There are several ways to describe that alignment: Centered and Off-Center, Centered and Uncentered, and on the present holder, "Set Left" is used to distinguish the variety. This Choice VF specimen has light amber and iridescent toning over light gray surfaces. (#96858)

1795 B-14, BB-51 Dollar, AU58
Uncentered Draped Bust

3813 **1795 Draped Bust, Off Center AU58 NGC. B-14, BB-51, R.2.** NGC's records for the Off Center Draped Bust (called "Set Left" in their parlance) 1795 dollars show only a handful of recently certified AU58 and finer examples, though a pool of about three dozen unsorted Draped Bust 1795 dollars complicates efforts to come up with correct census figures. In any event, though, it is clear that the issue is a rarity as fine as this near-Mint representative. Deep rose-orange and gold overtones settle across rich gray surfaces that have a medium hue at the interiors and areas that come close to charcoal at the margins. Well-defined, though the tops of the letters at the left half of LIBERTY show weakness from an adjustment-marked area, with just a touch of friction on the highest design elements. (#96858)

1795 B-14, BB-51 Dollar, AU58
Off-Center Draped Bust

3814 1795 Draped Bust, Off Center AU58 PCGS Secure. B-14, BB-51, R.2. The "Off Center" description applies to the design rather than the strike, and is better called Uncentered to avoid confusion, as the actual strike on this piece is exceptionally well centered. This variety is one of the most plentiful varieties of the year, so it is perhaps surprising that all observed examples are from perfect dies, according to the Bowers-Borckardt reference.

The present piece is an exception to that observation, with faint clash marks visible at the upper reverse. New die states of the early dollars, like all other early series, are constantly being discovered. It is only after publication of ground-breaking references, such as the Bowers-Borckardt study, that further information will be discovered.

This lovely near-Mint specimen has frosty luster with mostly brilliant, untoned surfaces showing only delicate champagne toning. Delicate handling marks are noted, with faint radial adjustment marks around the entire reverse perimeter. (#96858)

3815 1796 Small Date, Large Letters — Holed and Plugged — Genuine PCGS. B-4, BB-61, R.3. Bowers-Borckardt Die State I. In our opinion, this coin has the details of a Fine specimen that has been plugged and whizzed. The plug is at the right wreath stem and opposite near the ER in LIBERTY. Affected design elements have been carefully re-engraved. This steel-gray dollar is whizzed and has a granular portrait. The lower right obverse field displays moderate marks.(#6860)

1797 B-3, BB-71 Dollar, AU58
10x6 Stars, Large Letters

3816 1797 10x6 Stars, Large Letters AU58 NGC. B-3, BB-71, R.3. Three 1797 silver dollar varieties are known, and each is listed in the *Guide Book*. This variety with the obverse stars arranged 10 x 6 is listed first in the Bowers-Borckardt reference, suggesting that it was minted before the other two. Several decades earlier, Bolender listed it last, implying that it was the final 1797 variety coined.

Regardless of the actual emission sequence, the obvious eye appeal and originality of this pewter-gray, rose, and gold specimen is undisputed. Both sides are nicely defined with exceptional luster and satiny silver surfaces. (#6865)

1797 B-2, BB-72 Dollar, XF40
9x7 Stars, Small Letters

3817 **1797 9x7 Stars, Small Letters XF40 PCGS. B-2, BB-72, R.4.** Ex: Hesselgesser. Once considered a major rarity, the 1797 Small Letters reverse silver dollars are the rarest of three known die varieties of the date. Higher grade examples of this die marriage remain important rarities, and Mint State examples are extremely rare. In fact, no Mint State pieces have been certified at PCGS or NGC. The average grade of 104 submissions to those two services is just VF30.

The cataloger has seen just one Mint State example of this variety that is part of the Eric Newman Education Foundation and is the plate coin in the Bowers-Borckardt *Encyclopedia*. The present specimen is a pleasing, lightly circulated example with lovely golden-tan, pewter-gray, and cobalt-blue toned piece with hints of underlying luster and scattered surface marks expected for the grade. Population: 7 in 40, 8 finer (5/12). (#6866)

1798 Draped Bust Dollar, VF30
Small Eagle Reverse, B-1, BB-82

3818 **1798 Small Eagle, 13 Stars VF30 PCGS. B-1, BB-82, R.3.** Bowers-Borckardt Die State II. Two varieties of the 1798 Draped Bust dollar employ the Small Eagle reverse, which gave way later in the year to the Heraldic Eagle design. BB-82 is distinguished by its 13 Star obverse. This coin retains all significant detail on the major design elements, with strong highlights of original mint luster, under attractive pink and gold patina. Population: 21 in 30, 88 finer (5/12).
From The Norva Collection. (#6867)

3819 **1798 Large Eagle, Pointed 9, Four Berries — Reverse Damage — NGC Details. VF. B-8, BB-125, R.2.** Bowers-Borckardt Die State II. A granular area is noted between the eagle's neck to the D in UNITED, and a fairly deep depression affects reverse star 5. Both sides are faintly hairlined. Softly struck on the hair ribbon and opposite near the junction of the left wing to the shield.

3820 **1798 Large Eagle, Pointed 9 — Improperly Cleaned — NGC Details. VF. B-12, BB-120, R.4.** Bowers-Borckardt Die State II. The sharpness is pleasing and there are no singularly distracting marks, but the surfaces appear slightly glossy beneath deep golden-brown and steel-blue toning.(#6873)

1798 Draped Bust Dollar, AU55
Rare B-26, BB-114 Variety

3821 **1798 Large Eagle, Pointed 9 AU55 PCGS Secure. B-26, BB-114, R.5.** A light die crack beginning under the date and another on the reverse, from the shield through the stem to the border, identifies the rare BB-114 variety. Q. David Bowers knew of no Mint State examples of the BB-114 when he wrote his series reference in 1993, and the highest grade in his Condition Census was only XF45. This well-struck Choice AU specimen shows just a little flatness on the central reverse and retains much original mint luster, under shades of pink and gold patina. Population (not broken down for variety): 40 in 55, 45 finer (5/12). (#6873)

1798 B-13, BB-108 Dollar, VF30
Only 10 Arrows

3822 **1798 Large Eagle, 10 Arrows VF30 PCGS. CAC. B-13, BB-108, R.3.** This variety is always seen with a vertical die crack at the right side of the L in LIBERTY, although no other die cracks are apparent on this early die state specimen. Deeply toned in pewter and gray-gold, this original dollar has excellent surfaces for the grade. A highly appealing Choice VF. The 10 Arrows reverse carries a slight premium over other *Guide Book* listings for 1798 Heraldic Eagle dollars. (#6876)

1798 B-23, BB-105 Dollar, VF35

3823 **1798 Large Eagle, Wide Date, Pointed 9 VF35 ANACS. B-23, BB-105, R.3.** Bowers-Borckardt Die State II with cloud 3 lapped, the usual state for the variety. Reddish-brown, light gray, and iridescent toning appear on both sides of this pleasing Choice VF early dollar. Scattered marks are consistent with the grade. (#6877)

1799/8 B-3, BB-141 Dollar, AU50
15 Stars Reverse

3824 **1799/8 15 Stars Reverse AU50 PCGS. B-3, BB-141, R.3.** The unusual variety with 13 stars on the obverse and 15 stars on the reverse. The two extra reverse stars at each end of the top row, are mostly hidden beneath enlarged clouds, an ingenious solution to an engraving blunder. This pleasing piece has considerable luster with still brilliant silver surfaces beneath light gold toning, all within a frame of peripheral blue. Population: 16 in 50, 41 finer (6/12). (#6883)

3825 **1799 7x6 Stars VF20 NGC. B-14, BB-167, R.3.** Bowers-Borckardt Die State III. The BB-167 variety is characterized by two die flaws in the obverse field, by the eye, and another pair of die flaws under AM in AMERICA. This attractive early dollar is toned in dark shades of gray and blue-steel, with a minor reverse rim bruise at 7 o'clock.(#6878)

3826 **1799 7x6 Stars VF20 PCGS. B-9, BB-166, R.1.** Bowers-Borckardt Die State V. This cream-gray Bust dollar lacks mentionable marks and is nicely detailed for the VF20 level. B-9 is known as the "apostrophe" variety due to its die break after the second S in STATES.(#6878)

Bold XF 1799 Silver Dollar
7x6 Stars, B-17, BB-164

3827 **1799 7x6 Stars XF40 PCGS. B-17, BB-164, R.2.** Bowers Borckardt Die State II-III. This early dollar has light to medium lilac-gray and straw-gold toning. Well defined and attractive with noticeable marks limited to a hair-thin line near the chin and a small reverse rim ding at 11:30. Traces of luster glimmer from design elements. (#6878)

Patinated XF 1799 Dollar, B-12, BB-160

3828 **1799 7x6 Stars XF40 NGC. B-12, BB-160, R.3.** Bowers-Borckardt Die State I. Deep steel-blue and caramel-gold patina embraces this lightly abraded and attractively defined early silver dollar. Glimpses of luster emerge from the stars, legends, and wings. A decidedly above-average example of this pursued crown-sized type. (#6878)

3829 **1799 7x6 Stars — Obverse Damage — NGC Details. VF. B-23, BB-159, R.4.** The BB-159 *Guide Book* variety is easily recognized by the 8x5 arrangement of the obverse stars. This lightly circulated specimen shows minor damage in the left obverse field and Liberty's throat, with some interesting clash marks under the bust. (#6881)

3830 **1800 Genuine PCGS. B-12, BB-184, R.3.** The PCGS number ending in .82 suggests Filed Rims as the reason, or one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VG specimen that has filed rims. The striking details are a little soft on the centers of this pleasing dove-gray example, and incomplete design detail should not be entirely attributed to actual wear.(#6887)

1800 Draped Bust Dollar, XF40
Elusive B-5, BB-189 Variety

3831 **1800 XF40 NGC. B-5, BB-189, R.5.** Bowers-Borckardt Die State III. A pair of die dots, one inside the lower part of R in LIBERTY, and the other near the lower left part of the second T in STATES, identifies the BB-189 variety. The BB-189 can be located in lower grades with some patience, but AU specimens are very rare, and neither of the leading grading services has certified an example in Mint State. This attractive XF piece shows only light wear on the design elements, and the surfaces retain significant amounts of mint luster, with pleasing accents of gold and pink patina. (#6887)

3832 **1801 — Improperly Cleaned — NGC Details. Fine. B-3, BB-213, R.3.** Bowers-Borckardt Die State II. A bit bright from cleaning, this early silver dollar also has a rim mark beneath the 0 in the date and a couple of thin abrasions on the jaw. Light caramel-gold toning helps restore the eye appeal.(#6893)

1802/1 B-1, BB-231 Dollar, VF30
First 1802 Dollar Emission

3833 **1802/1 Narrow Date VF30 PCGS. B-1, BB-231, R.4.** The Bolender and Bowers-Borckardt references both place this variety first in the emission sequence. This Choice VF has lovely gold and violet-gray toning over pleasing surfaces that show only scattered, trivial marks. Hints of luster are still visible in the protected areas around the devices. A lovely early dollar. (#6898)

1802/1 B-3, BB-234 Dollar, AU50

3834 **1802/1 Wide Date AU50 PCGS. B-3, BB-234, R.3.** A die lump in the field southwest of star 8 provides obvious identification of the die, and of the variety since this die was only used for B-3. Bowers-Borckardt Die State II, where the die lump is described as a "crack," or possibly Die State III as the reverse has cloud 6 diminished from die lapping.

This lovely specimen has original deep gray toning with faint bluish overtones and smooth surfaces showing only trivial marks. Traces of luster remain in the protected areas, with hints of delicate gold around the stars. (#6899)

Smooth XF 1802 Dollar
Narrow Date, B-6, BB-241

3835 **1802 Narrow Date XF40 NGC. B-6, BB-241, R.1.** Bowers-Borckardt Die State III. Though the portrait high points are toned cream-gray, the borders exhibit glimpses of ocean-blue and chestnut-gold. Luster illuminates design elements, and the absence of relevant abrasions furthers the eye appeal. A desirable example of a readily collectible *Guide Book* variety. (#6895)

Choice VF 1802 Wide Date Dollar
Better B-5, BB-242 Dies

3836 **1802 Wide Date VF35 NGC. B-5, BB-242, R.5.** Much scarcer than the Narrow Date variety, the Wide Date, non-overdate Bolender-5 is usually encountered in VF and XF grades. Deep lavender patina bathes this attractive Early Dollar. Although wear is evident on the portrait, nearly all of E PLURIBUS UNUM is clear, and the major devices are richly detailed. A small dig to the left of the lowest hair curl prevents an XF designation.
Ex: Central States Signature (Heritage, 5/2004), lot 7960, which realized $2,645. (#6896)

3837 **1803 Large 3 Fine 15 PCGS. CAC. B-6, BB-255, R.2.** The 3 has a vertical serif at the upper left, immediately identifying the Large 3 and the variety. While noticeably worn, this 1803 silver dollar has pleasing surfaces with golden-brown patina and slightly deeper overtones. The surfaces are virtually mark free with exceptional eye appeal.
From The Norva Collection.(#6901)

1803 Draped Bust Dollar, AU Details
B-6, BB-255, *Guide Book* Variety

3838 **1803 Large 3 — Environmental Damage — NGC Details. AU. B-6, BB-255, R.2.** Bowers-Borckardt Die State I. The BB-255 variety is recognized by the large, thick-topped 3 in the date. The surfaces of this interesting coin show a few areas of corrosion, the worst a large pit between R and T in LIBERTY. Most original detail remains intact, but the surfaces display unnatural brightness and toning.

GOBRECHT DOLLARS

1836 Die Alignment I Judd-60 Gobrecht Dollar PR45 Example, Late-December Striking

3839 **1836 Name on Base, Judd-60 Restrike, Pollock-65, R.5, PR45 NGC.** Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment I (the center of Liberty's head is opposite the D in DOLLAR). The straight, diagonally slanted die clash mark is just barely visible with magnification. At first glance this clash mark could be easily confused with a parallel shallow scratch in the same area, but the die clash mark points toward the TA in STATES and the scratch points toward TE. It is believed that 600 dollars were struck in late December after the initial, early-December striking of 400 pieces. Even wear is seen over the high points of the design, and there are numerous, small contact scattered about. The fields are still moderately reflective and each side displays bright golden-gray patina.
From The Norva Collection. (#11225)

1836 Gobrecht Dollar, Judd-60 Die Alignment I, Proof AU Details

3840 **1836 Name on Base, Judd-60 Original, Pollock-65, R.1 — Plugged, Repaired, Whizzed — ANACS. PR50 Details.** Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment I (the center of Liberty's head is opposite the DO in DOLLAR). This is an early-December striking, as seen by the lack of the diagonal die clash mark above the eagle's wing. The top of the obverse and bottom of the reverse have been crudely plugged. The fields lack the usual brightness, a result of the whizzing that has subdued any remaining flash. Sharply detailed (except on Liberty's head) and each side is nearly brilliant with just a hint of bluish patina. (#11225)

SEATED DOLLARS

3841 **1841 AU53 PCGS.** Attractive shades of green, gold, and gray toning blanket the surfaces of this well-detailed Seated Liberty dollar. The well-preserved surfaces show only minor abrasions. (#6927)

3842 **1844 XF40 PCGS.** The 1844 is a scarce date with a low mintage of 20,000 pieces. The present stone-gray example has appealing luster within the drapery, plumage, and legends. Close inspection locates occasional scattered minor marks customary for the grade. In a green label holder.(#6930)

3843 **1844 AU50 NGC.** Concentric rings of cobalt-blue and greenish-gold toning surround the silver-gray centers of this lightly circulated Seated Liberty dollar. From a mintage of just 20,000 pieces. Census: 11 in 50, 91 finer (6/12).
From The Norva Collection.(#6930)

3844 **1844 AU53 NGC.** From a mintage of just 20,000 pieces, the 1844 Seated Liberty dollar is not too difficult to locate in lower circulated grades, but Mint State examples are rare. This well-detailed specimen retains traces of original mint luster under hints of gold and amber patina. Census: 11 in 53, 80 finer (5/12). (#6930)

3845 **1845 XF45 NGC.** Muted luster clings to each side of this Choice XF 1845 Seated dollar, from the small production of 24,500 circulation strikes. The surfaces are pinkish-gray with an attractive appearance and only minor, scattered marks.(#6931)

3846 **1846 AU55 NGC.** A lightly circulated example of this early series Seated Liberty dollar, with well-detailed design elements and vibrant mint luster, under attractive shades of champagne-gold toning.(#6932)

3847 **1846-O XF45 PCGS.** Dark gray and blue steel patina blankets the surfaces of this lightly circulated Seated Liberty dollar. From a mintage of 59,000 pieces, the 1846-O is seldom encountered in high grade. Population: 42 in 45, 97 finer (6/12).
From The Norva Collection.(#6933)

3848 **1846-O AU55 NGC.** After opening in 1838, the New Orleans Mint finally made its first Seated dollar issue eight years later, the 1846-O, a meager production of 59,000 coins. This Choice AU piece is far finer than most, with lustrous, deeply toned orange-gold surfaces that show a bold strike and minor, scattered abrasions. Census: 16 in 55, 47 finer (6/12).(#6933)

3849 **1847 AU50 ANACS.** Traces of satiny luster are visible on each side of this silver-gray example with splashes of deep gray-violet toning, mostly on the obverse. Scattered marks are consistent with the grade.(#6934)

1850 Seated Liberty Dollar AU53
Low-Mintage Issue

3850 **1850 AU53 PCGS.** The low mintage of only 7,500 business strikes is believed to have been caused by a dramatic increase in gold dollar production and decrease in the amount of silver deposited for dollar production. Fully struck with flashing fields showing scattered, small abrasions and hairlines. A dark spot appears on the edge of the eagle's right wing.
From The Norva Collection. (#6937)

1857 Seated Liberty Dollar, AU50
Scarce Heavily Exported Issue

3851 **1857 AU50 PCGS.** Mint records indicate 94,000 Seated Liberty dollars were struck in 1857, but the great majority of the mintage was used in overseas trade and the date is scarce-to-rare in all grades today. This lightly circulated example shows just a trace of wear on the well-detailed design elements, with mellow gold and lavender patina and traces of prooflike reflectivity in sheltered areas. Population: 8 in 50, 86 finer (5/12).
From The Norva Collection. (#6945)

3852 **1857 — Cleaning — Genuine PCGS. AU Details.** The well-detailed design elements of this elusive Seated Liberty dollar show traces of wear on the high points, and the surfaces have muted mint luster, due to the noted cleaning. The surfaces have retoned in pleasing shades of gray and gold.(#6945)

3853 **1859 XF40 PCGS.** The 1859 Seated Liberty dollar is a scarce-to-rare issue in all grades. This well-detailed XF example displays attractive golden-brown and lavender-gray patina. Population: 19 in 40, 97 finer (6/12).(#6946)

3854 **1860-O AU50 PCGS.** Dusky shades of golden-brown and bluish-gray patina blanket the surfaces of this lightly circulated Seated Liberty dollar. The design elements are well-detailed, and only a few minor abrasions are evident.(#6950)

3855 **1861 VF20 NGC.** A moderately worn example of this popular Civil War era issue, with four letters in LIBERTY still totally legible, and pleasing silver-gray patina. From a mintage of 77,500 pieces.(#6951)

1861 Seated Liberty Dollar, XF40
Low-Mintage Civil War Era Issue

3856 **1861 XF40 PCGS.** The 1861 Seated Liberty dollar boasts a smallish mintage of 77,500 pieces, struck during the first year of the Civil War. Light wear is seen on on Liberty's legs and chest, but traces of luster reside within the drapery, plumage, and legends of this attractive XF example. Minor marks are scattered but there are no singular distractions. (#6951)

1862 Seated Dollar, AU53
Low-Mintage Date

3857 **1862 AU53 PCGS.** The 1862 Seated dollar has a notably low mintage of only 11,500 pieces, but it can occasionally be located in the better circulated grades. This is a sharply defined example that displays gray-blue toning over most of each side with lighter brilliant-rose accents over the high points. Minimally abraded with slight traces of luster evident beneath the toning. (#6952)

3858 **1865 AU50 PCGS.** Deep gunmetal-blue, charcoal, and lighter gray tones dominate this lightly circulated Civil War-era Seated dollar. Traces of prooflike reflectivity remain in sheltered areas. Lightly abraded overall with a rim bump between 1 and 2 o'clock on the obverse. Population: 19 in 50, 63 finer (6/12).(#6955)

3859 **1867 XF45 PCGS.** A Choice XF example of this low-mintage date, with just the slightest touch of wear on the well-detailed design elements and traces of original mint luster under shades of gold and lavender-gray toning.
From The Norva Collection.(#6960)

3860 **1870-CC Fine 12 NGC. Variety 3-D.** All Carson City Seated dollars are rare, and the first-year 1870-CC is in demand from CC-mint type collectors. This circulated example has an interesting mint-made wedge-shaped strike-through at 10 o'clock on the reverse. Lightly marked with slightly luminous and hairlined surfaces.(#6964)

Choice XF 1870-CC Dollar
Low-Mintage Rarity

3861 **1870-CC XF45 PCGS. CAC. Variety 2-E.** Golden-brown and electric-blue toning dominates this introductory-year Carson City dollar. Smooth aside from a few wispy marks between the TA in STATES. The 1870-CC is more collectible in XF and AU than its tiny mintage of about 12,000 pieces suggests. Perhaps examples were saved as curiosities after the Morgan series became plentiful. (#6964)

3862 **1871 AU55 NGC.** This lightly circulated Seated Liberty dollar retains almost all of its original design detail, and the lustrous surfaces are patinated in shades of greenish-gold and silver-gray. *From The Lance Gage Collection.* (#6966)

Mint State 1872 Seated Dollar
Excellent Type Coin

3863 **1872 MS61 NGC.** The 1872 Seated dollar issue is, by a slim margin over the 1871, the highest-mintage issue from the last decade of the series, making it an excellent potential acquisition for type purposes. This Mint State example shows typical semiprooflike surfaces with a golden obverse and deeper blue tints on the reverse. A few scattered marks are consistent with the grade but not overly distracting. (#6968)

3864 **1872-S VF20 PCGS.** Certified in a green label holder, the present coin features rich steel-blue, powder-blue, and chestnut-tan patina. Sharply defined for the VF level with microgranular surfaces and a couple of small obverse rim marks. The sole collectible Motto San Francisco issue. (#6970)

3865 **1872-S VF35 PCGS.** The charcoal-gray surfaces show moderate wear consistent with the grade but no singular contact. This Choice VF piece comes from the tiny mintage of only 9,000 coins, struck at a time when the San Francisco Mint's focus was on double eagles. *From The Norva Collection.* (#6970)

VF Details 1873-CC Dollar
Important Carson City Rarity

3866 **1873-CC — Obverse Graffiti — NGC Details. VF.** The 1873-CC is the rarest Carson City silver dollar issue. Only 2,300 pieces were struck, some of which were likely melted by the Mint prior to release after the Act of 1873 eliminated the denomination in favor of the Trade dollar. The present untoned example has been cleaned and displays a few thin pinscratches on the right obverse. A slight obverse rim ding is at 2 o'clock. Still a desirable example of a famous Old West rarity. (#6972)

Seldom-Seen 1852 Seated Dollar PR64 Restrike

3867 **1852 Restrike PR64 NGC.** The 1852 Seated dollar issue is, along with the 1851 and 1858, one of the "Big Three" in the series. Only 1,100 business strikes were produced in the original format, along with perhaps 15 to 30 proof originals and 45 to 90 restrikes, according to estimates in Q. David Bowers' various silver dollar references. The Bowers-Borckardt *Silver Dollar Encyclopedia* comments concerning the restrikes:

> "As business strikes of the 1852 dollar were recognized as rarities at an early date, the 'Midnight Minters' set about restriking Proofs of these coins, probably as early as 1858 and until mid-1860, when Director James Ross Snowden seized the dies and sealed them in a carton. When Director Henry Richard Linderman opened the carton in 1867, more may have been restruck. Several reverse die varieties exist, suggesting *restriking* on different occasions."

Breen and Bowers both estimate that 90% of existing proofs are restrikes, with at least three reverse dies known. This piece is certified as a Restrike by NGC, showing profoundly flashy fields. The centers are brilliant but slightly hazy, contrasting with margins ringed by deep gray-blue toning. The strike is soft on the stars and head of Liberty and on the lower reverse, the leaves, claw, and branch. Some contrast appears on each side, along with some wispy field hairlines. Census: 8 in 64, 2 finer (5/12). (#6995)

1854 Seated Dollar, PR64 Ultra Cameo Profoundly Contrasted

3868 **1854 PR64 Ultra Cameo NGC.** The 1854 proof Seated dollar is a prime rarity in any grade with a mintage that has variously been estimated between 50 and 100 pieces. Even business strikes are rare, as apparently most were exported in an early attempt to create a "trade" dollar issue for the United States, according to the Bowers-Borckardt reference. A near-Gem proof such as the present example should stir intense interest among knowledgeable collectors.

Profound field-to-device contrast is the chief attribute of each side of this impressive proof coin. The surfaces at first glance appear brilliant, but a faint blush of rose patina occurs on the obverse. The strike is full throughout. A few light field hairlines and faint contact marks are perhaps all that preclude an even finer grade. A "whiskers" effect appears under Liberty's chin, but the confirmation as a proof is provided by the always-present triangular bit of metal above the 5 in the date. This piece is the *sole Ultra Cameo in any grade certified at NGC*, and probably fewer than 30 examples of the issue survive in any grade. (#96997)

Rare Select Proof 1857 Seated Dollar

3869 **1857 PR63 PCGS.** The 1857 proof Seated dollars were made in the last year before the Mint started publicly marketing proof sets to collectors rather than the merely well-connected. The *Guide Book* gives no mintage figure, but this is undoubtedly a very rare issue. PCGS' CoinFacts offers 50 pieces as a mintage, and Bowers estimates 50 to 100 pieces. In any case, the present Select proof is one of 14 such at PCGS, with 10 in 64 and a single 65 the finest at that service (5/12). CoinFacts estimates that 40 survive in all grades, which would imply an original mintage larger than 50, in all probability. Generous luster greets the viewer of this piece, with greenish-gold patina on surfaces that may be precluded from an even finer grade by the remnants of a fingerprint in the right obverse field. There are no singular signs of contact, although the strike is soft on the eagle's upper left (facing) wing and sharp otherwise. (#7000)

1858 Seated Dollar, XF Details
Proof-Only Date

3870 **1858 — Holed, Plugged — PCGS Genuine. XF Details.** This is an unusual item to find holed and plugged. The 1858 is a well-known, low-mintage, proof-only date with an unknown mintage. Some suggest as many as 300 pieces were produced. When new or close to it, this must have been quite a flashy item to use as a watch fob. Today the reflectivity is gone and the surfaces are dulled from handling. The hole that was crudely plugged is between stars 9 and 10. Substantial deep, multicolored toning is seen over each side with numerous small contact marks present as well.

1870 Seated Dollar, PR64
Ex: Eliasberg Collection

3871 **1870 PR64 PCGS.** Ex: Eliasberg. Housed in a green label PCGS holder, this near-Gem from the famous Eliasberg Collection has fully original and beautiful gold toning with peripheral blue and iridescent splashes. A few trivial and hidden marks in the obverse field keep it below the Gem grades. The provenance dates back to the late 1800s, starting just 25 years after this coin was minted..
Ex: George Crawford Collection (Charles Steigerwalt, 7/1895); J.M. Clapp; John H. Clapp; Clapp Estate; Louis E. Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, 4/1997), lot 2241; Houston Sale (Heritage, 12/2009), lot 929. (#7018)

TRADE DOLLARS

3872 **1873 AU58 PCGS. CAC.** An attractive near-Mint example of this low-mintage first-year issue. Only slight traces of wear are evident on the high points of the design, and the smooth surfaces are toned in pleasing shades of golden-brown and bluish-gray. (#7031)

Lustrous MS63 1874 Trade Dollar

3873 **1874 MS63 NGC.** No period after FINE. This lovely Select Trade dollar has sweeping luster and a wisp of gold patina. The strike is precise aside from the eagle's right (facing) leg. Smooth overall for the grade with faint field marks noted near the eagle's head. Census: 19 in 63, 30 finer (6/12). (#7034)

3874 **1874-CC AU50 PCGS.** Micro CC, considered rare by Breen. The 1874-CC Trade dollar was heavily exported in the China trade and few high-grade examples were saved by collectors. This attractive AU example is well-detailed, with much remaining mint luster, under shades of gold and lavender-gray patina.
From The Norva Collection.(#7035)

3875 **1874-CC AU58 NGC.** Tall CC. Period after FINE. A mere whisper of gold toning visits this near-Mint Carson City example. Luster dominates design elements and there are no significant marks.(#7035)

3876 **1874-CC AU58 PCGS.** A heavily exported issue, the 1874-CC Trade dollar is seldom encountered in high grade. This well-detailed example displays lustrous surfaces, with wisps of pale gold toning.(#7035)

3877 **1875-CC AU55 NGC.** Type One Reverse. Golden-brown and powder-blue patina encompasses this lightly handled but minimally marked Carson City Trade dollar. Luster emerges from design elements, especially the eagle's plumage.(#7038)

3878 **1875-CC AU58 NGC.** Type One Reverse. Certified in an old NGC holder, this lightly circulated 1875-CC Trade dollar displays well-detailed design elements and satiny mint luster, with only minor signs of contact.
From The Old Holder Collection.(#7038)

3879 **1875-CC AU58 NGC.** Type One Reverse. This lightly circulated Trade dollar retains most of its original design detail and significant amounts of luster, under shades of greenish-gold and aquamarine toning.(#7038)

Select 1875-CC Trade Dollar
Elusive in Higher Grades

3880 **1875-CC MS63 PCGS. CAC.** Type One Reverse. The 1875-CC Trade Dollar claims the largest mintage of the Carson City series, at more than 1.5 million pieces. Most of the mintage was released into circulation or exported, so the date is seldom encountered in high grade. This well-detailed Select example displays lustrous surfaces under attractive shades of gold and lavender toning. Housed in a green label holder. Population: 56 in 63, 27 finer (5/12). (#7038)

1875-CC Trade Dollar, MS64
Bright Cartwheel Luster

3881 **1875-CC MS64 PCGS.** Type One Reverse. Generally brilliant, although freckles of tan patina endow the reverse. This Choice Carson City Trade dollar gains instant appeal with its bright cartwheel sheen and strong strike. A few minor field marks discount the possibility of Gem status, but fail to diminish the coin's admirable appearance.
Ex: San Francisco ANA Signature (Heritage, 7/2005), lot 6674, which realized $8,050. (#7038)

1875-S Trade Dollar, MS64
Darkly Toned, Popular Type Coin

3882 **1875-S MS64 PCGS.** Type One Reverse. Large S. Dark gray and gold patina blankets the well-preserved surfaces of this Choice Trade dollar, with strong satiny mint luster underneath. The design elements are well-detailed, with just a touch of softness on the centers. The 1875-S is the most available Trade dollar in high grade and enjoys great popularity with type collectors. (#7039)

3883 **1876 MS62 PCGS.** Type One Obverse and Reverse. An absent period after FINE and missing serifs on the peripheral legends contribute further to the die variety interest. Dusky caramel-gold and ice-blue toning blankets satiny and lightly marked surfaces. (#7041)

3884 **1876 MS63 PCGS.** Type One Obverse and Reverse. No Period after FINE. Brilliant and lustrous with light field grazes but no individually obtrusive marks. The strike is bold save for the right (facing) claw of the eagle.(#7041)

3885 **1876-S MS62 PCGS.** Type One Obverse, Type Two Reverse, Minute S. Rich almond-gold and gunmetal-gray toning embraces this well struck and subdued representative. Faint obverse field marks preclude a finer grade.(#7043)

3886 **1877 MS61 NGC.** Although proofs were produced in later years, the 1877 Trade dollar represents the last business-strike issue of the denomination from the Philadelphia Mint. This pleasing Mint State example features well-detailed devices and lightly marked surfaces for the grade. Wisps of champagne-gold toning enhance the visual appeal.(#7044)

Top-Graded Premium Gem 1877 Trade Dollar

3887 **1877 MS66 NGC.** This Premium Gem Trade dollar dated 1877 is tied for the finest graded of the issue, with one submission each at NGC and PCGS and none finer (5/12). With a production exceeding 3 million pieces, the 1877 must be considered a type coin, but its mintage nonetheless pales beside that of the 1877-S, at close to 10 million pieces. Deep pinkish-gray and blue patina prevails throughout both sides of this piece, which is essentially pristine and mark-free. The strike leaves little to be desired, save for minor softness on the wheat sheaves and the hair around Liberty's ear. The reverse is also razor-sharp, despite picky softness on the left (facing) claw. This piece would fit well into a fine type set as an example that would never need upgrading — and in fact, could not be upgraded. Census: 1 in 66, 0 finer (5/12). (#7044)

3888 **1877-S MS63 PCGS.** Large S. Peach-gold toning illuminates the margins, while the remainder of this lustrous type coin is pearl-gray. Well struck and attractive with the expected number of minor field marks.(#7046)

Low-Mintage 1878-CC Trade Dollar, AU55
Lightly Circulated and Highly Lustrous

3889 **1878-CC AU55 NGC.** This lightly circulated coin has a slight pinkish-gold hue but scarcely any sign of mentionable contact; rather, the surfaces show light field chatter that under a loupe resolves into scattered, tiny ticks. Much luster remains on each side. The mintage of the 1878-CC Trade dollar was a notably low 97,000 pieces at a time when Carson City was focused on Morgan dollars, not Trade. Census: 6 in 55, 35 finer (6/12). (#7047)

3890 **1878-S MS63 PCGS.** Golden-brown and ice-blue consume this satiny and boldly struck final-year San Francisco Trade dollar. The left obverse field displays unobtrusive marks, but the overall preservation is appealing.(#7048)

PROOF TRADE DOLLARS

Select Proof 1873 Trade Dollar
865 Pieces Struck

3891 **1873 PR63 NGC.** Deep blue-gray toning, with splashes of golden iridescence at the rims, blanket each side of this attractive proof Trade dollar. The surfaces display a number of light, scattered hairlines, consistent with the grade, but the toning acts as natural camouflage, as none are visible without careful examination. From a mintage of just 865 proofs, an ideal combination of rarity and value for the type collector. Census: 30 in 63, 54 finer (5/12).
Ex: Long Beach Signature (Heritage, 6/2004), lot 8605. (#7053)

3892 **1874 PR61 NGC.** Rose-gold and blue-green toning embraces this satiny and nicely struck specimen. A few contact marks are present along with wispy hairlines. Only 700 proofs were issued. (#7054)

3893 **1875 PR62 NGC.** Type One Reverse. Golden-brown and olive-green hues emerge from the deeply toned surfaces. The strike is crisp except on the eagle's right (facing) leg. Just 700 proofs were produced.(#7055)

3894 **1878 PR40 PCGS. CAC.** From a proof-only mintage of 900 pieces, this lightly circulated Trade dollar shows minimal wear on the design elements, with pleasing gray and gold patina and only minor contact marks..
From The Norva Collection.(#7058)

3895 **1878 PR58 NGC.** Delicate gold patina appears on both sides of this Trade dollar, the first of the proof-only issues. Trivial hairlines are evident on the reflective fields, with light rub on the high points. Slight cameo contrast is noted.(#7058)

Gem Proof 1878 Trade Dollar
Proof-Only Issue, Rare in High Grade

3896 **1878 PR65 PCGS. CAC.** The Philadelphia Mint produced 900 proof Trade dollars in 1878, but no business-strikes were minted. The issue is usually seen in grades below PR64 and examples in Gem condition are rare. This attractive Gem displays well-detailed design elements, with deeply mirrored fields under attractive shades of golden-brown and cobalt-blue patina. Population: 9 in 65, 9 finer (5/12). (#7058)

1878 Trade Dollar, PR63 Cameo
First Proof-Only Issue

3897 **1878 PR63 Cameo NGC.** For the first time since the inception of the series in 1873, the Philadelphia Mint delivered only proof Trade dollars in 1878. It would not be the last time for the type. Fully brought up over the frosty textured devices, this piece is deeply reflective in the fields. Both sides are untoned with radiant features. Scattered hairlines and blemishes limit the grade, all of which are wispy, and none of which are singularly distracting. Census: 18 in 63 Cameo, 42 finer (6/12). (#87058)

3898 **1879 PR50 PCGS.** A lightly worn representative of this proof-only date, with shades of blue, gold, and charcoal-gray toning. Probably no more than two thirds of the generous proof mintage of 1,541 pieces survives today in all grades.
From The Norva Collection.(#7059)

3899 **1879 — Improperly Cleaned — NGC Details. Proof.** A faintly hairlined but precisely struck example of this popular proof-only date. Predominantly pearl-gray with hints of gold near the rims. (#7059)

3900 **1880 PR55 PCGS. CAC.** Only 1,987 pieces were struck in this late proof-only date. The present coin has much proof reflectivity with old-gold at the rims. The fields are heavily hairlined and there is some wear over the highest points.
From The Norva Collection.(#7060)

3901 **1880 PR58 NGC.** Both sides exhibit medium gray patina with splashes of delicate blue toning, all over mild field reflectivity, with numerous tiny handling marks. Light wear is noted on the high points, with a weak strike showing little detail in the stars along the right obverse border.(#7060)

1880 Trade Dollar, Well-Contrasted PR63

3902 **1880 PR63 PCGS.** The 1880 Trade dollar is among the late-series proof-only issues in the series, struck in the amount of 1,987 coins. Even though unmentioned on the holder, this piece shows considerable contrast, with reddish patina over each side, noticeable mint frost and profoundly deep, mirrored fields. The strike is sharp, and a few field hairlines account for the grade. (#7060)

1880 Trade Dollar, PR65 Cameo
Two-Toned Color Palette

3903 **1880 PR65 Cameo NGC.** A two-toned color palette comprises silver-gold obverse and multihued reverse, pinkish-gold, charcoal-gray, and ice-blue scattered about to lovely effect, with excellent field-device contrast and mirrored field reflectivity dominating both sides. Census: 22 in 65 Cameo, 48 finer (6/12). (#87060)

1880 Trade Dollar, Stunning PR68 Cameo Brilliant, Well-Contrasted Surfaces

3904 **1880 PR68 Cameo NGC.** By the year 1880 the Trade dollar as a circulating denomination was defunct, kept on life support by a few further years of proof-only emissions before the clandestine, series-ending issues of 1884 and 1885. The production for the 1880 proof was reportedly 1,987 pieces, largest of the series. This example is clearly among the finest survivors, not only of the 1880, but for the series as a whole. The surfaces are brilliant throughout, with notable contrast between fields and devices. As expected for the Superb Gem grade, there are no obvious distractions on either side, although a high-powered loupe reveals a few minuscule planchet imperfections (actually tiny lint marks), as made. Series or type collectors could scarcely go wrong with this acquisition. Census: 8 in 68 Cameo, 0 finer (5/12). (#87060)

3905 **1881 PR45 PCGS.** Only light wear is evident on the design elements of this PR45 Trade dollar. The reflectivity of the surfaces is somewhat diminished by cloudy lavender-gray and gold toning, and there is a minor rim bruise at 6 o'clock on the reverse, but this coin remains an attractive alternative to a high-grade example of this proof-only date.
From The Norva Collection. (#7061)

1881 Trade Dollar, Toned PR63

3906 **1881 PR63 PCGS.** Light hairlining is well-concealed beneath the finely speckled multicolored toning seen across each side. The 1881 is a proof-only date, and for those collectors who cannot afford a Gem this Select example might do nicely in a date run of Trade dollars. Sharply struck throughout. (#7061)

3907 **1882 PR50 PCGS.** Traces of reflectivity can be detected under dark shades of blue, gray, and gold toning on the surfaces of this lightly circulated Trade dollar. From a proof-only mintage of 1,097 pieces.
From The Norva Collection. (#7062)

1882 Trade Dollar, Deeply Toned PR66

3908 **1882 PR66 NGC.** Struck toward the end of the Trade dollar series, the 1882 was another proof-only date. In this case, its availability was limited to 1,097 pieces struck. The fields are remarkably bright and greatly enhance the reddish-golden and deep blue toning seen over each side. The only "defect" we see is slight softness on the peripheral stars. Census: 30 in 66, 6 finer (5/12). (#7062)

Choice Cameo 1882 Trade Dollar Proof-Only Issue

3909 **1882 PR64 Cameo NGC.** A spectacular Choice specimen of this popular proof-only date, with dramatic cameo contrast between the deeply mirrored fields and the richly frosted design elements. The surfaces are mostly brilliant, with a few hints of pale gold toning and no mentionable contact marks. Census: 41 in 64 (1 in 64+) Cameo, 42 finer (5/12). (#87062)

1882 Trade Dollar, PR65 ★ Cameo
Richly Toned

3910 **1882 PR65 ★ Cameo NGC.** The 1882 Trade dollar was produced exclusively in proof format, with a limited mintage of 1,097 pieces. This spectacular Gem is sharply detailed in most areas, but the upper stars show just a touch of flatness. The surfaces are patinated in spectacular shades of champagne-gold and cerulean-blue. The reflective fields contrast sharply with the frosted devices. Census: 28 in 65 Cameo (4 in 65 ★), 16 finer (6/12). (#87062)

3911 **1883 PR35 PCGS.** The 1883 is the last collectible date in the Trade dollar series, from a proof-only mintage of 979 pieces. This still-attractive example retains much of its original design detail and exhibits no large or distracting abrasions.
From The Norva Collection. (#7063)

1883 Trade Dollar, Lightly Toned PR64+
Attractive, Moderately Contrasted Surfaces

3912 **1883 PR64+ NGC. CAC.** The 1883 Trade dollar has a certain cachet other proof-only dates lack as it is the final stop for this beautifully designed dollar. The fields seen here are exceptionally bright and deeply mirrored, appearing almost brilliant even though there is slight reddish patina over each side. The margins are deep blue. Slight cameo contrast can be seen on each side, and the piece might even warrant such a designation if the toning did not impede the full force of its mirrored/frosted flash. (#7063)

EARLY PROOF SETS

1881 Eight-Piece Proof Set
All NGC-Certified, PR63-PR66

3913 **1881 NGC-Certified Proof Set.** Included are:

1881 Cent PR66 Red and Brown. Brightly mirrored fields; the surfaces are mostly red with pale accents of lilac interspersed.

1881 Three Cent Nickel PR66 Cameo. Each side is mostly brilliant with pale streakiness evident when closely examined.

1881 Nickel PR65. Pale pastel iridescence is seen on each side of this well-mirrored coin. The strike is notably complete.

1881 Dime PR64 Cameo. The fields display remarkable depth of reflectivity which sets up the contrast seen against the frosted devices. Brilliant except for an occasional accent of golden-brown around the margins.

1881 Quarter PR64. Like the dime above, the quarter is also deeply mirrored and mostly brilliant with a light trace of golden around the rims. The devices are also lightly frosted, but not enough to warrant a Cameo designation.

1881 Half Dollar PR65 ★ Cameo. Extraordinary eye appeal. The devices are nicely frosted and set against deep, glassy fields. Untoned centers accent light golden-brown peripheral color. Only 975 proofs were struck in 1881 in addition to a remarkably low 10,000 business strikes.

1881 Trade Dollar PR63. Light hairlines explain the grade; nevertheless the fields are deeply reflective and both sides are nearly brilliant with just the slightest hint of peripheral color.

1881 Morgan Dollar PR64. Just as deeply reflective as the Trade dollar, but lighter hairlines are evident. Again, the faces are brilliant with color only evident over the denticles. Fully detailed. (Total: 8 coins)

SHIELD NICKELS

3914 **1866 Rays AU50 PCGS. CAC. FS-302.** Repunched Date. All four original digits are visible right of the final placement, the date appearing as 11886666 on this variety. Although a trifle weak at the upper reverse, this attractive nickel has light gray surfaces with trivial marks.(#3790)

3915 **1866 Rays MS65 NGC.** This first-year Shield nickel has a mix of green-gold and peach shadings over luminous gray surfaces. While the strike is a trifle soft in places, this remains an appealing Gem. (#3790)

3916 **1868 MS66 NGC.** Medium chestnut-gold patina graces this lustrous and precisely struck high grade type coin. Virtually free from contact, and carbon is limited to pinpoint flecks near the left obverse border. Census: 31 in 66 (1 in 66+), 1 finer (6/12). (#3795)

3917 **1871 MS65 NGC.** The skimpy mintage of the 1871 Shield nickel was only 561,000 coins, and few Gems survive today. This fortunate example boasts pinkish-gold patina over problem-free surfaces that show considerable field-device contrast. An attractive coin for this seldom-seen issue. Census: 19 in 65, 5 finer (6/12).(#3798)

3918 **1871 MS65 PCGS. CAC.** Softly struck as usual but with generous luster under a mix of peach and pale gray shadings. This minimally marked Gem has a die crack from the left (facing) arrow to the rim. Population: 29 in 65, 9 finer (6/12).(#3798)

1875 Shield Nickel, MS66
Scarce in Better Grades

3919 **1875 MS66 PCGS. CAC.** The 1875 is an extremely important date in the Shield nickel series. Business strikes are rare, especially in Gem condition. This example shows a sharp strike and bright, satiny luster with a hint of gold on each side. A late-state example with extensive die cracks visible throughout. Population: 9 in 66, 0 finer (6/12). *Ex: Long Beach Signature (Heritage, 9/2006), lot 773); Dallas Signature (Heritage, 11/2006), lot 310.* (#3804)

Premium Gem 1879 Shield Nickel
Only Three Finer Coins at NGC

3920 **1879 MS66 NGC.** The 1879 Shield nickel claims a tiny mintage of 25,900 pieces, and few high-grade examples were saved by contemporary collectors. This sharply detailed Premium Gem displays ample mint luster, under attractive shades of pale gold toning. Census: 13 in 66, 3 finer (6/12). (#3808)

Elusive 1880 Shield Nickel, MS63
Sharply Struck and Lightly Toned

3921 **1880 MS63 PCGS. CAC.** Any numismatist familiar with the later entries in the Shield nickel series — that is, the last few before the Liberty nickels took over in 1883 — are familiar with how elusive the business strike issue of 1880 is, in particular. The proof mintage was nearly 4,000 pieces, but the business strikes saw a particularly low mintage of 16,000 coins. This Select example is one of four in this grade at PCGS, with 15 finer (6/12). Pale rose patina covers each side, complementing ice-blue margins. The strike is sharp, and the fields are slightly reflective while also showing significant cartwheel effect as well. A prize for series collectors. (#3810)

Gem 1883/2 Shield Nickel
Only Three Finer Coins at PCGS

3922 **1883/2 MS65 PCGS. FS-303.** A die break on the first 8 in the date, reminiscent of the S-197 1800 cent "Q" variety, identifies the specific 1883/2 obverse. The die break is actually a partial die cud from a die crack that runs from rim to rim from 6 to 7 o'clock. On later states a full cud forms in this area. FS-303 is considered the most "common" of the four overdates for 1883 and may represent as many as 75% of 1883/2 nickels. Nevertheless, these pieces are rare in the absolute sense as well as condition rarities. The surfaces on this piece are brightly lustrous and the strike is sharp, with very pale caramel-gold and ice-blue toning. Population: 4 in 65, 3 finer (6/12). (#3814)

PROOF SHIELD NICKELS

3923 **1872 PR65 Cameo PCGS. CAC.** Deeply mirrored with sharply contrasting, frosted devices give this piece its Cameo designation. Brilliant throughout. Only 950 proofs struck.(#83826)

3924 **1873 Closed 3 PR66 NGC.** All proofs from 1873 are Closed 3. This piece shows the usual thinning of details on the lower obverse caused by heavy die lapping. Deeply mirrored on each side, the mostly brilliant surfaces show just the slightest tinge of reddish patina when closely examined. Census: 35 in 66 (1 in 66+), 5 finer (6/12).(#3827)

3925 **1874 PR66+ PCGS. CAC.** An impressive Premium Gem proof with exceptional eye appeal, this piece exhibits light gray surfaces. Fully mirrored fields serve and satin devices characterize this appealing piece. Population: 47 in 66 (2 in 66+), 7 finer (6/12). (#3828)

3926 **1876 PR66 Cameo NGC.** Brightly and deeply reflective in the fields, unlike some proof 1876 nickels. The devices are noticeably frosted and present attractive cameo contrast. The center of the reverse has a long, squiggly lint mark and a shallow planchet lamination, the only "defects" we see. Census: 32 in 66 (2 in 66+) Cameo, 3 finer (6/12).(#83830)

1877 Shield Nickel, PR55
Proof-Only Issue

3927 **1877 PR55 PCGS. CAC.** Shield nickels were only produced in proof format in 1877, with a tiny mintage of just 900 pieces. This lightly circulated example shows just a touch of wear on the well-detailed design elements, while the reflective quality of the fields is slightly muted by shades of dusky crimson and gold toning. *From The Norva Collection.* (#3831)

Choice Proof 1877 Shield Nickel
First Proof-Only Date

3928 **1877 PR64 PCGS.** No business-strike Shield nickels were struck in 1877, leaving the tiny proof mintage of 900 pieces to satisfy collector demand. This attractive Choice specimen offers reflective fields under shades of champagne-gold and lilac toning. The design elements are sharply rendered. Housed in a green label holder. (#3831)

3929 **1878 PR64 PCGS.** One of only 2,350 pieces struck of this proof-only date, displaying understated silvery surfaces with a hint of diffuse gold, particularly evident around the reverse rim. *From The Norva Collection.*(#3832)

3930 **1878 PR66 PCGS.** A powerful strike lends bold definition to this Premium Gem proof. Light tan-gold color imbued with traces of ice-blue visits both sides, each of which reveals a few light flecks. A proof-only issue, this example has satiny luster with reflective fields that show little mirrored effect.(#3832)

3931 **1878 PR66 Cameo NGC.** Each side presents sharp cameo contrast between the fields and devices. Brilliant throughout and problem-free. The 1878 is a proof-only date with only 2,350 pieces produced. (#83832)

3932 **1882 PR66 Cameo PCGS. CAC.** An impressive nickel-gray Premium Gem Cameo proof, this Shield nickel has excellent contrast with bold design motifs. A highly appealing example. Population: 62 in 66 Cameo, 14 finer (6/12).(#83837)

LIBERTY NICKELS

3933 **1883 With Cents MS66 PCGS.** The upper obverse and lower reverse lack some detail on this brilliant champagne-toned Premium Gem. A few random dark spots are noted. Population: 53 in 66 (2 in 66+), 1 finer (6/12).(#3844)

1884 Nickel, MS66
Underrated Issue

3934 **1884 MS66 NGC.** An underrated issue in the Liberty series, preceding the key 1885 and 1886 dates, this 1884 is rarely encountered in Premium Gem. Both sides have satin luster with brilliant light gray surfaces and no evidence of toning. A few scattered marks on the reverse are consistent with the grade. Census: 24 in 66 (1 in 66+), 1 finer (5/12). (#3845)

1885 Liberty Nickel, Gem Uncirculated
Undisputed Key to the Series

3935 **1885 MS65 PCGS. CAC.** Here is the coin that makes the collector of any 19th century series stop and take notice. The 1885 nickel is scarce and highly valued in all grades. A Good 4 is a $400-$500 coin. In Gem BU probably no more than 50 individual pieces are known with perhaps two dozen finer. This is a brilliant example whose surfaces are thickly frosted. The strike is a bit irregular with some areas complete, others lacking full definition. Marks are minimal, as one would expect, with only a couple of modest abrasions in the field below PLURIBUS. Population: 38 in 65, 18 finer (5/12). (#3846)

3936 **1886 MS61 PCGS.** Well struck in the centers with luminous golden surfaces that offer occasional violet accents. Light, yet clearly visible abrasions contribute to the grade.(#3847)

1891 Liberty Nickel, MS66
Only One Numerically Finer Coin at PCGS

3937 **1891 MS66 PCGS. CAC.** Although the 1891 Liberty Head nickel claims a substantial mintage of 16.8 million pieces, few survivors can match the quality of this spectacular Premium Gem. This coin exhibits razor-sharp definition on all design elements, with vibrant mint luster and virtually pristine surfaces. Population: 18 in 66 (1 in 66+), 1 finer (5/12). (#3852)

3938 **1896 MS65 PCGS. CAC.** One of the scarcest dates in the series at the Gem level, the 1896 has the sixth lowest Gem PCGS population of any issue in the Liberty nickel series. This example has a full strike including both ears of corn in the wreath. The surfaces are frosty and highly lustrous with a hint of champagne toning. A single small spot is noted on the reverse. Population: 68 in 65 (2 in 65+), 8 finer (6/12).(#3857)

3939 **1898 MS66 PCGS. CAC.** The ear of corn at the lower left reverse has nearly full detail on this boldly defined Premium Gem. Both sides have brilliant satin luster with light gold toning over its nickel-gray surfaces. Population: 23 in 66, 1 finer (6/12). (#3859)

3940 **1904 MS66 NGC. CAC.** Deep peach and tan toning surrounds gray centers. That of the satiny obverse is deep nickel-gray, while a lighter, more sage hue is present on the reverse. This piece borders on fully struck. Census: 64 in 66, 2 finer (6/12).
Ex: Beverly Hills Signature (Heritage, 11/2011), lot 3156. (#3865)

1912-D Liberty Nickel, MS66
Only Three Finer NGC Coins

3941 **1912-D MS66 NGC.** The 1912-D nickel represents the final year of the Liberty Head design, discounting the clandestine 1913 mintage. Few examples of this issue were saved for numismatic purposes. This lustrous Premium Gem exhibits well-detailed design elements and attractive shades of lime-green and lavender toning. Census: 20 in 66, 3 finer (6/12). (#3874)

Low-Mintage 1912-S Nickel, MS64
Late-Date Key Issue

3942 **1912-S MS64 PCGS.** The base of the mintmark is repunched. Similar to the Indian cent, mintmarks on Liberty nickels appeared only at the end of the series. The 1912-D is merely a better date, but the 1912-S is very scarce, particularly in quality mint condition. This satiny near-Gem features rich peach and gunmetal-gray toning. Smooth aside from a slender tick on the cheek.
Ex: Central States Signature (Heritage, 4/2008), lot 385. (#3875)

1912-S Nickel, MS64+
Final S-Mint Liberty Head Issue

3943 **1912-S MS64+ PCGS.** The Liberty Head design was officially discontinued after 1912, making this low-mintage issue an important one for mintmark type collectors. This high-end Choice specimen exhibits well-detailed design elements and vibrant satiny mint luster, under attractive pale gold and lavender patina. (#3875)

1912-S Nickel, MS64+
Only S-Mint Liberty Head Issue

3944 **1912-S MS64+ PCGS Secure.** The 1912-S is the only San Francisco Mint "V" nickel ,and its mintage of 238,000 pieces is by far the lowest of any issue in the series. Hints of lavender toning along the rims enhance the mostly silver-gray surfaces. This satiny near-Gem representative has no marks of any significance. A great piece for an advanced collector. (#3875)

Near Gem 1912-S Liberty Nickel
Sharply Struck and Lightly Toned

3945 **1912-S MS64 PCGS. CAC.** Although the San Francisco Mint would strike its first copper cents in 1908, the first Liberty nickel production would come in the last year of regular issues. The low-mintage 1912-S is always popular, particularly in grades approaching Gem. The present near-Gem boasts semiprooflike surfaces that feature pale pastel blue-green and golden color. The strike is fairly sharp, including the peripheral obverse stars and some detail on the lower-left ear of corn on the reverse. A single diagonal contact mark appears on the cheek. (#3875)

1912-S Liberty Nickel, MS64+
Final S-Mint Liberty Nickel

3946 **1912-S MS64+ PCGS. CAC.** A high-end Choice specimen of this low-mintage key, the only Liberty Head nickel issue struck at the San Francisco Mint. This attractive coin is patinated in shades of greenish-gold and lavender-gray, with vibrant mint luster underneath. The well-detailed design elements show a touch of softness on the wreath and stars. (#3875)

Gem 1912-S Liberty Nickel
Delicately Toned, Top-Notch Appeal

3947 **1912-S MS65 NGC.** This delicately toned Gem 1912-S Liberty nickel should attract considerable collector attention, as one of the sought-after keys to the set, here with top-notch eye appeal, gold rim toning with jade centers, and no visible marks. The strike is not full on the radial obverse stars, but some detail shows even on the pesky lower-left ear of corn on the reverse. (#3875)

1912-S Liberty Nickel, MS65
One of Three Keys to the Series

3948 **1912-S MS65 PCGS. CAC.** There are only three stoppers to the Liberty nickel series, and the 1912-S is one of them. Even though it was the final year of issue, the mintage of 238,000 pieces explains why it is so highly valued. Subtle pastel iridescence is seen over each side with the usual satiny mint luster. There are no obvious or detracting marks. (#3875)

PROOF LIBERTY NICKELS

3949 **1885 PR63 PCGS. CAC.** This well struck and satiny key date Select proof displays splashes of gold, lilac, and powder-blue toning. Faint gray freckles visit portions of the reverse. Encased in a first generation holder.(#3883)

Premium Gem Proof 1885 Liberty Nickel
With Bold Cameo Surfaces

3950 **1885 PR66 Cameo PCGS. CAC.** An exemplary strike imparts fine detail to all design elements, and the frosty devices contrast boldly with the deeply mirrored fields. A few marks in the obverse field near Liberty's chin are the only flaws of note. Population: 43 in 66 (1 in 66+) Cameo, 6 finer (6/12). (#83883)

3951 **1890 PR65 Cameo PCGS.** Fully mirrored light gray fields frame the lustrous, sharply detailed devices of this Gem Cameo proof, with a single small spot on Liberty's neck. Tinges of gold toning add to the eye appeal. Population: 26 in 65 (2 in 65+) Cameo, 6 finer (5/12).(#83888)

3952 **1890 PR65 Deep Cameo PCGS.** This spectacular Gem proof is the single-finest PCGS certified 1890 Liberty nickel with Deep Cameo surfaces. The sharply detailed frosty design elements provide profound Cameo contrast with the deeply mirrored fields. Population: 1 in 65 Deep Cameo, 0 finer (5/12).(#93888)

3953 **1902 PR66+ PCGS.** Faintly toned surfaces distinguish this deeply mirrored coin. All devices are razor-sharp. Nearly perfect preservation.(#3900)

3954 **1909 PR67 PCGS.** The 1909 is an abundantly produced proof and one that can also be found in excellent condition and suitable for type purposes. This brightly reflective example shows even golden toning over each side and the strike is complete in all areas. Population: 33 in 67, 2 finer (6/12).(#3907)

3955 **1910 PR66 Cameo PCGS. CAC.** A gold-toned reverse complements pastel ice-blue and pink on the obverse of this well-contrasted Premium Gem Cameo proof. An area of gold patina in the center of Liberty's cheek shows some grayish diagonal streaks under a loupe that are toning, not contact marks. Population: 25 in 66 Cameo, 13 finer (6/12).(#83908)

3956 **1912 PR66 Cameo PCGS.** This coin presents a bifurcated toning scheme, each side displaying deeper amber-gold toning toward the left, and almost translucent light silver-gold on the right, amid excellent field-device contrast.(#83910)

BUFFALO NICKELS

3957 **1913 Type One MS67 PCGS. CAC.** Spectacular shades of champagne-gold and violet toning blanket the surfaces of this magnificent Superb Gem. Vibrant mint luster radiates from the slightly granular surfaces to complement the sharply detailed devices. PCGS has graded only 12 numerically finer specimens (6/12).
From The Color Collection.(#3915)

3958 **1913 Type One MS67 PCGS. CAC.** This is a splendid example of the popular Type One Buffalo, close to a full strike with the rough, pebbly field texture that James Earle Fraser designed for the subtype. Pastel pinkish-gold and sage hues grace each side of this virtually immaculate Superb Gem, with a full strike and only a couple of minor contact marks on the bison. PCGS has seen 12 finer (6/12). (#3915)

3959 **1913-S Type One MS66 PCGS.** Soft golden-gray patina runs over the lustrous surfaces of this sharply struck Premium Gem S-mint. Neither side reveals mentionable contact marks or spots. This issue is challenging any finer.
Ex: Long Beach Signature (Heritage, 2/2009), lot 724.(#3917)

1917-D Buffalo Nickel, MS66
Among the Finest of This Challenging Issue

3960 **1917-D MS66 NGC.** The 1917-D has a deserved reputation as a generally poorly produced issue, with the vast majority of survivors showing inferior detail on the central devices. This satiny and carefully preserved example offers a delightful exception, with only trifling softness at the bison's shoulder and excellent detail on the horn and the Indian's braid. Delicate pink, gold, and blue patina drapes the surprisingly mark-free surfaces. Spectacular eye appeal for the issue. This is one of just six Premium Gems certified by NGC, with none numerically finer at either NGC or PCGS (6/12).
Ex: ANA Signature (Heritage, 7-8/2008), lot 1567. (#3935)

3961 **1917-D 3 1/2 Leg VF20 PCGS. FS-901.** This gunmetal-gray VF nickel is problem-free for the grade save for a minor retained lamination at 6 o'clock on the obverse. The *Cherrypicker's Guide* credits Bob White with the variety's discovery in 1999. (#38441)

3962 **1917-S MS64 NGC.** Ex: Eliasberg. Steel-blue and almond-gold toning blankets coruscating and pleasing surfaces. The strike is decidedly above average. Perhaps the most famous pedigree in numismatics.
Ex: Louis E. Eliasberg, Sr. Collection (5/1996), lot 822.(#3936)

3963 **1918-D MS64 NGC.** The 1918-D Buffalo nickel is seldom encountered in high grade because of striking problems and insipid mint luster. This well-detailed Choice example shows a touch of softness on the bison's shoulder and the Indian's hair, with mellow satiny luster and traces of light gold toning.
From The Old Holder Collection.(#3938)

3964 **1918-S MS62 PCGS.** This tan and cream-gray branch mint nickel shows the expected incompleteness above the braid and on the tail. The date, mintmark, and bison's head are bold. The letters PLU (from PLURIBUS) are clearly clashed beneath the Indian's chin. A few hair-thin marks are noted near the front hooves. In a green label holder.(#3940)

Two Feathers 1918-S Nickel
Select Mint State

3965 **1918-S Two Feathers MS63 PCGS. CAC. FS-401.** *Cherrypickers'* states "the obverse die was heavily polished, probably to remove clash marks. The result was a die with the innermost feather missing." Unpriced in *Cherrypickers'* in grades above VF. PCGS has certified 11 examples of FS-401, but the present lot is the sole piece graded above AU53 (6/12). Satiny and stone-gray with one slender vertical mark on the bison's front leg.

3966 **1919 MS66 PCGS. CAC.** Bright, sparkling mint frost covers each side of this sharply struck Premium Gem. Each side is essentially brilliant. Regarding defects, the only ones we see are a light sprinkling of carbon on the obverse (look closely) and a planchet flaw on the reverse rim over the TA in STATES.(#3941)

3967 **1919-D MS64 NGC. CAC.** Rich olive-green toning endows this lustrous and virtually mark-free near-Gem. Well struck for the early Denver issue with some softness on the first two date digits and the hair above the ear. Housed in a former generation holder.
From The Old Holder Collection.(#3942)

1919-S Nickel, MS64
Pastel Toned, Semiprooflike

3968 **1919-S MS64 PCGS.** The 1919-S Buffalo nickel issue is among numerous S-mint keys within the series, and it is an issue notorious for overall strike weakness. This piece displays moderate overall strength of strike for the issue. The fields are semiprooflike, complementing pale pastel patina in shades of lilac and rose. Seldom seen finer; PCGS has graded only 34 submissions in higher grades — 31 in 65, 1 in 65+, 2 in 66 (6/12).
From The Color Collection. (#3943)

Gem 1919-S Buffalo Nickel
Luminous and Delightfully Toned

3969 **1919-S MS65 NGC.** While this earlier San Francisco Buffalo nickel issue is readily available in lesser grades, it emerges as a condition rarity at the Gem level, and NGC and PCGS have graded only 10 finer examples between them (6/12). This MS65 coin is broadly luminous with a considerable quicksilver element under gold, orange, and lavender-violet patina in the centers complementing emerald at the rims. As often seen, the strike is soft through the centers, though on the reverse, the bison's shoulder is better-defined than usual. On the bison's head, the horn is fully outlined but not rounded. A vertical mark just to the right of the braid contributes to the grade. Census: 17 in 65, 8 finer (6/12).
Ex: New York Signature (Heritage, 3/2011), lot 3185. (#3943)

3970 **1920-D MS64 PCGS.** A frosty example that just misses the Gem grade. A blush of rose graces the centers, while the remainder of the piece has orange and pewter-gray patina.(#3945)

3971 **1923-S MS64 NGC.** A pearl-gray Choice branch mint nickel with mark-free surfaces and unencumbered satin luster. The fields near the rims have an orange-peel texture, as made from long-in-use dies.(#3950)

3972 **1923-S MS64 NGC.** Smooth golden-gray surfaces with terrific underlying luster and only the typical softness of strike showing on the reverse. One of the more difficult Buffalo issues in Uncirculated condition.(#3950)

1923-S Buffalo Nickel, MS65
Sharply Struck and Satiny

3973 **1923-S MS65 NGC.** This San Francisco coin is exceptional both for its high grade and excellent strike. The satiny fields are smooth and subtly reflective, bathed in uniform clear reddish golden toning. The obverse presents a faint sheen but the coin displays little of the die erosion that is often seen for this date. This piece is close to the top rank of the grading roster. Census: 33 in 65, 6 finer (5/12). (#3950)

3974 **1924-D MS64 PCGS.** A splendid Mint State piece with satiny lilac-gray surfaces that are accented by lighter champagne toning. Although short of a full strike, this piece is exceptionally well detailed.(#3952)

1924-D Nickel, Subtly Toned MS65
Scarce D-Mint Issue

3975 **1924-D MS65 PCGS.** The scarce 1924-D is among the least available of the D-mint nickels (David Lange, 2006). Soft lilac patina with sun-gold accents dominates the obverse of this Gem, ceding to reddish-gold over the reverse. The lustrous surfaces exhibit well struck design elements, except for weakness at the bison's forehead, which according to Lange is typical for the issue. An occasional flyspeck is noted over each side. Housed in an old green-label holder. Population: 98 in 65, 1 finer (5/12).
From The Old Holder Collection. (#3952)

3976 **1924-S AU53 ANACS.** This low mintage San Francisco nickel shows light wear on the bison's hip and head but possesses ample coruscant luster. The medium olive-gray toning is consistent throughout. In a small-sized holder.(#3953)

3977 **1925-D MS64 PCGS. CAC.** This Denver date is notoriously hard to find in the higher grades and even harder to locate with a truly sharp strike. The buffalo's horn is full, and the satiny surfaces are generally smooth with a suffusion of delicate clear golden-lilac toning.(#3955)

3978 **1925-S MS63 PCGS.** Pastel gold, blue, and lilac patina covers lustrous surfaces. Weakly struck in some areas, as typical for the issue. Devoid of mentionable marks.(#3956)

3979 **1926-D 3 1/2 Leg VF25 PCGS. FS-901.** A cream-gray example with minor distributed obverse carbon. The bison's leftmost foreleg is weakened by Mint die polishing. A recent addition to the *Cherrypickers'* and now integral to a specialized collection of the various listed 3 and 3 1/2 Leg varieties.

1926-S Nickel, AU55
Key Buffalo Issue

3980 **1926-S AU55 NGC. CAC.** The 1926-S Buffalo nickel boasts a series-low mintage of 970,000 pieces, and few examples were set aside for numismatic purposes. The present coin is a well-struck Choice AU example with traces of high-point wear on the devices and subdued satiny mint luster. Attractive ice-blue and dove-gray patina blankets the surfaces of both sides. (#3959)

Select 1926-S Nickel
Moderate Luster and Strike

3981 **1926-S MS63 PCGS.** The 1926-S needs little introduction to series fans, as the only sub-1 million-coin mintage in the series — actually 970,000 pieces. The average certified grade for examples is about VF30, showing how popular examples are that they would be certified at such a level and below. This Select example boasts high-end eye appeal, with moderate luster over surfaces that show orange-gold rim toning with gold and aqua tints in the centers. A few tiny ticks appear consistent with the grade, and the strike is decent, somewhat soft on the high points, as usually seen on the issue, but better than many survivors. (#3959)

Famous 1926-S Nickel, MS64

3982 **1926-S MS64 PCGS.** As the only regular-issue Buffalo nickel with a sub-million mintage, the 1926-S has received plenty of attention from collectors over the years, and in a wide range of grades. The 1926-S is accessible in grades through MS63 and available for a price even in near-Gem, though anything finer is a definite condition rarity. This MS64 example has a golden overtone across broadly luminous surfaces that show a quicksilver element. Both sides are decently detailed for the date, and the portrait has a dab of lavender close to the feathers. PCGS has graded just 11 coins as MS65 or better (5/12). (#3959)

1927-D 3 1/2 Legged Buffalo, AU53, FS-901
Lightly Toned Cherrypicker's Dream

3983 **1927-D AU53 PCGS. 3 1/2 Legged, FS-901.** According to *Cherrypickers'*, the 1927-D 3 1/2 Legged came from "a reverse die [that[was heavily polished, possibly to remove clash marks. The result was a die with most of the bison's front leg missing ... ." It is ironic that this error is so similar in its creation and appearance to the famous 1937-D Three-Legged, which occurred exactly a decade later at the same mint. The 1927-D is an error that is still unknown to many collectors, but far rarer than its later counterpart and a cherrypicker's dream.

This lightly toned piece shows pinkish-gold patina over still-lustrous surfaces that display only a few minor marks consistent with a short spate in circulation. A full horn is still visible on the bison, although barely so. Population for FS-901: 1 in 53, 1 in 58, 1 in 62 (6/12).

PCGS Registry Set Note
If you are attempting to complete your herd of Buffalo nickel varieties, the presence of a 1927-D 3 1/2 Legged will provide a nine-point boost in the PCGS Complete Variety Set.

3984 **1927-S MS63 PCGS.** Virtually full details appear on both sides of this satin Select Mint State piece with delicate gold toning and iridescent accents.(#3962)

3985 **1927-S MS64 PCGS. CAC.** Pleasing, satiny mint luster shows the usual brightness with each side displaying light gray-lilac patina. Extraordinarily clean for the grade, just a bit weak as one would expect.(#3962)

1927-S Nickel, Bright, Satiny MS65
Far Better-Struck Than Most

3986 **1927-S MS65 NGC.** The 1927-S Buffalo nickel is a notorious conditional rarity within this widely collected series. Even assuming resubmissions and duplications, NGC and PCGS combined have seen only about three dozen Gems. NGC accounts for 16 submissions in MS65 with one finer (6/12). This MS65 NGC piece offers a bright, satiny surface texture with added sheen in the fields. Intermingled gold and lilac hues blend throughout both sides. The strike is not quite full, but far better-impressed than normal, setting it far apart from the typical example. (#3962)

3987 **1935 MS67 ★ NGC. CAC.** Vibrant ice-blue, lilac-red, and apricot-gold alternate across this lustrous and immaculate Superb Gem. Well struck save for the usual slight blending above the braid. Census: 5 in 67 ★, 3 finer (6/12).
From The Color Collection.(#3974)

3988 **1935 Doubled Die Reverse AU53 NGC. FS-801.** Per *Cherrypickers'*, FS-801 "is extremely rare in any grade above Very Fine." FIVE CENTS is thick and notched from prominent die doubling. This pearl-gray nickel shows moderate wear and is unabraded save for a faint curved obverse line between 3 and 5 o'clock.(#93974)

3989 **1937 MS67 PCGS. CAC.** Pinkish-gold and ice-blue alternate on each side of this lovely and lustrous coin, not fully but well-struck. A few small contact marks on the bison are in accord with the grade. PCGS has seen only 5 finer (6/12).(#3980)

3990 **1937-D Three-Legged AU50 NGC. FS-901.** Dusky gold toning adheres to the light gray surfaces of this pleasing piece, showing only light wear on the high points. Traces of darker verdigris are noted near the devices.
From The Lance Gage Collection.(#3982)

1937-D Three-Legged Nickel, MS62
Lightly Toned Mid-Mint State Example

3991 **1937-D Three-Legged MS62 NGC. FS-901.** It is safe to say that the 1955 Doubled Die Lincoln cent and the 1937-D Three-Legged Buffalo nickel are the most popular varieties within their respective series, although one would be hard-pressed to say which is *more* popular between the two. This MS62 Three-Legger shows light reddish patina over each side, and the surfaces display typically subdued satiny luster, a function of the advanced state of the dies. The strike is somewhat soft, also a usual trait, but no mentionable contact marks appear on either side. A faint spot appears between the bison's hind legs. This piece would do well in a Mint State set at reasonable cost. (#3982)

MS62 1937-D Three-Legged Buffalo
Nice for the Assigned Grade

3992 **1937-D Three-Legged MS62 NGC. FS-901.** The middle Mint State grades are fertile ground for herders of the 1937-D Three-Legged Buffalo, an area where the coins are not conditionally rare but far more obtainable than a few grade points higher. This MS62 example has much to commend itself, covered with golden-pink and aqua tones and showing few signs of contact. The somewhat diffuse luster, while typical of many examples, is likely the grade delimiter. Nice for the grade nonetheless. (#3982)

1937-D Three-Legged Buffalo Nickel
Attractively Toned MS62

3993 **1937-D Three-Legged MS62 NGC. FS-901.** Numerous 3 1/2 Leg varieties are now recognized by *Cherrypickers'*, but the present variety is the sole Three-Legged entry of the series. Rose-red and lime-green tints overlie shimmering stone-gray surfaces. Well defined and unmarked.(#3982)

Gem 1937-D Three-Legged Buffalo Nickel
Bright Mint Luster, Subtly Toned

3994 **1937-D Three-Legged MS65 PCGS. FS-901.** The FS-901 *Cherrypickers' Guide* designation, if one reads the relevant reference closely, is reserved for a "reverse variety, miscellaneous," i.e. not a doubled die reverse, for example. In fact, the 1937-D Three-Legged Buffalo is a die state variety, one of the few that are actively collected as such, and certainly one of the few to ever make it into the *Guide Book of United States Coins*. *Cherrypickers'* authors Bill Fivaz and J.T. Stanton also assign the Three-Legged Buffalo a I-5 Interest rating, the highest. They say, "A variety with a very high Interest Factor is in high demand, with several thousands of collectors desiring it." So, even though the authors estimate that from 4,000 to 8,000 examples survive, *there may be as many or more collectors than that desiring to acquire an example*.

The 1937-D Three-Legged is, nonetheless, not the only die state example that the series' many fans collect: The various Two Feathers varieties are also in the same category of die states. The *Cherrypickers'* explanation under the 1913-D Type One, Two Feathers, first in the series, is the same: "The obverse die was heavily polished, probably to remove clash marks. The result was a die with the innermost feather missing, hence the nickname 'Two Feathers.' " The authors comment further, "Recently more Two Feathers varieties have been found, creating a search for more while increasing interest in Buffalo nickels with abraded dies." Even though the authors mention increased interest in abraded dies, they assign the many Two Feathers varieties Interest and Liquidity factors of 3, meaning that they are far less in-demand and more thinly traded than the 1937-D Three-Legged.

This is one of the few Gems available of this conditionally elusive variety. The mint luster is satiny and unusually bright. Each side displays subtle shadings of pale golden and lilac, and as one would expect from a Gem, there are no noticeable abrasions. Population: 51 in 65 (1 in 65+), 6 finer (5/12). (#3982)

Three-Legged 1937-D Buffalo Nickel, MS66
Among the Finest Known of This Condition Rarity

3995 **1937-D Three-Legged MS66 PCGS. FS-901.** Although the popular Three-Legged Buffalo's name derives from the missing front left (facing) leg, curiously, the *hoof* on that leg is still present, despite the overeager die polishing that apparently created the variety. Despite the many bogus coins present in the marketplace — this variety should always be purchased certified, never raw — there are many other die diagnostics on each side that characterize examples of the genuine item.

The fifth edition, volume one of the *Cherrypickers' Guide* gives the Three-Legged Buffalo a ranking of 5 for Interest and Liquidity, the maximum, while assigning it a 14 on the Universal Rarity Scale. In other words, 4,001 to 8,000 examples survive in all conditions, yet it is nonetheless an issue with enduring popularity in any grade, one that readily changes hands and finds eager buyers.

The Three-Legged Buffalo is often found in grades of XF and AU, and even examples in the lower Mint State grade are seen with some regularity, up to the near-Gem level. Gem examples and the occasional Premium Gem, however, are conditionally quite rare, and when offered at auction they meet a host of potential buyers.

Heritage has been privileged to offer a number of top-grade examples of the Three-Legged Buffalo in recent auctions, MS65 and MS66 pieces certified by PCGS or NGC that have generally brought in the range from mid-five-figure prices up to $86,000-plus for an MS66 PCGS example we offered in 2005. PCGS has seen a few examples in MS66 as their top grade, while NGC has certified three submissions in MS67, including one with the Star designation.

This is one of the finest-preserved examples we have handled of the Three-Legged variant. The surfaces glow with rich, satiny mint luster and the strike details are uncommonly strong for an issue that is normally weak. Slight rose and lilac is seen over each side but does not impede the power of the underlying mint brilliance. Population: 6 in 66, 0 finer (6/12). (#3982)

1937-S Buffalo Nickel, MS68
Icy-Blue and Rose Colored Toning

3996 **1937-S MS68 NGC.** The 1937-S was the final issue of the Buffalo nickel struck in San Francisco. As with most S-mint issues, the production was small relative to its Philadelphia and Denver counterparts with only 5.6 million pieces struck. Rolls were set aside of the 1937-S and numerous high-grade pieces exist today. But at this lofty level, this coin is second finest only to one MS68 ★ coin (6/12). As expected, the surfaces display outstanding, bright frosted mint luster. This bright sheen enhances the overlay of ice-blue and rose colored toning. Of course, there are no noticeable abrasions.
Ex: Baltimore Auction (Bowers and Merena, 3/2009), lot 621, where it realized $26,450. (#3983)

PROOF BUFFALO NICKELS

Colorful PR68 ★ 1913
Type One Nickel

3997 **1913 Type One PR68 ★ NGC.** The NGC *Census Report* lists one PR68 and two PR68 ★ examples of this one-year-only proof Buffalo nickel design with none numerically finer (5/12). Thanks to a prior-generation holder and pedigree history, this specimen is no Johnny-come-lately to its elite status, either. Magnificently preserved surfaces have a satiny glow under nickel-blue, pale green, gold, orange, and peach patina. The strike is crisp, the all-around eye appeal remarkable, and the opportunity almost irreplaceable. A coin for the high-end type or series collector to cherish.
Ex: Sounder Collection (Heritage, 11/2005), lot 2044. (#3988)

1914 Matte Proof Nickel, PR66
Carbon-Free, Great for Type

3998 **1914 PR66 PCGS. CAC.** The 1914 is a moderately available matte proof date, and often the choice for a type coin. The surfaces display pronounced granularity and the striking details are pinpoint precise. Just a hint of pale golden toning can be seen on each side and we see no evidence of the usual carbon spotting. (#3991)

3999 **1936 Type One—Satin Finish PR66 PCGS.** Second finish of the year, and dare we say the more popular of the two. The surfaces are dazzling and show even light golden patina. The only defects we see are occasional specks of carbon on the reverse.(#3994)

4000 **1936 Type One—Satin Finish PR66 NGC.** Striped bluish-gray patina appears on the brilliant gray-gold obverse of this lovely Premium Gem. The similar appearing reverse has a few splashes of deeper gold. Sharply struck and highly attractive.(#3994)

4001 **1936 Type One—Satin Finish PR66 NGC. CAC.** The satiny surfaces of this sharply detailed proof Buffalo nickel are brilliant and untoned, with no mentionable distractions. Overall eye appeal is extraordinary.
From The Old Holder Collection.(#3994)

1936 Buffalo Nickel, PR67+
Type One, Satin Finish

4002 **1936 Type One—Satin Finish PR67+ PCGS. CAC.** Yearly proof set offerings were resumed in 1936, after a two-decade hiatus. The Buffalo nickel was produced with a Satin finish in the early part of the year, but the Mint switched to a Brilliant finish later, to satisfy customer demand. This high-end Superb Gem is fully struck, with bright satiny surfaces that show highlights of gold and ice-blue toning. Eye appeal is terrific. (#3994)

4003 **1936 Type Two—Brilliant Finish PR63 PCGS.** Delicate champagne toning enhances the brilliant mirrored finish and bold design definition on this Select proof Type Two Buffalo nickel. Trivial spots are consistent with the grade.(#3995)

1936 Buffalo Nickel, PR67
Type Two, Brilliant Finish

4004 **1936 Type Two—Brilliant Finish PR67 PCGS. CAC.** Orange and pink tints endow the centers, while the fields shimmer with ice-blue iridescence. All design elements are exactingly defined, which includes the curve of the tail, the bison's hair at 9 o'clock, and the Indian's braid. The low mintage of 4,420 pieces is divided into Satin and Brilliant finishes. PCGS has certified a mere six pieces higher (5/12).
Ex: Long Beach Signature (Heritage, 6/2006), lot 885. (#3995)

4005 **1937 PR65 PCGS.** This sharply defined Gem proof has deeply mirrored fields and satiny devices, all beneath gorgeous light gold and iridescent toning. A single small spot is noted inside the left obverse border.(#3996)

4006 **1937 PR66 PCGS.** Lemon-gold and lilac-red toning graces this flashy and precisely struck high grade specimen. Void of visible imperfections. Though Buffalo nickels were coined in Denver in 1938, no proofs of the type were struck that year.(#3996)

4007 **1937 PR66 PCGS. CAC.** Ice-blue and rose patina is lightly spread over each side of this brightly reflective proof nickel. The surfaces do not appear to show any traces of carbon.(#3996)

4008 **1937 PR66+ PCGS. CAC.** This high-end Premium Gem displays sharply struck satiny devices set against reflective fields, with attractive champagne-gold and ice-blue toning. Overall eye appeal is tremendous.
From The Color Collection.(#3996)

Gold Label 1937 Buffalo Nickel, PR66+

4009 **1937 PR66+ PCGS. CAC Gold Label.** The surfaces look perfect, even with the aid of a magnifier. We see no carbon and there are no obvious contact marks on either side. Each side is essentially brilliant, but close examination shows just a bit of pale golden patina and a trace of iridescence in the field below LIBERTY. (#3996)

4010 **1937 PR67 NGC. CAC.** While the 1937 proof typically has brilliant fields and mirrored devices, this Superb Gem example actually displays mild contrast between the deeply mirrored fields and somewhat satiny motifs. Soft yellow-gold and pale violet patina dances over the impeccably preserved surfaces of both sides. Exquisitely struck throughout.(#3996)

1937 Buffalo Nickel, PR68
None Numerically Finer at NGC

4011 **1937 PR68 NGC.** A wonderful survivor, tied for numerically finest certified by NGC (5/12). The exquisitely detailed central devices and powerful mirrors are virtually brilliant, and the overall preservation and eye appeal are equally spectacular. A great example of the final proof Buffalo nickel issue.
Ex: Baltimore Signature (Heritage, 7/2008), lot 1394. (#3996)

JEFFERSON NICKELS

MS67 FS-801 1939 Jefferson Nickel
Doubled Die Reverse, Doubled MONTICELLO

4012 **1939 Doubled MONTICELLO MS67 PCGS. FS-801.** Although the doubled MONTICELLO reverse is well-known, the actual variety shows doubling not only there but broadly on FIVE CENTS and much of UNITED STATES OF AMERICA as well. This variety, the doubled MONTICELLO or DDR FS-801, is among the top most-wanted varieties among the many fans of Jefferson nickels. It is also listed in the *Guide Book*. *Cherrypickers'* assigns the variety Interest and Liquidity factors of 5 each, meaning collectors are eager to buy examples. This pristine gold-toned coin shows no overt marks; the flowlines, more notable on the reverse but present on both sides, are from die fatigue. Population for FS-801: 1 in 67, 0 finer (6/12).

1939 FS-801 Nickel, MS67
Doubled MONTICELLO
Tied for Finest Certified

4013 **1939 Doubled MONTICELLO MS67 PCGS. CAC. FS-801.** Even though a small hoard was found a few decades ago, the variety remains rare and highly popular. That is especially true in Superb Gem with only six certified pieces at PCGS and NGC. This amazing specimen has frosty mint brilliance with pastel violet, blue, and gold toning. The strike is sharp with about half of the steps visible. Population: 4 in 67, 0 finer (5/12). (#4004)

4014 **1942-D D Over Horizontal D MS61 NGC. FS-501.** Cherrypickers' states the D over Horizontal D "is the rarest of the major Jefferson nickel varieties in Mint State." The satiny chestnut-gold and steel-gray surfaces are smooth aside from minor marks on Monticello.(#4015)

Gem D Over Horizontal D 1942-D Nickel
Important Jefferson Rarity

4015 **1942-D D Over Horizontal D MS65 PCGS. FS-501.** In A Guide Book of Buffalo and Jefferson Nickels, Bowers (2007) remarks that the D Over Horizontal D variety is "very rare, even a worn example would be a prize." The base and upright of the horizontal D are evident west of and within the prominent D. The present sharply struck and coruscating Gem displays lilac-red, peach-gold, and olive-green toning. (#4015)

1943/2-P FS-101 Nickel, MS67
Tied for Finest Certified

4016 **1943/2-P MS67 NGC. FS-101.** Almost 70 years have passed since this piece was minted, the last overdate in American numismatic history (we discount the so-called 1958/7 cents). Nearly full steps are visible on the reverse of this amazing Superb Gem. Both sides have lovely silver-gray surfaces with satin luster and delightful gold and iridescent toning. Census: 4 in 67, 0 finer (5/12). (#4019)

4017 **1945-P MS67 PCGS.** This spectacular Superb Gem is one of the finest survivors from this wartime mintage, with sharply detailed design elements and vibrant mint luster, under dark shades of gold and violet patina. Population: 36 in 67, 0 finer (5/12).
From The Color Collection.(#4025)

PROOF JEFFERSON NICKELS

4018 **1959 PR68 Deep Cameo PCGS.** This nearly perfect Superb Gem has light champagne toning over its nickel-gray surfaces with satiny devices and fully mirrored fields. Population: 12 in 68 Deep Cameo, 1 finer (6/12).(#94191)

1971 No S Nickel, PR69 Ultra Cameo
Brilliant and Tied for Finest Certified

4019 **1971 No S PR69 Ultra Cameo NGC.** The Mint confirmed that 1,655 proof nickels were struck in 1971 before the S mintmark was added to the die in Philadelphia. This is a tiny number of coins, especially when compared to the large and growing number of collectors of this series. This piece is tied for finest among Ultra/Deep Cameo examples. Each side is brilliant and we do not see any evidence of post-striking flaws that would prevent a perfect grade designation. Census: 4 in 69 Ultra Cameo, 0 finer (5/12). (#94204)

4020 **1979-S Type Two PR70 Deep Cameo PCGS.** A key to the Registry Set for modern Jefferson nickels, the 1979-S Type Two has seen only 28 coins in this ultimate grade at PCGS (6/12). This example shows blatant contrast over black-and-silver surfaces with impeccable preservation.(#94213)

MERCURY DIMES

1916-D Mercury Dime, XF Details
Low-Mintage Key

4021 **1916-D — Whizzed — NGC Details. XF.** The Mercury dime was introduced in 1916, and the 1916-D claims the lowest mintage of the series. Collectors prize this issue in all grades and conditions. This lightly worn example remains attractive, despite the noted whizzing, with lustrous surfaces that display light lavender and ice-blue toning.

4022 **1916-D — Improperly Cleaned — NGC Details. Fine.** Both sides of this moderately worn key Mercury dime have light silver-gray surfaces. Clearly cleaned at one time, this piece falls in the middle grade range that is scarcely seen. Most examples of the 1916-D are Mint State, or below VG. Examples grading VG to AU are rarely encountered.(#4906)

Choice Fine 1916-D Dime
Considerable Detail Remaining

4023 **1916-D Fine 15 PCGS. CAC.** Examples of the 1916-D Mercury dime are popular in any grade, but most examples seen are either VG or lower, or AU or finer. Examples from Fine through Extremely Fine are deucedly difficult. This Choice Fine specimen shows considerable deep detail on "Mercury's" helmet and feathers, and all the vertical sticks in the fasces are visible if incomplete. Gray-gold surfaces show no mentionable marks. A nice coin for the grade. (#4906)

XF Sharpness 1916-D Dime

4024 **1916-D — Cleaned — ANACS. XF40 Details.** Most survivors of the key date 1916-D dime grade between Fair and Fine, with AG and Good examples especially encountered. But the present silver-gray piece has partial luster and pleasing design detail. Faint hairlines are seen from oblique angles. The mintmark is lightly repunched. (#4906)

1916-D Mercury Dime, MS62 Full Bands
Low-Mintage Series Key

4025 **1916-D MS62 Full Bands PCGS.** From a famously low mintage of 264,000 pieces, the 1916-D Mercury dime is the undisputed key to the series. This attractive MS62 specimen offers vibrant satiny mint luster on both sides, and the brilliant surfaces show only the lightest hints of gold toning. The design elements are sharply detailed throughout, including the all-important Full Bands definition on the fasces. A scattering of minor contact marks on both sides explains the grade, but none is worthy of individual mention. We expect intense competition from series enthusiasts when this lot is called. (#4907)

1918-D Dime, MS64 Full Bands
Scarce Fully Struck

4026 **1918-D MS64 Full Bands PCGS.** Decidedly better-defined than the norm, especially on the central reverse. Both sides have a softly frosted appearance with hints of sky-blue color against silver-white surfaces. A few breaks in the frost around Liberty's portrait present windows of startling brilliance. PCGS has graded just 22 finer Full Bands pieces (6/12). (#4919)

4027 **1918-S MS63 Full Bands PCGS. CAC.** The 1918-S Mercury dime was not heavily saved by contemporary collectors, and high-grade specimens are quite elusive. This sharply detailed Select example displays vibrant mint luster under areas of greenish-gold and violet patina, with Full Bands definition on the fasces.
From The Color Collection.(#4921)

4028 **1919-D MS65 PCGS. CAC.** Attractive gold toning resides on the lustrous ivory surfaces of this brilliant and frosty Gem. The sharp strike shows a partially split central band and nearly full details elsewhere. Population: 22 in 65, 4 finer (6/12).(#4924)

4029 **1920-D MS66 NGC.** The obverse is sharply defined, but the reverse shows the expected softness on the horizontal and diagonal bands as well as occasional softness on the peripheral lettering. Brilliant throughout with exceptional mint luster. Census: 16 in 66, 2 finer (6/12).(#4930)

4030 **1920-S MS64 Full Bands PCGS. CAC.** This near-Gem 1920-S dime is lustrous and unabraded with delicate chestnut toning. The centers are well-defined, while the borders show slight fadeaway. This early issue is scarce in Mint State and is desirable with Full Bands in such quality.
Ex: FUN Signature (Heritage, 1/2006), lot 2023; Long Beach Signature (Heritage, 2/2008), lot 248; Long Beach Signature (Heritage, 2/2009), lot 998.(#4933)

Choice 1921 Mercury Dime
Elusive Full Bands Example

4031 **1921 MS64 Full Bands PCGS.** The 1921 Mercury dime is a semikey issue, with a low mintage of 1.2 million pieces. This well-detailed Choice example displays a little softness on the central obverse, but shows Full Bands definition on the fasces. Vibrant satiny mint luster shines through light gold and ice-blue toning, with outstanding eye appeal. (#4935)

4032 **1921-D — Improperly Cleaned — NGC Details. Unc.** Well struck at the centers with incompleteness noted near the rims. Gunmetal-gray and olive-gold with vibrant luster and no noticeable abrasions. Much nicer than the NGC designation implies.(#4936)

4033 **1921-D MS63 PCGS. CAC.** The severe postwar recession of 1921-1922 saw a dramatic drop in minor coin production at all U.S. mints. Denver dime production ended early in 1921 and was not resumed until 1924. The present coin boasts vibrant silver luster and a wealth of overall detail without the die cracks often seen on this branch mint date.(#4936)

Full Bands 1921-D Dime, MS63
Sharp and Richly Toned

4034 **1921-D MS63 Full Bands PCGS.** Splashes of forest-green and russet-gold toning enrich this lustrous Select example of the postwar recession with its reduced coinages. Fully struck in the centers with a few peripheral letters displaying slight softness at the rim. A few nearly undetectable slide marks on the jaw determine the grade but do not affect the eye appeal. (#4937)

4035 **1923-S MS65 NGC.** The obverse appears fully struck save for minor softness on the 3 in the date, while the reverse show notable weakness on the central bands. Lustrous satiny gray-gold surfaces compensate and are relatively unabraded.(#4940)

Condition Rarity 1924 Dime, MS67 Full Bands
Impeccable Surface Preservation

4036 **1924 MS67 Full Bands PCGS. CAC.** Despite the mintage of more than 24 million coins, the 1924 dime is a conditional rarity in Superb Gem Full Bands condition, where this piece is one of only 15 submissions at PCGS with none finer (6/12). Generous luster runs from surfaces tinged in lilac, ice-blue, and gold, with impeccable preservation. (#4943)

4037 **1924-S MS64 Full Bands PCGS.** Mottled violet and steel toning appears on frosty silver luster on this sharply defined Choice Mint State piece. Sharply struck examples are seldom seen in finer grades, with just 17 better Full Bands coins certified by PCGS (6/12). (#4947)

4038 **1925-D MS64 Full Bands PCGS. CAC.** Prevailing pinkish-gold hues complement small areas of deep rim toning in shades of russet and steel-blue. The strike is remarkably sharp on the reverse, a shade less so (due to tired dies, we believe, rather than strike deficiency) on the obverse.(#4951)

4039 **1925-S MS64 Full Bands PCGS. CAC.** Strong luster emanates from each side of this near-Gem, with daubs of russet patina and an area of "die burn" from overpolished dies before Liberty's face, while the remainder is frosty. The reverse adds pale jade and saffron rim toning, with a bold strike overall and a few small marks precluding a Gem grade.(#4953)

4040 **1926-D MS65 Full Bands PCGS.** Deep purple, lavender, and aqua tones appear on each side of this boldly struck Gem, which emits considerable luster despite the intense color. The strike is bold, and contact marks are few, even under a loupe. Population: 86 in 65 Full Bands, 26 finer (6/12).(#4957)

4041 **1926-S MS64 NGC.** The low-mintage 1926-S Mercury dime is in demand in all grades, with or without the Full Bands designation. There is much to like about this example, with golden luster over surfaces that show few mentionable marks and a bold strike overall, despite some fadeaway at the tops of a few peripheral letters on the reverse. Census: 37 in 64, 23 finer (6/12).(#4958)

4042 **1936 MS68 Full Bands PCGS.** Blended gunmetal-gray and chestnut color endows this essentially immaculate Superb Gem. Intricately struck in the centers, and the borders also are above average in definition. Perfect for the competitive Registry Set. Population: 14 in 68 Full Bands, 0 finer (6/12).(#4999)

4043 **1937-S MS67 Full Bands PCGS. CAC.** Ex Comics-N-Stuff San Diego. This coin may have been one of the first struck at the San Francisco Mint that opened this year. Its frosty luster joins a diamond-sharp strike exemplified by the Full Bands. Population: 85 in 67 (2 in 67+) Full Bands, 1 finer (5/12).(#5009)

4044 **1938-S MS67 Full Bands PCGS. CAC.** Both sides of this impressive Superb Gem have a bold strike with brilliant silver luster and no evidence of toning. PCGS has only certified six finer (6/12).(#5015)

4045 **1939-D MS68 Full Bands PCGS.** Almost perfectly preserved surfaces. The centers are brilliant and highly lustrous with dabs of multicolored toning at the margins. One darker spot, a Mint-made grease stain, is seen in the right obverse field.(#5019)

4046 **1939-S MS67 Full Bands NGC.** A few hints of light gold toning complement the vibrant mint luster on this stunning Superb Gem. The design elements are sharply rendered throughout, including Full Bands definition. Census: 9 in 67 Full Bands, 1 finer (6/12). (#5021)

4047 **1940-D MS68 Full Bands PCGS.** This stunning MS68 specimen offers brilliant centers that yield to darkly toned peripheries, with shades of green and amber predominating. The design elements are razor-sharp throughout, and satiny mint luster adds to the terrific eye appeal. Population: 22 in 68 Full Bands, 0 finer (6/12). (#5025)

1941-D Dime, MS68 Full Bands
Essentially Perfect Surfaces

4048 **1941-D MS68 Full Bands PCGS.** Of the more than 46 million pieces struck of the 1941-D, it is remarkable that less than 30 pieces were set aside in this ultimate grade. The surfaces are essentially perfect with only a shallow luster graze in the lower reverse field even vaguely noticeable. The interior of each side appears brilliant, but close examination reveals slight iridescence, and the margins are outlined with a ring of russet patina. Population: 22 in 68 Full Bands, 0 finer (5/12). (#5031)

4049 **1942/1 AU50 PCGS. FS-101.** This piece obviously circulated for a brief time before it was pulled from pocket change by an alert collector, perhaps in the mid-1940s. Both sides have light silver surfaces that retain traces of luster.(#5036)

4050 **1942/1 AU55 NGC. FS-101.** Substantial luster illuminates the margins and devices of this untoned and briefly circulated key date dime. No marks are remotely of consequence. Most 20th century overdates were made during wartime, though the 1909/8 double eagle is an exception.(#5036)

4051 **1942/1 AU55 PCGS. CAC. FS-101.** This famous *Guide Book* variety is seldom encountered in high grade because it was not discovered until the coins had been in active circulation for some time. This Choice AU example shows just a touch of wear on the devices, with satiny mint luster and hints of gold and ice-blue toning.
From The Norva Collection.(#5036)

4052 **1942/1-D AU55 PCGS. CAC. FS-101.** While not as famous as its Philadelphia overdated counterpart, the 1941/2-D Mercury dime is probably more difficult to locate in high grade. This lightly circulated specimen displays satiny mint luster and highlights of pale gold toning. Population: 38 in 55, 44 finer (5/12).
From The Norva Collection.(#5040)

1942/1-D Dime, MS62 Full Bands
Soft Golden Luster

4053 **1942/1-D MS62 Full Bands PCGS. FS-101.** The 1942/1-D overdate is more subtle than its Philadelphia counterpart, and the most obvious pickup point is the 4 in the date rather than the 1, which is blatant only on the P-mint. This satiny example is softly tinged in gold, with only a few minor ticks accounting for the grade and excellent eye appeal. (#5041)

4054 **1943-D MS68 Full Bands PCGS.** Ex: Comics-N-Stuff San Diego. This is an outstanding Superb Gem example with vibrant luster on both sides. Original orange-gold toning is intermittent on both sides. Population: 25 in 68 Full Bands, none finer (6/12).
Ex: Dallas Signature (Heritage, 11/2005), lot 1181; Rosemont Central States (Heritage, 4/2008), lot 722, which realized $1,265.(#5047)

4055 **1944 MS67 Full Bands PCGS.** Wispy gold, violet, and blue toning is barely visible on the brilliant and frosty silver surfaces of this Superb Gem. Population: 79 in 67 Full Bands, 1 finer (6/12). (#5051)

4056 **1944 MS67 Full Bands PCGS. CAC.** More sharply struck than most coins under hurried wartime conditions, this piece shows fully defined horizontal and diagonal bands. The date is not scarce, but crisply struck and fully lustrous examples are. Population: 79 in 67 Full Bands, 1 finer (5/12).(#5051)

Choice 1945 Mercury Dime
Elusive Specimen With Full Bands

4057 **1945 MS64 Full Bands PCGS.** David Lange states the "1945 (P) is the rarest coin in the series with Full Bands, and striking quality in general is less than desirable with this issue." The present coin is a happy exception to this rule, with sharply detailed design elements and Full Bands definition on the fasces. The lustrous surfaces are enhanced by shades of gold and ice-blue toning. Population: 43 in 64 Full Bands, 51 finer (5/12). (#5057)

PROOF MERCURY DIMES

4058 **1936 PR64 PCGS.** A sharply detailed Choice example of this landmark proof issue, with reflective surfaces that display shades of gold and spots of amber toning on the obverse. The design elements are sharply detailed, as expected.(#5071)

4059 **1936 PR65 PCGS.** Mostly brilliant, this Gem proof has delicate champagne toning on the obverse and gold on the reverse. Fully mirrored fields envelop satiny devices.(#5071)

4060 **1938 PR67 PCGS. CAC.** A splendid Superb Gem with bright silver surfaces, this example offers attractive champagne toning over deeply mirrored fields and reflective devices. PCGS has only certified six finer examples (6/12).
From The Color Collection.(#5073)

PROOF ROOSEVELT DIMES

4061 **1983 No S PR69 Deep Cameo PCGS.** A pristine and fully brilliant specimen of this scarce mint error. The dime denomination was perhaps more prone to a missing mintmark due to its small diameter. Population: 83 in 69 Deep Cameo, 0 finer (6/12). (#95265)

4062 **1983 No S PR69 Deep Cameo PCGS.** An indeterminate but small number of 1983-dated Roosevelt dimes escaped with no S mintmark, judging by the certified population. This piece is brilliant with deep contrast and little trace of color. Population: 83 in 69 Deep Cameo, 0 finer (6/12).(#95265)

4063 **1983 No S PR69 Deep Cameo PCGS.** Only a few 1983 proof sets contained dimes that lacked the familiar S mintmark above the date. This nearly perfect Superb Gem is one of those coins, with intense cameo contrast on both sides. The nickel-gray surfaces host delicate champagne toning. Population: 83 in 69 Deep Cameo, 0 finer (6/12).(#95265)

1916 Standing Liberty Quarter, VF30
Important First-Year Key

4064 **1916 VF30 PCGS. CAC.** An attractive mid-grade example of this low-mintage first-year key, with much original detail still intact and considerable remaining mint luster. The surfaces are remarkably free of significant abrasions and the considerable eye appeal is enhanced by shades of pleasing golden-brown and ice-blue toning. (#5704)

1916 Standing Liberty Quarter
Choice XF Example of This Key Date

4065 **1916 XF45 NGC.** The bright surfaces are generally untoned with just a hint of pale golden color present mostly around the margins. A trace of mint luster surrounds the devices and each side shows slight, even wear over the high points. Always a much-needed date with a small mintage that serves as a magnet for collectors. (#5704)

Choice XF 1916 Standing Liberty Quarter
Lightly Circulated Prize

4066 **1916 XF45 PCGS. CAC.** This nice, lightly circulated Choice XF 1916 Standing Liberty quarter might make a nice entry point to the series at a far more affordable price than a Mint State piece. The surfaces are problem-free and offer even gunmetal-gray patina with a slight undertone of rose. A prize for some fortunate and thoughtful bidder.
From The Norva Collection. (#5704)

1916 Quarter, AU53
First Standing Liberty Issue

4067 **1916 AU53 PCGS.** The Standing Liberty quarter was introduced in 1916, with a remarkably low mintage of 52,000 pieces. This attractive AU53 example is well-detailed, showing just a touch of wear on the high points of the devices. The well-preserved surfaces retain much original mint luster, under wisps of gold and lavender toning. (#5704)

1916 Standing Liberty Quarter, Unc Details
Still-Lustrous and Attractive Example

4068 **1916 Type One — Artificial Toning — NGC Details. Unc.** The 1916 Standing Liberty quarter boasts an extremely low mintage for a 20th century coin, and the Type One design was only struck during a two year period. This well-detailed example retains much original mint luster, despite the unnatural bluish-gray toning, and the surfaces show only minor contact marks. (#5704)

1916 Standing Liberty Quarter, MS63
Slightly Speckled With Strong Mint Luster

4069 **1916 MS63 NGC.** The year 1916 is notable for the introduction of several new coinage designs — the Mercury dime, Standing Liberty quarter, and Walking Liberty half dollar — and several issues of the year are conditional rarities at a minimum, if not absolute rarities regardless of condition. The Standing Liberty quarter dated 1916 falls into the latter category, due both to its low mintage of only 52,000 pieces and its release intermingled with 1917 Type One Philadelphia quarters. Fortunately for collectors, they have a choice between the 1916 Philadelphia issue and the 1917-PDS Type One coins for type set purposes. Only first-year-of-type collectors or those working on complete sets must seek out the 1916 Standing Liberty quarter. For those who fall in the latter category, this is a coin worthy of attention. The russet-golden toning has a slight speckling and the underlying mint frost enhances the appearance. The strike on Liberty's head is just slightly less-than-complete. We see no abrasions worthy of individual mention. Census: 51 in 63, 88 finer (5/12). (#5704)

4070 **1917 Type One MS65 Full Head NGC.** A sharply detailed Gem specimen of this important type issue, with Full Head definition and vibrant mint luster on both sides. The brilliant surfaces show a few accents of gold toning.(#5707)

4071 **1917-S Type One MS64 Full Head NGC.** A well-defined near-Gem for the collector who favors toned pieces. Satin-bright silver interiors give way to waves of gold-orange and blue.(#5711)

4072 **1917-S Type One MS64+ Full Head PCGS.** This marvelous Type One coin appears fully struck throughout, not merely on the head, given the full shield rivets, full waves in the rectangular panels, and full eagle feathers. A slight suggestion of original gold color complements engaging luster. High-end and close to Gem in every way.(#5711)

1917-S Quarter, MS65 Full Head
Final Type One Issue

4073 **1917-S Type One MS65 Full Head NGC.** The Type One Standing Liberty quarter debuted in 1916 and was discontinued the following year. The 1917-S issue is a favorite with mintmark type collectors because high-grade specimens are usually available. This impressive Gem displays sharply detailed design elements, with Full Head definition, and vibrant mint luster. (#5711)

1917-S Type One Quarter, MS66 Full Head
Intricately Detailed, Lightly Toned

4074 **1917-S Type One MS66 Full Head NGC.** Of the three Type One issues from 1917, the S-mint is also the scarcest. This brightly lustrous example displays just the slightest hint of golden and lilac toning. The strike details are intricately detailed throughout, with not only complete definition on the head of Liberty, but also on the eagle's plumage. (#5711)

High Grade 1917-S Type One Quarter
Marvelous MS66 Full Head Example

4075 **1917-S Type One MS66 Full Head PCGS. CAC.** The strike can be marvelously strong on some of the Type One Standing Liberty quarters, and this fully struck piece is no exception, with all shield rivets present and bold detail on the face of Liberty. Glints of rose near the rims complement golden-silver, satin-lustered centers, the whole adding up to tremendous eye appeal. Population: 67 in 66 (2 in 66+) Full Head, 9 finer (5/12). (#5711)

4076 **1918-S MS65 PCGS. CAC.** Fabulous, swirling mint frost is seen over each side of this unquestioned Gem. The only weakness is seen on the head of Liberty and the eagle's breast. Nearly brilliant. (#5724)

4077 **1918-S MS63 Full Head NGC.** Though softness appears at the lower part of the shield and the eagle's body, Liberty still qualifies for Full Head status. Generous swirling luster is largely silver with a touch of gold-to-pink at the rims.(#5725)

1918/7-S Standing Liberty Quarter, VF30
Key Wartime Hubbing Error

4078 **1918/7-S VF30 PCGS. FS-101.** The series-key 1918/7-S Standing Liberty quarter is probably the result of a hubbing error that occurred when inexperienced wartime personnel were called on to produce large volumes of coinage. This dusky gray and brown example retains all important design features, although some interior detail is worn flat. (#5726)

AU Details 1918/7-S Standing Liberty Quarter
Important Series Key

4079 **1918/7-S — Cleaned — ANACS. AU Details, Net XF45. FS-101.** Olive-green and ice-blue enrich satiny and relatively unabraded surfaces. Slightly glossy from a careful wipe, but nonetheless desirable. The 1918/7-S is one of two key dates to the Standing Liberty series, including the low-mintage 1916 Type One. Struck from clashed dies. (#5726)

1918/7-S Quarter, AU53
One of the Best Known Wartime Overdates

4080 **1918/7-S AU53 PCGS. FS-101.** The existence of several different "wartime overdates" in U.S. numismatics during the 20th century tends to confirm the usual theory that such blunders were the product of inexperience on the part of Mint personnel manufacturing new coinage dies. The 1918/7-S quarter counts as its close cousins the 1918/7-D nickel, the 1942/1 Philadelphia and Denver dimes, and the 1943/2-P nickel. But unlike the Buffalo nickel, Jefferson nickel, and Mercury dime series, the Standing Liberty quarter series is notable for its relative *lack* of varieties, making the *Guide Book*-listed 1918/7-S quarter a standout in another way, as the only die variety within its series.

Further reinforcement for the "inexperienced Mint personnel" theory comes in the form of the relative *absence* of overdates created during nonwartime periods. This pleasing, lightly handled example has good remaining luster, light golden-brown color, and a relative absence of abrasions. (#5726)

4081 **1919 MS66 PCGS. CAC.** This beautiful Premium Gem has a bold strike with about 70% visible head details. The shield shows the usual weakness at the lower left. Both sides are frosty and fully lustrous with wisps of pale violet toning.(#5728)

4082 **1919 MS66+ PCGS. CAC.** The surfaces are especially beautiful in terms of color, with an unusual silver-blue shade prevailing amid glints of pink and amber, and there are few signs of contact seen on either side. The strike is uneven, somewhat weak on the head and upper portion of Liberty, portions of the first 19 in the date, and some breast feathers on the eagle. Interestingly, all of the shield rivets are bold. Population: 89 in 66 (5 in 66+), 18 finer (6/12). (#5728)

1919 Quarter, Well-Defined MS67

4083 **1919 MS67 PCGS. CAC.** Radiant cartwheel luster emanates from both sides of this Superb Gem quarter. Contact marks are few and far between, but the eye appeal is over the top. The strike is excellent, with all shield rivets bold and a 90% full head. A super coin for collectors who obsess about overall quality rather than one area of the coin. Population: 15 in 67, 3 finer (5/12). (#5728)

4084 **1919 MS65+ Full Head PCGS. CAC.** The complete hairline and three olive sprigs along with an earhole are more than sufficient for the Full Head designation, but other areas are boldly struck as well, even if the first two date digits show minor weakness. Amber-gold and silver tones prevail among strong, radiant luster and few signs of contact.(#5729)

Choice 1919-D Standing Liberty Quarter
Underrated Issue in High Grade

4085 **1919-D MS64 NGC.** The 1919-D Standing Liberty quarter is an underrated issue in high grade, especially with Full Head definition. This attractive Choice example shows just a touch of softness on the shield rivets, but the head detail is full. The well-preserved surfaces display vibrant mint luster, under attractive shades of greenish-gold and ice-blue toning. Census: 46 in 64, 43 finer (5/12). (#5730)

1919-D Standing Liberty Quarter, MS65
Elusive as a Gem

4086 **1919-D MS65 PCGS.** This well-detailed Gem shows a touch of softness on Liberty's head and the shield rivets, as usually seen on examples of this issue. The well-preserved, lustrous surfaces are enhanced by shades of gold and violet toning. The 1919-D is an underrated issue in Gem condition. Population: 42 in 65 (1 in 65+), 25 finer (6/12). (#5730)

4087 **1920-D MS64 NGC.** Well-detailed in most areas, this attractive Choice example shows the typical flatness on Liberty's head. The lustrous surfaces display hints of light gold toning. Census: 46 in 64, 37 finer (6/12).(#5736)

4088 **1921 MS63 NGC.** The reduced mintage of 1.9 million pieces follows that of all postwar Depression coinage. Liberty's chain mail is meticulously detailed along with the rivets and stripes on her shield. Brilliant silver centers are haloed in clear peripheral gold for powerful visual effect.(#5740)

1923-S Quarter, MS64
Lustrous Key Date

4089 **1923-S MS64 NGC.** The 1923-S Standing Liberty quarter is a recognized key date, and the issue is always in demand from series specialists. This attractive Choice example offers well-detailed design elements, with just a touch of softness on the shield rivets and Liberty's head. The unmarked surfaces radiate vibrant mint luster, with pleasing hints of champagne-gold toning. Census: 45 in 64, 68 finer (5/12). (#5744)

4090 **1924-D MS66+ NGC. CAC.** This magnificent high-end Premium Gem is sharply detailed in most areas, but falls a little short of Full Head definition. The brilliant surfaces exhibit vibrant mint luster on both sides. NGC has graded 37 numerically finer examples (6/12).(#5748)

4091 **1924-S MS63 Full Head PCGS. CAC.** An amazing strike is evident on both sides, with a full head and nearly full shield. The satiny surfaces and brilliant mint luster shine through splashes of gold and iridescent toning.(#5751)

Choice 1924-S Standing Liberty Quarter
Elusive Full Head Example

4092 **1924-S MS64 Full Head NGC.** The 1924-S Standing Liberty quarter is seldom encountered with the Full Head designation, as the issue was plagued with striking problems. This important Choice example exhibits a touch of softness on the shield rivets, but Liberty's head is sharply defined. The lustrous surfaces are blanketed in light gold and violet patina. Census: 58 in 64 Full Head, 35 finer (5/12). (#5751)

4093 **1926-S MS64 NGC.** A well-detailed Choice example of this date, which is seldom encountered with superior design detail. This mostly brilliant specimen displays a few hints of green and blue toning, with vibrant mint luster and excellent eye appeal. Census: 88 in 64, 42 finer (6/12).(#5758)

4094 **1927-D MS64 Full Head PCGS.** The 1927-D Standing Liberty quarter is a low-mintage issue that is seldom encountered with the well-detailed devices and Full Head definition displayed on this Choice example. Vibrant mint luster adds to the considerable appeal. Housed in a green label holder.
From The Old Holder Collection.(#5763)

Select 1927-S Standing Liberty Quarter
Sought-After Low-Mintage Issue

4095 **1927-S MS63 NGC.** The 1927-S Standing Liberty quarter boasts a low mintage of 396,000 pieces, the second-lowest of the series, behind the famous 1916. This well-detailed Select example falls a little short of Full Head definition, but that coveted designation is seldom awarded to examples of this date. The lustrous surfaces are toned in attractive shades of greenish-gold and ice-blue. Census: 12 in 63, 96 finer (5/12). (#5764)

WASHINGTON QUARTERS

4096 **1932-S MS64 PCGS. CAC.** A sharply detailed Choice example of this first-year low-mintage key, with satiny mint luster on both sides and traces of pleasing greenish-gold and gray patina. (#5792)

4097 **1932-S MS64 PCGS. CAC.** This San Francisco date has the lowest mintage and is an undoubted key to the Washington series. The bright silver-white obverse contrasts with a generally golden reverse bearing scattered minute freckles.(#5792)

Gem 1932-S Washington Quarter
Only Four Numerically Finer Coins at PCGS

4098 **1932-S MS65 PCGS.** Only 408,000 Washington quarters were struck at the San Francisco Mint in 1932, the lowest mintage of the series. This sharply detailed Gem displays attractive wisps of champagne-gold, violet, and amber toning, with vibrant mint luster underneath. PCGS has certified only four numerically finer examples (6/12). (#5792)

1934 Washington Quarter, MS65
Doubled Die Obverse, FS-101

4099 **1934 Doubled Die Obverse MS65 PCGS. FS-101.** Some doubling can be detected on LIBERTY and the date, but the effect is strongest on the motto IN GOD WE TRUST. The 1934 Doubled Die Obverse is one of the most popular and valuable of all Washington quarter varieties. This impressive Gem is well-detailed, with vibrant mint luster and traces of pale gold toning. Population: 19 in 65 (1 in 65+), 11 finer (6/12). (#5795)

1934-D Washington Quarter, MS66
Better Date, Medium Motto

4100 **1934-D Medium Motto MS66 PCGS.** The low center of the W in WE identifies the Medium Motto variety. The 1934-D Washington quarter is a better date in high grade. This delightful Premium Gem displays sharply detailed design elements and strong satiny mint luster, with a few hints of light gold toning. Population: 68 in 66 (2 in 66+), 3 finer (6/12). (#5796)

4101 **1934-D Heavy Motto, Small D MS65 PCGS. FS-501.** The Small D reverse die was prepared in 1932, and 1934 quarters struck with it are the rarities of this later date. Silver-white surfaces are enriched by delicate diffused gold.(#407910)

4102 **1936-D MS65 PCGS.** The '36-D is among the most conditionally scarce issues of the Washington series. Minimally toned and sharply struck with vibrant luster and minor obverse field marks. Housed in a green label holder.(#5801)

4103 **1936-D MS66 PCGS.** The 1936-D Washington quarter is a plentiful issue in circulated grades, but Mint State pieces are surprisingly elusive. This sharply detailed Superb Gem exhibits vibrant mint luster on both sides, with just a few accents of pale gold toning. PCGS has graded only 11 numerically finer specimens (6/12).(#5801)

4104 **1938 MS67 PCGS. CAC.** The 1938 Washington quarter is an elusive issue in high grade. This sharply detailed Superb Gem displays lustrous surfaces, with a few accents of greenish-gold and aquamarine toning.(#5806)

4105 **1942-D Doubled Die Reverse MS65 PCGS. FS-801.** Die doubling is obvious on the eagle's beak and the base of the olive branch. Cherrypickers' states, "this is another of the most popular Washington varieties." This well struck Gem displays potent luster and is refreshingly devoid of contact. Sea-green and honey-gold toning contributes further to the eye appeal.
Ex: San Francisco ANA (Heritage, 7/2005), lot 6213.(#85818)

4106 **1943-S MS67 PCGS.** Ex: George's Army Collection. Large S. An immaculate Superb Gem with pastel ice-blue and almond-gold toning. Perfect save for minor incompleteness of strike on the date and OF. Population: 36 in 67 (2 in 67+), 1 finer (6/12).(#5822)

4107 **1943-S Doubled Die Obverse MS65 PCGS. FS-101.** The date, motto, and LIBERTY are all completely doubled, boldly enough that this doubling can be seen even without magnification. This frosty Gem is mostly brilliant with light golden toning apparent at the borders. A splendidly smooth high end example of this important variety. Population: 17 in 65 (1 in 65+), 4 finer (6/12). *Ex: FUN Signature (Heritage, 1/2007), lot 4278, which realized $4,312.50.*(#5823)

4108 **1943-S Doubled Die Obverse MS66 NGC. FS-101.** Obverse die doubling is very strong. IN GOD WE TRUST shows a wide spread and the date numerals are remarkably broad. Pumpkin-gold, lilac-red, and navy-blue encompass the margins of this lustrous and sharply struck Premium Gem.(#5823)

1950-D/S Washington Quarter, MS65 Over Mintmark, FS-601 Variety

4109 **1950-D/S MS65 PCGS. FS-601.** The remains of an undertype S can be detected to the left of the primary mintmark, which also shows slight strike doubling. The 1950-D/S Washington quarter is a popular variety which demands a significant premium. This sharply detailed Gem displays lustrous surfaces with a few hints of gold toning. Population: 17 in 65 (1 in 65+), 8 finer (6/12). (#5843)

Premium Gem 1950-S/D Washington Quarter Popular FS-601 Variety

4110 **1950-S/D MS66 PCGS. FS-601.** The undertype D is plainly visible beneath the primary mintmark, creating one of the most popular Washington quarter varieties. This delightful Premium Gem offers well-detailed design elements, with vibrant frosty mint luster and no mentionable distractions. Population: 31 in 66 (1 in 66+), 4 finer (6/12). (#5845)

4111 **1964 MS67 ★ NGC.** Type A Reverse. The remarkable obverse toning consists of fire-red and peach-gold at the center with apple-green throughout the border. The reverse displays speckled rose and aqua tints. Census: 3 in 67 ★, none finer with or without a Star designation (6/12).(#5876)

PROOF WASHINGTON QUARTERS

4112 **1936 PR64 PCGS.** The fields and devices are equally bright and dazzling on this low-mintage issue. Almost completely brilliant with just the faintest suggestion of color present.(#5975)

4113 **1936 PR64 PCGS.** A spectacular Choice example of this landmark proof issue, with sharply detailed design elements and brilliant reflective surfaces that show highlights of greenish-gold toning.(#5975)

4114 **1936 PR65 PCGS.** A lovely Gem, this first-year proof Washington quarter features brilliant silver surfaces with mirrored fields and satiny devices. Delicate gold and champagne toning, mostly on the obverse, enhances the eye appeal.(#5975)

4115 **1936 PR66 PCGS.** An attractive Premium Gem example of the first proof Washington quarter issue, with sharply detailed design elements and moderately reflective fields, under greenish-gold and aquamarine patina. PCGS has certified only eight numerically finer examples (6/12).(#5975)

Superb Gem Proof 1936 Quarter None Certified Finer

4116 **1936 PR67 PCGS.** Among the finest certified survivors of this early proof Washington quarter issue, the underlying surfaces sparkle beneath milky dusky-gold toning. Mark-free and undeniably pristine. Population: 8 in 67, 0 finer (5/12).
Ex: Pittsburgh ANA Signature (Heritage, 8/2004), lot 6136; Palm Beach Signature (Heritage, 3/2006), lot 826. (#5975)

4117 **1937 PR67 PCGS.** This Superb Gem specimen displays razor-sharp definition on all design elements and the deeply reflective surfaces expected on proofs of this era. A few hints of light gold toning add to the tremendous eye appeal. Population: 81 in 67 (1 in 67+), 2 finer (6/12).(#5976)

4118 **1937 PR67 PCGS. CAC.** The obverse of this Superb Gem is brilliant and untoned, while the reverse has delicate champagne toning over its mirrored surfaces. Population: 81 in 67 (1 in 67+), 2 finer (6/12).(#5976)

4119 **1952 PR68 ★ Cameo NGC.** Icy devices provide blatant contrast with glassy fields. A pristine stone-white specimen of a proof issue infrequently encountered in Cameo format. Census: 2 in 68 ★ Cameo, none finer as Cameo although 2 are 68 Ultra Cameo and 2 are 68 ★ Ultra Cameo (6/12).(#85984)

4120 **1971-S PR69 Ultra Cameo NGC.** A virtually perfect specimen of this popular proof issue, with fully struck frosty design elements that provide intense cameo contrast with the pristine mirrored fields. Census: 14 in 69 Ultra Cameo, 0 finer (6/12).(#96003)

STATEHOOD QUARTER

4121 **2004-D Wisconsin Extra Leaf High MS67 NGC. FS-5901.** This brilliant Superb Gem offers pristine satin surfaces and a precise strike. The origin and purpose of the "extra leaf" on the Leaf High FS-5901 (and its Leaf Low FS-5902 cousin) continues to be debated by variety specialists, but the scarce variety caused a stir in the hobby upon discovery.(#914033)

WALKING LIBERTY HALF DOLLARS

4122 **1916-S MS63 PCGS. CAC.** A pleasing Select specimen of this low-mintage issue, with vibrant satiny mint luster and accents of pale gold toning. The well-detailed design elements show the typical touch of softness on the eagle's leg, but the obverse shows emerging detail on Liberty's thumb and head.(#6568)

Choice 1916-S Walking Liberty Half
Lightly Saved First-Year Issue

4123 **1916-S MS64 PCGS. CAC.** Few examples of the 1916-S Walking Liberty half dollar were saved by collectors, despite its first-year-of-design status. As a result, the issue is much more elusive in high grade than its Philadelphia counterpart. This well-detailed Choice example features satiny mint luster under wisps of light gold toning. (#6568)

1916-S Walking Liberty Half Dollar, MS64
First Year of Design

4124 **1916-S MS64 PCGS. CAC.** The 1916-S Walking Liberty half dollar is a low-mintage issue from the first date of the design. Attractive Choice specimens, like the present coin, are prized by mintmark type collectors and series specialists alike. This well-detailed example exhibits satiny mint luster under light lavender and gold patina. (#6568)

MS64+ 1916-S Walking Liberty Half
Low-Mintage, First-Year Issue

4125 **1916-S MS64+ PCGS. CAC.** The 1916-S Walking Liberty half dollar is an important mintmark type issue, from a low first-year mintage of 508,000 pieces. This high-end Choice example features well-detailed design elements and satiny mint luster on both sides. No mentionable contact marks are evident. Visual appeal is quite strong. (#6568)

4126 **1917-D Obverse MS63 PCGS.** A lustrous, well-detailed specimen of this early series issue, featuring the prominent obverse mintmark which was moved to the reverse later in the year. Attractive shades of blue-steel and golden-brown patina blanket the pleasing surfaces. (#6570)

4127 **1917-D Obverse MS64 PCGS.** The obverse of this well-detailed specimen is attractively toned in shades of champagne-gold, purple, and ice-blue, while the reverse remains mostly brilliant. The design elements are well-detailed and satiny mint luster radiates from both sides.(#6570)

4128 **1917-D Reverse MS62 PCGS.** An unusually well-detailed specimen of this early series issue, with emerging detail evident on Liberty's thumb and forefinger. The lustrous surfaces are remarkably clean for the grade.(#6571)

4129 **1917-D Reverse MS62 NGC.** Both Liberty's hand and eagle's breast feathers are well detailed on this scarcer of the 1917 Denver mintmark varieties. Both sides are boldly lustrous, scattered obverse tics are visible under a glass.(#6571)

4130 **1917-S Obverse AU55 PCGS.** An attractive Choice AU specimen of this underrated date, with satiny mint luster on both sides and well-detailed design elements that show the typical touch of softness on the eagle's leg.(#6572)

1917-S Obverse Half, MS64
Seldom Seen Finer

4131 **1917-S Obverse MS64 PCGS.** Both of the 1917-S Walking Liberty half issues are in much demand, although the Obverse Mintmark variant is much more elusive as one approaches Gem condition. The present near-Gem is close to brilliant, with a hint of pale gold color present over strong mattelike surfaces. PCGS has seen four in 64+ with 39 finer (6/12). (#6572)

Near Gem 1917-S Walking Liberty Half
Scarcer Obverse Mintmark Variant

4132 **1917-S Obverse MS64 PCGS. CAC.** The 1917-S Walking Liberty half dollar with the Obverse mintmark is much more difficult to locate in high grade than the Reverse type. This lustrous Choice example displays well-detailed design elements, with the usual touch of softness on Liberty's hand and the eagle's leg. (#6572)

Gem 1917-S Obverse Mintmark Half
Condition Rarity

4133 **1917-S Obverse MS65 NGC.** The obverse mintmarks on the earliest Walking Liberty half dollars did not last long, as the mintmark location switched to the reverse during 1917, just the second year of production. Higher-grade Mint State examples of the 1917-S Obverse half are scarce, and at the Gem level, this issue of slightly under a million pieces is a condition rarity. While Liberty's branch hand shows typical softness, the rest of the coin is better-detailed with golden overtones gracing subtly frosted silver surfaces. Carefully preserved with a shallow scrape over the word IN on the obverse. Census: 26 in 65, 2 finer (6/12). (#6572)

4134 **1917-S Reverse MS62 NGC.** The 1917-S Walking Liberty half dollar is more difficult to locate in high grade than its substantial mintage would suggest. This well-detailed MS62 specimen displays satiny mint luster on both sides, with a few hints of pale gold toning.(#6573)

4135 **1918 MS64 NGC.** This frosty Choice Mint State Walker has a strong strike with a full thumb and all other details similarly sharp. Remember that the drapery lines are never visible on the earliest issues. Both sides have ivory surfaces with attractive peripheral toning.(#6574)

1918-D Half Dollar, Near-Gem
Strong Mint Luster

4136 **1918-D MS64 PCGS.** Although the 1918-D half dollar can be found up to the near-Gem level, Gems are seldom seen. This near-Gem, certified in a green-label holder, will fill many of the same needs, offering lovely rose-gold color over each side with strong underlying mint luster. A diagonal contact mark appears through Liberty's torso. PCGS has seen only 30 submissions finer (6/12). (#6575)

4137 **1918-S MS62 NGC.** Despite its huge mintage of more than 10 million pieces, the 1918-S Walking Liberty half dollar is not easy to locate in high grade. Most of the mintage circulated heavily, and few examples were saved. This attractive MS62 example is well-detailed and lustrous, with a few accents of green and aquamarine toning on the reverse.(#6576)

1918-S Half Dollar, MS64
Pleasing Visual Quality

4138 **1918-S MS64 PCGS. CAC.** Despite a high mintage, this San Francisco issue is elusive in the higher levels of Mint State, thanks to the wartime need for circulating coins. By the time collectors began searching for quality examples, most had been in circulation long enough to severely limit higher grade availability. The strike shows discernable weakness on Liberty's head and hand and the eagle's leg, as usually seen on early Walkers. Silver luster gleams under a dusting of clear gold. (#6576)

4139 **1919 AU53 PCGS.** A lightly circulated example of this low-mintage Philadelphia issue, with well-detailed design elements and satiny mint luster. Just a touch of pale gold toning accents the pleasing surfaces.
From The Norva Collection.(#6577)

Choice AU 1919-D Half
Noted Conditional Rarity

4140 **1919-D AU55 NGC. CAC.** Among the most conditionally challenging issues of the series, the 1919-D trades close to bullion value in filler grades but ascends in price rapidly until Gems command six figures. The present partly lustrous Choice AU example displays rich cream-gray toning and is free from visible marks. The branch hand has a typical strike. (#6578)

1919-D Walking Liberty Half, MS64
Prime Condition Rarity

4141 **1919-D MS64 NGC.** From a smallish mintage of less than 1.2 million pieces, the 1919-D Walking Liberty half dollar is the most challenging issue of the series in grades above the Choice level. The present coin is an attractive Choice example that shows some of the usually seen softness on the central devices. That being said, some emerging detail is evident on Liberty's thumb and head, and the feathers on the eagle's leg show more definition than the average specimen. The lustrous surfaces display a few hints of light gold toning, with no mentionable distractions. Population: 72 in 64 (1 in 64+), 11 finer (6/12). (#6578)

4142 **1919-S — Filed Rims — Genuine PCGS. AU Details.** Despite the PCGS caveat, of which we see little evidence, there is much to love on this AU sharpness piece, including the gold luster, attractive, apparently original surfaces, and a lack of any singular marks save for a few thin scrapes in the right obverse field. The lower reverse adds some ice-blue tints, and with the considerable luster remaining, this piece would nestle nicely into a mostly Mint State set at an affordable price.
From The Norva Collection. (#6579)

1919-S Walker, Vibrant MS64
Key to the Early Walker Series

4143 **1919-S MS64 NGC.** Second in overall rarity in the series, only trailing the 1921-S. This high-grade piece is brilliant, as are most better Mint State 1919-S halves, the surfaces are rendered even more vibrant by the presence of pronounced die striations in the fields. Brilliant throughout and sharply struck, the only exception being the skirt lines, a typical soft spot on early Walkers. Census: 55 in 64 (1 in 64+), 28 finer (6/12). (#6579)

White Gem 1920 Walking Liberty

4144 **1920 MS65 PCGS.** An early Philadelphia issue that is plentiful in VF grades but surprisingly rare at the MS65 level. This minimally toned example provides sweeping luster and a virtually mark-free appearance. Nicely struck on the cheek and branch hand. Certified in a green label holder. Population: 81 in 65 (2 in 65+), 13 finer (6/12). (#6580)

4145 **1920-D — Improperly Cleaned — NGC Details. Unc.** This scarce Denver date shows striking weakness on the high points and overall brightness is the result of cleaning, but the fields are smooth and satiny.

Choice XF 1921 Half Dollar
Scarce Early Walker in Circulated Grades

4146 **1921 XF45 PCGS. CAC.** The 1921 is a scarce and valuable coin in circulated grades, roughly comparable to the 1921-S. However, in mint condition the S-mint pulls away quickly in rarity and value. This is an evenly worn example that shows no obvious or detracting blemishes on either side. The brilliant-gray surfaces have just a tinge of light golden patina intermixed.
From The Norva Collection. (#6583)

1921-D Walking Liberty Half, XF40
Lightly Circulated Key

4147 **1921-D XF40 PCGS.** A pleasing XF specimen of this low-mintage key, suitable for inclusion in an otherwise high-grade collection of Walking Liberty half dollars. The incomplete design detail on the centers of this coin is due more to the soft strike usually seen on this issue than the light wear it suffered in circulation.
From The Norva Collection. (#6584)

Choice AU 1921-D Half Dollar
Originally Toned in Gold and Gray

4148 **1921-D AU55 PCGS.** Much of the mint luster, softly glowing, still clings to each side under a layer of gold, gray, and pink patina, an original appearance and a thoroughly appealing coin. The 1921-D is the lowest-mintage Walker of the year, even if the 1921-S is more elusive in the AU grade range. A nice potential acquisition for series enthusiasts. (#6584)

1921-D Walking Liberty Half, MS62
Low-Mintage Key

4149 **1921-D MS62 NGC.** A series-low mintage of 208,000 pieces makes the 1921-D Walking Liberty half dollar a sought-after key date. This well-struck MS62 specimen exhibits emerging detail on Liberty's thumb and head, with strong mint luster under shades of dusky gold and lavender-gray toning. (#6584)

4150 **1921-S VF25 PCGS.** The 1921-S is the rarest Walking Liberty half dollar in Mint State grades, from a low mintage of 548,000 pieces. Some interior design detail is worn smooth, but major features remain intact, and the surfaces display pleasing gray and blue-steel patina.(#6585)

4151 **1928-S MS62 NGC.** The 1928-S Walking Liberty half dollar is known as a premier strike rarity, and this attractive MS62 example shows some of the typical softness on Liberty's hand, but emerging detail is evident on the head and peripheral devices. Both sides display satiny mint luster and attractive light gold toning. (#6588)

4152 **1933-S MS62 NGC.** The present cataloger used to know one collector who would scour every bourse floor looking for examples of the 1933-S half dollar, amassing hundreds of examples. It does occupy a peculiar place within the series, the first issue since the 1929-S, and the last before the more-elusive 1920s coins gave way to the "Short Set" issues of 1934-47-PDS. This MS62 specimen shows moderate luster over frosty silver-gold surfaces with a few minor but grade-limiting contact marks.(#6591)

4153 **1934-D MS65 PCGS.** A lustrous Gem, with well-detailed design elements that show the usual touch of softness on the centers. The surfaces show only minor signs of contact, with shades of green, violet, and amber patina at the peripheries.(#6593)

4154 **1934-D MS65 PCGS.** Small D. This crisply struck Great Depression half dollar features booming luster and occasional wisps of chestnut-gold toning. Close to pristine save for a depression on Liberty's cheek.(#6593)

4155 **1934-D MS66 PCGS.** Small D. Blushes of pale gold toning deny full brilliance, but this beautifully preserved Premium Gem has a sharp strike and comprehensive cartwheel luster. The first Denver Mint issue since 1929, when the Great Depression diminished commerce.
Ex: Charlotte ANA (Heritage, 3/2007), lot 1048.(#6593)

4156 **1934-D MS66 PCGS.** Small D. Pastel straw-gold and ice-blue toning visits this lustrous and crisply struck Premium Gem. Only a few inconsequential obverse grazes limit the grade.(#6593)

4157 **1934-S MS64 PCGS. CAC.** Dappled jade-green and rose-red patina visits the margins and the lower reverse. Crisply struck and lightly abraded with vibrant cartwheel sheen.(#6594)

4158 **1935 MS66+ PCGS. CAC.** The strike is strong throughout and the brilliant surfaces gleam with frosted mint luster. Exceptional quality.(#6595)

4159 **1935-D MS65 PCGS.** Sharply struck for this consistently weak issue. The surfaces are uniformly brilliant with no detracting marks. Bright mint luster.(#6596)

4160 **1935-D MS65 PCGS. CAC.** Just a bit of softness on the head of Liberty and the eagle's plumage, the hand and skirt lines are notably strong for the issue. Just the lightest haze can be detected over the swirling, lustrous surfaces.(#6596)

1935-D Half Dollar, MS66
Exceptional Luster

4161 **1935-D MS66 PCGS.** This Denver date is notorious for careless strikes and this coin does show some weakness on Liberty's head, hand, and the eagle's leg feathers. Other design features are well-defined, while rich mint frost and overall brilliance provide exceptional visual appeal. A couple of minuscule marks are noted on each side, but magnification is needed to find them.
Ex: FUN Signature (Heritage, 1/2007), lot 4745; Dallas Signature (Heritage, 11/2007), lot 844. (#6596)

1936-D Walker, MS67
Brilliant and Fully Struck

4162 **1936-D MS67 NGC.** More than 4.2 million Walking Liberty half dollars were minted at the Denver Mint in 1936. The issue is easily located in lower Mint State grades, but Superb Gems are rare. The present coin is a magnificent specimen, with sharply detailed devices, vibrant mint luster, and brilliant surfaces. Census: 26 in 67, 0 finer (5/12). (#6599)

4163 **1936-S MS65+ PCGS. CAC.** This high-end Gem displays well-detailed design elements, with just a touch of softness on the eagle's leg, and satiny mint luster. Shades of gold and amber toning enliven the unmarked surfaces.
From The Color Collection.(#6600)

4164 **1937-D MS66+ PCGS. CAC.** Each side is brilliant and heavily frosted with no obvious marks. The strike details are nearly complete. Exceptional mint luster.(#6602)

4165 **1937-S MS66 PCGS.** This stunning Premium Gem displays brilliant, mark-free surfaces that radiate blazing mint luster and fantastic eye appeal. Sharply detailed in most areas, Liberty's hand shows the usual touch of softness. Only 23 numerically finer pieces have been certified at PCGS (6/12).(#6603)

4166 **1937-S MS66 PCGS. CAC.** This sharply detailed Premium Gem is certified in a green label holder. The virtually pristine surfaces radiate vibrant mint luster, with outstanding eye appeal and a few hints of light gold toning.
From The Old Holder Collection.(#6603)

4167 **1937-S MS66 PCGS. CAC.** Completely defined with notably strong definition on the skirt lines, hand, and head of Liberty. The glowing mint frost is covered on each side by light yellow-gold patina. Rarely found any finer.(#6603)

1938-D Walking Liberty Half Dollar, MS66
Sought-After Low-Mintage Issue

4168 **1938-D MS66 PCGS. CAC.** The 1938-D Walking Liberty half dollar is avidly sought-after because of its low mintage of 491,600 pieces. This exceptional Premium Gem displays well-detailed design elements, with a touch of softness on Liberty's hand, and vibrant mint luster, under shades of golden-brown toning. PCGS has certified only 27 numerically finer examples (6/12). (#6605)

4169 **1941-D MS67 PCGS. CAC.** The 1941-D Walking Liberty half dollar is popular as a well-struck and nicely preserved survivor of this widely collected series. The present Superb Gem is radiant silver-white, with satiny surfaces that show only the most minuscule contact marks. The strike is bold although not full. PCGS has seen only three pieces finer — two in 67+, one in 68 (6/12).(#6612)

4170 **1941-S MS66 PCGS.** Collectors take note: full skirt lines on Liberty. The hand is almost completely detailed also. Only the left side of the eagle's leg shows any striking softness. The interiors are brilliant and surrounded by wide margins of speckled golden-rose and cobalt-blue.(#6613)

4171 **1941-S MS66 PCGS. CAC.** This Premium Gem is brilliant with cartwheel luster and a suggestion of pinkish-gold confined to the reverse. There are few signs of contact on either side, but the strike is somewhat soft through the central obverse.(#6613)

4172 **1942-S MS66 PCGS.** Trumpet tail S. A nearly brilliant high grade example of this West Coast wartime issue. The high points of the striding Liberty show typical inexactness, but no marks are evident aside from a single hair-thin line on the eagle's front leg.
Ex: Long Beach Signature (Heritage, 5/2007), lot 1236, which realized $1,150.(#6617)

Extraordinary MS67 1943-S Walker
Almost Fully Detailed on the Skirt Lines

4173 **1943-S MS67 PCGS.** Collectors of the Short Set will appreciate the opportunity this coin presents. The 1943-S is among the most challenging issues from the 1940s, especially with a strong, almost full strike as seen on this piece. The surfaces are brilliant and exhibit dazzling mint frost and are nearly unabraded, as one would expect from an MS67. Population: 26 in 67 (1 in 67+), 0 finer (6/12). (#6620)

4174 **1945 MS67 PCGS. CAC.** The coloration is unusual, a satiny obverse with deep amber on the right side, pinkish-blue on the left side, while much of the reverse is brilliant silver-white with charcoal rim accents. A few tiny marks appear under the deep obverse toning, consistent with the grade. Population: 79 in 67 (2 in 67+), 0 finer (6/12).(#6624)

4175 **1947 MS67 NGC.** This lightly toned and satiny representative of the final year of the Walking Liberty series. The strike is nearly full, and only a couple of minor marks on Liberty's body keep this piece from an even higher grade. This carefully preserved and conditionally scarce piece would make an ideal representative of this underrated late-date issue. Census: 63 in 67, 0 finer (6/12). (#6630)

PROOF WALKING LIBERTY HALF DOLLARS

1936 Walker, Lightly Toned PR65 First-Year Modern Proof Issue

4176 **1936 PR65 PCGS.** This Gem proof is brilliant silver-white but covered with a thin layer of mottled powder-gray patina and tinges of gold. There is slight but perceptible contrast on this, an issue that generally lacks any field-device contrast. The strike is full on both sides. Minor contact in the right obverse field takes searching under a loupe to find. (#6636)

Gem Proof 1936 Walking Liberty Half Sharply Detailed and Lightly Toned

4177 **1936 PR65 PCGS.** The 1936 proof Walking Liberty half dollar is always in demand as the first proof issue of the series. The Mint had solved the striking problems that plagued earlier dates by 1936, and this delightful Gem displays sharply detailed devices, with hazily reflective fields and traces of champagne-gold toning. (#6636)

1936 Half Dollar, PR65 Sought-After Low-Mintage Issue

4178 **1936 PR65 PCGS. CAC.** The deeply mirrored surfaces of this delightful Gem display only light hints of pale gold toning, with just a few minor hairlines visible on close inspection. The classic Walking Liberty design shows to good advantage, with sharply detailed devices throughout. Eye appeal is outstanding on this low-mintage proof issue. (#6636)

Premium Gem Proof 1936 Half Dollar First Walking Liberty Proof Issue

4179 **1936 PR66 NGC.** The year 1936 saw the first proof mintage of the Walking Liberty half dollar series, with a small production of 3,901 pieces. This impressive Premium Gem displays sharply detailed design elements and hazily reflective fields, under shades of light pink, gold, and emerald-green toning. (#6636)

1936 Walking Liberty Half Dollar, PR66 First Proof Issue of the Modern Era

4180 **1936 PR66 PCGS.** The Philadelphia Mint resumed proof set offerings in 1936 for the first time in two decades. The initial mintage was small, but the program quickly gained in popularity, and every year saw a larger production until World War II put a temporary halt to the program after 1942. This delightful Premium Gem features razor-sharp definition on all design elements and brilliant reflective surfaces. PCGS has graded only 21 coins in higher numeric grades (5/12). (#6636)

Golden-Toned 1936 Half Dollar, PR66

4181 **1936 PR66 NGC. CAC.** This first-year proof Walking Liberty half shows a uniform but beautiful golden color front and back, with small ice-blue accents that appear under a loupe. There is minimal contrast, as usually seen on the issue, but much eye appeal should make this piece a popular potential acquisition for fans of the series or type. The certified populations are much less one grade point finer. (#6636)

1936 Walking Liberty Half
Debut-Year Superb Gem Proof

4182 **1936 PR67 NGC.** In the early years of modern proof coinage, customers could order proof coins from the Mint individually, thus there are varying totals for the proof denominations of each year from 1936 to 1942. In the case of the 1936 proof half dollar, the Mint recorded a total of 3,901 pieces sold, while for the Lincoln cent of that year it sold 5,569 pieces, and of the Mercury dime 4,130 coins. Thus the 1936 proof half dollar is the second-rarest of the year's denominations, edged out by the 1936 Washington quarter, with 3,837 coins sold.

Regardless of the mintage figure, this coin is conditionally rare and elusive, as it is one of only 74 so graded at NGC, with another 20 pieces at PCGS, and only one coin finer at either service (a PR68 at PCGS) (5/12). This example displays remarkably pristine silver-white fields that show little or no trace of color. The strike is impeccably sharp, and the preservation is equally exemplary.
Ex: Long Beach Signature (Heritage, 5-6/2007), lot 1242. (#6636)

1936 Walking Liberty Half, PR67
Iridescently Toned, Only One Finer

4183 **1936 PR67 PCGS. CAC.** The 1936 Walking Liberty half dollar was the first proof issue of the "modern era," struck in the tiny amount of 3,901 pieces during a period in which collectors could order any proof denomination severally or individually. Thus it is that all five proof denominations made during the year have slightly differing mintages — but all minuscule. The present Superb Gem is a piece that is unlikely soon to be bettered at PCGS, as that service has certified only a single example in the PR68 grade. Generous luster prevails underneath a moderate layer of greenish-gold patina with amber and russet accents more prominent at the rims. The strike is every bit as sharp as would be expected, and the eye appeal is top-notch. Population: 20 in 67, 1 finer (5/12). (#6636)

4184 **1937 PR65 NGC.** A brilliant, no-contrast proof of this second-year issue with tinges of gold and russet near the obverse rims, complementing blue and rose on the reverse margins.(#6637)

4185 **1937 PR66 PCGS.** Each side has a light coating of speckled, multicolored toning, primarily red and lilac. The color is further enhanced by the exceptionally deep mirrors that flash in the fields. (#6637)

4186 **1937 PR67 PCGS.** Each side is nearly brilliant, but not quite. There is a slight hazy overlay in the centers and light speckling of color at the margins. Slight contrast can be seen between the deeply mirrored fields and devices.(#6637)

4187 **1937 PR67 NGC.** A spectacular, eye-catching half dollar with entirely white surfaces. This high-grade proof has highly reflective surfaces that are immaculate, and the details are fully struck as one would expect. The 1937 has the second-lowest mintage of proofs for the Walking Liberty series, and only 5,728 specimens were struck. A captivating example of this midseries issue. NGC has certified 18 pieces finer (5/12).
Ex: ANA Signature (Heritage, 7-8/2008), lot 690.(#6637)

1937 PR68 Walking Liberty Half
Near-Perfect Preservation

4188 **1937 PR68 NGC.** Of the 5,728 proofs struck in 1937, only 18 have been certified in PR68 by NGC and nine by PCGS (6/12). None are finer at either service. This is a brightly mirrored example that is mostly untoned in the centers with speckled gray-golden peripheral color. As expected from the grade, there are no obvious contact marks and the coin appears perfect. (#6637)

4189 **1938 PR66 PCGS. CAC.** A mildly contrasted third-year proof with gleaming fields under a layer of pale yellow toning. Faintly frosted devices have strong detail and preservation.(#6638)

4190 **1938 PR67 NGC. CAC.** This Superb Gem proof shows slight contrast between the fields and devices. An essentially perfect coin; the surfaces are brilliant throughout. An overlooked scarcity with a lower mintage and lower availability, especially in high grades.
Ex: Central States Signature (Heritage, 5/2007), lot 3100.(#6638)

4191 **1938 PR67 PCGS. CAC.** A delightful Superb Gem proof, with razor-sharp definition on the design elements and brightly mirrored fields that show hints of gold and lime-green toning. PCGS has graded only 11 numerically finer specimens (6/12).
From The Color Collection.(#6638)

4192 **1939 PR67 NGC.** The ice-blue toning is slightly hazy across each side. Nevertheless, the bright mirrors flash strongly through and enliven the near perfectly preserved surfaces.(#6639)

4193 **1939 PR67 PCGS. CAC.** Satiny and close to brilliant with outstanding preservation. The designer's monogram was hand-engraved on the reverse die. Encapsulated in an old green label holder.
Ex: Long Beach Signature (Heritage, 5/2009), lot 883, which realized $977.50.(#6639)

4194 **1940 PR67 NGC.** Delicate champagne toning graces the surfaces of this Superb Gem proof. Both sides offer fully mirrored fields and satiny devices, showing a hint of cameo contrast.(#6640)

4195 **1941 PR67+ NGC. CAC. No AW.** A majority of proof 1941 halves lack any indication of the designer's monogram, inadvertently polished from the reverse die prior to production. A brilliant Superb Gem with highly reflective fields and flawless surfaces.(#6641)

Gem Proof 1942 Half Dollar
Rare Cameo Specimen

4196 **1942 PR65 Cameo NGC. CAC.** The Mint discontinued its popular proof set offerings after 1942, due to the economic stresses of World War II. The sharply detailed design elements of this exceptional Gem possess enough mint frost to produce rarely seen Cameo contrast with the deeply mirrored brilliant fields. Census: 1 in 65 Cameo, 3 finer (6/12). (#86642)

PROOF FRANKLIN HALF DOLLARS

4197 **1950 PR65 Cameo PCGS. CAC.** The flashy obverse is silver-white and completely untoned; the reverse is similar but with unusual purplish toning accents scattered about. Moderate field-device contrast is sufficient for the designation. Population: 93 in 65 Cameo, 31 finer (6/12).(#86691)

4198 **1953 PR68 Cameo NGC.** The snow-white surfaces appear completely pristine on this Superb Gem, with deep field-device contrast and seemingly on the verge of an Ultra Cameo designation. One of the finest at either service. Census: 27 in 68 Cameo, 0 finer (6/12).(#86694)

4199 **1954 PR68 Cameo NGC.** A sensational Superb Gem Cameo proof with exceptional contrast on both sides. The devices exhibit satin luster that contrasts with the deeply mirrored fields. A small splash of cobalt-blue appears in the right obverse field. NGC has only certified four finer Cameo proofs.(#86695)

4200 **1955 PR67 Deep Cameo PCGS.** A stunning Superb Gem with deeply mirrored fields and frosty devices, showing exceptional contrast. The surfaces are untoned and pristine. Population: 48 in 67 Deep Cameo, 17 finer (6/12).(#96696)

4201 **1956 Type Two PR69 ★ Cameo NGC.** We cannot decide if the Star designation is merited for superior eye appeal or for the pristine preservation — or even if they are, in fact, different — but in any case this stunning coin is as close to perfection as we expect to ever see, deeply contrasted silver-white with not the tiniest flaw visible.(#86697)

4202 **1957 PR69 ★ NGC.** The surfaces show little contrast amid the uniform, reflective-throughout quicksilver effect, although the Star for compelling eye appeal is completely merited. Census: 24 in 69 ★, 0 finer (6/12).(#6698)

KENNEDY HALF DOLLAR

'Top-Pop' 1967 Kennedy Business Strike, MS67
Spectacularly Toned on Both Sides
Finest We Have Ever Offered

4203 **1967 MS67 PCGS.** Although the 1965-67 Special Mint Set Kennedy halves are quite common in MS67 (or SP67, as PCGS has begun recently certifying them), the business strike 1965-67 Kennedys are quite *uncommon* so fine. In fact, this appears to be the first time we have ever offered a business strike in Superb Gem. This colorfully toned, pristine example is mounted reverse-side-up in the PCGS holder to display its admirable qualities, but the obverse is just about as nice. The reverse shows gold, sunset-orange, and soft jade hues with complete mint luster, while the obverse offers a similar palette. We note than even some of the top Registry Sets at PCGS show MS66 grades for the 1965-67 business strikes. This coin should see spirited bidding from series fans. Population: 9 in 67, 0 finer (6/12). (#6710)

SMS KENNEDY HALF DOLLARS

4204 **1966 No "FG" SMS MS66 NGC. FS-901.** A mint worker presumably polished the reverse die with undue enthusiasm, since the Frank Gasparro initials were inadvertently removed along with portions of the rays on each side of the eagle's neck. *Cherrypickers'* states "this variety is very rare and certain to become very popular!"

4205 **1966 SMS MS67 ★ Cameo NGC.** Frosty motifs and darkly reflective fields command significant eye appeal. Precisely struck and brilliant with a pristine appearance.(#86846)

4206 **1967 SMS MS68 ★ Cameo NGC.** A brilliant and satiny Superb Gem with immaculate fields and strong obverse cameo contrast. The final year of the Special Mint Sets, struck at San Francisco sans mintmark with a finish closer to proofs than business strikes. (#86847)

PROOF KENNEDY HALF DOLLARS

4207 **1964 Accented Hair PR66 Ultra Cameo NGC. FS-401.** Type One Reverse. The initial proof subtype with greater hair definition above Kennedy's ear. Flashy and crisply struck with a pristine appearance. Brilliant aside from a pair of small obverse tan freckles. (#96801)

4208 **1964 Accented Hair PR67 Deep Cameo PCGS. FS-401.** Type One Reverse. Millions of proof 1964 Kennedy halves were struck, but the earliest are in demand, as they represent the very scarce and ephemeral Accented Hair subtype. Brilliant and pristine with glassy fields and icy devices.(#96801)

4209 **1979-S Type Two PR70 Deep Cameo PCGS.** The 1979-S Type Two Kennedy shows a clear mintmark rather than the bulbous, blobby Type One coins. This deeply contrasted Type Two shows no mentionable distractions over surfaces that show the merest hint of gold color. A nice example for a fine Registry Set. Population: 82 in 70 Deep Cameo (6/12).(#96819)

4210 **1979-S Type Two PR70 Deep Cameo PCGS.** Seldom-seen at this ultimate grade level, the 1979-S and 1981-S Type Twos are both keys to a complete proof Registry Set. Deep contrast and no noticeable color are hallmarks of this examples. Population: 82 in 70 Deep Cameo (6/12).(#96819)

4211 **1981-S Type Two PR70 Deep Cameo PCGS.** The 1981-S Type One mintmark is square-shaped and sans serif, while the Type Two has a larger mintmark that is asymmetrical, larger and with bulbous serifs at the top and bottom. The 1981-S Type Two Kennedy half is a notable conditional rarity at this grade level, where PCGS has seen only 31 pieces (6/12). This piece is deeply contrasted and shows little trace of color. One of the keys to a proof Registry Set. (#96822)

MORGAN DOLLARS

4212 **1878 8TF MS65 NGC. VAM-14.2.** Light to medium sun-gold patina visits the centers of this lustrous first-year Morgan dollar. Crisply struck and splendidly preserved with exceptional eye appeal. (#7072)

4213 **20-Piece Lot of 1878 7TF Reverse of 1878 Morgan Dollars, Each MS63 NGC.** A certified roll of Select Mint State NGC-certified Morgan dollars of this popular first-year issue, frosty untoned silver-white coins. Scarcely any show discernible color. (Total: 20 coins)

4214 **20-Piece Lot of 1878 7TF Reverse of 1878 Morgan Dollars, Each MS63 NGC.** A matched grade roll's worth of B2a Reverse 1878 silver dollars. All coins are lustrous and lightly toned with good strikes and attractive surfaces for the grade. The NGC certification IDs indicate a single submission for all pieces.(Total: 20 coins)(#7074)

4215 **20-Piece Lot of 1878 7TF Reverse of 1878 Morgan Dollars, All MS64 NGC.** A certified roll of MS64 NGC dollars, mostly untoned silver-white coins with bold cartwheel luster and frosty surfaces. A few examples show light gold rim toning. A nice lot for first-year Morgan specialists.(Total: 20 coins)

4216 **1878 7TF Reverse of 1878 MS65 NGC.** Glimpses of canary-gold fill the obverse periphery though the reverse is stone-white. This well struck Gem provides potent luster and is impressively devoid of marks.(#7074)

4217 **1878 7TF Reverse of 1878 MS65 NGC.** Highly lustrous and close to brilliant with a bold strike and a nearly pristine reverse. The R in PLURIBUS is strongly die doubled; a project for enterprising VAM collectors that specialize on this diverse introductory Philadelphia date.(#7074)

4218 **1878 7TF Reverse of 1878 MS65 NGC.** The obverse is die doubled, most clearly on the R in PLURIBUS; a project for VAM researchers. Traces of sun-gold and lilac visit the obverse border, but this lustrous Gem is essentially brilliant. Smooth save for faint grazes on the cheek.(#7074)

4219 **1878 7TF Reverse of 1878 MS65+ NGC.** The one-year-only type defined by feathers: seven in the eagle's tail and parallel on the arrows' fletchings. This pink-laced example has considerable silver cartwheel luster and great all-around preservation. The few marks present are shallow.(#7074)

4220 **1878 7TF Reverse of 1878 MS65 ★ NGC.** Iridescent crescents of powder-blue, lemon-gold, cherry-red, and apple-green endow the left borders of this otherwise brilliant Gem. Well struck and lustrous with a few wispy grazes on each side.(#7074)

4221 **1878 7TF Reverse of 1878 MS65 PCGS. VAM-84.** Line Under 8. This exceptional Gem contrasts an essentially brilliant reverse with an obverse that shows rich shades of sea-blue and gold. Unabraded, but a hint of a finger print is found at 2 o'clock. Struck from boldly clashed dies, the L in LIBERTY is washed out (as made) and LIBERTY is lightly die doubled.
Ex: Long Beach Signature (Heritage, 9/2003), lot 8684, which realized $977.50.(#134044)

4222 **1878 7TF Reverse of 1879 MS65 PCGS.** A frosty Gem example of the 1878 7 Tailfeather Reverse of 1879, with Slanted Arrow Feather. Lustrous surfaces are completely untoned and show only a few scrapes mostly confined to the eagle's breast on the reverse. (#7076)

4223 **1878-CC MS65 NGC.** High intensity greenish-gold and blue toning blankets the obverse of this sharply detailed Gem, while the reverse remains essentially brilliant. Vibrant mint luster adds to the stunning visual appeal.(#7080)

4224 **1878-CC MS65 NGC. VAM-11.** A Top 100 Variety. A stone-white and thoroughly lustrous representative of the "Lines in Wings" VAM. The strike is intricate except for the right (facing) claw. The reverse is virtually pristine, as is the obverse aside from light grazes on the cheek.(#7080)

4225 **1878-CC MS65 PCGS.** Each side shows just a hint of light toning, and the strike is fully detailed, as one would expect. The fields display bright semiprooflikeness when angled just so beneath a light.(#7080)

4226 **1878-CC — 75 Degree Clockwise Rotated Dies — MS65 PCGS.** Morgan dollars struck from widely rotated dies are seldom encountered. The present lustrous Carson City Gem is precisely struck and splendidly smooth. The borders exhibit rose-red, golden-brown, and sea-green toning.(#7080)

4227 **1878-CC MS65 ★ NGC.** This sharply detailed Morgan dollar has been holdered with the reverse of the coin in front, in order to emphasize the spectacular rings of golden-brown and cobalt-blue toning at the peripheries. Vibrant mint luster adds to the terrific eye appeal.
From The Color Collection.(#7080)

4228 **1878-CC MS65 NGC. CAC.** The frosty surfaces are mostly silver-white, save for a gorgeous rainbow of iridescence at the left margin of each side, more prominent and variegated on the obverse and ranging from saffron to ice-blue.
From The Color Collection.(#7080)

1878-CC Morgan Dollar, MS66
Ideal Mintmark Type Coin

4229 **1878-CC MS66 PCGS.** The 1878-CC is an important mintmark type issue from the first-year of the Morgan dollar design. This spectacular Premium Gem displays razor-sharp definition on all design elements and lustrous surfaces that show just a few hints of golden-tan toning. Housed in a green label holder. PCGS has graded only five numerically finer specimens (6/12). (#7080)

4230 **1878-CC MS64+ Prooflike PCGS. CAC.** Each side is brilliant and the devices are not only fully struck but heavily frosted. This frosted effect contrasts sharply against the depth of mirroring in the fields. Minimally abraded.(#7081)

4231 **1878-CC MS64 Deep Mirror Prooflike ANACS. VAM-11.** A Top 100 Variety. The collectible "Lines in Wings" VAM. Frosty motifs contrast with flashy fields. Brilliant aside from a slender band of gold at the margins. Nicely struck and lightly abraded with good eye appeal.(#97081)

1878-S Morgan, MS67
Dazzling and Fully Struck

4232 **1878-S MS67 NGC.** A stunning, absolutely Superb Gem example of this popular first-year San Francisco Mint issue. Fully struck, including over the hair of Liberty's ear and the eagle's breast feathers. The impeccably preserved surfaces are mostly brilliant except for irregular splotches of gray color on the cheek, and reddish-purple patina on the upper reverse. Census: 27 in 67, 0 finer (6/12).
Ex: Portland Signature (Heritage, 3/2004), lot 6690; Long Beach Signature (Heritage, 9/2007), lot 2333. (#7082)

Premium Gem 1878-S Morgan Dollar
Only Two Finer Prooflike Coins at PCGS

4233 **1878-S MS66 Prooflike PCGS.** The 1878-S represents the first year of the Morgan dollar design, and this exceptional Premium Gem would be a cornerstone in a fine S-mint type set. The deeply mirrored fields show noticeable elements of contrast with the sharply detailed design elements, and the lightly marked surfaces display wispy golden-tan toning. Population: 9 in 66 Prooflike, 2 finer (6/12). (#7083)

4234 **1879 MS65+ PCGS.** An arc of vivid sky-blue spans the rim above Liberty's head, with amber iridescence hugging the obverse rim elsewhere. The reverse shows some of the same effect, and the frosty surfaces are silver-white and well-preserved elsewhere. A premium coin worthy of a strong bid.(#7084)

1879 Morgan Dollar, MS66
Only One Numerically Finer at PCGS

4235 **1879 MS66 PCGS.** The 1879 Morgan dollar claims a mintage of nearly 15 million pieces, but the quality of surviving specimens varies widely. This magnificent Premium Gem displays needle-sharp definition on all design elements and unusually vibrant cartwheel mint luster, with incredible eye appeal. PCGS has graded only one numerically finer coin (6/12). (#7084)

4236 **1879-CC XF45 NGC.** About half of the luster remains on this Choice XF 1879-CC dollar, the first issue of the Big Three Morgans. There is only the faintest suggestion of gold color, and a loupe reveals scattered, undistracting abrasions but no overt marks. (#7086)

4237 **1879-CC AU50 NGC.** Perfect Mintmark. Surprisingly little detail is lost for 10 points of wear. Each side is gray-brilliant and significant portions of luster are still evident surrounding the margins. No large or detracting marks are evident.(#7086)

Scarce Gem 1879-CC Morgan Dollar
Higher Mintage, Low Availability

4238 **1879-CC MS65 NGC.** Unlike other dates such as the 1881-CC and 1885-CC, the 1879-CC Morgan dollar had low representation in the Treasury holdings and later GSA auctions; thus, despite a sizable (by Carson City standards) mintage of more than three-quarters of a million pieces, there are far fewer Gems available than for dates of similar vintage. Such coins are distinctly scarce, and finer examples virtually unheard-of. This MS65 piece has semireflective silver fields that swirl with cartwheel luster. Subtle peach-gold overtones disappear in most views but blaze to life at the proper angle to the light. A marvelous survivor. Census: 34 in 65, 1 finer (6/12). (#7086)

1879-CC Morgan Dollar, MS63
Famous Capped Die Variety, VAM-3

4239 **1879-CC Capped Die MS63 PCGS. CAC. VAM-3.** A Top 100 Variety. The primary mintmark was impressed over a smaller CC, creating the famous Capped Die variety. This attractive Select specimen exhibits well-detailed design elements, with just a touch of softness on the hair above the ear. The lustrous surfaces display shades of light golden-tan toning in places, with a few minor, grade consistent contact marks. (#7088)

4240 **1879-S Reverse of 1878 MS64 NGC. VAM-42.** A Top 100 Variety. A tiny die chip between the TY in LIBERTY is diagnostic for this Second Reverse VAM. The present Choice silver dollar is brilliant with a prooflike obverse and vibrant cartwheel luster on the reverse. Well struck with clean fields and one minor mark behind the mouth.(#7094)

4241 **1879-S Reverse of 1878 MS64 PCGS. VAM-39.** A Top 100 Variety. The Third Reverse 1879-S is plentiful in Mint State, but Second Reverse examples are scarce. The present sharply struck near-Gem has only a hint of caramel-gold toning. Lustrous and well preserved.(#7094)

4242 **1879-S Reverse of 1878 MS64 PCGS. CAC.** The 1879-S, Reverse of 1878 Morgan dollar is identified by the parallel arrow feather on the reverse, and is much more elusive than its Reverse of 1879 counterpart. This sharply detailed Choice example is lustrous and mostly brilliant, with hints of champagne-gold toning. Housed in a green label holder.
From The Old Holder Collection.(#7094)

4243 **1879-S Reverse of 1878 MS64+ PCGS. CAC. VAM-39.** A Top 100 Variety. Obscure die scratches (as made) distinguish VAM-39 from the few other Second Reverse VAMs. Lustrous and crisply struck with delicate honey toning and uncommonly cleans surfaces. (#7094)

4244 **1879-S Reverse of 1878 MS63 Prooflike PCGS. CAC.** The Flat Breast Reverse is a scarce coin from 1879, and quite the condition rarity. It is seldom found finer than MS63. This brilliant example is deeply mirrored with strongly contrasting mint frost over the devices. Numerous small abrasions are evident, as one would expect. Population: 25 in 63 Prooflike, 8 finer (6/12).(#7095)

4245 **1880-CC MS65 PCGS. CAC.** Pale golden toning and semiprooflike fields characterize this Gem CC type coin. Minimal abrasions, especially for a Carson City dollar.(#7100)

4246 **1880-CC MS66 PCGS.** Ex: Bermuda. A high grade Carson City representative that boasts dynamic luster and a hint of tan-gray toning. The minor softness at the centers is typical for the issue. (#7100)

4247 **1880-CC MS66 PCGS.** The 1880-CC Morgan dollar is prized by collectors for its low mintage and charismatic mintmark. This impressive Premium Gem displays well-detailed design elements and lustrous, lightly toned surfaces. PCGS has graded only 28 numerically finer examples (6/12).(#7100)

4248 **1880-CC MS66 PCGS.** Ex: New York City Set. A bar below the second 8 is frequently seen on 1880-CC Morgan dollars, and this one has microscopic recutting inside the top of the second C. A lovely piece with delicate champagne toning, this Premium Gem exhibits frosty silver luster and excellent design definition. (#7100)

4249 **1880-CC MS66+ PCGS. CAC.** Like all Carson City Morgan dollars, the 1880-CC is always in demand, and the low mintage of 591,000 pieces continues to intrigue series enthusiasts. This high-end Premium Gem shows just a touch of softness on the hair above the ear, but the vibrant mint luster and creamy pristine surfaces create tremendous eye appeal.(#7100)

Smooth MS66+ 1880-CC Dollar
8 Over High 7, VAM-5

4250 **1880-CC 8 Over High 7 MS66+ PCGS. CAC. VAM-5.** A Top 100 Variety. Among the more obvious of the 8 over 7 varieties with most of the outline of the 7 apparent. The typically encountered '80-CC exhibits only a "dash" below the second 8. Crisply struck with booming luster and virtually pristine fields. Liberty's cheek and neck show only faint grazes. (#7102)

4251 **1880-CC 8 Over High 7 MS66+ PCGS. CAC. VAM-5.** A Top 100 Variety. The 7 underdigit is blatant within the second 8 of the date. A well struck and thoroughly lustrous Premium Gem with light tan-gold toning and exemplary surfaces.(#7102)

4252 **1880/79-CC Reverse of 1878 MS64 PCGS. VAM-4.** A Top 100 Variety. One of only two Reverse of 1878 VAMs for the date, each of which is separately listed in the *Guide Book*. Well struck, untoned, and lustrous with smooth fields and minor facial grazes. (#7108)

1880/79-CC Morgan Dollar, MS65 Prooflike
VAM-4, Only One Coin Finer at PCGS

4253 **1880/79-CC Reverse of 1878 MS65 Prooflike PCGS. CAC. VAM-4.** A Top 100 Variety. The remnants of an undertype 79 are plainly visible beneath the last two digits of the date, and the parallel arrow feathers indicate the scarcer Reverse of 1878. This sharply detailed Gem displays deeply reflective prooflike fields that contrast boldly with the frosty devices. Population: 9 in 65 Prooflike, 1 finer (5/12). (#7109)

1880/79-CC Morgan, Reverse of 1878
Gem Deep Mirror Prooflike

4254 **1880/79-CC Reverse of 1878 MS65 Deep Mirror Prooflike NGC. VAM-4.** A Top 100 Variety. This variety is tops on many collectors' want lists, combining as it does characteristics of the first three years of Morgan dollar mintage: the 80 over 79 overdate combined with the Parallel Arrow Feather Reverse of 1878. This Deep Mirror Prooflike example is the only one in Gem condition at NGC, with none finer at either service (6/12). The surfaces are brilliant and deeply mirrored throughout, with strong mint frost over the devices. A premier coin for a fine Morgan dollar set. (#97109)

4255 **1880-O MS64 PCGS.** A pleasing Choice example, with attractive intermingled shades of gold, gray, and blue patina, this well-detailed Morgan dollar shows vibrant mint luster under the toning.
From The Color Collection.(#7114)

4256 **1880-O MS64 ANACS.** Micro O. This virtually brilliant Choice New Orleans Morgan has dynamic luster and a sharp strike. Smooth except for one thin mark in the field beneath the right (facing) wing.(#7114)

1880-O Dollar, Micro O Mintmark
Brilliant MS64 Deep Mirror Prooflike

4257 **1880-O MS64 Deep Mirror Prooflike NGC. VAM-4.** A Top 100 Variety. Micro O Mintmark. This variety has an extremely small, perfectly round mintmark on the reverse, as well as slight evidence of an 80/79 overdate. While NGC has certified quite a number of MS64 DPL examples of the date, that grading service has yet to certify even one MS65 DPL example of this issue. In fact, Deep Mirror Prooflike examples of this date are elusive regardless of grade. This is a fully brilliant and highly lustrous example with excellent cameo contrast. There are quite a number of tiny bagmarks, but the mirrored surfaces reflect some of these and make them even more noticeable than they really are.
Ex: Dallas Signature (Heritage, 11/2005), lot 3105. (#97115)

4258 **1880/79-O MS64 PCGS. VAM-4.** A Top 100 Variety. The overdate status and VAM are undesignated on the PCGS insert. This minimally toned Choice New Orleans dollar offers dynamic luster and shows only moderate incompleteness at the centers. Wispy grazes on the field beneath the wings decide the grade. (#7116)

Premium Gem 1880-S Morgan Dollar
Popular Type Coin

4259 **1880-S MS66 PCGS. CAC.** Spectacularly toned in shades of cobalt-blue, golden-brown, and silver-gray, this delightful Premium Gem displays sharply detailed design elements and vibrant satiny mint luster. The 1880-S Morgan dollar is an available issue in high grade and a favorite choice of type collectors.
From The Color Collection. (#7118)

4260 **1880-S MS67 NGC.** Large S. Beautiful orange, lemon, ruby-red, and powder-blue toning dominates much of this lustrous and boldly struck Superb Gem. The fields are pristine and the cheek has only wispy contact. Certified in a prior generation holder.
From The Color Collection.(#7118)

4261 **1880-S MS67 NGC.** This Superb Gem is mounted reverse-up in the holder to emphasize the splendid technicolor display, waves of saffron, gold, orange, purple, and blue with scattered silver-white, while the obverse is untoned. Both sides are impeccably preserved. (#7118)

4262 **1880-S MS67 ★ NGC.** Sharply detailed throughout, with vibrant mint luster that shines through layers of dusky golden-brown and violet toning, this spectacular Superb Gem possesses tremendous eye appeal.(#7118)

4263 **1880-S MS67 Prooflike NGC.** Medium S. A brilliant and intricately struck Superb Gem with exemplary field reflectivity and noticeable white-on-black contrast. An impressive high grade silver type coin.(#7119)

Superb Gem 1880-S Morgan Dollar
Only Two Finer Deep Mirror Prooflike Coins at NGC

4264 **1880-S MS67 Deep Mirror Prooflike NGC.** The 1880-S Morgan dollar is known for its high quality and terrific eye appeal, but this spectacular Superb Gem stands out as a truly exceptional piece, even for this vaunted issue. The fully struck design elements are endowed with incredible mint frost that contrasts profoundly with the deeply mirrored fields. No mentionable distractions are noted, and visual appeal is stunning. Census: 17 in 67 Deep Mirror Prooflike, 2 finer (6/12). (#97119)

4265 **1880/9-S MS67 PCGS. CAC. VAM-11.** A Hot 50 Variety. This sharply detailed Superb Gem displays vibrant mint luster over mostly brilliant surfaces that show a few hints of golden-tan toning. A minor dent in the reverse rim at 3:30 is the only noticeable mark. (#7122)

1881-CC Morgan Dollar, MS67
High Quality and Incredible Eye Appeal

4266 **1881-CC MS67 PCGS.** A delightful Superb Gem example of this in-demand Carson City issue, this coin possesses extraordinary eye appeal, with vibrant mint luster and well-detailed design elements. The virtually pristine surfaces are highlighted by subtle shades of golden-tan toning. PCGS has certified only three numerically finer coins (6/12). (#7126)

MS66 Prooflike 1881-CC Dollar

4267 **1881-CC MS66 Prooflike PCGS. CAC. VAM-2.** This low mintage Carson City Morgan has dazzling luster and a sharp strike. Brilliant save for an arc of butter-gold toning on the left reverse margin. This well preserved silver dollar likely participated in the GSA auctions of the 1970s. Encased in a first generation holder. Population: 30 in 66 Prooflike, 0 finer (6/12). (#7127)

4268 **1881-O MS64 Deep Mirror Prooflike PCGS.** Stunningly reflective through a delicate partial layer of golden patina. A well-contrasted near-Gem with amazing eye appeal. PCGS has graded just 12 pieces as MS65 Deep Mirror Prooflike or finer (6/12). (#97129)

4269 **1881-O MS64 Deep Mirror Prooflike PCGS.** This sharply struck and decisively mirrored near-Gem has light almond-gold toning and only inconsequential contact. One small strike-through (as coined) on the field near the base of the cap.(#97129)

4270 **1881-S MS67+ NGC.** This high-end Superb Gem displays razor-sharp definition on all design elements, and the fields are awash in vibrant mint luster. Accents of pale gold toning add to the tremendous eye appeal.(#7130)

4271 **1881-S MS67+ PCGS. CAC.** A characteristically well-made 1881-S dollar that straddles the line between Superb Gem and a step beyond. Powerful cartwheel luster is minimally toned save for hints of gold at the rims.(#7130)

1881-S Dollar, MS66 Deep Mirror Prooflike
Brightly Frosted Devices

4272 **1881-S MS66 Deep Mirror Prooflike PCGS.** The 1881-S is one of the more available Morgan dollars in Mint State. This is an outstanding cameo-like specimen that shows unfathomable depth of mirrored reflectivity with bright mint frost over the devices, all of which are sharply struck. Each side shows a wide arc of deep, iridescent toning. Population: 70 in 66 Deep Mirror Prooflike, 7 finer (5/12).
Ex: Dallas Signature (Heritage, 11/2005), lot 3164; Central States Signature (Heritage, 4-5/2009), lot 2996. (#97131)

4273 **1882 MS66 PCGS. CAC.** A boldly struck and thoroughly lustrous high grade silver type coin. The surfaces are close to immaculate, and toning is absent aside from an arc of sun-gold near 5 o'clock on the reverse.(#7132)

4274 **1882-CC MS66 PCGS.** Brilliant and fully struck, the mint luster is thick and frosted as one would expect for a CC dollar. Excellent type coin.(#7134)

1882-CC Silver Dollar, MS67
Dazzling, Semiprooflike Surfaces

4275 **1882-CC MS67 PCGS.** The 1882-CC Morgan, and the two subsequent Carson City issues, the 1883-CC and 1884-CC, constitute the most widely available silver dollars from that mint. The Superb Gem population of the 1882-CC is somewhat sparse, however, with PCGS and NGC having certified just over 100 examples. A splash or two of faint gold-tan patina gravitates to the obverse of this outstanding MS67 example, while the reverse remains color-free. Partially prooflike fields offer sharp contrast with the crisply struck design elements, and a couple of minor luster grazes do not affect the grade designation. Population: 53 in 67, 1 finer (6/12).
Ex: Central States Signature (Heritage, 5/2007), lot 4621. (#7134)

4276 **1882-CC MS65 Deep Mirror Prooflike PCGS.** The dies boldly clashed twice, then were polished by mint workers and re-installed. The fields are flashy and the minimally toned surfaces are beautifully preserved. A nicely struck and desirable Carson City type coin.(#97135)

4277 **1882-O MS65 PCGS. CAC.** The obverse of this Gem is richly toned green, yellow, and blue over glowing satiny luster. The reverse is frosty silver with a brown-gold spot on the right wing. *From The Color Collection*.(#7136)

1882-O Morgan Dollar, MS64 Popular VAM-4, O/S Variety

4278 **1882-O/S MS64 PCGS. VAM-4.** A Top 100 Variety. This well-detailed Choice specimen shows the diagonal line of the undertype S inside the primary mintmark, as well as the die-polishing lines inside Liberty's ear that indicate the popular VAM-4 variety. Wisps of light gold toning highlight the lustrous, well-preserved surfaces. Population: 57 in 64, 0 finer (6/12). (#133891)

4279 **1882-O/S MS63 PCGS. CAC. VAM-4.** A Top 100 Variety. The "O/S Recessed" VAM. This Select Mint State dollar has delicate violet toning over champagne surfaces with a weak strike only evident above Liberty's ear.(#7138)

4280 **1883-CC MS66 PCGS. CAC.** Variegated toning covers all of the reverse and most of the obverse, save for a brilliant silver-white patch. Generous luster and excellent eye appeal make this Premium Gem a prize for toning enthusiasts. *From The Color Collection*.(#7144)

4281 **1883-CC MS66+ PCGS. CAC.** Mounted reverse-up in the holder, the better to show off that side's peach, blue, and green-gold patina. The obverse is border-toned in similar, softer colors with creamy cartwheel luster. *From The Color Collection*.(#7144)

1883-CC Morgan Dollar, MS67 None Numerically Finer at NGC

4282 **1883-CC MS67 NGC.** This magnificent Superb Gem Carson City dollar offers an unbeatable combination of high technical quality and stunning eye appeal. The design elements are sharply detailed throughout and the virtually unmarked surfaces radiate vibrant mint luster. The NGC Census does not show any numerically finer coins (6/12). (#7144)

1883-CC Dollar, Glittering Superb Gem

4283 **1883-CC MS67 PCGS.** Courtesy of the GSA hoard, the 1883-CC is among the most available Carson City dollars in Mint State. However, it is not like the 1880-S dollar, which is plentiful at the MS67 level. In fact, Superb Gem 1883-CC dollars are few and far between, and the issue is virtually unobtainable any finer. The present magnificent piece is separated from perfection by only the faintest contact on the cheek and neck. *Ex: Dallas Signature (Heritage, 12/2005), lot 2350.* (#7144)

Superb Gem 1883-CC Morgan Dollar Only Three Numerically Finer at PCGS

4284 **1883-CC MS67 PCGS.** The pristine surfaces of this Superb Gem Carson City dollar are graced by even shades of light gold toning. Vibrant cartwheel mint luster and sharply detailed design elements add to the considerable eye appeal. PCGS has graded only three numerically finer examples (6/12). (#7144)

4285 **1883-CC MS66 Prooflike PCGS.** Although the reverse displays an arc of amber-gold, the obverse is nearly brilliant. The strike is precise, and the surfaces are thoroughly lustrous and impeccably preserved. Encapsulated in an old green-label holder. PCGS has seen only eight Prooflike pieces finer (6/12). *From The Old Holder Collection*.(#7145)

4286 **1883-CC MS66 Deep Mirror Prooflike NGC.** Fully struck with finely frosted silver-white devices that appear to float on mirrored fields showing minimal abrasions, making this a coin of compelling beauty. Census: 36 in 66 Deep Mirror Prooflike, 5 finer (5/12). (#97145)

4287 **1883-O MS65 Deep Mirror Prooflike PCGS.** The well-detailed design elements are richly frosted, providing stark cameo contrast with the deeply reflective fields of this impressive Gem. PCGS has certified only 13 numerically finer examples.(#97147)

4288 **1883-S MS63 PCGS.** The surfaces of this well-detailed Select specimen display especially vibrant mint luster and the reverse is remarkably free of contact marks. Two more prominent marks on Liberty's face are all that prevent a higher grade.(#7148)

4289 **1883-S MS63 PCGS.** This attractive Select Morgan dollar displays well-detailed design elements and brilliant surfaces, with vibrant cartwheel mint luster. A few minor contact marks around Liberty's mouth explain the grade.(#7148)

Choice 1883-S Morgan Dollar
Exceptional Mint Luster

4290 **1883-S MS64 PCGS.** Unusually vibrant mint luster and sharply detailed design elements are the hallmarks of this impressive Choice Morgan dollar. A few accents of greenish-gold and blue toning add to the considerable eye appeal. A few minor contact marks on Liberty's chin prevents a Gem evaluation. PCGS has graded only 17 numerically finer examples (6/12). (#7148)

4291 **1884 MS66+ PCGS. CAC.** Remarkable splashes of powder-blue, lime-green, rose-red, and orange-gold encompass the obverse. The reverse displays only a trace of honey patina. An exceptionally preserved Morgan type coin.(#7150)

4292 **1884-CC MS66 PCGS. CAC.** Splashes of burnt-orange, crimson, and aqua visit the obverse, and touches of sienna are noted along the lower and right reverse borders. Highly lustrous and well struck save for the hair over Liberty's ear.
Ex: Palm Beach Signature (Heritage, 11/2004), lot 9512. From The Color Collection.(#7152)

1884-CC Dollar, MS67
Bright, Cartwheel Luster

4293 **1884-CC MS67 PCGS.** Ex: Jackson Hole. Like most examples of this date, it is most likely the case that this coin came from the 1970s GSA sale of Carson City Morgan dollars, although it is uncommonly nice and far superior to most of the pieces from that source. The surfaces of this Superb Gem are frosty and highly lustrous with complete cartwheels on each side. Population: 63 in 67, 3 finer (6/12).
Ex: Dallas Signature (Heritage, 4/2007), lot 40. (#7152)

4294 **1884-CC MS66+ Prooflike NGC.** This nicely mirrored and intricately struck Premium Gem Carson City type coin is splendidly unabraded and has only a hint of almond-gold toning.(#7153)

4295 **1884-CC MS65 Deep Mirror Prooflike PCGS.** This spectacular Gem Carson City dollar exhibits deeply reflective fields that contrast dramatically with the sharply detailed frosty design elements. Only a few minor hairlines and contact marks are evident.(#97153)

4296 **1884-O MS67 NGC.** The satiny luster takes on a confirmed semiprooflike gleam in the fields of this high-grade O-mint dollar. Remarkable problem-free surfaces. Sharply struck throughout. (#7154)

4297 **1884-S AU58 NGC.** This sharply detailed near-Mint specimen shows just a trace of high-point rub on the design elements, with essentially brilliant surfaces and vibrant mint luster on both sides. The 1884-S Morgan dollar is seldom encountered in high grade. (#7156)

4298 **1884-S AU58 NGC.** Brighter than usually seen with pale silver surfaces. Though several "wedge" abrasions are present on the obverse, including one on the jawline, only a touch of rub affects the high points.(#7156)

Select 1884-S Morgan Dollar
Classic Condition Rarity
Only 15 Finer Coins at PCGS

4299 **1884-S MS63 PCGS. CAC.** A substantial mintage of 3.2 million Morgan dollars was accomplished at the San Francisco Mint in 1884, but most of the mintage was released into circulation at the time of issue, and few coins were saved for numismatic purposes. The 1884-S is plentiful in circulated condition, but high-grade specimens are quite elusive in today's market.

Undoubtedly, some bags were retained in Treasury vaults, as small numbers were later released to customers in the period from 1926 to the early 1950s. It seems likely that the bulk of the government stockpile was melted under the provisions of the Pittman Act in 1918, however, as the numbers released in later years were never large, and the issue attracted little attention.

The 1884-S was not well-represented in the great Treasury releases of the 1960s, and series specialists finally realized that the issue was scarce in all Mint State grades, and rare above the Select level. Today, the 1884-S is recognized as an important key to the Morgan dollar series in high grade. Auction appearances in modern times include the impressive Select specimen in lot 4184 of the Central States Signature (Heritage, 4/2002), which realized $54,050.

The present coin is a delightful Select example, with sharply detailed design elements that show bold, if not full, definition on the hair strands above Liberty's ear. The mostly brilliant surfaces display a few areas of green and gray toning, with most of the color on the reverse. Both sides exhibit a mixture of vibrant satiny mint luster and semiprooflike reflectivity. We expect intense competition from Morgan dollar enthusiasts when this lot is called. Population: 43 in 63, 15 finer (6/12). (#7156)

4300 **1885-CC MS65 PCGS.** Strong gold-peach patina through the centers with generous silver-gray luster through the margins. A lovely Gem example of this Carson City classic.
Ex: Stack's (11/2005), lot 639.(#7160)

4301 **1885-CC MS65 PCGS.** An attractive Gem representative of this low-mintage Carson City issue, with sharply detailed design elements throughout and vibrant cartwheel mint luster, under pleasing shades of light gold toning.(#7160)

4302 **1885-CC MS65 PCGS.** A faintly toned, lustrous, and better date Morgan dollar that boasts a well preserved reverse and only minor obverse marks. The fiscally prudent Grover Cleveland shut down the presses at Carson City in 1885 but they resumed operation when Benjamin Harrison became President in 1889.(#7160)

4303 **1885-CC MS65 PCGS.** Lustrous and well struck with creamy-gray central toning and attractive speckled charcoal patina near the borders. Carefully preserved with very few marks.(#7160)

4304 **1885-CC MS66 PCGS.** Hints of tan patina appear on the obverse of this frosty and highly lustrous Carson City dollar, the balance of the obverse and the entire reverse showing no toning. A splendid Premium Gem and seldom found nicer.(#7160)

4305 **1885-CC MS66 PCGS.** This low mintage Carson City dollar is richly and evenly patinated in dove-gray and golden-brown shades. Exceptionally free from marks. The strike shows slight softness at the centers. Encapsulated in an old green label holder.(#7160)

4306 **1885-CC MS66 PCGS.** This Premium Gem 1885-CC is delightfully toned with a golden blush over the entire surface that starts to deepen toward amber near the rim. Only a few undistracting, grade-consistent marks are present.
Ex: Dallas Signature (Heritage, 11/2005), lot 3273; FUN Signature (Heritage, 1/2007), lot 7061.(#7160)

4307 **1885-CC MS66 PCGS.** An untoned representative of this important and widely collected Carson City dollar. The low mintage is certainly a pull for dollar collectors, and coupled with its widespread availability in mint condition, the 1885-CC is a very appealing issue for collectors. This is a brilliant coin with the usual superb mint frost. Sharply struck, there are no detracting blemishes on this high grade example.(#7160)

4308 **1885-CC MS66 PCGS.** An amazing Premium Gem with only minimal bagmarks on each side, this frosty and brilliant silver specimen has no evidence of toning.(#7160)

Beautiful MS66+ 1885-CC Dollar

4309 **1885-CC MS66+ PCGS. CAC.** A magnificently preserved representative of this popular low mintage Carson City issue. The centers are lightly brought up but the remainder of the designs are bold. Pastel hints of ice-blue and straw-gold deny absolute brilliance. Much more affordable than the next higher grade. (#7160)

4310 **1885-CC MS63 Deep Mirror Prooflike PCGS. CAC.** Highly mirrored fields provide pleasing contrast with the frosty portrait, eagle, and wreath. The low mintage CC-mint silver dollar has a good strike, a clean reverse, and moderate marks on the left obverse.(#97161)

4311 **1885-CC MS64 Deep Mirror Prooflike PCGS.** Dazzling fields and frosty motifs ensure the eye appeal of this well struck and better date Choice CC-mint silver dollar. Well preserved despite a few faint grazes on the portrait. Certified in an old green label holder. (#97161)

Brilliant 1885-CC Morgan Dollar, MS66 Deep Mirror Prooflike Example

4312 **1885-CC MS66 Deep Mirror Prooflike NGC.** This is a gorgeous example with fully brilliant surfaces and nary a trace of toning. It is remarkably well contrasted with highly lustrous devices. Few examples of the issue can match this one for overall aesthetic appeal.
Ex: FUN Signature (Heritage, 1/2005), lot 11335. (#97161)

1885-CC Dollar, MS66 Deep Mirror Prooflike Heavily Contrasted, Among the Finest Known

4313 **1885-CC MS66 Deep Mirror Prooflike NGC.** This deeply mirrored Gem is only bettered by one coin certified by NGC. The fields are deeply mirrored, and this Gem dollar displays excellent contrast. Dave Bowers noted: "DMPL coins with good cameo contrast exist and are highly sought." This is a mostly brilliant silver dollar with a smattering of reddish-golden color about the borders on each side. We cannot imagine any collector that would not be thrilled to own this Gem. Census: 19 in 66 Deep Mirror Prooflike, 1 finer (6/12).
Ex: Atlanta Signature (Heritage, 4/2006), lot 1025. (#97161)

4314 **1885-O MS67 NGC.** A well-defined Superb Gem with effusive luster. Light streaks of medium-gray patina descend from the upper right obverse and plunge well into the subtly frosted portrait. (#7162)

4315 **1885-S MS65 PCGS.** Unlike most of the 1885-S dollars from the Redfield hoard, this dollar is notably free from the abrasions usually expected. Each side is brilliant and the cheek of Liberty is smooth and rounded. Well struck overall.(#7164)

4316 **1886 MS67 PCGS. CAC.** Radiant cartwheel luster envelops both sides of this frosty silver-white Superb Gem. Some interesting die cracks, old clash marks, and a fairly pebbly, textured surface are signs of dies long in use. PCGS has seen only three submissions numerically finer (6/12).(#7166)

4317 **1886 MS66 Prooflike PCGS. CAC.** This all-brilliant dollar displays bright, reflective mirrors in the fields, equally balanced in appearance on both sides. Sharply struck and showing no obvious marks.(#7167)

Choice 1886-O Morgan Dollar
Only Three Numerically Finer Coins at PCGS

4318 **1886-O MS64 PCGS.** The creamy surfaces of this Choice Morgan dollar are remarkably well-preserved, suggestive of an even higher grade. The design elements are sharply detailed throughout and the fields radiate vibrant mint luster. Eye appeal is outstanding. PCGS has certified only three numerically finer examples (6/12). (#7168)

4319 **1886-S MS65 NGC.** A semi-prooflike Gem of this lower mintage and better date San Francisco issue. Crisply struck and close to brilliant with clean surfaces despite a few tiny ticks on Liberty's jaw. (#7170)

4320 **1886-S/S MS65 NGC. VAM-2.** A Top 100 Variety. The mintmark is lightly repunched. Of greater interest to collectors of this better date, the lustrous surfaces exhibit attractive tan-gold and sea-green peripheral patina. The strike is good and there are no singularly mentionable marks.(#7170)

Gem 1886-S/S Morgan Dollar
Repunched Mintmark, VAM-2

4321 **1886-S/S MS65 PCGS. CAC. VAM-2.** A Top 100 Variety. This sharply detailed Gem displays the repunched mintmark characteristic of the collectible VAM-2 variety. The creamy brilliant surfaces display a few accents of golden-tan toning, with especially vibrant mint luster on both sides. No mentionable contact marks are evident and eye appeal is outstanding. Population: 11 in 65, 1 finer (5/12). (#7170)

4322 **1887-O MS65 PCGS.** A well-detailed Gem, with spectacular shades of powder-blue and silver-gray toning on the obverse, while the reverse remains brilliant white. Vibrant mint luster adds to the extraordinary eye appeal. PCGS has graded only nine numerically finer coins (6/12).(#7176)

4323 **1887-O MS65 PCGS.** A hint of apricot toning endows this thoroughly lustrous and splendidly unabraded New Orleans Gem. The hair above the ear shows minor bluntness, though less than is usually associated with the Cajun facility.(#7176)

4324 **1887-S/S MS65 PCGS. VAM-2.** A Top 100 Variety. The serif of an errant S is nestled within the upper loop of the prominent S. Lustrous, boldly impressed, and minimally abraded with light to medium cream-gray and ice-blue toning.(#7180)

4325 **1888 MS66+ PCGS. CAC.** This piece is untoned on the reverse and vividly toned on the obverse, with waves of copper-gold, fuchsia, and aqua predominating. This sharply struck piece is just a couple of tiny ticks away from a Superb Gem grade, where PCGS has seen only 15 grading events (6/12).(#7182)

4326 **1888-O MS66 PCGS.** This spectacular Premium Gem displays vibrant mint luster and well-detailed design elements, with just a touch of softness on the hair above the ears. No numerically finer specimens have been graded at PCGS (6/12).(#7184)

1888-S Dollar, MS64 Deep Mirror Prooflike
Only Three Finer Specimens at PCGS

4327 **1888-S MS64 Deep Mirror Prooflike PCGS.** From a low mintage of 657,000 pieces, the 1888-S Morgan dollar is elusive in Choice condition, with Deep Mirror Prooflike surfaces. This impressive specimen features sharply detailed frosty devices that contrast boldly with the mirrored fields. A few minor contact marks and hairlines prevent a Gem designation. Housed in a green label holder. Population: 43 in 64 Deep Mirror Prooflike, 3 finer (5/12). (#97187)

4328 **1889 MS66 PCGS.** Although the 1889 Morgan dollar can only be called scarce in MS66 condition, PCGS has graded only four numerically finer specimens (5/12). This spectacular Premium Gem is sharply struck, with vibrant mint luster and outstanding eye appeal.(#7188)

4329 **1889-CC — Questionable Color — Genuine PCGS.** In our opinion, this coin has the details of an XF specimen that has scratches and questionable color. This key date Carson City dollar has a slender diagonal scratch on the cheek and dusky caramel-gold and steel-gray toning. Close to AU sharpness with wear concentrated at the centers.(#7190)

4330 **1889-CC VF20 PCGS.** This midlevel key issue has relatively unmarked surfaces for the grade, medium gray with good eye appeal and deeper charcoal accents around the devices.(#7190)

4331 **1889-CC VF30 PCGS. CAC.** Blended tan-brown and stone-gray toning embraces this midgrade key date CC-mint dollar. Surprisingly void of abrasions, and the wings and curls retain ample design detail.(#7190)

4332 **1889-CC VF35 NGC.** The 1889-CC Morgan dollar is the most challenging date of the Carson City series and this Choice VF example should be a welcome addition to an otherwise high-grade collection. The surfaces are evenly worn, with pleasing gold, gray, and blue patina.(#7190)

4333 **1889-CC — Improperly Cleaned — NGC Details. XF.** This stone-gray key Carson City dollar displays noticeable luster within design crevices but the surfaces are subdued and faintly hairlined. We note an obverse rim mark at 9 o'clock and a granular area near the base of the cap.(#7190)

1889-CC Morgan Dollar, XF45
Carson City Key

4334 **1889-CC XF45 NGC.** The 1889-CC Morgan dollar is the key to the Carson City series, and collectors prize attractive Choice XF examples, like the present coin. This lightly circulated example shows noticeable wear on the high points of the design, but retains all important detail and significant amounts of mint luster. (#7190)

Uncirculated 1889-CC Dollar
Scarce and Valuable in All Grades

4335 **1889-CC MS60 NGC.** Even though the Carson City Mint reopened in 1889 after a four-year hiatus, it only produced two issues during its "second startup." The Morgan silver dollar saw a production of 350,000 coins with a face value of $350,000, while the 1889-CC Liberty Head double eagle was struck in a much skimpier amount, some 30,945 coins with a face value of $618,900, making the total 1889 Carson City output $968,900. The 1889-CC double eagle is an extremely popular issue within the series. However, many more collectors seek nice examples of the 1889-CC silver dollar, as far more silver dollar collectors exist than double eagle specialists. A large majority of the 1889-CC silver dollars — perhaps as many as 325,000 coins or so — were melted after minting, according to Rusty Goe. This example shows lovely mint frost and each side is covered with moderate gray-golden patina. The most detracting element on either side is a carbon spot on the eagle's left (facing) wing. (#7190)

4336 **1889-O MS64+ PCGS. CAC.** Bright, satiny mint luster characterized this immaculately preserved O-mint dollar. As almost always seen, the center of each side is softly struck and the area directly above Liberty's ear also shows roller marks.(#7192)

4337 **1889-O MS64 PCGS. VAM-6.** A Top 100 Variety. The base of the 18 is clearly repunched. A whisper of straw-gold toning enriches lustrous and lightly abraded surfaces. The centers are lightly brought up. A conditionally rare VAM. Population: 15 in 64, 0 finer (6/12).(#133933)

4338 **1889-S MS65 PCGS.** The lovely surfaces on this Gem 1889-S are far above-average, somewhat prooflike and highly reflective, with rose rim toning complementing silver centers. The surfaces show no overt marks. PCGS has certified only 63 submissions finer (6/12).(#7194)

4339 **1889-S MS65 PCGS.** The mintmark and the 9 in the date are repunched. Lovely peach-gold patina brightens the borders of this lustrous and sharply struck better-date dollar. The reverse is splendidly preserved, as is the obverse field. The portrait displays faint marks.(#7194)

4340 **1889-S MS65+ PCGS. CAC.** This high-end Gem exhibits sharp definition on the strands of hair over Liberty's ear and the feathers on the eagle's breast. The lustrous surfaces show few signs of contact and a few hints of light gold toning. From a mintage of just 700,000 pieces.(#7194)

4341 **1890 MS65 PCGS.** The 1890 Morgan dollar is a prime condition rarity in grades above the Gem level. This delightful specimen features well-detailed devices and lightly marked lustrous surfaces. PCGS has graded a single numerically finer example (6/12). (#7196)

4342 **1890 MS65 NGC.** Reddish-gold and aqua-blue hues run over the lustrous surfaces of this well struck Gem. Well cared for on both sides. Extremely difficult to locate any finer; NGC has certified just five numerically superior pieces (5/12).
From The Color Collection.(#7196)

4343 **1890 MS65 PCGS.** This well-detailed Gem displays bright semiprooflike surfaces, a welcome change from the typical 1890 Morgan dollar, which is usually seen with a weak strike and subdued mint luster. Although this issue can be located in Gem condition without too much difficulty, PCGS has graded only one coin in higher numeric grade (5/12).(#7196)

4344 **1890 MS64 Deep Mirror Prooflike PCGS.** The 1890 is a high-production dollar with more than 16 million pieces struck. The usual coin with Prooflike fields shows little contrast. Few display the marked contrast between fields and devices, as seen here. Few also have definition as strong over the ear of Liberty as seen on this coin. Brilliant throughout and minimally marked. Population: 89 in 64 (1 in 64+) Deep Mirror Prooflike, 6 finer (6/12).(#97197)

4345 **1890-CC MS64 PCGS. VAM-3.** The 90 in the date is nicely repunched. Lustrous and well preserved with a good strike and a mere hint of peripheral golden toning. A better Carson City issue. (#7198)

4346 **1890-CC MS64 PCGS. VAM-3.** The base of the 90 is repunched. An untoned near-Gem whose vibrant luster and nice strike combine with clean surfaces for imposing eye appeal. Faint roller marks on the cheek are of mint origin.(#7198)

4347 **1890-CC MS64 PCGS.** This frosty and sharply struck near-Gem has brilliant silver luster with splashes of gold and cobalt-blue toning around much of the obverse and reverse borders. (#7198)

4348 **1890-CC MS64+ PCGS.** An impressive near-Gem with fully brilliant and untoned silver surfaces, the sharply struck devices exhibit frosty luster and the pristine fields show satiny mint surfaces. (#7198)

Gem 1890-CC Morgan Dollar
Radiant Cartwheel Luster

4349 **1890-CC MS65 PCGS.** The 1890-CC is overshadowed by some of its rarer CC-mint cousins, but Gems are nonetheless not easily obtained without spirited bidding, and anything finer is seldom seen. This Gem shows mostly untoned silver-white surfaces with radiant cartwheel luster. A few light roller marks remain on the lower cheek. (#7198)

MS65 1890-CC Dollar
Sharply Detailed and Lustrous

4350 **1890-CC MS65 PCGS.** An attractive Gem example of this sought-after Carson City issue, with sharply detailed design elements and vibrant mint luster. The creamy surfaces are free of mentionable distractions and display pleasing shades of light gold toning. Visual appeal is extraordinary. PCGS has certified only nine numerically finer specimens (6/12). (#7198)

4351 **1890-CC MS63 Deep Mirror Prooflike PCGS.** The prominently reflective fields display peripheral autumn-brown and apple-green toning. The reverse is essentially pristine though the left obverse displays faint marks. The 0 in the date is widely repunched, similar to VAM-3, but the reverse die appears differs from two other examples of VAM-3 in the present auction.(#97199)

4352 **1890-CC MS64 Deep Mirror Prooflike PCGS.** A sharply struck near-Gem, this brilliant and untoned Carson City dollar has deeply mirrored fields around lightly frosted devices. PCGS has only certified 20 finer Deep Mirror Prooflike examples (6/12). (#97199)

4353 **1890-O MS65 PCGS.** Golden-brown borders frame stone-gray fields and devices. Slightly soft at the centers, customary for a New Orleans dollar of the era, but other portions are well struck. Lustrous and lovely with a particularly unabraded obverse. Encapsulated in an old green label holder.
Ex: Los Angeles Signature (Heritage, 8/2009), lot 1952, which realized $1,552.50.(#7200)

4354 **1890-O MS65 PCGS. VAM-5.** The top of the 9 in the date is lightly repunched. Brilliant and highly lustrous with a good strike and a refreshingly unabraded appearance. Certified in a first generation holder.(#7200)

4355 **1890-S MS65 PCGS. CAC.** This splendidly toned and crisply struck Gem has vibrant bands of orange-gold, ruby-red, and aqua-blue on the left obverse margin. The reverse is fully patinated rose-red except for an arc of apple-green on the upper border. Housed in an old green label holder.(#7202)

Premium Gem 1890-S Morgan Dollar
Only Six Numerically Finer Coins at PCGS

4356 **1890-S MS66 PCGS.** This delightful Premium Gem is an outstanding example of the high-quality Morgan dollar mintage accomplished by the San Francisco Mint in 1890. The design elements are sharply detailed in all areas, and the surfaces radiate frosty mint luster. A few hints of dusky toning accent the mostly brilliant unmarked fields. PCGS has graded only six numerically finer coins (5/12). (#7202)

Gem 1891 Morgan Dollar
Only Three Finer Coins at PCGS

4357 **1891 MS65 PCGS.** The 1891 Morgan dollar was a high volume issue, with a mintage of nearly 8.7 million pieces. Unfortunately, quality control was relaxed to achieve the large production, and the typical example seen exhibits weak striking details and lackluster surfaces. This well-detailed Gem is a welcome exception, with creamy surfaces that display vibrant mint luster and strong eye appeal. PCGS has graded only three finer coins (5/12). (#7204)

4358 **1891-CC MS64 PCGS.** The frosty silver surfaces offer generous luster, with a few too many luster grazes and scattered grayish spots, likely water spots, to qualify for Gem status, but the eye appeal is good nonetheless. The reverse is high-end for the grade. (#7206)

4359 **1891-CC MS64 NGC. VAM-3.** A Top 100 Variety. The "Spitting Eagle" variety with a die lump beneath the beak. This reverse was found on a significant number of the GSA '91-CC Morgans. A sharply struck and lustrous Carson City near-Gem with faint gold toning and minor marks on Liberty's jaw.(#7206)

4360 **1891-CC MS64 PCGS. VAM-3.** A Top 100 Variety. This "Spitting Eagle" Choice Carson City coin has a good strike and potent luster. Caramel-gold toning is light and intermittent. Minor marks on the cheek and left (facing) wing determine the grade.

4361 **1891-CC MS64 NGC. CAC.** A well-detailed Choice specimen of this always-in-demand Carson City issue, with semiprooflike fields that show a few hints of light gold toning. Certified in an old NGC holder.
From The Old Holder Collection.(#7206)

Radiant Gem 1891-CC 'Spitting Eagle' Dollar

4362 **1891-CC MS65 PCGS. VAM-3.** Spitting Eagle, A Top 100 Variety. The extra die lump near the eagle's beak is responsible for the moniker of this popular variety. This frosty Gem boasts radiant cartwheel luster, and a few ticks on the eagle's breast and minor scrapes on Liberty's chin are consistent with the grade. PCGS has seen 31 finer (6/12). (#7206)

1891-CC Morgan, Brilliant MS65
Seldom Seen Finer

4363 **1891-CC MS65 PCGS.** Seemingly a candidate for a higher grade, the surfaces show smooth mint frost and a high degree of eye appeal overall. Virtually unblemished. The striking details are strong on each side, and both obverse and reverse are brilliant. Faint clash marks show on the reverse.
Ex: Denver Signature (Heritage, 8/2006), lot 3026; Dallas Signature (Heritage, 4/2007), lot 1174. (#7206)

Eye-Appealing 'Spitting Eagle'
VAM-3 1891-CC Gem Morgan

4364 **1891-CC MS65 PCGS. VAM-3.** Spitting Eagle, A Top 100 Variety. For a real challenge for the VAM specialists, expand your search to include the other four varieties known for the 1891-CC. The 1891-CC VAM-3 is only conditionally rare, but the VAM-6 is much more elusive. This satiny Gem shows good eye appeal and bold cartwheel luster. (#7206)

MS65 1891-CC VAM-3 Dollar
The 'Spitting Eagle,' Top 100 Variety

4365 **1891-CC MS65 PCGS. VAM-3.** Spitting Eagle, A Top 100 Variety. Although the extra reverse die lump is obvious, there are other subtle die markers on the reverse of the Spitting Eagle, including "diagonal die gouges at outside of eagle's left leg and between bottom and middle arrow shafts," per VAMWorld.com. This piece is mostly untoned silver-white, save for an arc of golden rim toning on the reverse. (#7206)

Gem 1891-CC Silver Dollar
Satiny and Bright Silver-White

4366 **1891-CC MS65 PCGS.** Ex: New York City Set. The bright silver-white surfaces are satiny and somewhat prooflike on each side, even if no designation is forthcoming. A loupe reveals only a few small marks on Liberty's cheek and neck, consistent with the grade. PCGS has certified 31 submissions numerically finer (6/12). (#7206)

4367 **1891-O MS63 Prooflike NGC.** Considerable mirrors with a golden element to the reverse. Though lightly abraded with mild contrast, this is still an entirely pleasing Select Prooflike O-mint piece. Census: 17 in 63 Prooflike, 19 finer (6/12).(#7209)

4368 **1892 MS64 PCGS.** Wisps of gold appear on the obverse with delicate lavender on the reverse of this fully brilliant and frosty Choice Mint State dollar.(#7212)

4369 **1892 MS64+ PCGS. CAC.** This is a highly lustrous example of this scarcer P-mint. Each side has light yellow-golden patina over rolling cartwheel mint luster. The strike is just a tad soft in the centers, the usual state for an 1892 dollar.(#7212)

4370 **1892-CC MS61 NGC.** A well-detailed Mint State example of this popular Carson City dollar, the present coin displays vibrant mint luster and lightly marked surfaces that are suggestive of a higher grade.(#7214)

4371 **1892-CC MS63 NGC.** This attractive Carson City Morgan dollar displays vibrant mint luster and well-detailed design elements, with pleasing accents of greenish-gold toning. A scattering of minor contact marks explains the grade.(#7214)

4372 **1892-CC MS63 PCGS.** Carson City Morgan dollars are always in demand, and this well-detailed Select specimen displays vibrant cartwheel mint luster on both sides. The surfaces are enhanced by shades of champagne-gold and gray toning.(#7214)

4373 **1892-CC MS64 NGC.** This near-Gem 1892-CC Morgan dollar is certified in an old-style NGC "no line fatty" holder, a popular encapsulation. The dollar offers much as well, beautiful luster over iridescent toning with amber and ice-blue predominating on the obverse, aqua and jade on the reverse.
From The Old Holder Collection.(#7214)

Choice 1892-CC Dollar
Semiprooflike Fields

4374 **1892-CC MS64 PCGS. CAC.** The 1892-CC Morgan dollar is always in demand because it was not as heavily represented in the Treasury releases of the 1960s as many other Carson City issues. This attractive Choice example exhibits sharply detailed design elements and lustrous fields that have a hazy reflective quality in most areas. (#7214)

1892-CC Morgan, Semiprooflike MS64

4375 **1892-CC MS64 PCGS. CAC.** A generally well-produced issue from near the end of the CC-mint era, the 1892-CC enjoys perennial popularity. The present example is high-end for the assigned grade, with brilliant, semiprooflike silver-white surfaces that display relatively few abrasions and generous eye appeal.
Ex: ANA Signature (Heritage, 8/2007), lot 2365. (#7214)

1892-CC Silver Dollar, MS65
Die Chip in 2

4376 **1892-CC MS65 PCGS.** A small die chip fills the bottom part of the 2 on this attractive Gem. Both sides have frosty and brilliant silver luster with no evidence of toning. Faint clash marks and minor die cracks are noted on each side. Only 23 finer examples reside in PCGS holders (6/12). (#7214)

1892-CC Morgan Dollar, MS65
Filled 2

4377 **1892-CC MS65 PCGS.** A small die chip fills the 2 just above the base and the mintmark is tilted slightly to the left. This Gem has brilliant and untoned silver surfaces with frosty devices and satiny, slightly reflective fields. PCGS has only certified 23 finer examples (6/12). (#7214)

1892-CC Silver Dollar, MS64 Prooflike
Clashed Dies

4378 **1892-CC MS64 Prooflike PCGS.** Light clash marks are visible in the fields on either side of Liberty, and inside the right branch of the wreath. This Choice Mint State dollar is a lovely untoned example with brilliant silver surfaces showing frosty devices and fully mirrored fields. Population: 77 in 64 Prooflike, 10 finer (6/12). (#7215)

4379 **1892-O MS64 PCGS.** The design elements of this Choice Morgan dollar are well-detailed, with just a touch of the typical softness on the hair above the ear and the eagle's breast. Shades of greenish-gold and lavender toning enhance the lightly marked surfaces. (#7216)

4380 **1892-O MS64 PCGS.** Fiery gold shares minimally abraded surfaces with pale aquamarine to give this New Orleans Morgan dollar its assertive overall beauty. Typically struck for the issue. *From The Color Collection.*(#7216)

4381 **1892-O MS64+ PCGS. CAC.** The mint luster is outstanding and there are virtually no marks on either side of this upper-end MS64 example. The centers show the usual striking softness and roller marks are also seen on the obverse.(#7216)

Gem 1892-O Morgan Dollar
Conditionally Elusive

4382 **1892-O MS65 PCGS.** The 1892-O Morgan dollar is seldom seen even in Gem condition, and finer pieces are just about unobtainable. The present MS65 specimen shows a strike that is somewhat weak in the centers, as usual for the issue. Compensating are the relatively unmarked surfaces that show swirling mint frost rather than the usual satin luster. Tinges of gold are scattered around the margins of each side. PCGS has certified only five finer (6/12). (#7216)

4383 **1892-S AU50 ANACS.** Much of the luster remains intact on this AU 1892-S, with silver centers and golden edge toning. Scattered marks appear under a loupe, the only overt one a dig on the eagle's breast.(#7218)

4384 **1892-S AU53 PCGS. CAC.** This lightly circulated Morgan dollar shows just a touch of high-point wear on the design elements and retains much of its original mint luster. A few hints of champagne-gold toning highlight the pleasing surfaces.(#7218)

1892-S Dollar, Choice AU
Bright, Semireflective Fields

4385 **1892-S AU55 PCGS. CAC.** Many will see this as a remarkable opportunity. This semikey issue shows only the slightest friction on each side, and the fields are bright and many might argue fully reflective. The combination of these two attributes gives the astute collector the opportunity to acquire this challenging issue in an uncommon condition. The brilliant centers are surrounded by golden toning at the margins. (#7218)

4386 **1893 MS63 PCGS.** This Select Mint State piece will nicely represent the date in a one-a-year collection. Both sides are essentially brilliant with a hint of champagne on the reverse. Sharply struck except over the ear.(#7220)

4387 **1893 MS63 NGC.** The surfaces are frosted, thoroughly lustrous, and bright silver-white, with a decent strike even though a few abrasions scattered about, including some on Liberty's cheek and neck, preclude an even finer grade.(#7220)

4388 **1893 MS64 PCGS.** While its S-mint counterpart attracts more attention, the 1893 presents its own challenges and has a mintage under 400,000 pieces. This well struck, strongly lustrous representative displays delicate gold and rose tints with good eye appeal.
Ex: Long Beach Signature (Heritage, 9/2007), lot 2686.(#7220)

4389 **1893 MS64 PCGS.** Light butter-gold toning adorns the obverse of this lustrous and better date silver dollar. The strike is sharp and only a couple of moderate marks on each side deny status as a full Gem.(#7220)

4390 **1893-CC XF45 PCGS.** The 1893-CC Morgan dollar is the final date of the Carson City series. This Choice XF representative displays light wear on the design elements and vivid patches of green and violet toning, with traces of prooflike reflectivity in sheltered areas.(#7222)

4391 **1893-CC XF45 ANACS.** Lightly worn with pale silver interiors and narrow gold-orange toning in crescents at the margins. Lightly abraded overall with the deepest cut appearing between the wreath and the eagle's left (facing) wing.(#7222)

Well Struck MS61 1893-CC Dollar

4392 **1893-CC MS61 PCGS.** Many '93-CC dollars have a mushy central strike, but the present semi-key Carson City dollar is fully defined. A trace of tan-gold toning visits lustrous surfaces. The cheek displays scattered marks, though the remainder of the coin is smooth. Certified in an old green label holder. (#7222)

1893-CC Morgan Dollar, MS63 Atypical Surfaces

4393 **1893-CC MS63 PCGS.** The typical survivor from the final Morgan dollar issue at Carson City has a heavily abraded obverse and lightly abraded reverse. This atypical Select Mint State specimen has trivial marks on each side, with brilliant silver luster and satiny surfaces. Both sides are essentially untoned. (#7222)

1893-CC Dollar, Thickly Frosted MS63 Low-Mintage Carson City Date

4394 **1893-CC MS63 NGC.** Whether an 1893-CC has a weak strike in the center (as seen here) or a strong strike, one trait can always be seen: fabulous, frosted mint luster. The luster on this piece rolls around each side impeded by only the slightest marks. The surfaces are brilliant except for a a dash of golden on the upper obverse and a diagonal grease stain on the lower obverse. (#7222)

MS64+ 1893-CC Dollar Brilliant, Lustrous Silver-White Surfaces

4395 **1893-CC MS64+ PCGS. CAC.** The last Carson City Mint Morgan dollar issue, the 1893-CC, was, unfortunately, not the finest hour for the historic Nevada facility. Even most Mint State examples cluster in the lower grades, as they are apt to show extensive bagmarks — perhaps a sign that many were moved elsewhere when the facility closed later in the same year after their striking. The present MS64+ example is clearly one of the finest survivors of the historic mintage. Abundant luster is its foremost attribute, gleaming from silver-white surfaces that offer just a touch of contrasting gold over the denticles. The surfaces are far finer-preserved than usual: The only singular mark is a small one on the chin of Liberty, near the jawline. Some wispy die cracks encircle portions of the reverse periphery. PCGS has seen only 15 submissions in 64+, with 10 finer (5/12). (#7222)

4396 **1893-O AU53 NGC.** This lightly circulated half dollar is pearl-gray with traces of almond-gold. There are no detrimental marks. The '93-O is the second rarest O-mint issue of the series. (#7224)

4397 **1893-O AU55 NGC.** A little high point rub on this Choice AU specimen will be beneficial to the collector on a budget, as the price will certainly be far less than a full Mint State example. At the same time, this piece is nearly as attractive with virtually full luster and lovely gray-gold toning on each side.(#7224)

4398 **1893-O AU55 PCGS.** A trace of wear is evident on the high points of this still lustrous New Orleans dollar. Both sides have splashes of gold toning with other areas of silver brilliance. (#7224)

1893-O Morgan, MS64
Significant New Orleans Rarity

4399 **1893-O MS64 PCGS.** Ex: Jackson Hole. A truly rare coin in both the conditional and absolute senses, the 1893-O boasts the smallest mintage of any Morgan dollar from the New Orleans Mint, and the fifth smallest mintage of any business strike Morgan — excluding, of course, the unknown (or unissued) 1895s. The four other Morgan issues with comparable mintages, from largest to smallest, are the 1881-CC and 1885-CC — both saved in tremendous quantities relative to their original mintages, with many thousands released from the Treasury in the early 1960s and later by the GSA — and the 1893-S and 1894, coins that formed only a tiny fraction of the Treasury holdings. The fame of the 1893-O has perhaps been overshadowed by its illustrious siblings, the coveted 1893-S, and by the last of the CC Morgans, the 1893-CC. Nonetheless, the 1893-O is many times rarer in MS64 than the 1893-CC. As Bowers' silver dollar *Guide Book* puts it, "Choice MS-64 coins are rare and MS-65 coins are of sufficient fame that an auction house might showcase one in a news release."

The present coin is an exception to the majority of Mint State coins, in that it is refreshingly free of mentionable abrasions, save for a couple of undistracting ticks on the cheek and a nick to the right of the 3 in the date. Brilliant luster radiates from each side of the silver-white surfaces, and considerable prooflikeness is present, with mirrored fields and moderate frost on the devices. Population: 84 in 64 (1 in 64+), 6 finer (6/12).
Ex: Fort Lauderdale Bullet Sale (Heritage, 3/2000), lot 401; FUN Signature (Heritage, 1/2001), lot 7540; Dallas Signature (Heritage, 4/2007), lot 79. (#7224)

4400 **1893-S AG3 NGC.** Considerable rim merging, particularly on the reverse, but with the date and mintmark entirely intact. A gold-gray key-date coin that many collectors would be proud to own despite a few digs in the fields.(#7226)

4401 **1893-S AG3 NGC.** The 1893-S is the most elusive business-strike issue of the Morgan dollar series, and even well-worn examples are avidly collected by series enthusiasts. The rims are worn flat in places on this problem-free specimen, but the date, mintmark, and major design features remain intact, at least in outline.(#7226)

4402 **1893-S Good 4 PCGS.** The all-important date and mintmark are bold on this key date Morgan dollar. Each letter is clear within the peripheral legends, and the stars are also separated from the rim. Some plumage detail remains on the lower portions of the wings. Dusky lavender-gray toning encompasses the surprisingly smooth surfaces.(#7226)

4403 **1893-S — Improperly Cleaned — NGC Details. VG.** The surfaces are a bit overbright for the grade level but not unattractive. An overlay of gold is beginning to appear, with a single pale blue dot beneath PL on the obverse. A nice entry-level coin for this key issue.(#7226)

1893-S Morgan Dollar, VG10
Key Business-Strike Issue

4404 **1893-S VG10 NGC.** The 1893-S is the low-mintage key to the Morgan dollar series and collectors prize examples in all grades and conditions. This evenly worn specimen exhibits only minor abrasions and the surfaces display pleasing gray, gold, and blue-steel patina. This coin would be a welcome addition to an otherwise high-grade collection of Morgan dollars. (#7226)

4405 **1893-S — Scratched, Edge Damaged, Cleaned — ANACS. VG10 Details.** A pair of light but lengthy pinscratches intersect on Liberty's chin, and a second pair intersect on the eagle's right (facing) wing. Rim dings are noted at 4:30 and 11 o'clock on the obverse and at 7 o'clock and 9:30 on the reverse. The steel-blue and tan-gray surfaces are slightly luminous and show a scuff near the P in PLURIBUS.(#7226)

1893-S Silver Dollar, VG10
Affordable Quality

4406 **1893-S VG10 PCGS. CAC.** The popular key issue in the Morgan dollar series, this original piece has natural medium gray patina with deeper gray peripheries and lighter devices. Although lightly marked on each side, this is an exceptional example for the grade, providing a nice combination of eye appeal and affordability. (#7226)

1893-S Silver Dollar, Fine 15

4407 **1893-S Fine 15 ANACS.** Scattered surface marks on each side of this pleasing 1893-S dollar are consistent with the assigned grade of Fine 15. Each side exhibits light gray patina that deepens slightly along the borders. Wisps of lemon-gold appear on the rims of this pleasing specimen. (#7226)

1893-S Morgan Dollar, VF Details In-Demand Key Date

4408 **1893-S — Cleaning — Genuine PCGS. VF Details.** This important key Morgan dollar exhibits solid VF sharpness on the design elements, and the fields display pleasing accents of gold toning. Traces of mint luster remain in sheltered areas, despite the noted cleaning. A few minor contact marks are present, the worst being a short dig on Liberty's cheek, but these hardly detract from the coin's appearance. This coin should find a home in an otherwise high-grade collection of Morgan dollars.
Ex: Americana Sale (Stack's, 1/2006), lot 2593. (#7226)

XF Sharpness 1893-S Morgan

4409 **1893-S — Improperly Cleaned — NGC Details. XF.** The '93-S is the lowest mintage regular issue of the Morgan series and is coveted in all grades. The present stone-gray piece has a wealth of detail but is moderately subdued from dipping. Luster nonetheless glints from design recesses. The sole relevant abrasion is a minor reverse rim ding at 3:30. (#7226)

1893-S Silver Dollar, XF45 Slight Cameo Contrast

4410 **1893-S XF45 PCGS.** A wonderful Choice XF specimen, this 1893-S Morgan dollar is untoned with light silver-gray surfaces. The fields are noticeably mirrored with excellent cartwheel luster remaining on each side. The devices are satiny, showing slight contrast with the mirrored fields. (#7226)

Bright 1893-S Dollar, AU50

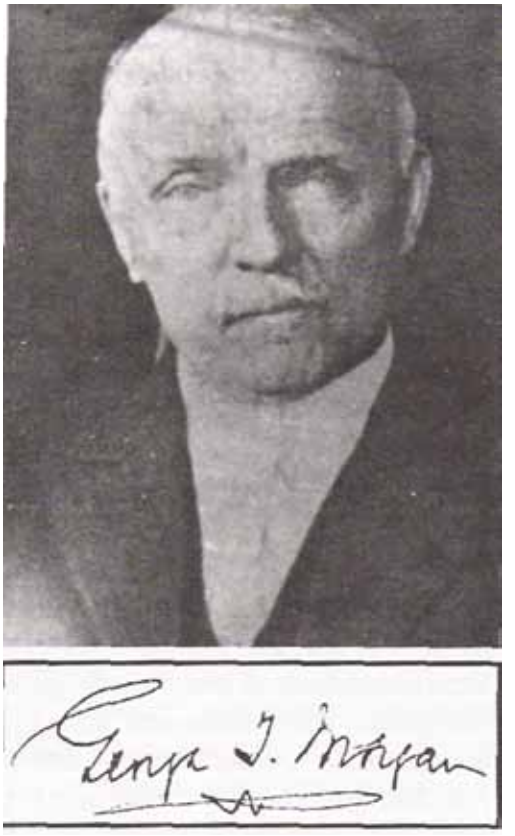

4411 **1893-S AU50 PCGS Secure.** The numismatic marketplace shows a seemingly insatiable lust for Morgan dollars in general and for the 1893-S dollar in particular. Examples are in demand in all grades, and the future appears every bit as bright as the past has been for this issue. A nice AU example such as the present piece seems a right-size compromise for many collectors between coins with an unacceptable degree of wear and the occasional but pricey Mint State specimen that appears now and again. The bright silvery surfaces of this key-date example display occasional wisps of light gold and retain traces of luster in the recessed areas. The design elements exhibit nice detail, save for light high-point wear. The few minute marks seen are completely in line with a coin that has seen light circulation.
Ex: The Joseph C. Thomas Collection (Heritage, 4/2009), lot 2629. (#7226)

1893-S Dollar, Brilliant AU53
Sharply Defined in the Centers

4412 **1893-S AU53 NGC.** Among key-date Morgan dollar issues, the 1893-S has perhaps the most "typical" pattern of circulation. The entire issue was released, and though only 100,000 pieces were struck, few paid attention to the coins when they were distributed. As a result, they circulated freely for a time. Today, the most common details grade for the 1893-S issue is VF, a level which the present piece clearly exceeds. This is an all-brilliant example that still retains some of the original reflectivity in the fields. Generally lightly abraded and remarkably well defined in the centers. (#7226)

1893-S Morgan Dollar, Lightly Toned MS60
Important Uncirculated Capstone of the Series

4413 **1893-S MS60 PCGS.** The present piece occupies an interesting position among the numerous illustrious issues in the Morgan dollar series, as one of the lowest-graded possible examples of the famous 1893-S — certified in Mint State by PCGS. MS60, to be precise. If one were to form a mental image of what such a coin might look like, one might guess that it had lackluster surfaces pretty much devoid of eye appeal, showing no high-point rub but an abundance of scattered contact marks, including some quite serious.

Nothing could be further from the truth where this coin is concerned.

It is true that the surfaces expectedly show a few marks which we will note, but they are scattered and minor throughout both sides. The strike is quite well-executed overall, and the eye appeal is excellent. Starting with the focal points of the coin, Liberty's cheek shows a few faint, straight slide marks on the lower chin area, and a small scrape shows running diagonally through the ear. A few other tiny ticks in the obverse field are barely worthy of notice. The reverse is also relatively unabraded, the most obvious signs of contact being a small patch of reeding marks in the triangular area between the right (facing) olive branch, the arrows, and the right wing. The eagle's breast is free of mentionable abrasions.

The coloration on both sides is a consistent olive-gold color with hints of rose, a captivating appearance that further enhances the surfaces. The luster is perhaps a bit subdued, but it would not surprise us to see this same coin again one day in a higher-grade holder. The importance of this offering, a Mint State 1893-S Morgan dollar, will surely not go unnoticed among the legions of collectors attempting to assemble complete sets. Population: 2 in 60, 32 finer (5/12). (#7226)

4414 **1894 VF25 NGC.** The 1894 Morgan dollar boasts one of the lowest mintages of the series, and even well-worn examples are avidly collected by series specialists. This attractive mid-grade specimen retains much original design detail, with pleasing pink and silver-gray patina.(#7228)

4415 **1894 VF25 ANACS.** A richly toned midrange example of this famous lower-mintage issue. Deep violet and orange influences prevail in the areas of lower relief, while lighter grays are present on the worn high points.(#7228)

4416 **1894 XF45 PCGS.** A Choice XF example of one of the lowest-mintage dates in the Morgan dollar series, this lightly abraded specimen retains traces of original mint luster under gold and silver-gray toning.(#7228)

4417 **1894 AU55 PCGS.** This Choice AU Morgan dollar displays well-detailed design elements, with just a touch of high-point wear, and lustrous surfaces that show only minor, grade-consistent abrasions. The 1894 is avidly pursued because of its low mintage.(#7228)

4418 **1894 AU55 PCGS.** The eagle's breast displays light wear but considerable bright luster dominates the designs. Minor marks are distributed on the obverse, though the reverse is smooth aside from a vertical line near the left (facing) wing. An untoned example of the business strike Philadelphia key date.(#7228)

1894 Silver Dollar, MS61

4419 **1894 MS61 PCGS.** Several examples of the key 1894 Morgan dollar appear in the present sale, providing collectors with an opportunity to acquire the best coin for their collection. This MS61 is brilliant and lustrous with no toning on the obverse and faint champagne on the reverse. (#7228)

1894 Dollar, MS62
Popular, Low-Mintage Date

4420 **1894 MS62 NGC.** The strong suit of the 1894 is its low, low mintage of only 110,972 pieces. This number is deceptively low, however, as quite a few Uncirculated examples are known. This piece displays subdued, satiny luster that is mostly untoned with an occasional streak of pale golden color. Sharp, but not quite fully struck. (#7228)

1894 Morgan Dollar, MS63
Untoned and Satiny

4421 **1894 MS63 PCGS.** At first glance this coin appears to merit a higher grade, with satiny luster over untoned surfaces. Closer examination reveals a set of three bagmarks on the cheek, visible without a loupe, and some smaller cheek abrasions seen with a loupe. The strike comes just short of full in the centers, and there is a diagonal struck-through die grease stain on the reverse that parallels the center arrow feather from where it intersects with branch to the arrow tip. Eye appeal is excellent for the grade. (#7228)

4422 **1894-O MS61 NGC.** Wisps of champagne toning grace the surfaces of this brilliant and frosty Mint State dollar. The central obverse and reverse exhibit the usual weakness over Liberty's ear and on the eagle's breast.(#7230)

4423 **1894-S MS64 NGC.** This satiny near-Gem is highly attractive for the grade, hosting delicate peripheral gold toning and otherwise brilliant silver surfaces. NGC has only certified 50 finer pieces (6/12).(#7232)

4424 **1895-O AU50 NGC.** Shades of pale gold, silver-gray, and lavender patina enhance the surfaces of this lightly circulated Morgan dollar. A light trace of wear shows on the design elements, and considerable mint luster is evident beneath the toning.(#7236)

4425 **1895-O AU53 NGC.** Light blue elements enhance the gray on this AU53 example. Lustrous despite light wear and a dig in the field to the left of Liberty's eye.(#7236)

Attractive AU58 1895-O Morgan Dollar
Quality Strike and Luster

4426 **1895-O AU58 NGC.** Only 450,000 Morgan silver dollars were coined at the New Orleans Mint in 1895. While production values were generally low for this issue, the present coin is an attractive specimen, with only the slightest traces of wear on the high points of the design. The devices are well-detailed for an 1895-O, as the date is noted for its poor strikes. The surfaces are lustrous and free of distractions. Wayne Miller has noted that high-grade AU specimens of this date are often more attractive than Mint State examples.
Ex: Fort Worth Signature (Heritage, 3/2010), lot 1604. (#7236)

1895-O Dollar, Near-Mint Example Still Lustrous and Minimally Abraded

4427 **1895-O AU58 NGC.** Fully lustrous except for a slight break due to a few days in circulation. Both sides have excellent champagne toning with peripheral blue, lilac, and gold toning. The slight high point wear on each side will potentially save the bidder several thousand dollars.
Ex: Houston Signature (Heritage, 12/2008), lot 3146. (#7236)

1895-O Morgan Dollar, AU58 Attractive Higher-Grade Example

4428 **1895-O AU58 PCGS. CAC.** This relatively high-grade example of a key New Orleans issue shows an unusually sharp strike, defined by the hair above Liberty's ear and the feathers on the eagle's breast. The surfaces on both sides are of above-average quality with few abrasions and pleasing pervasive gray-gold toning . (#7236)

4429 **1895-S XF40 NGC.** Light silver-gray surfaces host trivial grade-consistent surface marks. Traces of luster remain with evidence of a prooflike appearance when this piece was minted.(#7238)

4430 **1895-S AU55 PCGS.** A Choice AU specimen of this low-mintage Morgan dollar issue, this coin offers well-detailed design elements and lustrous surfaces, with spots of golden-tan toning and a scattering of minor abrasions on both sides.(#7238)

1895-S Morgan Dollar, AU58 Attractive Low-Mintage Issue

4431 **1895-S AU58 PCGS.** The 1895-S Morgan dollar is a low-mintage issue and Mint State examples are usually seen with excessive bagmarks. A lightly circulated near-Mint examples, like the present coin, can be an attractive alternative to the typical heavily marked Uncirculated example. This coin exhibits just a touch of wear on the well-detailed design elements and retains much original mint luster, with traces of light green and gold patina.
From The Norva Collection. (#7238)

1895-S Silver Dollar, MS64 Semi-Prooflike

4432 **1895-S MS64 PCGS.** The only commonly available 1895-dated Morgan dollar in Mint State, this Choice example is fully brilliant and highly attractive with untoned silver surfaces. The devices of this contrasted specimen are frosty with fully reflective fields, nearly sufficient for a Prooflike designation. (#7238)

4433 **1896 MS65 Deep Mirror Prooflike PCGS.** Delicate blue and gold patina graces this amply reflective Philadelphia Morgan dollar. The obverse is clean save for a shallow graze to the left of Liberty's nose, though reed marks appear between the A in STATES and the G in GOD.(#97241)

1896-O Dollar, Evenly Toned MS62

4434 **1896-O MS62 PCGS. CAC.** The 1896-O issue is highly regarded as a condition rarity among New Orleans dollars. The surfaces of this impressive MS62 example are blanketed in shades of golden-tan and pinkish-gray patina, with some prooflike reflectivity in sheltered areas. The design elements are unusually well-detailed for the issue. (#7242)

1896-O Morgan Dollar, MS63 Scarce New Orleans Issue

4435 **1896-O MS63 PCGS.** A fully lustrous Select Mint State piece, this scarce New Orleans dollar has ivory surfaces with peripheral gold and iridescent toning. The strike is typical for the issue, showing weakness above Liberty's ear. However, the eye appeal is exceptional. PCGS has only certified 29 finer (6/12). (#7242)

4436 **1896-S AU53 NGC.** The 1896-S is surprisingly scarce in XF and better grades despite a mintage only half that of its common Philadelphia cousin. Copious luster fills the borders and devices, and the minimally toned surfaces are only lightly marked for the grade.(#7244)

Gem 1896-S Morgan Dollar
Rare Issue in High Grade

4437 **1896-S MS65 PCGS.** Despite the substantial mintage of 5 million pieces, the 1896-S Morgan dollar is very scarce in Gem condition, and finer examples are almost unobtainable. It is likely that a high percentage of the large mintage was melted under the provisions of the Pittman Act in 1918. Most examples seen in today's market have weak strikes, insipid luster, or excessive bagmarks.

The present coin is a happy exception to the rule, with vibrant mint luster and brilliant surfaces that show only the most insignificant contact marks. The design elements are sharply detailed in almost all areas, with the slightest softness evident on the hair strands above Liberty's ear. Eye appeal is extraordinary. Population: 60 in 65 (3 in 65+), 4 finer (6/12). (#7244)

4438 **1897 MS66 PCGS. CAC.** Extremely radiant cartwheel luster emanates from untoned surfaces that lack any trace of color and seem to cry out for a Prooflike designation. The eye appeal is top-notch. A single mark appears just above the eagle's head. PCGS has seen only 15 finer (6/12).(#7246)

4439 **1897 MS66 PCGS. CAC.** The 1897 Morgan dollar was a well-produced issue, and this delightful Premium Gem is an outstanding example of the popular date, with sharply detailed design elements, vibrant mint luster, and exceptional eye appeal.(#7246)

4440 **1897-O MS62 PCGS.** The creamy surfaces of this attractive MS62 Morgan dollar show surprisingly few contact marks for the grade. The design elements are well-detailed and both sides emit vibrant mint luster.(#7248)

1897-O Silver Dollar, MS63
Conditionally Scarce Issue

4441 **1897-O MS63 NGC.** A conditionally scarce Morgan dollar, the 1897-O is common in circulated grades but rare in Uncirculated condition. The average certified grade is just AU55, with the emphasis on certifying higher grade coins. This Select Mint State specimen has brilliant and frosty silver luster with scattered marks. Both sides are untoned. (#7248)

4442 **1897-S MS66 NGC.** This Premium Gem 1897-S Morgan dollar has brilliant luster with soft, frosty silver surfaces and delicate gold toning that hardly deserves mention. A lovely example for an advanced collector. NGC has only certified 10 finer pieces (6/12). (#7250)

4443 **1898-S MS65 ANACS.** A gorgeous Gem, exhibiting frosty silver luster at the centers, with delightful gold and iridescent-toned peripheries. A typical strike shows slight central weakness. (#7256)

4444 **1900-S MS64 Prooflike PCGS.** Fully mirrored fields contrast nicely with the satiny devices of this brilliant, untoned near-Gem. PCGS has only certified 29 finer Prooflike pieces (6/12). (#7271)

1901 Silver Dollar, MS61
First of the Third Mint

4445 **1901 MS61 NGC.** Nearly 7 million 1901 Morgan dollars were minted in Philadelphia, following the opening of the third Mint building. However, most entered circulation and few have survived in Mint State grades. This piece is weak at the centers, retaining full luster beneath delicate gold and iridescent toning. (#7272)

4446 **1902 MS66 PCGS.** A fully brilliant and lovely Premium Gem, this 1902 dollar has satiny silver surfaces and excellent eye appeal. Only 22 finer are PCGS certified (6/12).(#7278)

4447 **1902 MS66+ PCGS. CAC.** Cartwheel luster on each side complements golden rim toning and superb eye appeal on this MS66+ 1902 Morgan. The surfaces are satiny rather than frosty and appear close to Superb Gem. Population: 8 in 66+, 22 finer (6/12).(#7278)

4448 **1903 MS67 NGC.** A crescent of brilliant gold toning appears at the upper obverse of this otherwise untoned Superb Gem. Both sides have frosty luster and sharp design motifs. Census: 91 in 67, 2 finer (6/12).(#7284)

4449 **1903-O MS66+ PCGS. CAC.** Until it surfaced in the Treasury releases of the 1960s, the 1903-O Morgan dollar was one of the most elusive dates of the series. This high-end Premium Gem offers well-detailed design elements and vibrant mint luster, with unmarked fields that show a few hints of gold toning.(#7286)

1903-O Morgan Dollar, MS67
Famous Treasury Hoard Issue

4450 **1903-O MS67 NGC.** Most of the nearly 5 million coin 1903-O Morgan dollar production was stored at the Treasury until they were finally released into the hands of collectors 60 years later. This Superb Gem is brilliant and untoned with frosty silver luster and exceptional eye appeal. Census: 43 in 67 (1 in 67+), 0 finer (6/12). (#7286)

4451 **1904 MS65 PCGS.** The 1904 Morgan dollar is an underrated, elusive issue in the series, especially in higher grades. This delightful Gem exhibits unusually sharp striking details and vibrant mint luster. The surfaces are completely blanketed in attractive shades of pale green and violet toning. Only 15 coins have been certified finer at PCGS (6/12).(#7290)

4452 **1904-S AU58 PCGS.** The cartwheel luster is essentially intact, but the hair above the ear shows a whisper of friction. A nearly untoned example of this conditionally scarce San Francisco issue. One hair-thin mark is noted on the cheek.(#7294)

1904-S Dollar, MS63
In-Demand, Late-Date Issue

4453 **1904-S MS63 PCGS. CAC.** The 1904-S Morgan dollar is a notable late-series conditional rarity within the series as the higher Mint State grade are approached. Gems are the finest readily obtainable, for a price, even though there are a few finer-graded examples around. This bright Select example offers satiny luster over surfaces that are mostly untoned, although near-imperceptible rose toning deepens around the rim of the obverse. A few scattered, light contact marks account for the grade.
From The Norva Collection. (#7294)

1904-S Dollar, Lightly Toned MS64

4454 **1904-S MS64 NGC. CAC.** The 1904-S is scarce in the better grades of Uncirculated, and especially so in MS64 or better grades. The soft mint frost on this piece is gently covered with pale reddish-golden toning, the strike is strong but not quite complete, and there are minimal abrasions present. (#7294)

4455 **1921-D MS66 PCGS. CAC.** Razor-sharp definition is evident on all design elements, and the lightly marked surfaces exhibit vibrant mint luster, with a few hints of light gold toning. PCGS has certified only five numerically finer examples (6/12).(#7298)

4456 **1921-D MS66 PCGS. CAC.** The 1921-D Morgan dollar will never be rare, but this piece is at the top end of the spectrum aesthetically, with bands of iridescence on each side, saffron, lavender, and emerald predominating. A super example of the only Denver Mint Morgan dollar. PCGS has graded only five submissions numerically finer (6/12).(#7298)

4457 **1921-S MS65+ PCGS.** A high-end Gem representative of the final date of the Morgan dollar design, with sharply detailed design elements and satiny mint luster, under attractive champagne-gold toning. PCGS has graded only 26 numerically finer examples (6/12).(#7300)

PROOF MORGAN DOLLARS

4458 **1880 PR62 PCGS.** The sharply detailed design elements of this proof Morgan dollar contrast boldly with the reflective fields. The surfaces exhibit a few minor contact marks and hairlines, with accents of pale gold toning.(#7315)

1880 Morgan Dollar, PR63
Multicolor Toning

4459 **1880 PR63 PCGS.** The short-lived speculation in Trade dollars in 1880 caused a sharply increased demand for proof sets, and a generous mintage of 1,355 proof Morgan dollars was achieved that year. This sharply detailed Select specimen displays deeply mirrored fields under shades of green, gold, and lavender-gray toning. (#7315)

1880 Morgan Dollar, PR65
Attractive Multicolor Toning

4460 **1880 PR65 PCGS.** Silver proof mintages were generous in 1880, but the Morgan dollar issue is seldom encountered in Gem condition. This delightful Gem is spectacularly toned in shades of gray, gold, and blue, with reflective fields and well-detailed design elements. Population: 42 in 65, 50 finer (5/12). (#7315)

4461 **1886 PR62 PCGS. VAM-15.** The 18 in the date is repunched. Peach-gold toning visits the margins but the remainder of this needle-sharp specimen is brilliant. The motifs are frosty and contrast with the fields, but the reflectivity is a bit diminished, precluding a Cameo designation.(#7321)

Gem Proof 1887 Morgan Dollar
Exceptional Rainbow Toning

4462 **1887 PR65 PCGS.** Any Gem proof Morgan dollar, regardless of date, is a conditional rarity, and the present Gem 1887 is no exception. What is exceptional is the color, deep blue-green patina interspersed in the fields, giving a rainbow effect. The field are also exceptional, profoundly reflective. A top-notch example for a type set or complete run. Population: 27 in 65, 16 finer (6/12). (#7322)

4463 **1899 PR62 PCGS.** The deeply reflective fields of this proof Morgan dollar are enhanced by attractive shades of golden-brown toning. The design elements are well-detailed and frosty. Eye appeal is outstanding.(#7334)

4464 **1900 PR53 NGC.** This piece is a lightly circulated proof, silver-white with a glint of gold color, still highly reflective. Some unfortunate bumps and ticks in the fields and on the high points afflicted it during its short spell in circulation.(#7335)

4465 **1900 — Improperly Cleaned — NGC Details. Proof.** Faint almond-gold toning emerges when this precisely struck proof silver dollar is rotated beneath a light. Field reflectivity is subdued but there are no contact marks or hairline patches.(#7335)

4466 **1900 — Altered Surface — Genuine PCGS. Proof, Unc. Details.** This well struck specimen is void of contact marks but has a subdued appearance. The milky stone-gray toning cedes to almond-gold near the rims. A mere 912 proofs were released.(#7335)

4467 **1900 PR62 PCGS. CAC.** The reflective fields of this attractive proof Morgan dollar are blanketed in shades of champagne-gold toning, with a few minor hairlines that explain the grade. The design elements are sharply detailed throughout and show some light elements of contrast.(#7335)

Near-Gem Proof 1900 Morgan Dollar
Attractive Color

4468 **1900 PR64 NGC. CAC.** A gleaming turn-of-the-century silver dollar proof from a mintage of just 912 pieces, this near-Gem specimen has hints of contrast through distinct patina. Deeper hues such as peach and violet appear at the margins, while the centers are gold-to-gray. A few light hairlines contribute to the grade. (#7335)

1901 Dollar, Dazzling Brilliant PR63

4469 **1901 PR63 NGC. VAM-4.** Both sides of this impressive proof dollar have brilliant surfaces. The fields and devices are both reflective, as usual for this issue; the Mint discouraged production of cameo proofs. Proofs of this date are in demand by type collectors, proof Morgan collectors, and those who otherwise seek business strike coins, due to the rarity of pieces in the latter category. ONE DOLLAR is lightly die-doubled.
Ex: FUN Signature (Heritage, 1/2007), lot 7497; West Palm Beach Signature (Heritage, 7/2009), lot 1045. (#7336)

1901 Dollar, PR64 Cameo
Seldom Found With Contrast

4470 **1901 PR64 Cameo PCGS.** The 1901 is of interest to date collectors because of the scarcity of Uncirculated business strikes. As a result, many collectors over the years have used a proof as a high-grade substitute. This deeply reflective example displays noticeable contrast against the frosted devices. Each side is covered with significant golden-rose and blue toning. Seldom seen with cameo features. Population: 9 in 64 Cameo, 15 finer (6/12). (#87336)

1903 Silver Dollar, PR64
Slightly Contrasted

4471 **1903 PR64 PCGS.** Housed in a first-generation PCGS holder is an attractive near-Gem 1903 proof silver dollar with satiny devices, fully mirrored fields, brilliant centers, and delicate gold peripheries. Slight contrast is visible between the fields and devices, although that contrast is insufficient for a Cameo designation. (#7338)

1904 Cameo Dollar, PR65
The Finest Cameo Certified by PCGS

4472 **1904 PR65 Cameo PCGS. CAC.** It has been quite some time since we have offered a high-grade Cameo 1904 (January 2009, actually). These pieces were not intentionally produced with contrast, it was just a matter of chance and the use of new dies that accounts for the few that do exist. The fields on this piece are remarkably deep, making even the slightest frost on the devices seem significant. Each side is mostly brilliant with only light peripheral toning present. Population: 1 in 65 Cameo, 0 finer (6/12). (#87339)

PEACE DOLLARS

4473 **1921 MS64+ PCGS. CAC. VAM-1F.** The dies for this VAM were used to strike matte proofs, though the present near-Gem is a business strike with expected moderate incompleteness at the centers. Lustrous with faint tan toning and a few delicate obverse abrasions.(#7356)

4474 **1921 MS65 NGC.** Delicate straw-gold and gunmetal-blue patina graces lustrous and beautifully preserved surfaces. One hair-thin line above the jaw denies an even finer grade. The strike is good for the high relief issue despite blending at the centers.(#7356)

4475 **1921 MS65 PCGS. CAC.** This first-year Peace dollar has typically soft high detail but generous luster through the fields. Broadly silver surfaces show a partial pale peach overtone. A single dig to the left of Liberty's nose is grade-consistent.(#7356)

4476 **1921 MS65 PCGS. CAC. VAM-1F.** A business strike from the dies that previously coined matte proofs. Butter-gold toning illuminates much of this lustrous and beautifully toned high relief Peace dollar. Smooth aside from delicate grazes on the left obverse field. Housed in a first generation holder.(#7356)

1923 Silver Dollar, MS67
Seldom Equaled, Never Exceeded

4477 **1923 MS67 NGC.** The 1923 Peace dollar issue saw a sizable mintage of more than 30 million coins but few of those have survived in similar quality to this Superb Gem. Both sides are brilliant and untoned with frosty surfaces and intense silver luster. No finer pieces have been certified. Census: 88 in 67, 0 finer (6/12). (#7360)

4478 **1923 Whisker Jaw MS66 NGC. CAC. VAM-1A.** A Top 50 Variety. This sharply detailed Premium Gem shows the die defect on Liberty's jaw that identifies the VAM-1A variety. The pleasing surfaces are lightly toned in shades of pale gold, with vibrant mint luster and strong eye appeal.

4479 **1923-D MS65 NGC.** Deep slate-blue, lavender, and rose-gray shadings are dappled across each side of this Gem. Soft cartwheel luster filters through the toning.
From The Color Collection.(#7361)

4480 **1924-S MS64 PCGS.** A light patina of champagne-gold and ice-blue hues blankets the lightly marked surfaces of this attractive Choice Peace dollar. The design elements are well-detailed and satiny mint luster shines through the toning.
From The Color Collection.(#7364)

4481 **1924-S MS64+ PCGS. CAC.** Cartwheel luster is unusual on a Peace dollar, but this example has it to spare, amid delicate gold and copper tones tinged with ice-blue. Gem examples of the 1924-S are far rarer — and far more expensive, making this a coin that bears serious consideration. Population: 35 in 64+, 77 finer (6/12). (#7364)

4482 **1925 MS66 PCGS. CAC.** Certified in an old green-label holder, this Premium Gem 1925 Peace dollar would fit well in a top-notch type or complete set. Generous cartwheel luster radiates from each side, with silvery surfaces lightly tinged with gold. A super coin for the grade.
From The Old Holder Collection.(#7365)

4483 **1925-S MS64+ PCGS.** This attractive high-end Choice specimen displays well-detailed design elements, with just a touch of softness on Liberty's hair. The lustrous surfaces are blanketed in shades of light gold toning, with specks of amber.(#7366)

4484 **1925-S MS64 PCGS. CAC.** Light to medium chestnut-gold toning adorns this nicely struck and lustrous scarcer date near-Gem. The obverse is remarkably unabraded, and the reverse displays only minor marks. Certified in a green label holder.(#7366)

4485 **1927 MS65 NGC.** Generous gold-to-peach patina graces a medium-gray base. Though softly struck, this broadly lustrous Gem is impressively preserved. NGC has graded just two examples as MS66 or finer (6/12).(#7370)

4486 **1927 MS65 ANACS.** The obverse has deep violet toning with gold influences through the fields with silver on the portrait. The reverse offers lighter coloration with yellow-orange interior aspects and dashes of blue along the margins. High eye appeal.(#7370)

4487 **1927-S MS64+ PCGS.** This high-end Choice Peace dollar displays a few hints of pale gold toning on lustrous surfaces that show few abrasions. A graze below Liberty's eye is the greatest obstacle to the next grade.(#7372)

4488 **1927-S MS64 NGC. CAC.** Generous luster shimmers through delicate patina with gold and blue elements strongest. A well-struck near-Gem that shows a small brilliant area between the letter I of LIBERTY and the edge of the portrait's hair.(#7372)

4489 **1927-S MS64 PCGS. CAC.** Canary-gold toning graces this sharply struck and lustrous silver dollar. Nicer than some MS65 examples seen by the present cataloger. The leaves near the claw are die doubled, although VAMworld.com diagnostics are insufficient to definitively attribute between VAM-5 and the Top 50 VAM-3.(#7372)

4490 **1928 MS64 PCGS.** The 1928 Peace dollar is a sought-after low-mintage issue. This well-detailed Choice example offers vibrant mint luster and just a touch of pale gold toning. Housed in a green label holder.
From The Old Holder Collection.(#7373)

4491 **1928 MS64 NGC.** The overtone of this luminous near-Gem is pale yellow on the obverse with a richer gold hue to the reverse. Only a few places of coin-to-coin contact are visible on the lower portrait.(#7373)

4492 **1928 MS64 PCGS. CAC.** The popular low-mintage issue in a familiar grade. Pale blue and gold tints enhance strong silver luster. An abrasion like an extra ray between the E and R of LIBERTY contributes to the grade.(#7373)

4493 **1928 MS64+ PCGS. CAC.** A gorgeous example on the cusp of a considerably scarcer and pricier grade. Rich gold and paler sky-blue tints grace amply lustrous surfaces with just a few too many marks for the next designation.(#7373)

Frosty Gem 1928 Silver Dollar

4494 **1928 MS65 PCGS.** Delicate tan-gold and steel-blue toning visits this thoroughly lustrous and nicely struck Gem. The obverse is remarkably void of contact and the reverse has only unimportant abrasions. The 1928 has less than half the mintage of any other Peace dollar issue. Encapsulated in an older generation PCGS holder. (#7373)

4495 **1928-S MS64+ NGC. CAC.** The obverse is die doubled on TRVST and the designer's monogram, but this is not the Hot 50 VAM-3. Apricot-gold and ice-blue adorn lustrous and exceptionally clean surfaces. Since MS65 examples are practically non-collectible, the present piece is a cost-effective alternative with nearly the same quality.(#7374)

1928-S Peace Dollar, MS65
One of the Undisputed Series Keys

4496 **1928-S MS65 PCGS. CAC.** The 1928-S Peace dollar is one of a handful of S-mint issues — also including the 1925-S and 1924-S — that are the true keys to the series in Gem or finer, with Peace dollar researcher Roger Burdette pegging the 1928-S at #1 in the MS65 grade and #2 in MS66 (behind the 1925-S).

This Gem 1928-S is housed in a PCGS first-generation holder, a nice, original coin. The original mint brilliance is tempered by light, faintly speckled golden-lilac patina that is slightly deeper around the obverse margin. The strike is sharp if not quite full, but certainly better than most examples of this poorly struck issue. Light contact appears on the high point of Liberty's cheek, only visible with a loupe because of the toning. Population: 47 in 65 (1 in 65+), 1 finer (6/12). (#7374)

4497 **1934 MS65 PCGS. CAC.** Medium olive-gold toning enriches both sides of this lustrous and precisely struck Gem. A magnificently preserved example of this later and low mintage Philadelphia issue. Certified in a first generation holder.(#7375)

4498 **1934-D MS65 PCGS.** Shades of greenish-gold, peach, and lavender toning highlight the well-preserved surfaces of this impressive Gem, with vibrant mint luster and terrific eye appeal.
From The Color Collection.(#7376)

Beautiful MS66+ 1934-D Dollar
Doubled Die Obverse, VAM-3

4499 **1934-D MS66+ PCGS. CAC. VAM-3.** A Top 50 Variety. Liberty's profile and GOD WE are clearly die doubled. The Medium D mintmark distinguishes VAM-3 from VAM-4, which has a Small D. Of course, any MS66+ 1934-D dollar is desirable, since the typical certified example of the low mintage issue grades only MS63. Precisely struck and lustrous with a whisper of gold toning. (#7376)

4500 **1934-S MS61 NGC.** Pleasingly detailed for this issue of just over a million pieces. Gold-orange and blue-gray overtones saturate much of each side, while dots of deeper patina appear in places along the margins.(#7377)

Near Gem 1934-S Peace Dollar
Low-Mintage Key

4501 **1934-S MS64 PCGS. CAC.** The 1934-S Peace dollar boasts a fairly low mintage of just over 1 million pieces, and the issue is one of the keys to the series. This attractive Choice specimen, displays sharply detailed design elements, vibrant mint luster, and brilliant surfaces, with a few hints of golden-tan toning. Housed in an old green label holder. (#7377)

1934-S Peace Dollar, MS65
Extraordinary Surface Preservation

4502 **1934-S MS65 PCGS. CAC.** The 1934-S retains its position as the key to the Peace dollar series, even though other issues are now recognized as strike rarities and some are rarer in high grades. This piece is remarkably clean on each side. The surfaces are completely brilliant and heavily frosted. Clearly suggestive of an even higher grade. (#7377)

1935 Silver Dollar, MS66
Tied for Finest at PCGS

4503 **1935 MS66 PCGS. CAC.** An amazing Premium Gem, this 1935 Peace dollar exhibits soft satiny surfaces with full mint brilliance. Both sides have delicate iridescent toning along parts of the borders, with the centers showing bright, untoned silver luster. PCGS has never certified a finer example (6/12). (#7378)

PROOF SUSAN B. ANTHONY DOLLARS

4504 **1981-S Type Two PR70 Deep Cameo PCGS.** An incredible perfect Deep Cameo proof with sensational contrast. This piece is far more elusive than its Type One counterpart, a prize for the advanced collector. Population: 94 in 70 Deep Cameo (6/12). (#99595)

4505 **1981-S Type Two PR70 Deep Cameo PCGS.** This perfect Deep Cameo proof has exceptional contrast between the frosty devices and deeply mirrored fields. A remarkable example for the advanced registry collector. Population: 94 in 70 Deep Cameo (6/12). (#99595)

4506 **1981-S Type Two PR70 Deep Cameo PCGS.** Attractive light gold toning is evident on each side of this perfect Deep Cameo proof. Population: 94 in 70 Deep Cameo (6/12).(#99595)

COMMEMORATIVE SILVER

1893 Isabella Quarter, MS66
Originally Toned With Cartwheel Luster

4507 **1893 Isabella Quarter MS66 PCGS. CAC.** "Cartwheel luster" is not a phrase one usually associates with Isabella quarters, but this Premium Gem offers it in spades, over olive-aqua centers deepening to lilac hues near the rim. Both sides of this love, originally toned coin are virtually mark-free, even under a loupe. (#9220)

4508 **1900 Lafayette Dollar MS62 PCGS. DuVall 2-C.** The second S in STATES is sharply repunched. Deep dove-gray and golden-brown toning blankets this satiny and well struck example. The obverse is surprisingly unabraded, and the reverse displays only infrequent moderate marks.(#9222)

4509 **1900 Lafayette Dollar MS63 PCGS. DuVall 1-B.** The most often encountered die pair identified by the point of a leaf between the 19 in the date. Nicely struck and highly lustrous with peripheral sun-gold toning and minimal marks for the MS63 level.(#9222)

4510 **1900 Lafayette Dollar MS63 PCGS. DuVall 1-B.** Rich gunmetal-gray, powder-blue, and walnut-brown toning embraces this coruscating and boldly struck silver dollar. An unmarked example of this popular early type. Encased in a first generation holder. (#9222)

4511 **1900 Lafayette Dollar MS63 NGC. DuVall 1-B.** Deeply blended golden-brown and forest-green toning is consistent across both sides of this satiny and sharply struck Select commemorative. Marks are surprisingly absent aside from a pair of faint lines above the center of the pedestal.(#9222)

1900 Lafayette Dollar, MS64
Lustrous Brilliant Surfaces

4512 **1900 Lafayette Dollar MS64 PCGS. DuVall 1-B.** The 1900 Lafayette dollar is the only dollar coin from the classic silver commemorative series, with a distribution figure of 36,026 pieces. This impressive Choice example is sharply detailed throughout, with vibrant mint luster and just a few minor contact marks on both sides. (#9222)

Choice 1900 Lafayette Dollar

4513 **1900 Lafayette Dollar MS64 PCGS. DuVall 2-C.** This precisely struck gunmetal-gray near-Gem has satin luster and is void of abrasions aside from a slender horizontal mark on Washington's jaw. All Lafayette dollars were struck on a single day; the exact centennial of Washington's death. Although 50,000 pieces were struck, 14,000 pieces were melted by the Mint in 1945, decades after initial issue. (#9222)

4514 **1921 Alabama 2x2 MS65 PCGS. CAC.** This sharply detailed Gem displays vibrant mint luster and attractive shades of champagne-gold and ice-blue toning, with exceptional eye appeal. Housed in a green label holder.
From The Old Holder Collection.(#9225)

4515 **1937 Antietam MS67 NGC. CAC.** Wisps of attractive champagne-gold toning visit the surfaces of this sharply detailed Superb Gem commemorative. Vibrant mint luster adds to the tremendous eye appeal.(#9229)

4516 **1925-S California MS66 PCGS.** Traces of violet-blue, greenish-gold, and amber toning highlight the lustrous surfaces of this sharply detailed Premium Gem. Overall eye appeal is quite strong. (#9281)

4517 **1925-S California MS66 NGC.** A California Premium Gem that has bold luster on each side. The well-defined obverse boasts multicolor patina heavy on the reds and yellows, while the reverse has mild champagne and silver-gray hues.
From The Color Collection.(#9281)

4518 **1925-S California MS67 NGC.** Lovely golden-brown, apple-green, and plum-mauve adorn the peripheries of this lustrous and precisely struck Superb Gem. The reverse appears immaculate, and the obverse field has only the faintest grazes. NGC has certified eight numerically finer coins (6/12).
From The Color Collection.(#9281)

4519 **1892 Columbian MS66 PCGS. CAC.** It is fitting that the discoverer of the Americas, Christopher Columbus, should also be depicted at the beginning of the commemorative half dollar series, along with his sponsor, Queen Isabella of Spain, on the quarter of the same era. This Premium Half Columbian half shows bright silver centers with rim toning in russet and ocean-blue, a beautiful coin for the grade.(#9296)

4520 **1922 Grant No Star MS66 NGC.** This spectacular Premium Gem exhibits well-detailed design elements and vibrant mint luster, under shades of golden-brown and violet toning. NGC has graded only 22 numerically finer specimens (6/12).(#9306)

4521 **1922 Grant No Star MS66 NGC. CAC.** The surfaces of this delightful Premium Gem are blanketed in spectacular shades of greenish-gold, blue, and gray patina. The design elements are sharply rendered and vibrant mint luster shines through the toning on both sides.(#9306)

4522 **1922 Grant With Star MS64 PCGS.** This satiny and well struck Choice commemorative exhibits medium caramel-gold toning. A loupe fails to locate any marks. The low mintage Grant variety with an incuse star on the right obverse field. Unlike the preceding Missouri and Alabama types, the star had no significance other than creating a low mintage alternative.(#9307)

4523 **1922 Grant With Star MS64 PCGS.** The usual satin appearance is the result of die polish in the fields of this scarce commemorative variety. Both sides have medium gold toning with splashes of deep blue.(#9307)

4524 **1928 Hawaiian — Improperly Cleaned — NGC Details. Unc.** This well struck representative displays shimmering cartwheel luster and medium lavender and olive-gray toning. Marks are few and of no importance. Although designated as cleaned, most collectors would be pleased to own the present example of the key silver commemorative type.(#9309)

4525 **1928 Hawaiian — Improperly Cleaned — NGC Details. Unc.** The peach-gold centers are bounded by peripheral cream-gray. This key type commemorative is void of hairlines but the luster is a bit subdued and the coin has a slightly glossy appearance. One brief thin mark on the cheek.(#9309)

4526 **1928 Hawaiian MS62 PCGS.** Sharply struck but the untoned surfaces are a bit too lackluster for a higher grade.(#9309)

Select 1928 Hawaiian Half
Key to the Silver Series

4527 **1928 Hawaiian MS63 PCGS.** The surfaces overall are still silver-white, but the obverse of this Select Hawaiian half show a portion covered in light grayish patina on the right side, with scattered charcoal flecks on the left side. A few small contact marks appear under a loupe, which combined with the somewhat subdued luster account for the grade. (#9309)

Lustrous Gem 1928 Hawaiian Half
Pristine Surface Preservation

4528 **1928 Hawaiian MS65 PCGS.** Gem Hawaiian halves are available for a price in today's numismatic marketplace, but as one of the true keys to a complete silver commemorative set, they are eagerly snatched up, and anything higher-graded is both much more expensive and much more elusive. This Gem shows much luster emanating from lightly toned surfaces, gray and gold with pinkish accents. A loupe reveals the excellent surface preservation required to attain this grade level. PCGS has seen only 77 submissions finer — and CoinFacts shows a price more than double that of an MS65 for an MS66 (6/12). (#9309)

4529 **1935 Hudson MS63 PCGS.** Shades of lavender and champagne-gold toning highlight the surfaces of this well-detailed Select specimen, with vibrant mint luster and strong visual appeal. Housed in a green label holder.
From The Old Holder Collection.(#9312)

4530 **1935 Hudson MS64 PCGS.** Delicate red-gold and lavender toning overlies brightly lustrous fields and sharply detailed devices. The coin's eye appeal is extraordinary. One of the keys to the classic commemorative series.(#9312)

4531 **1935 Hudson MS64 PCGS. CAC.** Thick gray-rose toning covers each side of this highly lustrous commem. Close examination reveals the expected abrasions on Neptune, but there are almost none elsewhere.(#9312)

4532 **1935 Hudson MS65 PCGS. CAC.** Absolutely splendid, sparkling mint frost is fully evident over each side of this undisputed Gem. Most of each side is brilliant still, but there are significant areas, especially around the margin of the obverse, that show deep, speckled toning, it appears from tab toning from a holder of issue. (#9312)

4533 **1935 Hudson MS66 PCGS.** The 1935 Hudson half dollar is one of the keys to the silver commemorative series. This well-detailed Premium Gem displays vibrant mint luster and attractive gold and ice-blue patina. PCGS has graded only seven coins in higher numeric grades (5/12).(#9312)

MS67 1936 Long Island Half
Delicately Toned, Three Finer at NGC

4534 **1936 Long Island MS67 NGC.** The centers are mostly untoned or else steel-gray with a slight suggestion of pink on this Superb Gem, but the rims on the obverse show accents of deep amber and cherry sprinkled about. The reverse shows similar rim toning with delicate sage and ice-blue entering the fray. Thorough luster and pristine preservation make this piece highly appealing. Census: 56 in 67, 3 finer (6/12). (#9322)

4535 **1936 Lynchburg MS67 NGC.** The soft, frosted mint luster appears at first glance to be untoned, but close examination reveals a wealth of subtle undertones of color. Exceptionally clean surfaces. (#9324)

4536 **1921 Missouri 2x4 MS64 PCGS.** An amazing near-Gem example of the 2X4 variant, this Missouri half dollar has brilliant silver surfaces without toning. The upper reverse is a trifle weak as usual. (#9331)

4537 **1923-S Monroe MS65 PCGS. CAC.** Warmly lustrous under dappled silver-blue, gold-gray, and reddish-orange toning. This Monroe Doctrine Gem has understated but undeniable eye appeal. (#9333)

1923-S Monroe Half Dollar, MS66
Rarely Found in High Grades

4538 **1923-S Monroe MS66 PCGS.** In lower grades, the Monroe half dollar is plentiful, but in grades better than MS65, it is a major condition rarity as evidenced by the PCGS population data. This Premium Gem has frosty luster beneath splashes of iridescent toning. Population: 54 in 66 (1 in 66+), 5 finer (5/12).
Ex: Dallas Signature (Heritage, 10/2008), lot 1681. (#9333)

4539 **1938 New Rochelle MS67 NGC. CAC.** Reflective fields are noted on this satin Superb-Gem with gold and iridescent toning at the obverse border and over much of the reverse. An important commemorative issue that is seldom seen so fine.(#9335)

Superb Gem 1938 New Rochelle Half Dollar
Spectacular Prooflike Surfaces

4540 **1938 New Rochelle MS67 Prooflike NGC. CAC.** The 1938 New Rochelle half dollar claims a distribution figure of 15,266 pieces, and examples with prooflike surfaces are quite elusive. This spectacular Superb Gem is sharply detailed throughout, with pristine deeply reflective surfaces. Eye appeal is extraordinary. Census: 15 in 67 Prooflike, 1 in 67+ Prooflike, 1 finer (5/12). (#89335)

4541 **1936 Norfolk MS68 PCGS.** A wisp of olive-gold patina visits this otherwise brilliant half dollar. Precisely struck and pristine save for trivial contact west of the ship. The Norfolk has the most verbose legends of the series. Certified in a green label holder.(#9337)

4542 **1925 Norse Thick Planchet MS66 PCGS.** This piece is well-struck with bright satiny luster, some small green toning spots on the reverse, and just two or three tiny contact marks on each side of the piece. Tied for finest certified at PCGS.
Ex: Long Beach Signature (Heritage, 1/2004), lot 6595. (#9450)

4543 **1925 Norse Thick Planchet MS66 NGC. CAC.** The 1925 Norse American issue is technically a medal, but it has traditionally been included in the commemorative series. The present offering is a Thick Planchet Premium Gem, with sharply detailed devices, satiny mint luster, and accents of golden-brown toning. Census: 26 in 66, 2 finer (6/12).(#9450)

4544 **1925 Norse Thick Planchet MS66 PCGS. CAC.** Although technically medals lacking any denomination, the Norse pieces are traditionally collected alongside the silver commemorative halves (and Isabella quarter and Lafayette dollar to make a complete set). This shimmering Premium Gem displays pleasing surfaces and a sharp strike. Each side presents a fully brilliant appearance. Population: 33 in 66, 0 finer (6/12).
Ex: Palm Beach Signature (Heritage, 3/2005), lot 6575.(#9450)

4545 **1925 Norse Thick Planchet MS66 PCGS. CAC.** This high-grade Norse is untoned and exhibits bright, satiny mint luster. The surfaces are virtually unmarked and well deserving the CAC endorsement.(#9450)

4546 **1936-S Oregon MS66 PCGS. CAC Gold Label.** This fully struck Premium Gem is satiny and pristine with medium lime-green and tan-gold toning. The Gold CAC seal remains very scarce after a few years of operation. Encapsulated in an old green label holder. (#9346)

4547 **1938 Oregon MS67+ PCGS.** Ex: Guttag Family. Only four finer 1938 Oregon half dollars are certified. This frosty and fully lustrous specimen has wispy gold toning over brilliant silver surfaces. Population: 77 in 67 (6 in 67+), 2 finer (6/12).(#9348)

4548 **1938 Oregon MS67 PCGS. CAC.** This piece is close to immaculate, with pastel olive-green and sky-blue toning. A small ejection shelf of extra metal shows on the back of the oxen, as struck and scarcely noticeable. Population: 77 in 67 (6 in 67+), 2 finer (6/12).(#9348)

4549 **1939 Oregon MS67 PCGS. CAC.** This final-year Oregon half is brightly lustrous and each side displays light golden toning. Superb quality. Population: 82 in 67 (1 in 67+), 4 finer (6/12).(#9352)

4550 **1939 Oregon Set PCGS. CAC.** Ex: Guttag Family. The low mintage set includes: **1939 MS66+ CAC,** well struck and pristine with autumn-gold tab toning on the reverse; **1939-D MS66 CAC Gold Label,** lavender and green-gray patina, immaculate, some softness of strike on the back of the wagon; and a **1939-S MS66 CAC,** intricately struck, splendidly preserved, cream-gray toning.
Ex: Chicago ANA (Stack's Bowers, 8/2011), lot 8561.(#9355)

Delicately Toned Premium Gem 1915-S Panama-Pacific Half Dollar

4551 **1915-S Panama-Pacific MS66 PCGS.** Glimpses of peach patina visit the margins of this Panama-Pacific half dollar, the first commemorative of the familiar size struck in the 20th century. The luster is largely silver elsewhere with a hint of pastel-yellow, softly swirling save for a touch of flash at the right reverse. PCGS has graded 81 examples as MS67 or better (5/12). (#9357)

MS66 1915-S Pan-Pac Half Satiny Toned Surfaces

4552 **1915-S Panama-Pacific MS66 PCGS. CAC.** Pink, sage, and aqua-olive hues compete for territory on this Premium Gem 1915-S Pan-Pac half dollar, with considerable luster apparent despite the moderately intense coloration. The surfaces show a typical satiny appearance, and a loupe reveals few marks other than a tiny tick on one of the cherub's buttocks. The softness on the eagle feathers on the reverse is a universal design flaw rather than strike weakness. (#9357)

4553 **1920 Pilgrim MS66 PCGS. CAC.** From pale gold to richer peach, blue, and violet hues, this Premium Gem Pilgrim half has gorgeous color over ample luster. A well-preserved piece with quality detail. (#9359)

4554 **1920 Pilgrim MS66+ PCGS. CAC.** Attractively toned in shades of champagne-gold and lavender, this high-end Premium Gem is sharply detailed throughout, with vibrant mint luster shining through the patina. PCGS has graded 36 numerically finer examples (6/12).(#9359)

4555 **1936-D Rhode Island MS67 NGC. CAC.** Subtle but thorough cartwheel luster complements satiny surfaces, pinkish-gold in the centers with pastel shades of ice-blue and jade near the rims. A loupe reveals no mentionable contact.(#9364)

4556 **1937 Roanoke MS66 Prooflike NGC. CAC.** Each side is completely brilliant and the fields show confirmed brightness and reflectivity, this effect was created by die polishing, the effects of which can be seen as swirling die polish lines. Virtually unmarked on each side.(#89367)

4557 **1935-S San Diego MS67 PCGS. CAC.** An amazing ivory toned Superb Gem with splashes of gold and violet at the rims, this piece has a sharp strike compared to most survivors. PCGS has only certified three finer examples (6/12).(#9371)

4558 **1936-D San Diego MS67 PCGS.** This spectacular 1936-D San Diego half dollar is among the finest examples certified at PCGS. The devices are well-detailed and the pristine surfaces are toned in mellow shades of gold and blue. Population: 74 in 67 (2 in 67+), 0 finer (5/12).(#9372)

4559 **1935 Spanish Trail MS65 PCGS.** This darkly toned Gem displays sharply detailed design elements and satiny mint luster, under shades of gray, gold, and amber toning. Holdered with the obverse in back.(#9376)

4560 **1935 Spanish Trail MS65 PCGS. CAC.** Brightly lustrous surfaces that are essentially silver-white show overtones of pale gold in some areas. The design elements are well-defined with a trio of small luster grazes in the space to the right of the word LIBERTY. Housed in a green label holder.
Ex: Central States Signature (Heritage, 4/2010), lot 1504.
From The Old Holder Collection.(#9376)

4561 **1935 Spanish Trail MS65 PCGS. CAC.** The Spanish Trail half dollar is always in demand, and sharply detailed Gems, like the present coin, are prized by commemorative enthusiasts. This exceptional piece displays vibrant mint luster on both sides, with a few hints of light gold toning.(#9376)

4562 **1935 Spanish Trail MS65+ PCGS. CAC.** Hazy gray patina covers each side of this exceptionally clean Spanish Trail. The only surface defects are a couple of minute specks of carbon on each side. (#9376)

4563 **1935 Spanish Trail MS66 PCGS. CAC.** The Spanish Trail half dollar is a key to the silver commemorative series, from a distribution of 10,008 pieces. This spectacular Premium Gem is sharply detailed and lustrous, with attractive accents of light gold toning.(#9376)

4564 **1934 Texas MS67 PCGS. CAC.** The 1934 Texas half dollar is seldom encountered in Superb Gem condition. This magnificent specimen is sharply detailed and lustrous, with a few hints of greenish-gold and pink patina. Population: 45 in 67 (1 in 67+), 2 finer (6/12).(#9381)

Superb Gem 1938 Texas Half Dollar
Only One Numerically Finer PCGS Coin

4565 **1938 Texas MS67 PCGS. CAC.** Ex: Guttag Family. From a low distribution figure of 3,780 pieces, the 1938 Texas commemorative half dollar is seldom encountered at the Superb Gem level. This spectacular piece is sharply detailed and lustrous, with a few hints of greenish-gold toning at the rims. Population: 38 in 67 (1 in 67+), 1 finer (6/12). (#9394)

4566 **1925 Vancouver MS65 PCGS. CAC. Doubled Die Obverse, FS-102.** Although not pronounced, evidence of doubling can be detected on 1925 and WE TRUST. This sharply detailed Gem exhibits vibrant mint luster and a few accents of gold and blue toning.
From The Color Collection.(#9399)

4567 **1925 Vancouver MS66 PCGS.** Original ocean-blue, tan, and slate-gray blend throughout this splendidly toned and satiny Premium Gem. A sharply struck example of this better commemorative type. Encapsulated in an old green label holder.
Ex: Milwaukee ANA (Heritage, 8/2007), lot 1316, which realized $1,495.(#9399)

4568 **1925 Vancouver MS66 NGC. CAC.** The 1925 Vancouver half dollar claims a distribution of 14,994 pieces and the issue is very scarce above the Premium Gem level. This impressive specimen offers sharply detailed design elements, vibrant mint luster, and attractive shades of medium-intensity gold and blue toning.
From The Old Holder Collection.(#9399)

4569 **1927 Vermont MS66 NGC. CAC.** Despite their uncommonly high relief, Vermont halves are usually well struck, as is the present Premium Gem. This lustrous high grade piece displays vibrant luster and a blanket of olive-green and rose-gold toning. Certified in a former generation holder.(#9401)

4570 **1927 Vermont MS66 NGC. CAC.** The obverse has evenly distributed champagne and gold toning over satiny silver luster, while the reverse has splashes of similar gold toning.(#9401)

4571 **1946 Booker T. Washington MS67 NGC.** Richly toned with green-gold and violet elements that yield to small windows of silver-blue. This Superb Gem has a degree of the usual planchet roughness on Washington's jaw.(#9404)

4572 **1946 Booker T. Washington MS67 PCGS. CAC.** This spectacular Superb Gem is one of the finest survivors of this widely collected issue, with sharply detailed design elements, vibrant mint luster, and shades of golden-brown and lavender-gray patina. Population: 48 in 67 (3 in 67+), 1 finer (5/12).(#9404)

4573 **1947-S Booker T. Washington MS67 NGC.** An amazing Superb Gem, tied for the finest certified, exhibiting pinkish-gold toning on the obverse, with delicate champagne on the reverse. Both sides have frosty luster shining through the toning. Census: 18 in 67 (1 in 67+), 0 finer (6/12).(#9410)

4574 **1951 Washington-Carver MS66+ PCGS. CAC.** This impressive high-end Premium Gem is among the finest seen at PCGS. The design elements are well-detailed and the lustrous surfaces are highlighted by shades of violet, gold, and lavender toning. Population: 53 in 66 (4 in 66+), 0 finer (5/12).(#9430)

4575 **1936 Wisconsin MS67+ PCGS. CAC.** An amazing Superb Gem, this Wisconsin half dollar has lovely champagne, gold, and iridescent toning over frosty silver luster, with bold design motifs. PCGS has only certified 25 finer (6/12).(#9447)

COMMEMORATIVE GOLD

4576 **1903 Louisiana Purchase/Jefferson MS65 PCGS.** A sharply struck and nearly mark-free Gem with light apricot-gold toning and one tiny spot near the E in UNITED. The first appearance of Jefferson on a U.S. coin, though he had previously appeared on many issues of Federal currency.(#7443)

1903 Louisiana Purchase/McKinley Gold Dollar
Seemingly Flawless MS67 Example

4577 **1903 Louisiana Purchase/McKinley MS67 NGC.** The detail on McKinley's portrait is uncommonly sharp, with subtle frostiness adding to the effect. Each side shows slight variation in the color, with straw, wheat, and canary-gold shadings. The surfaces are smooth and undisturbed, as demanded of the grade. NGC has graded just three numerically finer pieces (5/12).
Ex: Central States Signature (Heritage, 4-5/2009), lot 3426. (#7444)

4578 **1904 Lewis and Clark MS61 NGC.** This lower Mint State Lewis and Clark might provide a nice entry point for budget-minded collectors, as strong eye appeal remains. The orange-gold color is attractive, and it takes a loupe to see the grade-determining light field chatter and minor slide marks on the cheek on each side. There are no overt marks.(#7447)

4579 **1915-S Panama-Pacific Quarter Eagle AU55 PCGS.** Light circulation wear shows on the high points of Columbia's knee, breast, and head and the hippocampus' head, and the high points of the eagle on the reverse, but most of the mint luster is intact over orange-gold surfaces. This piece was likely carried for a short while as a pocket piece rather than seeing actual circulation, as there are minimal abrasions.(#7450)

MS66 1915-S Pan-Pac Quarter Eagle
Excellent Eye Appeal

4580 **1915-S Panama-Pacific Quarter Eagle MS66 NGC.** The yellow-gold surfaces on this Premium Gem show excellent eye appeal amid the typical swirling die polishing lines that usually appear on the issue. There are few mentionable signs of contact even under a loupe, and the small patch of hazy gray in the right reverse field is not overly bothersome. (#7450)

4581 **1916 McKinley MS65 NGC.** The surfaces have an original "crusty gold" look on this Gem 1916 McKinley, orange-gold with hints of green near the rims and subtle, thorough luster.(#7454)

Superb Gem 1922 Grant No Star Dollar
Rich Coloration

4582 **1922 Grant No Star MS67 NGC.** General Grant's cheek is the exposed high point of this tiny gold dollar, and here it is remarkably free of abrasions, the singularly most important criterion for membership in this exclusive Superb Gem grade. The orange-gold coloration and excellent luster are pluses.
Ex: Baltimore Signature (Heritage, 3/2009), lot 1811. (#7458)

4583 **1922 Grant With Star MS64 PCGS.** A satiny peach-gold Choice example with exceptionally smooth surfaces. The strike is crisp aside from unavoidable incompleteness on the tree trunk left of the window. Encapsulated in an old green label holder.(#7459)

4584 **1926 Sesquicentennial MS64 NGC.** A few trivial marks are noted on each side of this brilliant and sharply struck near-Gem with a small splash of blue toning on the reverse.(#7466)

PROOF COMMEMORATIVE GOLD

1903 PR65 Cameo McKinley Gold Dollar
Only 100 Proofs Struck

4585 **1903 McKinley PR65 Cameo NGC.** The Louisiana Purchase-McKinley and Jefferson Mint State coins were struck to the extent of 125,000 coins, of which 17,500 of each were issued after their promotion turned out to be a failure. But the proof gold dollars are a vastly different story, with only 100 examples of each struck. This gleaming Gem shows much more field-device contrast than a "circulation strike" would display, setting up the desirable gold-on-black effect. The squared-off dentils, high rims, and full strike on all details — especially McKinley's hair — characterize this piece as an unquestioned proof. Even so, die lapping has removed a bit of detail on the bowtie, at the juncture of the hair and collar at the back of the head, and where the shoulder joins the rim. A couple of thin scrapes on the reverse determine the grade. A tiny, elongated planchet depression below the R in PURCHASE is as made. An interesting and delightful coin. Census: 2 in 65 Cameo, 4 finer (5/12). (#87483)

MODERN ISSUE

2000-W Library of Congress Bimetallic Eagle MS70, A Key to the Modern Gold Set

4586 **2000-W Library of Congress Bimetallic Ten Dollars MS70 PCGS.** The first bimetallic (gold-platinum) U.S. Mint issue, the 2000-W Library of Congress ten dollar coins were struck in proof and "circulation strike" format, but the low-mintage business strikes, at 7,261 distributed, were the long-term winner in high grades — far more so than the proofs, at 27,445 coins. This business strike is essentially perfect, as the grade implies. One of the keys to a modern set of gold commemoratives. (#9784)

MODERN BULLION COINS

4587 **1987-S Silver Eagle PR70 Deep Cameo PCGS.** A fully brilliant Deep Cameo proof, this perfect PR70 example has sensational contrast between its deeply mirrored fields and frosty devices. (#9809)

1995-W Silver Eagle, PR68 Deep Cameo Key to the Series

4588 **1995-W Silver Eagle PR68 Deep Cameo PCGS.** The 1995-W is the undisputed key to the Silver Eagle series with a mintage of just 30,125 pieces. It was originally issued only as part of the four-piece Gold Eagle sets. The present specimen exhibits spectacular black-and-white cameo contrast between the deeply mirrored fields and frosted devices. The strike is full, as one would expect, and the surfaces appear pristine.
Ex: Los Angeles Signature (Heritage, 8/2009), lot 2198. (#9887)

4589 **2000-W One-Ounce Platinum Eagle PR70 Deep Cameo PCGS.** The 2000-W one-ounce platinum eagle continues the five-year Vistas of Liberty reverse with a design the *Guide Book* calls Eagle Above America's Heartland, the bird soaring over a farm scene and crop of corn. This flashy piece is deeply mirrored and essentially perfect.(#99782)

4590 **Four-Piece 2008-W Gold Buffalo Set PR70 Ultra Cameo NGC.** The matched grade set includes the 2008-W tenth-ounce $5, quarter-ounce $10, half-ounce $25, and one-ounce $50. All four pieces are fully struck and pristine with luminous motifs and reflective textured fields.(Total: 4 coins)(#393330)

2009 Ultra High Relief, MS70 Technically Perfect Coin

4591 **2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 PCGS.** This technically perfect specimen of the 2009 Ultra High Relief issue shows the celebrated Saint-Gaudens design resurrected more than a century after its first appearance. The deeply mirrored yellow-gold surfaces show no imperfections , even on close inspection, and the fully struck design elements are truly spectacular. (#407404)

2009 Ultra High Relief Twenty, MS70

4592 **2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 PCGS.** Designated as First Strike by PCGS. The perfectly basined fields of this impressive and unmarked yellow-gold specimen exhibit fully brilliant, prooflike reflectivity. This recent issue is a tribute to the classic and timeless artistry of Augustus Saint-Gaudens who created the design following President Theodore Roosevelt's request for improved coinage designs for all American coins early in the 20th century. (#407405)

MMIX Ultra High Relief Twenty Dollar MS70 Prooflike

4593 **2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike NGC.** One wonders what Augustus Saint-Gaudens would think of the Mint's modern-day homage to his genius. Nonetheless, the numismatic marketplace has overwhelmingly warmed to the 2009 — or MMIX — Ultra High Relief bullion coins. This piece is every bit as bright and dazzling as the MS70 Prooflike designation would imply, yellow-gold and impeccable. (#24461)

4594 **(5) 2011 25th Anniversary Silver Eagle Sets.** Each of the five sets includes the Mint State 2011 (struck at San Francisco without a mintmark), 2011-S, and 2011-W, the proof 2011-W, and the reverse proof 2011-P, housed in a Mint presentation case with certificate of authenticity. The mailing box was opened by Heritage solely to remove the Mint receipt identifying the consignor. Only 100,000 sets were issued.(Total: 5 sets)(#509194)

2000 Paris Mint Libertas Americana Medal Gold Restrike, PR67 Deep Cameo

4595 **"1776" Libertas Americana Gold Medal 2000 Restrike PR67 Deep Cameo PCGS.** 47 mm, 64 gm of .916 fine gold. Certified as PR67 Deep Cameo "Libertas Americana Gold / 2000 Restrike" by PCGS, a beautiful and highly reflective restrike of the historic and seminal Libertas Americana medals. The "edge view" holder barely lets us discern a cornucopia hallmark from the Paris Mint and number 916 in an oval, presumably the fineness. These were made in a limited quantity of 500 restrikes, although we can see no other information on the edge of this piece.

4596 **(2010) "1876" One-Ounce Gold $100 Gold Union, Ultra Cameo Gem Proof NGC.** A modern private issue struck in pure gold using unissued pattern designs by U.S. Mint engraver George T. Morgan. Accompanied by a pamphlet from the New York Mint and a nice faux cherry-wood display box.

COINS OF HAWAII

1847 Hawaii Cent, MS64 Brown Glossy Original Surfaces

4597 **1847 Hawaii Cent MS64 Brown PCGS. CAC. Medcalf 2CC-2.** Crosslet 4, 7x8 berries, berry centered under first A in HAWAII. The most often seen of the various Medcalf varieties. This near-Gem Brown example shows glossy mint luster under medium-brown surfaces with a slight bluish tint, totally original, relatively unmarked, and showing just one small carbon spot near the obverse rim at 6:30. Population: 33 in 64 Brown, 6 finer (6/12). (#10965)

ERROR

Borderline Uncirculated 1965 Quarter Struck on a Silver Dime Planchet

4598 **1965 Washington Quarter — Struck on a Silver Dime Planchet — AU58 PCGS.** In the mid-1960s, the U.S. Mint transitioned from 90% silver alloy to a clad copper-nickel alloy for the dime and quarter. Quarters dated 1965 should have been struck in copper-nickel, so the present lot has the wrong alloy, in addition to its wrong denomination planchet. Satiny and minimally abraded with pearl-gray centers and golden-brown and lime-green margins. Aligned with the collar at 5 o'clock, with LIBERTY and (appropriately) QUARTER DOLLAR completely absent.

SO-CALLED DOLLAR

4599 **1898 One Pinch Alaska Gold, Head Right, 16 Stars, Octagonal MS64 NGC. Gould-Bressett 135.** From the Hart's Coins of the West series. A prooflike butter-gold piece with an intricate strike and unabraded surfaces. One small spot at 8 o'clock on the reverse.

CIVIL WAR MERCHANTS

4600 **1863 William R. Cobb, Brighton, MI, Fuld-85B-1a1, R.9, MS64 Red and Brown NGC.** William R. Cobb was born in Vermont circa 1814, and relocated to Brighton about 1838, soon afterward opening a dry goods and grocery business. He retired in 1864, and died at Brighton on August 20, 1882. He served local offices, including county clerk at the time this token was issued.

This Choice Mint State plain edge token has reflective surfaces with fully brilliant orange mint luster on the obverse, and 50% original color on the reverse. As impressive as it is rare.
Purchased from James Kelly (5/7/1943) for 35 cents.

4601 **1864 J. B. Shagnon, Detroit, MI, Fuld-225BR-3a1, R.10, MS65 Brown NGC.** The Shagnon (Chagnon) obverse die was mated by Stanton with the 1864-dated 1047 reverse die to create this rarity. This die marriage with a Plain Edge is unlisted in Fuld and is unique. In addition to its singular rarity, it is also a lovely Gem with considerable deep orange color and bluish-brown toning. There is nothing more the specialist could want.

ALASKA TOKEN

4602 **1862 (Circa 1910) Alaska 2 TooWah, Original, Gold, 7 Stars, MS62 NGC.** 1.34gm. One of many fantasy small denomination gold designs offered by W.E. Hart of San Francisco during the 1909 Seattle and 1915 Panama-Pacific expositions. The TooWah type was listed as "rare" in the 1960 Gould-Bressett reference. A prooflike apricot-gold example with an even strike and delicate field hairlines.

MEDAL

1924 Civic Forum's Tiffany Gold Medal To French Ambassador Jean Jules Jusserand

4603 **1924 Gold Civic Forum Distinguished Public Service Medal — Edge Tooled — Uncirculated Details.** 18 karat gold, 80 mm, 235 gms (7.556 troy ounces), by Paul Manship. #124 in *Paul Manship*, by Harry Rand. Manship's medals spanned the years from the early 1900s through his John F. Kennedy Presidential Inaugural Medal of 1961. The Civic Forum Medal was first awarded in bronze in 1914 to George Goethals of Panama Canal fame; electrical wizard Thomas Edison received the medal in 1915; telephone inventor Alexander Graham Bell in 1917, and the "great engineer" Herbert Hoover in 1920.

Jean Jules Jusserand (1855-1932) joined the French diplomatic service in 1876, serving in Constantinople and other exotic posts before arriving in the U.S. in 1902. He was a skilled promoter of French interests, and became the friend of every American president from Theodore Roosevelt through Calvin Coolidge. His closeness to President Woodrow Wilson was a key factor in bringing about America's entry into the First World War in 1917. No other French envoy developed the depth of friendship and understanding with American leaders as this profound thinker. This medal's importance and value are greatly increased by the name Tiffany. This unique gold medal combines artistic beauty and historical significance in a single object of surpassing beauty. The strike is full, the surfaces are gently matte with only the rounded rim showing brilliance. At the top of the rounded rim is an inch-long area that shows tooling, indicating removal of something from that area; however, this does not impair the overall appearance of this important medal.

GSA DOLLARS

Scarce 1879-CC GSA Dollar, MS63

4604 **1879-CC MS63 NGC.** Much scarcer than its 1878-CC predecessor, the 1879-CC is a find in a GSA holder. This delicately toned and lustrous representative has a good strike and a splendidly smooth reverse. The obverse field is also unabraded, although faint marks on the cheek correspond to the grade. The black box and certificate of GSA issue accompany the lot. (#7086)

4605 **1880-CC 8 Over High 7 MS65 NGC. CAC. VAM-5.** A Top 100 Variety. Delicately gold-toned and semireflective with a decent strike and quality eye appeal. Band-certified in the black GSA holder of issue with box but no paperwork.
From The Color Collection.(#7102)

4606 **1881-CC MS66 NGC.** Well-defined with a gleaming silver obverse and a wave of gold, peach, and violet patina at the lower right reverse. Band-certified in the black GSA holder of issue with box and certificate number 81082932.
From The Color Collection.(#7126)

4607 **1882-CC MS66 NGC. CAC.** A frosty example with hints of peach-to-gold visiting the borders of otherwise silver expanses. Band-certified in the black GSA holder of issue with box and certificate number 82418720.
From The Color Collection.(#7134)

4608 **1885-CC MS65 NGC.** Appreciably reflective, if not to the Prooflike tier, with great silver luster and minimal patina. Band-certified in the black GSA holder of issue with box and certificate number 81104006.
From The Color Collection.(#7160)

4609 **1885-CC MS65 NGC.** This Gem has a frosty, almost pillowy texture. Largely silver surfaces show a few streaks of deeper gray on the reverse. Band-certified in the black GSA holder of issue with box but no paperwork.
From The Color Collection.(#7160)

4610 **1885-CC MS65 NGC.** Frosty silver-gray through the interiors with the obverse edged in gold and the upper reverse offering a muted arc of bronze and plum. Band-certified in the black GSA holder of issue with box and certificate number 85020572.
From The Color Collection.(#7160)

4611 **1885-CC MS65 NGC.** A subtle pink-peach tint visits parts of each side, leaving the rest of this GSA Gem gleaming silver or faintly milk-toned. Band-certified in the black GSA holder of issue with box and certificate number 84465217.
From The Color Collection.(#7160)

4612 **1885-CC MS66 NGC.** Well-defined and semireflective, this Premium Gem has broad silver luster with occasional hints of gold playing at the margins. Band-certified in the black GSA holder of issue with box and certificate number 85056816.
From The Color Collection.(#7160)

MS66 ★ 1885-CC GSA Dollar
Colorful Obverse

4613 **1885-CC MS66 ★ NGC.** Bold coin-over-coin patina leaves the upper right two-fifths of the obverse bright silver but gives waves of blue, green-gold, orange, magenta, and violet to the rest of that side. The reverse has just a tinge of yellow at bottom left. Band-certified in the black GSA holder of issue with box and certificate number 85061801.
From The Color Collection. (#7160)

4614 **1885-CC MS65 Deep Mirror Prooflike NGC.** An arc of lemon toning along the lower reverse precludes full brilliance, but this prominently mirrored Carson City dollar is only lightly abraded and boasts attractive eye appeal.(#97161)

4615 **1890-CC MS62 NGC.** Light honey-gold toning denies full brilliance. Sharply struck and lustrous with a clean reverse and a number of wispy grazes on the portrait. The back of the black GSA holder has a vertical crack that has no effect on the preservation of the coin itself. A black box (but no certificate) accompanies the lot.(#7198)

4616 **1891-CC MS62 NGC.** Brilliant and lustrous with a good strike and a number of faint marks consistent with the grade. The black box and certificate of GSA issue are included in the lot.
From The Color Collection.(#7206)

4617 **1891-CC MS63 NGC.** This Carson City GSA dollar has booming luster and a well preserved reverse. Minor facial grazes are all that limit the grade. A GSA black box and certificate are included with the lot.
From The Color Collection.(#7206)

REDFIELD DOLLAR

Select Mint State 1893-CC Redfield Dollar

4618 **1893-CC Morgan Dollar MS65 Paramount (MS63 NGC).** Ex: Redfield Collection. Golden-brown and forest-green toning graces the borders of this lustrous and boldly struck silver dollar. The reverse appears Gem although the obverse shows infrequent moderate contact. La Vere Redfield presumably obtained the present key date Carson City dollar at face value during the 1950s. (#7222)

PATTERNS

Undated (1856) Flying Eagle Cent Pattern Judd-179, PR65 Brown

4619 **(1856) Flying Eagle Cent, Judd-179, Pollock-207, Low R.7, PR65 Brown PCGS. CAC.** Snow-1858 PT1b. Similar to the regular issue Flying Eagle cent, except that the obverse legends (UNITED STATES OF AMERICA and the date) are absent. Although no date is present, this pattern has been traditionally assigned with the 1856 varieties. Rick Snow believes that Judd-179 was struck in 1858, as part of an extensive series of pattern issues produced that year. The reverse die, however, was used on several 1856 cent die marriages, including S-5, S-6, S-7, and (especially) S-9. It is identified by a tiny die scratch on the left ribbon end. Struck in copper with a plain edge. The brown surfaces show occasional dabs of charcoal over each side. The strike is irregular with full definition on the reverse but some softness on the tail feathers on the obverse. (#11783)

Uncirculated 1858 Indian Cent, Judd-208

4620 **1858 Indian Cent, Judd-208, Pollock-259, R.1, MS60 NGC.** A transitional pattern that resembles the designs of the issued 1859 cent but is dated 1858. The centered date Pollock variant with five leaf clusters on the wreath. Struck in copper-nickel with a plain edge. Judd-208 is usually seen in proof format, but the present cent is designated as a business strike, perhaps due to the soft definition on the feathertips and right-side dentils. The apricot and olive surfaces are unabraded but show a few small obverse spots. (#11884)

PR62 1858 Indian Cent, Judd-208

4621 **1858 Indian Cent, Judd-208, Pollock-259, R.1, PR62 NGC.** Judd-208 is less famous than the 1856 Flying Eagle cent, but perhaps of similar significance, since it is dated 1858 yet has the same designs as the issued 1859 cent. The wreath exhibits five-leaf clusters. Struck in copper-nickel with a plain edge. This boldly struck specimen is from moderately rotated dies and has lightly hairlined and nicely reflective fields. Void of contact marks with minor residue in the UN in UNITED and a small spot near the chin. (#11885)

Gem Proof 1858 Indian Cent
Judd-208 Transitional Pattern

4622 **1858 Indian Cent, Judd-208, Pollock-259, R.1, PR65 NGC.** Snow-PT28. Die Pair 1. The Indian Head cent as adopted in 1859, with clusters of five leaves on the reverse wreath. This is the Centered Date Pollock variant. Struck in copper-nickel with a plain edge from slightly rotated dies, as often seen. Sharply struck and satiny with steel-blue centers and butter-gold borders.
Ex: Madison Collection (Heritage, 1/2008), lot 3556, which realized $2,990. (#11885)

Choice Proof 1858 Indian Cent
Judd-212, Broad Bust Tip

4623 **1858 Indian Cent, Judd-212, Pollock-263, R.4, PR64 PCGS.** Snow-PT25. Similar to the Indian Cent design as issued in 1860, but with a broad, ornamented shield at the top of the reverse. Struck in copper-nickel with a plain edge. The centered date, broad bust tip Pollock/Snow variant of Judd-212. This well struck near-Gem has bright gold color along the margins and mellowed tan hues in the centers. Peripheral obverse carbon prevents a finer grade. Housed in a green label holder. Population: 39 in 64, 11 finer (6/12).
Ex: Palm Beach Signature (Heritage, 11/2004), lot 7293; Dallas Signature (Heritage, 10/2009), lot 1253. (#11895)

Choice 1859 Shield Reverse Indian Cent
Judd-228 Transitional Pattern

4624 **1859 Indian Cent, Judd-228, Pollock-272, R.1, MS64 NGC.** Identical to the issued shield reverse 1860 Indian cent except dated 1859. Struck in copper-nickel with a plain edge. Like the Judd-208 transitional Indian cent pattern, Judd-228 is both collectible and affordable. The present near-Gem is unabraded and attractive with minor carbon and consistent honey-gold color. The strike is sharp aside from the top of the shield. (#11932)

MS66 Shield Reverse 1859 Cent
Judd-228 Transitional Pattern

4625 **1859 Indian Cent, Judd-228, Pollock-272, R.1, MS66 NGC.** Ex: Lemus Collection. A transitional pattern that combines the standard Indian Head cent obverse with the adopted reverse design of 1860. Struck in copper-nickel with a plain edge. Crisply struck and thoroughly lustrous. Pristine save for a tiny depression on the N in CENT and a couple of peripheral flecks. Census: 8 in 66, 0 finer (6/12).
Ex: Queller Family Collection (Heritage, 1/2009), lot 1566. (#11932)

1861 GOD OUR TRUST Half Dollar
Judd-278 Bronzed, PR65 Brown

4626 **1861 Half Dollar, Judd-278 Bronzed, Pollock-327, Low R.7, PR65 Brown NGC. CAC.** The design is similar to the regular issue Seated half dollar, but the motto GOD OUR TRUST is placed within a scroll above the eagle. Struck in copper and bronzed with a reeded edge. This precursor reverse was struck in both copper and silver, and both metals have date position variants. This piece has the shield point near the right side of the 1 in the date. It is believed the pieces that were bronzed are restrikes. The reddish-brown surfaces are problem-free, save for a few tiny specks of carbon. The fields are predictably non-reflective from the bronzing process. Fully struck throughout. (#12102)

Bronze 1863 Indian Cent
MS63 Brown, Judd-299

4627 **1863 One Cent, Judd-299, Pollock-359, R.3, MS63 Brown PCGS. CAC.** A transitional variety; similar to the 1864 No L bronze cent but dated 1863, when all regular issue cents were copper-nickel. The success in circulation of copper Civil War tokens encouraged the change in cent composition. Struck in bronze with a plain edge. Medallic alignment of the dies. A fully struck specimen with minimal carbon. Dark brown with iridescent orange-red and sea-green undertones.
Ex: Cincinnati Central States (Heritage, 5/2009), lot 3513. (#60453)

Reeded Edge 1863 Indian Cent
MS65, Judd-300

4628 **1863 One Cent, Judd-300, Pollock-362, High R.6, MS65 NGC.** The regular-issue 1863 Indian cent dies struck in copper-nickel, but with a reeded edge. Pollock's low date variant. Lustrous and sharply struck with a mark-free appearance. The obverse margin and the reverse are slightly faded peach-red while the obverse field and portrait display sea-green. Interesting die crumbling is noted between 9 and 12 o'clock on the obverse rim. (#70455)

Choice Proof Brown 1863 Two Cent, Judd-312

4629 **1863 Two Cents, Judd-312, Pollock-377, R.4, PR64 Brown NGC.** Similar to the adopted two cent piece of the following year, except that the motto reads GOD OUR TRUST, and the word CENTS is sharply curved within the wreath. The wreath lacks trailing ribbon ends. Struck in bronze with a plain edge. Fully impressed and flashy with deep lavender and forest-green toning. Smooth aside from two thin obverse marks at 3 and 5 o'clock. (#60467)

1863 GOD OUR TRUST Half Dollar
Judd-338, PR62 Cameo

4630 **1863 Half Dollar, Judd-338, Pollock-410, R.5, PR62 Cameo PCGS.** The obverse is the regular Seated Liberty die for 1863; the reverse is like the regular issue, with the addition of GOD OUR TRUST on a scroll above the eagle's head. Struck in silver with a reeded edge. An early prototype of the religious-motto class, considerably contrasted with deep silver, blue, and violet shadings through the mirrored fields. Scattered hairlines, perhaps more concentrated in the right obverse field, account for the grade. (#60500)

With Motto 1863 Pattern Half Dollar
Judd-341, PR63 Brown

4631 **1863 Half Dollar, Judd-341, Pollock-413, R.5, PR63 Brown PCGS.** The obverse die is that of regular-issue half dollars in 1863. The reverse presents the regular spread eagle but with the motto GOD OUR TRUST in the field, a feature attributed to George Eckfeldt for Mint Director James Pollock. Struck in copper with a reeded edge. Bands of the boldest red-gold, electric blue, and violet on both sides create dramatic visual impact
From The Color Collection. (#60503)

Copper 1865 With Motto Dollar
Judd-435, PR64 Brown

4632 **1865 Dollar, Judd-435, Pollock-508, Low R.7, PR64 Brown PCGS.** The regular issue With Motto Seated Liberty dollar design. Struck in copper with a reeded edge. Approximately a dozen examples are believed known of this copper variant, and the design was also produced in silver and aluminum. According to USPatterns.com, these pieces were struck "circa 1869 and into the early 1870s." This brightly reflective dollar displays autumn leaves toning on each side. The most easily identifying pedigree marker is a spot of brown color by the base of the rock at 8 o'clock. (#60620)

1869 Three Cent Nickel Pattern in Nickel
Judd-676, Pollock-755, PR55

4633 **1869 Three Cent Nickel, Judd-676, Pollock-755, R.4, PR55 PCGS.** Similar to the contemporary three cent nickel, except the date is larger and the denomination pillars are smooth. The short denticles Pollock subvariety. Struck in nickel with a plain edge. The short denticles variant is the scarcer of the two variants. The surfaces are dull, light gray and show a few spots on each side. (#60901)

1870 Copper Standard Silver Half
Judd-930, PR65 Red and Brown

4634 **1870 Standard Silver Half Dollar, Judd-930, Pollock-1035, R.7, PR65 Red and Brown NGC. CAC.** This William Barber design features Liberty seated and facing left, surrounded by 13 stars. She steadies a shield with her right hand, while her left hand holds an olive branch. A Liberty pole is partly concealed behind the shield. A scroll crossing the shield features a raised inscription of LIBERTY. The date is centered below. The reverse has a wreath of corn and cotton, with 50 CENTS inside and STANDARD above. Struck in copper with a plain edge. Interestingly, there is no mention of the country on either side. The bright, proof mirrors on each side serve to backlight the lovely blue patina that is interspersed with original mint red. (More red is apparent on the obverse.) (#71176)

1870 Copper Striking of Standard Silver Half
Judd-941, Pollock-1068, PR64 Red and Brown

4635 **1870 Standard Silver Half Dollar, Judd-941, Pollock-1068, High R.7, PR64 Red and Brown PCGS. CAC.** Liberty faces right and wears a cap ornamented with two stars. A ribbon with LIBERTY in incused letters rests on her shoulder. IN GOD WE TRUST lies within a scroll below, and UNITED STATES OF AMERICA is centered above. The reverse has the familiar wreath of corn and cotton, with 50/CENTS/1870 inside the wreath and STANDARD denoted above. One of two Pollock variants of Judd-941, Pollock-1068 (unlike Pollock-1054) does not have the peak of Liberty's cap beneath the final S in STATES. Struck in copper with a reeded edge. Only three or four are believed known of this variant, and no plain edge examples have been confirmed. The obverse retains much original brightness around the devices with gentle browning at the margin. The reverse is more subdued with significant brown over that entire side. Several small specks of carbon can be seen on the left side of the obverse, the reverse has a spot below the 0 in the denomination. (#71187)

Aluminum 1870 Standard Silver Half
Judd-980, PR65 Cameo

4636 **1870 Standard Silver Half, Judd-980, Pollock-1093, R.8 PR65 Cameo PCGS. CAC.** A bust of Liberty faces right on the obverse with the motto IN GOD WE TRUST on a scroll below. Liberty wears a cap that is ornamented with two stars, and a ribbon that crosses her shoulder is inscribed with LIBERTY in raised letters. The initial B is seen within the folds of the ribbon behind Liberty's cap, and the legend UNITED STATES OF AMERICA is at the upper periphery. On the reverse, the denomination 50 CENTS is expressed within a wreath of oak and laurel. The date 1870 is below, the word STANDARD is above. Struck in aluminum with a plain edge. Two variants are known of this design. This piece is from the second set of obverse dies and shows the tip of the cap below the E in STATES and Barber's initial in the folds of the ribbon. This is a lovely aluminum striking that shows no oxidation. The surfaces are nearly defect-free and the reverse fields display pronounced die striations. Strong contrast is evident on each side. (#800078)

1870 Standard Silver Half in Copper
Judd-984, PR65 Red and Brown

4637 **1870 Standard Silver Half Dollar, Judd-984, Pollock-1104, R.7, PR65 Red and Brown PCGS. CAC.** The obverse shows a bust of Liberty facing right, surrounded by the peripheral legend UNITED STATES OF AMERICA, and IN GOD WE TRUST on a scroll below. Liberty wears a diadem inscribed LIBERTY, and her hair is tied in a bun. On the reverse, the denomination 50 CENTS is centered in an oak and laurel wreath, with STANDARD SILVER above, and the date 1870 below. The 1 in the date is repunched. Struck in copper with a plain edge. The fields are moderately reflective and each side shows generous amounts of original red along with pale green patina. The devices are fully struck throughout and there are no mentionable contact marks. (#71230)

Copper 1870 Standard Silver Dollar
Judd-998, PR64 Red and Brown

4638 **1870 Standard Silver Dollar, Judd-998, Pollock-1129, R.7, PR64 Red and Brown PCGS. CAC.** Ex: Denali Collection. Standard Silver dollar that depicts Liberty seated, her right hand resting on a shield and holding a ribbon, her left hand holding an olive branch, a Liberty pole and cap appearing in the background. The central motif on the reverse is the denomination 1 DOLLAR, surrounded by a broad wreath of cotton and corn, and STANDARD at the top. Struck in copper with a reeded edge. About a dozen examples are believed known of this dollar pattern. Both sides are more blue than red or brown, making an impressively toned dollar. The fields are deeply mirrored and enliven the patina even more. Fully struck. (#71245)

Copper 1870 Gold Dollar
Judd-1023, PR63 Red and Brown

4639 **1870 Gold Dollar, Judd-1023, Pollock-1158, R.7, PR63 Red and Brown PCGS.** From regular issue gold dollar dies, but struck in copper with a reeded edge. Although designated as Low R.7 in the 10th edition of Judd, we believe this dies trial to be R.7. A well struck example with a deeply impressed date and an unabraded appearance. The obverse is mostly mahogany-red while the reverse is blended olive-green and rose-red. This is the single highest graded among three specimens of Judd-1023 certified by PCGS (6/12). (#71271)

1871 Five Cent Pattern, Judd-1050
Three Cent Nickel Design, PR64

4640 **1871 Five Cents, Judd-1050, Pollock-1184, Low R.6, PR64 PCGS. CAC.** The obverse bears a portrait of Liberty similar to that used on the nickel three cent piece. The date is below and UNITED STATES OF AMERICA is above the central device. The reverse depicts a reversed Roman numeral five and the word CENTS is within a wreath. Struck in nickel with a plain edge. Examples were also struck in copper and aluminum, and a single piece is known in the Connecticut State Library struck on a wide aluminum planchet. The fields on this example are brightly mirrored and there is slight contrast evident against the lightly frosted devices. Almost brilliant, showing just a hint of golden color on each side. There are few contact marks or other post-striking impairments on this lovely near-Gem. (#61309)

1871 Copper Half Eagle
Judd-1170, Bright PR65 Red and Brown

4641 **1871 Five Dollar, Judd-1170, Pollock-1312, R.6-7, PR65 Red and Brown PCGS.** The regular dies for the 1871 Liberty half eagle. Struck in copper with a reeded edge. It is Saul Teichman's opinion, as expressed on the USPatterns.com website, that "it is more than likely that the off-metal 'trials' of this year were deliberately struck for sale to collectors." Still, only half a dozen are believed to exist today. The last auction appearance was in the Queller/Lemus Collection in April 2009. The two sides present different degrees of red, the deeply mirrored obverse field displays iridescent blue and cherry-red, contrasting with a brighter red-gold on the bust of Liberty, while the reverse presents a deeper overall red with partial blue sheen. (#71433)

1873 Trade Dollar Pattern in Silver
Judd-1293, Peripherally Toned PR63

4642 **1873 Trade Dollar, Judd-1293, Pollock-1435, R.4, PR63 ANACS.** The design is similar to the issued Trade dollar, but Liberty's left hand rests on a globe, right hand holds a staff, and plow handles are behind the globe. On the reverse, the banner bearing E PLURIBUS UNUM is clutched by the eagle's beak, which also clutches a Federal shield in place of the usual olive branch. Struck in silver with a reeded edge. This interesting design was also struck in silver with a plain edge, copper, aluminum, and white metal. Lovely golden-rose and lilac peripheral color surrounds nearly brilliant centers. The high point of the eagle's breast is softly struck, as usually seen.
From The Color Collection. (#61578)

1875 Aluminum Quarter Eagle
Judd-1435, Heavily Contrasted PR65

4643 **1875 Quarter Eagle, Judd-1435, Pollock-1578, High R.7, PR65 PCGS. CAC.** Regular dies trial for the Liberty quarter eagle. Struck in aluminum with a reeded edge. According to USPatterns.com while these pieces have been termed as dies trial strikings in the past, in reality they were deliberately struck for sale to collectors. Nevertheless, aluminum strikings are of the greatest rarity with only two or three pieces believed known. The copper strikes are also rare with an estimated four or five pieces known, several of which have been gilt to simulate the rare 1875 quarter eagle. This is a deeply mirrored example, and as with many aluminum patterns, the devices are heavily frosted and present stark cameo contrast. The surfaces are unoxidized and problem-free. (#81741)

1878 Spread-Wing Eagle Dollar Pattern
Judd-1554, Pollock-1733 Variant, PR66 Cameo

4644 **1878 Dollar, Judd-1554, Pollock-1733, R.5, PR66 Cameo NGC.** The head of Liberty is large and faces left with IN GOD WE TRUST at the top and the date below, similar to the pattern fifty dollar gold pieces from 1877. The reverse has a spread-winged eagle with E PLURIBUS UNUM in Gothic lettering above. UNITED STATES OF AMERICA is at the top and ONE DOLLAR on the bottom rim. This is the Pollock variety with star 13 close to the curl and the upright of the B in PLURIBUS beneath the right foot of the second T in STATES. Struck in silver with a reeded edge. A rare pattern that enjoys considerable popularity due to the kinship in obverse design with the famous half union patterns. Light golden overtones drape the considerable mirrors and the modestly frosted devices. (#61915)

Proof 1879 Goloid Metric Dollar, Judd-1626

4645 **1879 Goloid Metric Dollar, Judd-1626, Pollock-1822, R.4, PR61 NGC.** William Barber's design for the Goloid Metric dollar with a capped head of Liberty on the obverse, paired with a reverse that carries the statutory as well as elemental inscriptions. A circle of stars about the central inscriptions breaks the otherwise continuous wording. Struck in goloid (a silver alloy that includes a small portion of gold) with a reeded edge. This crisply struck pattern has steel-gray surfaces with caramel-gold undertones. Lightly hairlined and occasionally microgranular. (#62004)

GOLD DOLLARS

4646 **1849 Open Wreath MS64 NGC.** A well-detailed Choice example from the first year of the denomination, this attractive specimen displays lustrous yellow and rose-gold surfaces, with ample eye appeal. NGC has graded 51 numerically finer coins (5/12). (#7502)

4647 **1849 Open Wreath MS64 NGC.** Large Head, Close Stars, With L. A lovely Choice Mint State specimen, this first-year gold dollar has brilliant green-gold color with satin luster and sharp design motifs. (#7502)

1849-D Gold Dollar, MS61
Only Open Wreath Dahlonega Issue

4648 **1849-D MS61 NGC. Variety 1-A.** The 1849-D is the introductory Dahlonega issue of the denomination. It is also a necessity for subtype collectors, since the Open Wreath design was struck for only one year. The present crisply struck and unmarked example displays rich peach-red luster throughout the peripheries. Census: 41 in 61, 46 finer (6/12). (#7507)

1849-D Gold Dollar, MS62
Excellent Type One D-Mint Example

4649 **1849-D MS62 NGC. Variety 1-A.** This variant shows the mintmark far to the left, compared to the much scarcer 1-B variety that has a more centrally located mintmark. The 1849-D is a relatively obtainable D-mint gold dollar with an estimated 250-300+ survivors in all grades, and 30-40 pieces are believed known in mint condition. This bright yellow-gold example has considerable die flow lines around the margins on each side. There are no singularly mentionable abrasions. The strike is strong, except in the central portion of Liberty's hair. (#7507)

1850 Gold Dollar, MS65 ★
Only Four Finer Coins at NGC

4650 **1850 MS65 ★ NGC.** This well-detailed Gem gold dollar shows just a touch of softness on the stars and reverse lettering. The vivid orange-gold surfaces show highlights of lilac and turquoise, with prooflike reflectivity in sheltered areas and outstanding eye appeal. Census: 12 in 65, 1 in 65 ★ ,4 finer (6/12). (#7509)

Flashy Near-Mint 1850-C Gold Dollar

4651 **1850-C AU58 PCGS. Variety 1.** Like other Charlotte Mint gold dollar issues, the 1850-C is a low mintage rarity. While most examples show strike weakness on the obverse, this piece is a pleasing exception, with bold detail on the peripheral stars and on the central device. Moderately prooflike with radiant straw-gold color. Marks are minor aside from slender abrasions on and near Liberty's neck. *Ex: Long Beach Signature (Heritage, 9/2006), lot 3004.* (#7510)

4652 **1851-C XF40 PCGS. CAC. Variety 3.** The scarce Variety 3 is easily recognized by the reverse die break that runs from the rim to the second S in STATES. This well-detailed specimen shows just a touch of wear on the devices, with only a few minor contact marks on both sides. Housed in a green label holder.
From The Old Holder Collection.(#7514)

1851-O Gold Dollar, MS65
Only One Finer NGC Coin

4653 **1851-O MS65 NGC.** Vibrant green-gold luster on both sides with delicate rose toning on the reverse combines to present exceptional eye appeal on this frosty Gem. Both sides have a few minuscule marks to prevent a higher grade. The strike is bold, and the obverse has a delicate die crack from the star at 2 o'clock, across the head, to the border at 10 o'clock. A remarkable Gem for the connoisseur. Census: 22 in 65, 1 finer (5/12). (#7516)

1852 Gold Dollar, Fully Struck MS66
Excellent High-Grade Type Coin

4654 **1852 MS66 NGC.** The 1852 is often used as a type coin. The reason can be explained by one coin that exists: an 1852 in MS69, a coin we sold in 2006. Garrett and Guth mention this piece in their gold reference. This coin has the same bright, sparkling mint luster and freedom from abrasions. The devices are fully struck on each side. Census: 17 in 66, 7 finer (6/12). (#7517)

4655 **1852-O MS61 NGC. CAC.** A sharply struck and lustrous yellow-gold example that has no trace of wear. Minor field marks are consistent with the third-party grade.
Ex: Long Beach Signature (Heritage, 9/2006), lot 3018, which realized $1,161.50.(#7520)

MS62 1853-C Gold Dollar
Difficult Charlotte Issue

4656 **1853-C MS62 NGC. Variety 1.** Sole dies known. A caramel-gold example of this low mintage and challenging Charlotte issue. Minute mint-made strike-throughs give the fields an occasionally textured appearance, but no post-strike contact is apparent. Boldly struck by the standards of the remote North Carolina facility. Census: 13 in 62 (1 in 62+), 17 finer (6/12). (#7522)

Choice 1853-O Gold Dollar

4657 **1853-O MS64 NGC. Variety 1.** The High Date variant of this New Orleans Type One issue. A lustrous canary-gold near-Gem with a sharp strike save for softness on the 3 in the date and prominent 1 of the denomination. Marks are absent aside from a slender line behind the neck curls. Census: 36 in 64, 12 finer (6/12). (#7524)

1854 Gold Dollar, MS62
Popular Type Two Issue

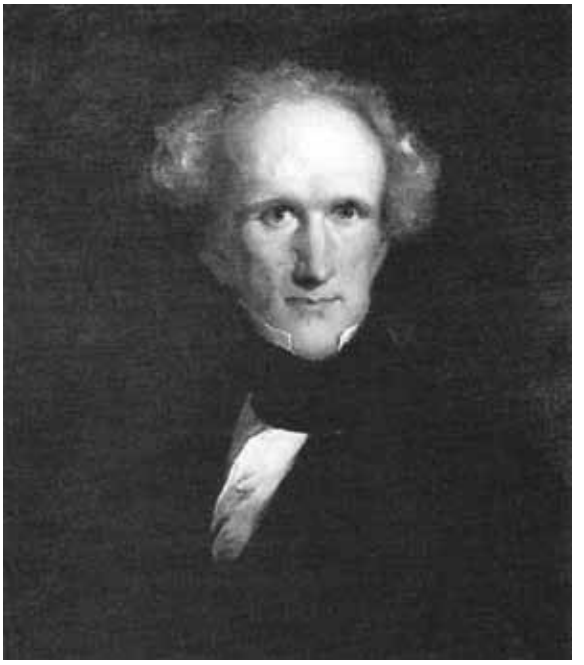

4658 **1854 Type Two MS62 NGC.** The diameter of the gold dollar planchet was increased in mid-1854, to keep the coins from being so easily lost in pockets, etc. The new Type Two design only lasted three years, due to striking problems. This well-detailed MS62 example offers lustrous greenish-gold surfaces, with only minor signs of contact. (#7531)

1854 Type Two Gold Dollar, MS64
Popular First Year of Type

4659 **1854 Type Two MS64 NGC. CAC.** The 1854 gold dollar represents the first year of the larger diameter Type Two design, and claims a substantial mintage of 783,943 pieces. The short-lived Type Two design was only produced from 1854-1856, and Mint State examples are always in demand as type coins. The coin offered here is a pleasing Choice specimen, with well-detailed design elements and vibrant satiny mint luster. The attractive yellow and rose-gold surfaces show few signs of contact, but both sides display interesting clash marks. The 1854 is scarce in MS64 condition, and NGC has graded only 36 numerically finer coins (5/12). (#7531)

James Barton Longacre

1854 Type Two Gold Dollar, Spectacular MS66
Rich Color and Sparkling Mint Luster

4660 **1854 Type Two MS66 PCGS. CAC.** "Solve one problem, create another," the old bromide goes, and so it was with the Mint's coinage difficulties of the 1850s. The reduction in net silver content of the minor coinage, signified by the Arrows/Arrows and Rays designs introduced in 1853, managed for the first time since the Mint's founding to provide ample quantities of circulating domestic silver coinage. The gold dollar and double eagle, introduced commercially in 1849 and 1850 respectively, were intended to increase the circulation of gold coins and as new coinage vehicles for the abundance of California gold. The double eagle was popular and circulated well, especially in the West.

But the diminutive gold dollar had problems. Its small size and weight — a 13-mm coin weighing only 1.67 gm, about one-eighteenth of a troy ounce — meant it was easily lost. In 1854 Mint Engraver James B. Longacre attempted a fix via a one dollar gold coin that was 1 mm larger in diameter and proportionally thinner, but the urge to stereotype the design was among the factors that doomed the result. Not only was the size increased, but the Indian Princess motif was introduced to harmonize with the three dollar gold coin, also introduced in 1854. On the one dollar coins, the head of Liberty was in relatively high relief for such a tiny coin, with the high points in the center obverse in direct opposition to the LL in DOLLAR and the 85 in the date on the reverse. Striking difficulties were inevitable. The strike on the reverse shows the near-universal weakness on the 8 in the date and LL in DOLLAR. Each side also displays the usually seen clash marks. However, what is truly spectacular on this piece is the bright, sparkling mint luster and rich reddish-gold and lilac color intermixed over each side. (#7531)

1855 Type Two Gold Dollar, MS62
Excellent Type Coin

4661 **1855 MS62 NGC.** The 1855 gold dollar is prized by type collectors because it represents the popular Type Two design, which was only coined in three consecutive years. This well-detailed MS62 example displays some interesting clash marks on the reverse, but signs of contact are minimal for the grade. Vibrant mint luster adds to the considerable appeal. (#7532)

1855 Type Two Gold Dollar, MS62
Unclashed Obverse/Clashed Reverse

4662 **1855 MS62 PCGS. CAC.** Second year of this short-lived design type, this green-gold example has subdued but complete mint luster over each side. The strike is remarkably sharp on the headdress on the obverse, but the reverse shows the usual softness in the center. Curiously, there is no trace of die clashing on the obverse, while there is on the reverse. (#7532)

Choice XF 1855-C Gold Dollar
Sole Type Two Charlotte Issue

4663 **1855-C XF45 NGC. Variety 2.** Rich pumpkin-gold and steel-blue toning embraces unmarked and nicely defined surfaces. The '55-C is the sole Charlotte issue of the briefly coined Type Two design. The mintage of 9,803 pieces is sufficiently low to make possession of an example a significant challenge for C-mint type collectors. (#7533)

4664 **1855-O AU53 NGC. Variety 2.** Long upright of 1 is partway beneath the first L in DOLLAR. This nice, attractive 1855-O would be a nice addition to a complete Type Two gold dollar set, an achievable if challenging set consisting of only six issues. Orange-gold surfaces retain most of their original luster and show no overt marks, although mentionable strike softness occurs on the 8 in the date.(#7535)

4665 **1855-O AU55 NGC. Variety 1.** Brilliant yellow surfaces exhibit nearly full luster with a hint of green color, and delicate orange high-point toning. Trivial marks are consistent with the grade. (#7535)

4666 **1856-S/S Type Two AU50 PCGS. FS-501.** The mintmark was originally punched out of position, right and above the final location. The two varieties, the other having a normal mintmark, are about equal in rarity. Hints of green appear on the pleasing yellow surfaces with traces of satin luster.(#7536)

1857 Gold Dollar, MS66
Bold Clash Marks

4667 **1857 MS66 PCGS. CAC.** Both sides of this beautiful Premium Gem show bold clash marks in the fields, including ERTY clearly visible through the 7 in the date. Those clash marks add considerably to the character of this impressive piece. Both sides are brilliant and highly lustrous, with exceptional eye appeal despite faint obverse slide marks. Population: 8 in 66, 7 finer (6/12). (#7544)

4668 **1857-C XF45 PCGS. Variety 1.** The only known dies. A pleasing Choice XF, this 1857-C gold dollar has gunmetal-blue fields and orange-gold high points. Unabraded, though the obverse has shallow strike-throughs (as made) on the jaw and right obverse field. Population: 32 in 45, 59 finer (6/12).(#7545)

4669 **1857-C — Improperly Cleaned — NGC Details. AU.** This chestnut-tan Charlotte gold dollar is subdued and minutely granular but displays sharp design definition. Void of reportable abrasions. Rare, since just 13,280 pieces were coined.(#7545)

Bright 1857-C Gold Dollar, AU55
Notably Unmarked Surfaces

4670 **1857-C AU55 NGC.** The 1857-C is the first Type Three Charlotte issue. An absence of contemporary regional coin collectors and a meager mintage of 13,280 pieces combines to ensure rarity at the AU55 level. The present straw-gold representative has bright mark-free surfaces and an even strike. One small club-shaped strike-through (as made) is on Liberty's neck. Census: 39 in 55, 37 finer (6/12). (#7545)

4671 **1858 MS63 NGC.** A few tiny marks are noted in the left obverse field of this Select Mint State specimen. Both sides have brilliant yellow luster with excellent eye appeal. Census: 18 in 63, 15 finer (6/12).(#7548)

1858 Gold Dollar
Conditionally Rare in MS65

4672 **1858 MS65 PCGS. CAC.** This frosty and brilliant Gem has exceptional surfaces, the reverse with a few lines that appear to be mint-made. The strike is bold, creating excellent eye appeal and desirability. The date is relatively common in low grades but conditionally rare in high grades. Population: 6 in 65, 7 finer (6/12). (#7548)

4673 **1859 MS65 NGC. CAC.** An impressive Gem showing orange and blue overtones accompanying frosty yellow luster. Inconsequential marks are noted on each side. Census: 12 in 65, 9 finer (6/12). (#7551)

1859-C Gold Dollar, MS61
Rare Issue in Mint State

4674 **1859-C MS61 PCGS Secure.** The only known die pair for 1859-C gold dollars was used for production of 5,235 coins. This Mint State piece has the typical mushy strike of the entire production run. The greenish-yellow gold surfaces are fully lustrous with myriad, grade-limiting marks. Population: 4 in 61, 6 finer (6/12). (#7552)

Borderline Uncirculated 1859-D Dollar

4675 **1859-D AU58 PCGS. Variety 11-N.** A fully struck rose-gold example of this elusive issue. Smooth save for a tick between the IT in UNITED. The gold dollar denomination always took a back seat to the half eagle at Dahlonega, and the inflow of West Coast gold dwindled after the San Francisco Mint opened in 1854. Thus, just 4,952 pieces were struck, and perhaps only a few hundred examples have survived. (#7553)

1865 Gold Dollar, MS62
Only 3,720 Pieces Struck

4676 **1865 MS62 NGC.** The 1865 gold dollar is one of the most elusive issues of the series, from a tiny mintage of just 3,720 pieces struck during the last year of the Civil War. The present coin displays prooflike yellow-gold surfaces with a few minor contact marks and well-detailed design elements. Census: 7 in 62, 16 finer (5/12). (#7564)

4677 **1868 MS61 Prooflike NGC.** The peach-gold surfaces show brilliant luster amid scattered field chatter and light hairlines that appear under a glass. The Prooflike surfaces come from the low mintage of 10,500 circulation strikes. Census: 6 in 61 Prooflike, 5 finer (6/12).(#77567)

4678 **1873 Open 3 MS65 PCGS. CAC.** This lovely Gem has reflective fields and strong design motifs with pristine, brilliant yellow surfaces showing faint iridescent overtones. Population: 40 in 65 (1 in 65+), 12 finer (6/12).(#7573)

4679 **1874 MS66 PCGS. CAC.** This high grade gold type coin is well struck except for the 87 in the date. The obverse is close to pristine and the reverse displays only faint marks near the prominent 1. Certified in a green label holder. Population: 56 in 66 (4 in 66+), 32 finer (6/12).(#7575)

1875 Gold Dollar, Unc Details
Only 400 Examples Minted

4680 **1875 — Damaged — NGC Details. Unc.** The 1875 gold dollar is famous for its low mintage of just 400 pieces and collectors prize this issue in all grades and conditions. This coin has some small, random marks in the prooflike fields of both sides, but the design elements are well-detailed and the coin retains considerable eye appeal. (#7576)

Flashy 1880 Gold Dollar, MS66+ ★ Prooflike

4681 **1880 MS66+ ★ Prooflike NGC. CAC.** This flashy Premium Gem 1880 gold dollar is one of those low-mintage wonders that some knowledgeable contemporary collector must have snatched up before it ever had a chance to circulate, a well-known phenomenon from late in the series that produced a wealth of marvelously collectible examples for the numismatists of today. The surfaces are bright yellow-gold throughout, with deeply mirrored fields and frosted devices creating a prooflike effect, a function of the low mintage of 1,600 business strikes. The Star designation recognizes exceptional eye appeal. (#77581)

1881 Gold Dollar, MS66
Sharply Detailed, Prooflike Surfaces

4682 **1881 MS66 PCGS.** Although certified as a business strike, this fully and deeply mirrored specimen could easily be confused for a proof. In fact, it would not surprise us if this example were offered as a proof in the past. Both sides have gorgeous orange-gold color in addition to a full strike. (#7582)

1883 Gold Dollar, MS68
None Certified Finer at PCGS

4683 **1883 MS68 PCGS.** A nominal business-strike mintage of 10,800 gold dollars was achieved in 1883, but only a small percentage of this total ever reached circulation. The issue was well-produced, and most examples seen are attractive Mint State specimens, often with prooflike surfaces. The coin offered here stands out as one of the finest survivors of this high-quality issue, with razor-sharp definition on all design elements and virtually pristine greenish-gold surfaces. The fields display prooflike reflectivity in most areas, but the surfaces have more of a satiny quality than the proofs of this year, which typically exhibit the classic orange peel texture. This coin represents a combination of tremendous eye appeal and incredibly high technical quality and should find a home in a fine collection or Registry Set. Housed in a green label holder. Population: 9 in 68, 0 finer (5/12). (#7584)

4684 **1885 MS61 Prooflike NGC.** The unusual grade of MS61 Prooflike is explained by the fine field hairlines seen on each side of this nonetheless highly reflective two-toned coin, deep, mellow red-orange with hazel accents. Census: 2 in 61 Prooflike, 16 finer (6/12).(#77586)

4685 **1886 MS65 PCGS. CAC.** Both sides are boldly clashed on this Gem 1886 gold dollar, showing bright canary-gold color and excellent eye appeal. A loupe reveals no singular marks but considerable prooflike reflectivity. Population: 42 in 65, 18 finer (6/12).(#7587)

Fully Struck MS66+ 1889 Gold Dollar
Frosty and Light Orange-Gold

4686 **1889 MS66+ NGC.** Last-year type collectors will be thrilled by this Premium Gem coin, a high-end piece with no mentionable contact visible amid the frosty luster and light orange-gold color. Some interesting die cracks pass around the reverse rim, and the strike is full. (#7590)

PROOF GOLD DOLLARS

Deep Cameo PR66 1866 Gold Dollar
Incredible Contrast

4687 **1866 PR66 Deep Cameo PCGS.** While the late proof gold dollars are synonymous with relative availability, earlier dates fell in line with the minuscule mintages of their time. The official mintage of the proof 1866 gold dollar amounted to only 30 specimens, for example, and not all of those coins survive. This piece, however, has come through in all of its Deep Cameo glory. Orange-infused yellow-gold surfaces are frosted on the intricately detailed devices and reflective in fields that show appreciable "orange-peel" texture rippling across each side. A remarkable survivor from one of the more challenging postwar issues and a true treat for the proof gold connoisseur. Population: 2 in 66 Deep Cameo, 1 finer (5/12). (#97616)

1883 Gold Dollar, PR67 Ultra Cameo
Tied for Finest Certified

4688 **1883 PR67 Ultra Cameo NGC.** Only 207 proof gold dollars were minted in 1883, and the issue is seldom encountered today. Q. David Bowers estimates a surviving population of 50-75 examples in all grades, and it is doubtful any surviving specimen can match the quality of the coin offered here. This piece is tied with one other PR67 Ultra Cameo at NGC, and there are none finer than PR66 Deep Cameo at PCGS (6/12). Two varieties are known for the issue, with this example representing the less available variety with the repunched date.

The present coin is a spectacular specimen, with deeply mirrored honey-gold fields of unfathomable depth. The pristine surfaces display the characteristic orange peel effect seen on proofs of this era. The strike is razor-sharp throughout, and the field-device contrast is profound. The visual appeal of this coin is overwhelming. (#97633)

1889 PR64 Gold Dollar
Popular, Final-Year Issue

4689 **1889 PR64 PCGS.** A beautiful near-Gem proof of this last-year issue in the gold dollar series, this piece shows deep sunset-orange color with a noticeable cameo effect. Some die crumbling appears at the C in AMERICA and a curving lintmark is above DO on the reverse. Post-strike abrasions are insignificant. A pleasing coin for the grade. Population: 14 in 64, 20 finer (6/12). (#7639)

CLASSIC QUARTER EAGLES

4690 **1834 AU50 NGC. Large Head, Breen-6140, Variety 2, R.3.** A well defined introductory year Classic half eagle. The straw-gold fields are subdued and show only a single remotely consequential abrasion, a thin vertical mark near star 11.(#7692)

1834 Classic Two and a Half, MS61

4691 **1834 MS61 NGC. Large Head, Breen-6140, Variety-2, R.3.** The "Wide AM" variety. Stars 2, 3, 10, and 11 are repunched. A sharply struck Mint State example of this popular and relatively short-lived gold type. Light apricot-gold overall with moderately deeper toning near the rims. Careful examination reveals a few faint field marks. (#7692)

4692 **1835 AU55 NGC. Breen-6141, Variety-6, R.2.** The AM in AMERICA are widely separated on the reverse of this variety, the only common die marriage of the year. This Choice AU specimen has lightly reflective fields with smooth yellow surfaces. (#7693)

4693 **1836 Script 8 AU55 NGC. Head of 1835, Breen-6143, Variety 11, R.2.** A lightly toned caramel-gold Classic type coin with a good strike despite minor blending on the curls above the ear. Marks are unimportant for the grade and include one hairline above star 11.(#7694)

4694 **1836 Script 8 AU58 NGC. Head of 1835, Breen-6143, Variety 11, R.2.** The bisecting obverse die crack between 11 and 4 o'clock is prominent on the present near-Mint example. The honey-gold surfaces are mildly glossy and devoid of any visible marks. (#7694)

4695 **1836 Block 8 XF45 PCGS. Second Head of 1837, Breen-6144, Variety-15, R.2.** An unabraded peach-gold representative with a pleasing strike and moderate wear on the forehead curls. An affordable yet quality example of this scarce gold type. (#97694)

4696 **1836 Block 8 AU55 NGC. Second Head of 1837, Breen-6144, Variety 15, R.2.** A yellow-gold Classic two and a half with well struck borders and a softer strike at the centers. The mildly luminous surfaces are devoid of noticeable marks.(#97694)

4697 **1836 Block 8 AU58 NGC. Second Head of 1837, Breen-6144, Variety-15, R.2.** Luster brightens the borders and motifs of this minimally abraded straw-gold Borderline Uncirculated Classic type coin. Peripheral elements are well struck while the centers are lightly brought up.
Ex: FUN Signature (Heritage, 1/2008), lot 3780, which realized $2,070.(#97694)

1839-C Quarter Eagle, XF40
Breen-6150, Recut Date

4698 **1839-C XF40 PCGS. Breen-6150, Variety-22, R.4.** This always-popular Charlotte issue has a boldly recut date with the 3 especially pronounced. This is a reuse of the 1838-C reverse die. This example has even reddish tinted surfaces. Extensive die cracks are noted on each side, and a planchet lamination is seen in the right obverse field. Minimally abraded. (#7699)

AU53 1839-O Two and a Half
Substantial Luster, Unmarked Surfaces

4699 **1839-O AU53 NGC. High Date, Wide Fraction, Breen-6152, Variety-27, R.3.** The 1839-O is the first quarter eagle New Orleans issue, and is also the only O-mint issue of the Classic two and a half series. Despite these attributes and a low mintage of 17,781 pieces, examples are collectible. The present coin is pleasing for its ample peripheral luster and undisturbed pale peach surfaces. The obverse is well struck while the lower reverse shows selected softness. (#7701)

LIBERTY QUARTER EAGLES

1842-D Two and a Half, AU53
Sharply Repunched Date

4700 **1842-D AU53 NGC.** Only a single die pair is known for the mintage of just 4,643 pieces. The present example is from an early die state and shows prominent repunching on the 184 in the date. This repunching is faint or absent on a majority of survivors. The stars are well struck though the centers show minor incompleteness. The straw-gold surfaces are clean aside from a single small mark near Liberty's shoulder.
Ex: Long Beach Signature (Heritage, 2/2009), lot 2446. (#7725)

4701 **1843-D Small D VF25 PCGS. Variety 4-F.** Sharper than its VF25 grade suggests, particularly on the curls above the coronet. The green-gold surfaces are moderately bright and display mottled tan patina. Housed in a green label holder.(#7730)

4702 **1845-O — Improperly Cleaned — NGC Details. XF.** Just one die variety is known from the tiny mintage of 4,000 pieces. The 1 in the date is strongly repunched. The present olive-gold coin is mildly glossy from a light cleaning. Wear is moderate and marks are inconsequential. One slender strike-through above star 13.(#7739)

1845-O Liberty Quarter Eagle, AU53
Rarest O-Mint Two and a Half

4703 **1845-O AU53 NGC.** From a mintage of just 4,000 pieces, the 1845-O is the rarest quarter eagle from the New Orleans Mint. Probably no more than 65-75 examples survive today in all grades. This attractive AU53 example is well-detailed on the obverse, but the reverse shows the typical softness. The lightly marked yellow-gold surfaces retain much original mint luster. Census: 8 in 53, 15 finer (6/12). (#7739)

1846 Liberty Quarter Eagle, MS61
Rare Issue in Mint State Grades

4704 **1846 MS61 NGC.** The 1846 Liberty quarter eagle claims a low mintage of 21,598 pieces, and the date is rare in Mint State grades. This well-detailed MS61 example displays light greenish-gold surfaces, with a few rose highlights. The lustrous fields show only minor signs of contact. Census: 14 in 61, 3 finer (6/12). (#7740)

Near-Mint 1846-D Two and a Half

4705 **1846-D AU58 NGC. Variety 7-K.** Variety 7-K. The '46-D is a challenging Dahlonega issue with a mintage of 19,303 pieces. This is a well struck near-Mint representative with sun-gold surfaces that retain substantial luster throughout the margins. Faint marks are noted near the cheekbone and profile. Census: 40 in 58, 14 finer (6/12). *Ex: FUN Signature (Heritage, 1/2007), lot 5405, which realized $4,312.50.* (#7742)

1846-D/D Quarter Eagle, Choice XF
Variety 7-K, Scarce Early Die State

4706 **1846-D/D XF45 PCGS. Variety 7-K.** The trace of a previously punched D can be seen just left of the dominant D and immediately above the 1 in the numerator. This is an earlier die state that shows significant portions of the lower part of the first D, and as such is much scarcer than other double mintmarks, and generally trades for a strong premium. This is a bright yellow-gold example that displays light, even wear over the high points and a few medium-sized field marks on the obverse. (#97742)

4707 **1846-O AU58 PCGS. CAC. Variety 3.** A canary-gold Borderline Uncirculated representative of this scarce New Orleans issue. There are no relevant marks, but the centers are lightly brought up, and a shallow mint-made strike-through is noted above star 5. Population: 17 in 58, 15 finer (6/12).(#7743)

1846-O Quarter Eagle, MS60
Rare Issue in Mint State

4708 **1846-O MS60 NGC. Variety 1.** A delightful example that is sharply struck with essentially full and complete design features on each side. The only exception is usual weakness on the eagle's leg, from the left side of the shield down to the claw below. Although minor hairlines and abrasions are visible, the brilliant yellow gold surfaces are reflective and almost prooflike in appearance. This is an extremely important opportunity to acquire a rare issue. Just 62,000 examples were struck, and few have survived in full Mint State condition. Census: 2 in 60, 22 finer (6/12). (#7743)

1848 CAL. Quarter Eagle, AU58
Possibly First U.S. Commemorative Coin
Only 1,389 Pieces Struck

4709 **1848 CAL. AU58 NGC.** In the opinion of many numismatists, the 1848 CAL. quarter eagle should be considered the first U.S. commemorative coin. Certainly, the coins serve to provide a direct link to the historic days of the California Gold Rush, and this important issue has many of the qualities of a commemorative coin. However, unlike most commemorative issues, the 1848 CAL. quarter eagle was not sold at a premium, but distributed as a regular-issue coin at face value, like the Statehood quarters of recent times.

Newly acquired, after the Mexican War of 1846, California was still under the authority of a military governor when gold was discovered at Sutter's Mill in 1848. The first shipment of gold from the newly discovered fields, totaling 230 ounces, was dispatched on December 9, 1848 by Col. R.B. Mason to Secretary of War William A. Marcy. Marcy delivered the bullion to the Philadelphia Mint, where 1,389 quarter eagles were struck and counterstamped with the initials CAL. to commemorate the important events transpiring in the faraway gold fields.

Collectors have prized the 1848 CAL. quarter eagle since the earliest days of the hobby, and a specimen was sold in the Dr. Lewis Roper Sale (Moses Thomas & Sons, 2/1851), which most numismatists agree was the first all-coin auction held in this country. Recent auction sales include the magnificent MS68 ★ NGC specimen in lot 3419 of the FUN Signature (Heritage, 1/2006), which realized $402,500.

The present coin is an attractive near-Mint specimen, with well-detailed design elements that show just a touch of softness on Liberty's curls and the eagle's head. A few minor contact marks are present, none worthy of individual mention. The pleasing greenish-gold fields show distinct traces of prooflike reflectivity in many areas around the devices. This coin is included in Garrett and Guth's *100 Greatest U.S. Coins*. Census: 9 in 58, 18 finer (6/12).

Ex: FUN Signature (Heritage, 1/2007), lot 3411, realized $57,500. (#7749)

Near-Mint 1849-D Quarter Eagle
Low-Mintage Issue, Rare in High Grade

4710 **1849-D AU58 NGC. Variety 11-M.** From a tiny mintage of just 10,900 pieces, the 1849-D Liberty quarter eagle is a rare issue in high grade. Doug Winter estimates the surviving population at 115-135 examples in all grades, with most pieces grading no better than XF. This sharply detailed specimen displays lightly marked copper-gold surfaces, with bright mint luster on both sides. Census: 40 in 58, 9 finer (6/12). (#7754)

4711 **1850-O AU58 NGC. Variety 4.** The flag of the 5 is lightly repunched. This honey-gold Borderline Uncirculated New Orleans example has a good strike and lacks any consequential abrasions. Census: 57 in 58 (1 in 58+), 10 finer (6/12).(#7758)

4712 **1851 MS63 PCGS.** Slight violet residue appears at the lower left obverse of this Select Mint State piece. Both sides are brilliant with frosty yellow luster. A couple minor scratches limit the grade. Population: 43 in 63, 39 finer (6/12).(#7759)

4713 **1851 MS64 NGC.** This frosty orange-gold near-Gem quarter eagle shows few overt marks on the reverse and excellent eye appeal, although the Gem grade is likely precluded by a scrape near star 6, some planchet roughness at the nose, and a weak strike on the forecurl. Census: 35 in 64 (1 in 64+), 9 finer (6/12). (#7759)

4714 **1851-C XF40 PCGS.** Deep butter-gold toning graces this attractive Charlotte example. The eagle is typically brought up though the portrait shows pleasing detail. Minimally abraded except for one concealed mark at the tip of the lowest arrowhead. Just 14,923 pieces were struck.(#7760)

1851-C Quarter Eagle, MS61
Variety 1, the Only Dies

4715 **1851-C MS61 NGC. Variety 1.** The only dies for this issue. Myriad handling marks are noted on the green-gold surfaces of this boldly detailed Charlotte quarter eagle. Both sides retain full frosty mint luster with traces of reflectivity in the protected areas. An attractive example and rarely found so nice. Census: 7 in 61, 3 finer (6/12). (#7760)

4716 **1852 MS63+ ★ NGC. CAC.** A moderately prooflike representative with flashy pumpkin-gold fields and a good strike. Devoid of noticeable abrasions, though light parallel roller marks (as made) cross the eagle. As of (6/12), NGC has certified only four examples of the issue with a Star designation.(#7763)

4717 **1852 MS64 PCGS.** A die crack from the left obverse border extends through the base of the date on this Choice Mint State piece. Both sides are brilliant and highly lustrous with frosty yellow surfaces. Population: 38 in 64, 12 finer (6/12).(#7763)

Rare Mint State 1852-O Quarter Eagle
Only Five Finer Coins at PCGS

4718 **1852-O MS61 PCGS. CAC. Variety 2.** The 1852-O Liberty quarter eagle boasts a substantial mintage of 140,000 pieces, but probably no more than 200-250 examples are still extant in all grades. Mint State coins are rare. This well-detailed MS61 specimen exhibits a touch of softness on the central reverse, with lustrous orange-gold surfaces that show only minor contact marks. Population: 6 in 61, 5 finer (5/12). (#7766)

4719 **1854 MS63 PCGS. CAC.** Minor clash marks appear in the fields of this frosty and lustrous Select Mint State piece that exhibits brilliant yellow surfaces. Population: 44 in 63, 30 finer (6/12). (#7769)

AU53 1856-C Quarter Eagle

4720 **1856-C AU53 NGC.** Orange and butter-gold toning encompasses this briefly circulated and unabraded rare date quarter eagle. The obverse has a typical strike, while the reverse impression is above average for the Charlotte facility. Very scarce, since the mintage of 7,913 pieces was given little if any numismatic attention until decades later. (#7778)

1856-C Quarter Eagle, MS61
A Lower Condition Census Example

4721 **1856-C MS61 NGC. Variety 1.** Only 7,913 pieces were struck of the 1856-C quarter eagle, and of that low number only 95-125 individual coins are believed extant today. The 1856-C ranks third rarest in the series in overall rarity and fourth rarest in condition rarity. This piece is grouped with several other MS61 coins in the lower range of the Condition Census. The surfaces are bright yellow-gold, and the usual shallow planchet problems are evident on each side. The strike details are soft, as expected. Identifiable in the future by a short diagonal mark across the brow of Liberty and a shallow scrape in the field between stars 7 and 8. (#7778)

1856-O Two and a Half Conditionally Rare MS62 Tied With One Other at PCGS

4722 **1856-O MS62 PCGS. CAC. Variety 2.** The New Orleans Mint, in its antebellum heyday, struck only 21,100 examples of the 1856-O quarter eagle, a denomination that was unloved and neglected in favor of the half eagle and (after 1849) the double eagle throughout much of its history. San Francisco, in only its third year of operation, also struck 1856-S quarter eagles for the first time since opening, and managed to best New Orleans by a margin of more than 3 to 1. Whether these comparative mintages were an early sign of the increasing decrepitude that would overtake the Southern mint by the early 20th century, or merely an indication of the continuation of the hard-money tradition of the Old West that began a few years earlier with the Gold Rush of 1849, is not readily known today. Nonetheless, 1856-O quarter eagles are quite elusive in Mint State; the average certified survivor is about AU. PCGS has certified precisely two pieces in MS62 including this piece, and the other example we handled more than a decade ago in our Exclusively Internet Auction #21043, lot 3407, where it realized $10,000.

From the photo, we believe the present coin represents the second MS62 PCGS example. The surfaces have an original, pleasing orange-gold color with an extremely sharp strike. The date has the Slanted 5 style typical of late-1850s coinage. There are no mentionable marks on either side of this conservatively graded piece. (#7780)

4723 **1857 MS63 PCGS.** Primarily reddish-gold with occasional iridescence and a very few marks. This boldly shining coin offers immense eye appeal for the grade assigned. Population: 19 in 63, 22 finer (5/12).
Ex West Palm Beach Signature (Heritage, 6/2006), lot 1831. (#7782)

4724 **1857-O AU58 NGC.** A single die pair is known from the low mintage of 34,000 pieces. A sharply struck representative with sun-gold color and distributed minor field marks. Luster brightens protected areas.(#7784)

Select Mint State 1857-O Quarter Eagle Significant Condition Rarity

4725 **1857-O MS63 NGC. Variety 1.** Sole dies. The 1857-O is a challenging but largely unappreciated Coronet quarter eagle issue. The mintage of 34,000 pieces does not attract immediate attention, but the attrition rate for this issue was extremely high. AU examples are scarce; Mint State, rare. This is a solid Select Uncirculated piece. The eagle's leg shows the diagnostic striking weakness common to all known 1857-O quarter eagles, yet the obverse has above-average detail. The coin has bright yellow-gold color with a coppery area hovering over the shafts of the arrows. An area of planchet roughness is noted in the right obverse field. Census: 7 in 63, 2 finer (6/12). (#7784)

1858-C Quarter Eagle, XF45
Variety 1, the Only Die Pair

4726 **1858-C XF45 PCGS. Variety 1.** The only die pair identified for 1858-C quarter eagles. This Choice XF specimen has lovely lemon-yellow surfaces, retaining considerable luster with frosty surfaces. The orange toned rims show minor ticks on each side, especially at 10, 12, and 2 o'clock on the obverse. (#7787)

1859 Quarter Eagle, MS63
Low-Mintage New Reverse Type

4727 **1859 New Reverse, Type Two MS63 PCGS.** The New Reverse introduced in 1859 featured smaller letters and arrow heads than the Old Reverse type. This well-detailed Select specimen is brightly lustrous, with light greenish-gold surfaces. Only 39,364 quarter eagles were struck at the Philadelphia Mint in 1859. Population: 12 in 63, 4 finer (6/12). (#7788)

1860-C Variety 1 Two and a Half, VF35
Last Charlotte Quarter Eagle

4728 **1860-C VF35 PCGS. CAC. Variety 1.** The only known die marriage. Only 7,400 Charlotte quarter eagles were minted in 1860, the final year of the denomination at that Mint. This Choice VF specimen has hints of green on its pleasing yellow surfaces with minor imperfections of little consequence. (#7792)

4729 **1861 Old Reverse, Type One AU50 PCGS. CAC.** The 1861 quarter eagle with the Old Reverse was not discovered until 1976, and the issue is much more elusive than the New Reverse type. This well-detailed AU specimen is lustrous and lightly marked, with light orange-gold surfaces.(#97794)

4730 **1861 New Reverse, Type Two MS64 NGC.** The New Reverse quarter eagles of 1861 are more available than the Old Reverse pieces, but the near-Gem grade of the present example is seldom surpassed. Frosty orange-gold luster complements surfaces that show good eye appeal and few abrasions. The strike is incredibly sharp, perhaps just shy of full on a couple of the star radials. NGC has seen 24 finer (6/12).(#7794)

4731 **1861 New Reverse, Type Two MS64 NGC. CAC.** Minimal marks appear on each side of this frosty and lustrous Choice Mint State piece that exhibits pleasing light yellow surfaces. NGC has certified a mere 24 finer pieces (6/12).(#7794)

4732 **1862 AU53 PCGS.** Light yellow surfaces show substantial luster with reflective fields suggesting that this was an early strike showing full mirrors when it was minted. Both sides are nicely detailed with excellent eye appeal. Population: 8 in 53, 51 finer (6/12). (#7796)

1862 Two and a Half, AU58
Rich, Deep Reddish Patina

4733 **1862 AU58 NGC.** The 1862 quarter eagle is considerably scarcer than its mintage of 98,543 pieces. The obverse fields are brightly reflective, but none is observed on the reverse. Each side displays deep, rich reddish patina, indicative of an uncleaned coin. Sharply struck, a few small abrasions are scattered over each side. (#7796)

1863-S Quarter Eagle, Choice XF
Low-Availability S-Mint Issue

4734 **1863-S XF45 NGC.** The 1863-S is a scarce and all-too-often overlooked S-mint quarter eagle. Only 10,800 pieces were struck, and it is infrequently offered at public auction. This Choice XF has bright surfaces with considerable reddish patina over each side, and noticeable traces of mint luster can still be seen around the devices. Lightly marked, except for a couple of larger scrapes in the obverse field. (#7799)

4735 **1866-S AU53 NGC.** Slightly weak at the centers as usual, this example has light yellow surfaces with minimal handling marks and a generous quota of satin luster. Census: 19 in 53, 51 finer (6/12). (#7804)

1869-S Two and a Half, MS61
Low-Mintage Conditional Rarity

4736 **1869-S MS61 NGC.** Only 29,500 1869-S quarter eagles were minted, and few survive in Mint State grades as the issue served its purpose in commerce. The average certified grade is just XF45. Scattered surface marks on each side limit the grade of this lustrous specimen. Both sides have satiny yellow luster with strong design definition. Census: 8 in 61, 4 finer (6/12). (#7810)

1870-S Quarter Eagle, Sharp MS63
Among the Finest Known

4737 **1870-S MS63 PCGS.** The 1870-S quarter eagle undoubtedly shines in part due to the reflected light from its illustrious cousin, the fabulously rare 1870-S three dollar gold. The 1870-S quarter eagle is in an entirely different class, of course, but it is as close as most collectors will ever get to the 1870-S three. The mintage of the quarter eagle was 16,000 coins, and today examples are unavailable any finer than MS64, a level where PCGS and NGC have each certified only one piece. In MS63 this coin is one of two at PCGS, with another single example at NGC. This piece is extremely well-struck for an issue that is usually seen with a weak strike, and deep luster prevails over orange-gold surfaces that lack mentionable distractions. An impressive example of this difficult Old West issue. Population: 2 in 63, 1 finer (5/12). (#7812)

1875 Quarter Eagle, AU55
A Classic 19th Century Rarity

4738 **1875 AU55 NGC.** The 1875 quarter eagle is well-known, even beyond collectors of rare 19th century gold. The mintage was a paltry 400 pieces. Its scarcity is such that copper dies trial strikings (Judd-1434) have been gilt to simulate a high-grade 1875 two and a half. A couple of dozen pieces exist in all grades with very few finer than Choice AU. Predictably, most circulation strikes display prooflike or semiprooflike fields, as the initial die polish never had a chance to dim. This is a sharply defined piece whose fields show the expected flash. Numerous small abrasions are peppered over each side, but the only mark of (possible) significance is a short scrape above the upper arrow. (#7822)

4739 **1877-S MS62 NGC.** Strong golden luster with peach overtones. This well-defined and lightly abraded coin has a copper spot almost exactly on the eagle's eye. Census: 56 in 62, 14 finer (6/12). (#7827)

1877-S Quarter Eagle, MS64
Fully Struck, Bright Mint Luster

4740 **1877-S MS64 NGC.** The 1877-S is one of the more available S-mints from this era, even though only 35,400 pieces were struck. Lower grade Uncirculated coins available, but better-grade examples are seldom offered. NGC has only certified three other pieces in this grade with two finer (6/12). This sharply struck example has bright, sparkling mint luster and there are only a couple of shallow marks on the obverse that prevent an even higher grade. (#7827)

4741 **1878 MS64 PCGS.** A fully brilliant Choice Mint State specimen, this frosty example shows delightful pink luster. The strike is typical, showing weakness on the eagle's left facing leg. PCGS has certified 39 finer examples (6/12).(#7828)

1879 Two and a Half, Boldly Struck MS65

4742 **1879 MS65 PCGS.** The 1879 quarter eagle, minted to the extent of 88,960 pieces, was struck during an era when the Mint's priorities lay elsewhere, namely on double eagle and silver dollar production. This Gem is one of only 10 so graded at PCGS, with six finer (6/12). The surfaces display rich orange-gold luster amid swirling mint frost. There are essentially no distractions in terms of contact marks, and the strike is bold save for minor weakness below the shield on the reverse. (#7830)

4743 **1886 MS61 PCGS.** A scattering of minor marks explains the grade on this lustrous yellow-gold 1886 two and a half, which benefits from a good strike and bold luster. The mintage was a low 4,000 circulation strikes. Population: 10 in 61, 34 finer (6/12). (#7838)

4744 **1893 MS64 PCGS. CAC.** A fully struck near-Gem with booming luster and pale peach toning. Close to pristine but the market grade is limited by tiny mint-made strike-throughs. Housed in a green label holder.(#7845)

4745 **1894 MS62 NGC. CAC.** A boldly defined Liberty quarter eagle from a low mintage of only 4,000 business strikes. This piece has brilliant yellow surfaces with reflective fields, presenting exceptional eye appeal.(#7846)

4746 **1897 MS65 NGC.** A few scattered dark specks are noted with a small area of greenish verdigris on the reverse of this frosty and fully lustrous pink-gold quarter eagle.(#7849)

4747 **1898 MS66 NGC.** One of just 24,000 pieces struck. Difficult at the Premium Gem level and elusive any finer. Pleasing luster rests on the peach-gold surfaces of this sharply struck specimen. Well preserved throughout. Census: 48 in 66 (1 in 66+), 32 finer (6/12). (#7850)

Fully Struck 1901 Quarter Eagle, MS67
Repunched Final 1 in Date

4748 **1901 MS67 PCGS. CAC.** Repunched 1 in date. The 1901 quarter eagle is renowned for excellent production values that are on ample display on this Superb Gem, which boasts a full strike, impeccable surface preservation, and lustrous greenish-gold surfaces. As a bonus for variety collectors, repunching is obvious on the bottom of the final 1 in the date. Population: 9 in 67, 1 finer (6/12). (#7853)

4749 **1907 MS65 NGC.** This brilliant light yellow Gem has sharp design motifs and pleasing surfaces that show only trivial, microscopic marks. An excellent opportunity for a date or type collection.(#7859)

PROOF LIBERTY QUARTER EAGLES

1887 Quarter Eagle, PR64 Cameo
One of the Finest of This Low-Mintage Date

4750 **1887 PR64 Cameo NGC.** The recorded proof quarter eagle mintage was 122 pieces in 1887, a year in which only a meager 6,160 business strikes were made. Despite — or because of — the considerable proof production, it is likely that a good number were melted or otherwise destroyed. Garrett and Guth estimate that only 40 to 50 survive still. The present near-Gem Cameo example shows excellent eye appeal and good contrast over the yellow-gold surfaces. The fields show some orange-peel effect, and the strike is meticulously detailed throughout both sides. There is little evidence of contact beyond a couple of tiny marks on Liberty's chin. Census: 6 in 64 Cameo, 8 finer (6/12). (#87913)

1898 Quarter Eagle, PR61+

4751 **1898 PR61+ NGC. CAC.** Although both sides of this proof quarter eagle exhibit light hairlines and trivial contact marks, the fields are fully mirrored and the boldly detailed devices are lustrous, with light cameo contrast evident on the orange-gold surfaces. This attractive example survives from a mintage of only 165 proofs. (#7924)

Glittering PR64 ★ Ultra Cameo 1900 Quarter Eagle

4752 **1900 PR64 ★ Ultra Cameo NGC.** While NGC's *Census Report* lists 48 certification events for Ultra Cameo proof 1900 quarter eagles, just six of those events received the Star designation (6/12). While this piece has the lowest technical grade of the six, its Star is a testament to its amazing arm's-length eye appeal. Even by Ultra Cameo standards, the contrast is intense and the reflectivity profound. Though both sides show evidence of light contact and a thin line passes just to the left of Liberty's nose, this specimen retains solid all-around display quality and is particularly suited to reverse-up display. (#97926)

1901 Quarter Eagle, Select Proof Brilliant and Crisply Defined

4753 **1901 PR63 PCGS.** This Select example of a mintage of only 223 pieces is one of the last proof dates of the Liberty Head series. Subtly frosted devices appear to float on the deeply mirrored yellow-gold fields. Careful search will find one or two minute contact marks that determine the grade but this coin is thoroughly appealing. Population: 17 in 63, 40 finer (5/12). (#7927)

1905 Quarter Eagle, Slightly Contrasted PR64

4754 **1905 PR64 PCGS.** The 1905 had a lower mintage of 144 proofs, and probably no more than 75-85 individual pieces are extant today. This date is usually not seen with cameo contrast, as with most post-1901 dates. However, this coin displays slight contrast on each side. Apparently there is not enough to persuade PCGS to designate it as a Cameo coin, but knowing it is slightly contrasted gives the collector added value in this near-Gem proof. The yellow-gold surfaces have just the slightest overlay of reddish patina, and there are no obvious or mentionable contact marks on either side. Population: 22 in 64, 30 finer (5/12). (#7931)

Gem Proof 1906 Quarter Eagle

4755 **1906 PR65 NGC.** The penultimate proof Liberty quarter eagle issue saw an official mintage of 160 pieces, though repeated resubmissions have made the certified population data all but useless in determining actual rarity. Nonetheless, it is clear that Gem and better survivors are hard to come by. This PR65 specimen has only a touch of contrast on its gold-brilliant obverse, though the reverse has a significant cameo effect to go with the small coppery areas in the upper right reverse field. Excellent preservation is best appreciated under magnification. An all-around great coin. (#7932)

1907 PR66 Ultra Cameo Quarter Eagle Among the Finest of This Late-Date Issue

4756 **1907 PR66 Ultra Cameo NGC.** The 1907 is the final year of issue for the Liberty type. However, it is not the most frequently encountered proof date. As Akers points out, "that honor goes to the 1900 and 1901." The mintage was 154 pieces. Of that number it seems an inordinately high percentage was saved. There are obviously a high number of resubmissions for the 1907 because if the non-Cameo, Cameo, and Deep/Ultra Cameo coins are added together they exceed the mintage by more than 50 coins! This is a deeply mirrored, glassy proof that displays strongly contrasting cameo devices. The surfaces are essentially perfect. On the reverse there are two interesting small patches where the die was unpolished: to the left of the eagle's neck and just right of the D. Census: 1 in 66 Ultra Cameo, 2 finer (5/12). (#97933)

INDIAN QUARTER EAGLES

4757 **1908 MS65 NGC.** Traces of green appear on the lustrous yellow surfaces of this boldly defined, satiny Gem. NGC has only certified 63 finer examples of this first year Indian quarter eagle (6/12). (#7939)

1908 Indian Two and a Half, MS66
Wonderful First-Year Type Coin

4758 **1908 MS66 NGC.** A spectacular Premium Gem example from the first year of the Indian design, this impressive coin displays vivid reddish-gold surfaces, with a few hints of lilac, and vibrant mint luster. The design elements are well-detailed, but the eagle's wing feathers show the often-seen softness at the top. Census: 60 in 66, 3 finer (6/12). (#7939)

4759 **1910 MS63 NGC. CAC.** A pleasing Select Mint State 1910 quarter eagle, this example is fully brilliant with satiny yellow luster and pleasing surfaces.(#7941)

4760 **1910 MS64 NGC.** A lovely near-Gem, this NGC certified 1910 quarter eagle has brilliant yellow surfaces and satin luster. Minor grade-consistent marks appear primarily on the obverse with a dark toning spot on the reverse.(#7941)

Antique-Gold Gem 1910 Quarter Eagle
Notably Unmarked Surfaces

4761 **1910 MS65 NGC.** Even under a loupe the surfaces are virtually unperturbed on both sides of this Gem quarter eagle, an available issue up to this level but scarcely seen finer. Some planchet flowlines are the most visible feature under magnification, but the Indian's cheek is notably unmarked. The strike is well-executed over antique-gold surfaces. NGC has seen only 12 numerically finer submissions (6/12). (#7941)

4762 **1911-D Weak D — Improperly Cleaned — NGC Details. AU.** The mintmark is faint but its outline and (especially) its interior are evident when studied beneath a lens. This key date quarter eagle is bright from cleaning and has mildly granular borders. (#7954)

1911-D Indian Quarter Eagle
Strong D

4763 **1911-D Genuine PCGS.** The PCGS number ending in .92 suggests Cleaning as the reason, or one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an XF specimen that has been cleaned. This low-mintage issue is avidly collected in all grades and conditions. Aside from its unnaturally bright sheen, this coin remains an attractive example of this key date.

1911-D Quarter Eagle
Strong D Mintmark

4764 **1911-D — Surface Damage — Genuine PCGS.** The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has myriad surface marks on its lustrous yellow surfaces.

Choice AU Key Issue 1911-D Quarter Eagle

4765 **1911-D AU55 NGC.** This low-mintage key gives the collector an opportunity to acquire an '11-D with just a bit of friction for a fraction of what a Select Uncirculated example would cost. The surfaces are bright, and each side is peppered with numerous small abrasions; the only mentionable marks are below the motto in the right reverse field. The mintmark is faint but clearly recognizable. (#7943)

1911-D Quarter Eagle, Choice AU
Strong Mintmark, Rich Reddish Patina

4766 **1911-D Strong D AU55 PCGS.** Just the slightest trace of high point friction can be seen. The surfaces retain significant portions of mint luster, and each side is covered with deep reddish-gold patina. The mintmark is notably strong as are the rest of the design elements. Minimally abraded, especially for the grade. (#7943)

Near Mint 1911-D Indian Quarter Eagle
Key to the Series

4767 **1911-D AU58 NGC.** The 1911-D is the rarest Indian quarter eagle, and collectors prize examples of this date in all grades and conditions. This attractive near-Mint specimen is well-detailed and shows only the slightest trace of wear on the pleasing greenish-gold surfaces. Bright mint luster adds to the considerable eye appeal. (#7943)

1911-D Quarter Eagle, AU58
Bold Mintmark

4768 **1911-D AU58 NGC.** Only a trace of wear visits the high points of this attractive near-Mint example, with trivial marks on each side. The strike is bold with the mintmark especially sharp on this piece. Multiple examples in the present sale, like most of our auctions, provides bidders with a choice of grades. (#7943)

Mint State 1911-D Quarter Eagle
Mattelike and High-End for the Grade

4769 **1911-D MS61 NGC.** The present 1911-D quarter eagle in MS61 might be just the ticket to spur some fortunate bidder into entering a new collecting arena, the completable Indian Head two and a halves minted from 1908 through 1929. The set comprises just 15 issues, including three from Denver, but only the 1911-D is a notable challenge in Mint State. This mattelike example shows a bold mintmark and lots of eye appeal for the grade on antique-gold surfaces with lilac tinges. A diagonal scrape through the Indian's mouth and into the field is the grade limitation, but there are few marks elsewhere. (#7943)

Select Mint State 1911-D Quarter Eagle
Famed Five-Figure Mintage

4770 **1911-D MS63 PCGS. CAC.** The 1911-D quarter eagle is a famous prize in its series regardless of grade. While many collectors will accept an XF or AU example in an otherwise Mint State set, this Select piece should appeal to those set-finishers who would prefer not to compromise on quality. The overall detail on the figures is strong, as only the lowest pendant on the necklace shows appreciable weakness. Broadly shimmering luster is yellow-to-orange with a peach tinge in the fields and a small coppery area at the portrait's cheekbone. Scattered light abrasions determine the grade but have scant effect on the all-around eye appeal. (#7943)

1911-D Quarter Eagle, MS64
Strongly Defined Mintmark

4771 **1911-D Strong D MS64 PCGS. CAC.** The 1911-D quarter eagle merits its well-deserved reputation as the sole key in one of the most completable U.S. gold sets of the "classic era," ending in 1933. The complete Indian Head quarter eagle set comprises 15 issues, 12 from Philadelphia and three from Denver, but except for the 1911-D, they mostly trade as type coins until the middle Mint State grades are reached. The old adage, "Buy the keys first," is both applicable and easily achievable in relation to this popular series. The insert indicates the mintmark is strong, but the other details on each side are equally well defined. The yellow-gold surfaces are bright and lustrous with no mentionable or noticeable abrasions. (#7943)

Near Gem1911-D Quarter Eagle
Strongly Struck Overall, Terrific Mint Luster

4772 **1911-D Strong D MS64 PCGS. CAC.** The 1911-D quarter eagle is not conspicuously rare when compared to its low-mintage counterparts in the Indian half eagle and eagle series, but it is conspicuous *simply because all other quarter eagle issues are so much more easily obtained*. The mintage of the 1911-D quarter eagle was meager at 55,680 pieces. The very availability of the remainder of the quarter eagle issues makes the 1911-D especially desirable, as the only noteworthy obstacle to completing the entire set. This issue is especially rare and valuable in MS64 and better grades. The importance of a piece such as this one is its ability to match with other pieces in a complete collection. As mentioned, the other issues are relatively easy to acquire in, say, MS64 condition. However, an MS64 1911-D requires a significant outlay of cash in order to maintain uniformity of a set. This is an especially attractive example that displays thick mint frost over each side and pronounced reddish-gold color. There are no noticeable marks on either side and the strike is strong throughout with unusually bold definition on the mintmark. (#7943)

4773 **1912 MS63 NGC. CAC.** A beautiful caramel-gold representative that boasts coruscating luster and an even strike. Marks are essentially absent except for a couple of faint lines near the chin. Housed in a former generation holder.(#7944)

MS64 1912 Quarter Eagle
Pale Reddish-Gold Color

4774 **1912 MS64 NGC.** Pale reddish-gold color complements excellent but subtle luster on this relatively unmarked near-Gem. The Indian's cheek is unmarked, and only a few tiny field scrapes make this piece appealing and seemingly high-end for the assigned grade. The population thins out markedly at the Gem level, where NGC has seen only 60 submissions less duplicates (6/12). (#7944)

1912 Indian Quarter Eagle, MS64
Underrated Early Series Issue

4775 **1912 MS64 NGC.** The 1912 Indian quarter eagle is the fourth rarest issue of the series, in both absolute terms and number of high-grade specimens known. This attractive Choice example displays sharply detailed design elements and lustrous green and rose-gold surfaces. No mentionable distractions are noted. (#7944)

4776 **1912 MS64 PCGS.** The 1912 Indian quarter eagle is a better date in the series, especially in high grade. This sharply detailed Choice example displays lustrous orange-gold surfaces, with highlights of lilac.(#7944)

4777 **1914 MS62 NGC.** Faint hairlines and trivial marks appear on each side of this satiny Mint State 1914 quarter eagle. Typical examples seen today are circulated, or in the lowest Mint State grades, with an average certified grade of just MS60.(#7946)

1914 Indian Quarter Eagle, MS63
Second-Rarest Series Issue Behind 1911-D

4778 **1914 MS63 NGC.** Because it is a P-mint many collectors overlook the 1914 quarter eagle, which is the second-rarest Indian Head overall and among the rarest in high grades as well. This Select example shows deep, dazzling reddish patina with hazel accents in the recesses, splendid eye appeal. The Indian's cheek and obverse field show only a few tiny marks, and a planchet indent appears above the headdress in the field below RT, perhaps Mint-made, perhaps not. (#7946)

Choice 1914 Indian Two and a Half
Colorful, Original Surfaces

4779 **1914 MS64 NGC.** From a mintage of 240,000 pieces, the 1914 Indian quarter eagle is the second-scarcest date of the series. This well-detailed Choice example displays pleasing greenish-gold surfaces, with orange and lilac highlights and vibrant mint luster. Few signs of contact are evident, unusual for this issue, which is often seen with scattered abrasions. (#7946)

4780 **1914-D MS63 PCGS.** Wispy bluish toning appears on the frosty yellow-gold surfaces of this sharply defined Select Mint State Denver quarter eagle.(#7947)

4781 **1914-D MS63 PCGS. CAC.** Distinctive rims are a characteristic of all 1914-D quarter eagles, easing authentication. This Select Mint State piece has brilliant yellow surfaces and sharp design elements with frosty luster.(#7947)

1914-D Quarter Eagle, MS64
Elusive in Finer Grades

4782 **1914-D MS64 NGC.** This highly lustrous Choice Mint State Denver quarter eagle, one of only three Indian quarter eagles issued at that Mint, exhibits brilliant and frosty yellow-gold surfaces and bold design motifs. NGC and PCGS have each certified 40 finer examples of this issue (6/12). (#7947)

Near Gem 1914-D Quarter Eagle
Rarest Series Issue in Gem Condition

4783 **1914-D MS64 PCGS.** Michael Fuljenz ranks the 1914-D quarter eagle third-rarest overall in his recently published reference on Indian Head gold coins, calling it the rarest at the Gem level. This near-Gem shows deep orange-red color with excellent luster and only a few tiny marks, mostly confined to the reverse, that preclude the coveted Gem level. PCGS has seen only 32 submissions in 64+ and 40 finer (6/12). (#7947)

MS64 1914-D Two and a Half
Seldom Seen in Gem Grade

4784 **1914-D MS64 NGC. CAC.** The 1914-D quarter eagle is available at the near-Gem level but seldom seen finer, making it one of the scarcest overall members of the series in high grade. This MS64 piece shows ample luster over attractive orange-gold surfaces with a bold strike. Some minor planchet roughness and a few small marks, consistent with the grade, are confined to the reverse. (#7947)

1914-D Quarter Eagle, MS64+
Third-Scarcest Issue in the Series

4785 **1914-D MS64+ PCGS. CAC.** The 1914-D is the third-scarcest issue in this short, completable series. Most of the problems encountered by collectors usually revolve around softness of strike and excessive abrasions. This is an evenly struck example that exhibits bright cartwheel luster and minimal marks for the grade (as indicated by the Plus designation). The yellow-gold color has a slight reddish tinge. Exceptional quality. (#7947)

4786 **1915 MS64 NGC.** A lovely near-Gem, this Indian quarter eagle has brilliant orange-gold surfaces with frosty luster and only a few scattered marks.(#7948)

4787 **1925-D MS64 NGC.** This near-Gem 1925-D shows why it is such a popular choice for type purposes, with a strong mintmark, bold strike, and mattelike antique-gold surfaces that are relatively unabraded, save for a small patch of scrapes on the reverse in front of the eagle that collectively preclude a Gem grade. (#7949)

4788 **1925-D MS64 PCGS. CAC.** This is what an MS64 should look like, with frosty light yellow surfaces, splashes of deeper yellow toning, minimal marks, and brilliant luster.(#7949)

4789 **1926 MS64 PCGS. CAC.** A sharply detailed Choice example of this popular type issue, with pale rose-gold surfaces that radiate frosty mint luster. Only minor contact marks are present, and visual appeal is quite strong.(#7950)

4790 **1927 MS64+ PCGS. CAC.** This high-end Choice specimen is an excellent balance of quality and value in an issue that can be easily located in lower Mint State grades, but is conditionally rare in grades above the Gem level. The present coin displays sharply detailed devices and lustrous green and rose-gold surfaces. (#7951)

4791 **1928 MS64 NGC.** This frosty Choice Mint State Indian quarter eagle has brilliant straw-gold luster with scattered, grade-consistent marks.(#7952)

4792 **1929 MS64 PCGS.** Hints of green appear on each side of this brilliant and frosty yellow-gold example. A pleasing Choice Mint State piece, destined for a complete Indian quarter eagle collection or U.S. gold type set.(#7953)

4793 **1929 MS64+ NGC. CAC.** An exceptional near-Gem, this final year of issue Indian quarter eagle exhibits sharp details and frosty yellow luster with a few small copper spots on the reverse. (#7953)

PROOF INDIAN QUARTER EAGLE

Superb Gem Proof 1914 Quarter Eagle
The Penultimate Issue

4794 **1914 PR67 NGC.** The 1914 proof quarter eagle has a significantly lower mintage compared to the year before; only 117 proofs were produced, against 165 for the 1913 coins. Garrett and Guth write:

> "The Philadelphia Mint again revised the matte Proof process for 1914 quarter eagles, using a darker, coarser sand-blast finish than seen on the 1912 to 1913 issues. The microscopic facets are larger than seen in prior years, and thus the reflectivity is less noticeable."

The prevailing coloration on this PR67 specimen is greenish-tinged yellow-gold, enhancing fine-grained surfaces that exhibit no noticeable contact marks. The surfaces are not perfect, but their only imperfection lies in a Mint-made flaw: On the right side of the reverse, through the TR in TRUST, one can detect a curious, raised diagonal planchet lamination into the right field below, an unusual feature on a proof gold coin. Census: 12 in 67, 4 finer (5/12). *Ex: ANA Signature (Heritage, 7/2008), lot 1917.* (#7963)

THREE DOLLAR GOLD PIECES

1854 Three Dollar, MS62
Reddish-Gold Surfaces

4795 **1854 MS62 NGC.** This honey-gold example is sharply struck though the left border of the hair shows minor incompleteness. No marks are worthy of comment for the designated grade. Luster dominates the borders and covers the devices. A single-year design subtype identified by small letters in DOLLARS. (#7969)

1854-O Three Dollar, AU53
Low-Mintage Southern Gold Type

4796 **1854-O AU53 NGC. Variety 2.** The lapped die state of this desirable issue, the only New Orleans emission of the three dollar denomination. Just 24,000 pieces were struck, though a number appear to have been saved despite the high face value. Most survivors are in XF and AU grades. The present wheat-gold example is generally smooth with a few wispy marks near the date and the occasional mint-made obverse strike-though on the obverse margin. (#7971)

Mint State 1855 Three Dollar
Appealing Second-Year Example

4797 **1855 MS61 NGC.** The surfaces are antique-gold with lots of original appeal and strictly no trace of rub, and it is perhaps only the somewhat muted luster and a few light field hairlines that preclude a higher Mint State grade. The mintage of the 1855 three was only a fraction that of the 1854, about 40% as many. (#7972)

1855 Three Dollar Gold, MS62
Generous Luster on Yellow-Gold Surfaces

4798 **1855 MS62 NGC.** Generous luster proceeds from yellow-gold surfaces on each side of this nicely preserved MS62 1855 three dollar gold. The reflective fields are faintly prooflike, and it takes a loupe to reveal the scattering of minor marks, mostly on the reverse, that preclude an even finer grade. Census: 62 in 62, 57 finer (6/12). (#7972)

4799 **1856-S XF45 NGC.** Small S. The 1856-S three dollar issue, at 34,500 pieces, was by far the largest of the few S-mint productions in the series, leaving it a popular choice for mintmark type collectors. This Choice XF example boasts sharp eye appeal over lightly abraded yellow-gold surfaces with some semiprooflike reflectivity around the peripheral devices. The reverse is noticeably rotated, about 30 degrees counterclockwise.(#7975)

Choice AU 1856-S Three Dollar
Better Small S Mintmark

4800 **1856-S AU55 NGC.** Ex: South Texas Collection. Small S, and scarce as such. The present lightly circulated San Francisco three has bright luster across the legends, wreath, and headdress. The sun-gold surfaces are unmarked aside from wispy abrasions near DOLLARS. Wear is evident on the high points of Liberty's curls. (#7975)

Near-Mint 1856-S Three Dollar

4801 **1856-S AU58 PCGS.** Medium S. Minor rub on Liberty's hair confirms a brief encounter with Old West commerce. Minimally abraded except for faint marks on the lower reverse. San Francisco threes are scarcer than their Philadelphia Mint cousins. Population: 32 in 58, 10 finer (6/12). (#7975)

Choice AU 1857-S Three Dollar
Heavily Circulated Issue

4802 **1857-S AU55 NGC.** Just 14,000 three dollar gold pieces were struck in San Francisco in 1857, but even those odd-denomination pieces saw heavy use in the West Coast economy. This Choice AU example is among the fortunate few to show little wear. A strong peach overtone enriches still-lustrous yellow surfaces. Census: 31 in 55, 11 finer (5/12). (#7977)

4803 **1859 AU55 NGC.** This orange-gold pre-Civil War three dollar should see much bidder interest, with most of its luster remaining over orange-gold surfaces that show few marks of any import. A nice coin for the grade.(#7979)

4804 **1860 — Obverse Rim Damage — NGC Details. Unc.** A sharp but small scrape has damaged the very edge of the coin, past the dentils and biting slightly into the edge-reeding at 3:30 on the obverse, and the scrape extends through the dentils and into RIC on the obverse. The central reverse is hairlined. Some charcoal-gray patina appears mostly on the reverse, but otherwise this coin is yellow-gold with good mint luster and the appearance of a mid-Mint State three. Personal inspection is recommended on this piece.

1860 Three Dollar Gold Piece, MS62
Only 7,036 Pieces Minted

4805 **1860 MS62 PCGS.** With the solitary exception of 1858, all Philadelphia Mint three dollar gold pieces from the 1850s had mintages greater than 15,000 coins. Beginning in 1860, and continuing through the end of the series in 1889, only two Philadelphia issues had mintages greater than half that amount. The 7,036 coin mintage in 1860 was the largest of all those issues through 1889, excepting 1874 and 1878. This lovely piece has brilliant yellow luster with frosty surfaces and trivial marks. The design definition is bold, save for the ribbon bow on the reverse. Population: 29 in 62, 31 finer (6/12). (#7980)

1860-S Three Dollar Gold Piece, AU53
Final Commercial Issue at San Francisco

4806 **1860-S AU53 PCGS. CAC.** This is the last of only four three dollar gold pieces coined in San Francisco for commercial use. That facility produced a later example in 1870 and the 1870-S is unique. This 1860-S survives from a mintage of 7,000 coins, exhibiting hazel toning over orange-gold luster on the obverse. The reverse combines orange- and yellow-gold, with considerable luster. Population: 9 in 53, 18 finer (6/12). (#7981)

Choice AU 1865 Three Dollar
Low-Mintage Civil War Issue

4807 **1865 AU55 PCGS.** At the end of the Civil War, the Philadelphia Mint produced a mere 1,140 business strikes of the 1865 three, and examples are rare in all grades. This yellow and honey-gold example has reflective fields with excellent eye appeal. Population: 11 in 55, 25 finer (6/12). (#7986)

4808 **1866 XF45 NGC.** A low mintage issue, the 1866 three dollar gold piece has a production of just 4,000 business strikes. This Choice XF example has satiny light yellow surfaces with wispy lavender toning near the borders.(#7987)

4809 **1868 AU55 NGC.** Only 4,850 business strikes were produced, with this piece typical of survivors, the issue having an average certified grade of 56. Both sides have lovely honey-gold surfaces with light blue overtones.(#7989)

1868 Three Dollar Gold Piece, AU58
Only 4,850 Business Strikes Minted

4810 **1868 AU58 NGC.** Scattered marks are evident on each side of this lovely near-Mint specimen, with brilliant yellow luster and excellent eye appeal. The strike is typical, with weakness on the ribbon bow. A significant number survive from the 4,850 coin business strike mintage in 1868. However, that number is insufficient to serve the collector base for this denomination. (#7989)

Select 1874 Three Dollar
Reflective Canary-Yellow Surfaces

4811 **1874 MS63 PCGS.** Beautiful eye appeal is the result of canary-yellow surfaces with reflective prooflike fields. A loupe reveals a few minor ticks and some planchet roughness, as made, neither of which detracts significantly from the strong appeal. The 1874 three dollar is a choice of many type collectors as one of the three largest mintages of the series. (#7998)

4812 **1878 AU58 NGC.** The 1878 three dollar gold piece is one of the most available dates of the series, and a favorite choice of type collectors. This lightly circulated example displays well-detailed design elements with lustrous greenish-gold surfaces. (#8000)

Near-Gem 1878 Three Dollar
Lustrous Type Coin

4813 **1878 MS64 PCGS.** The 1878 three dollar is the last of the Big Three type issues within the series, produced in the generous amount of 82,304 business strikes. Deep, mellow orange-gold coloration is the hallmark of this MS64 example, with a paucity of marks, large or small, and thorough luster. (#8000)

1878 Three Dollar Gold Piece, MS65
Excellent Type Candidate

4814 **1878 MS65 PCGS. CAC.** The second highest mintage in the entire three dollar gold series from 1854 to 1889 occurred in 1878, when 82,304 business strikes were coined. Only 10 issues had mintages of more than 10,000 coins, illustrating the rarity of the denomination. This lustrous example is one of just 250 pieces that PCGS has certified in MS65 or finer grades, including only 70 higher grade pieces (6/12).

Both sides are fully lustrous with radiant mint frost and brilliant yellow surfaces showing a hint of orange toning near the borders and light green in the fields. The strike is a trifle weak on the ribbon bow, but all other details are strong. A highly attractive example for an advanced collection or type set. (#8000)

Premium Gem 1878 Three Dollar
Only Four Numerically Finer Coins at PCGS

4815 **1878 MS66 PCGS.** The 1878 three dollar, sporting a generous mintage exceeding 82,000 circulation strikes, is the most common date of the series. Even Gem examples can be located without too much difficulty. The certified population drops significantly at the Premium Gem level, however, and higher-grade specimens are extremely elusive.

The present MS66 coin displays rich, even reddish patination over both sides and is well-struck. It exhibits the finish peculiar to three dollar gold pieces with a mixture of cartwheel luster and semiprooflike reflectivity. Refreshingly free from abrasions, as expected for the grade. An excellent example for a high-grade type collection. Housed in a green label holder. Population: 64 in 66, 4 finer (5/12). (#8000)

4816 **1879 AU53 PCGS.** Only 3,000 three dollar gold pieces were struck in 1879, and some of them may have been melted at the Mint in later years. This attractive AU53 specimen offers semiprooflike surfaces and lightly worn design elements, with only minor contact marks in the fields.(#8001)

1879 Three Dollar Gold, MS63
Only 3,000 Pieces Struck

4817 **1879 MS63 PCGS.** The mintage of three dollar gold coins in 1879 was limited to just 3,000 business-strikes and 30 proofs. Fortunately, a number of Mint State specimens were saved, and the date is not extremely difficult to locate in high grade. This well-detailed Select specimen displays prooflike greenish-gold surfaces. (#8001)

1879 Three Dollar Gold, MS63+
Low-Mintage Date With Prooflike Surfaces

4818 **1879 MS63+ PCGS. CAC.** Only 3,000 three dollar gold pieces were struck in 1879, as the Mint realized there was no commercial demand for this odd denomination. It is likely that some of the mintage was never distributed and was destroyed in later years. This high-end Select specimen exhibits well-detailed design elements and prooflike yellow-gold surfaces. (#8001)

1880 Three Dollar, MS64
Always-Popular Date, Only 1,000 Minted

4819 **1880 MS64 PCGS. CAC.** The 1880 is one of the scarcest and most highly sought after dates in the three dollar series. Only 1,000 pieces were struck for circulation, but a substantial number are known today as contemporary collectors and the general public recognized the absolute rarity of a coin with a mintage this low. This piece does not have the often-seen deeply mirrored fields that resemble a proof. Instead it looks like many other well-preserved threes with a combination of bright, semiprooflikeness in the fields and cartwheel luster. Each side has beautiful mint luster with a significant presence of reddish patina and occasional streaks of lilac. The only mark of note is in the obverse field below the O in OF. Population: 68 in 64 (2 in 64+), 19 finer (6/12). (#8002)

4820 **1882 XF45 NGC. CAC.** Wispy bluish toning appears on the light yellow surfaces of this Choice XF. Low mintage issues such as the 1882 abound in the three dollar gold series, providing collectors with quite a challenge.(#8004)

1882 Three Dollar, AU53
Only 1,500 Pieces Minted

4821 **1882 AU53 PCGS.** Despite a low mintage, the 1882 is a rather common issue today, as few actually entered circulation. However, this issue is certainly scarcer than many others, and examples are infrequently encountered. A couple dull scratches appear on each side, but the surfaces retain considerable light yellow luster with satiny fields. (#8004)

Select 1882 Three Dollar
Starkly Contrasted Surfaces

4822 **1882 MS63 PCGS.** PCGS does not use the Prooflike designation on business strike gold, or else the present coin would undoubtedly be certified as such. The fields are mirrored and void of bagmarks, though we know the coin was struck from commercial dies, since the 2 is widely repunched, unlike on the rare proofs. Sharply struck and very scarce in unquestioned Mint State. Population: 38 in 63 (1 in 63+), 37 finer (5/12). (#8004)

1882 Three Dollar Gold, MS66
Immaculate Preservation, Abundant Appeal

4823 **1882 MS66 PCGS. CAC.** Premium Gem three dollar gold pieces of any stripe are conditionally rare, regardless of date. This 1882 three in MS66 is one of a string of low-mintage dates from 1879-1889 that concluded the series — 1,500 business strikes, in this case. If one examines the PCGS *Population Report*, that service has certified 164 submissions of the three dollar gold denomination in MS66, including all dates and mintmarks. Several dozen of those are the common 1878 issue, without which the number in MS66 of all dates shrinks to 103 submissions (and including duplicates). For the 1882 specifically, this piece, certified in a PCGS green-label holder, is one of three submissions in MS66, with two finer in MS67 (5/12).

The surfaces are deep reddish-orange with faint traces of lilac, sharply struck and ultimately pleasing, displaying complete, engaging mint luster on both sides and nothing other than immaculate preservation and abundant eye appeal. As with all known circulation strikes of this date, the present example shows vestiges of an earlier 2 above the subsequent, correctly aligned 2. This coin bears serious consideration for a fine gold type set. (#8004)

1884 Three Dollar, MS62
Bright Semiprooflike Fields

4824 **1884 MS62 NGC. CAC.** As expected from an issue with such a low mintage, the fields are bright and reflective. Business strikes of this date can be differentiated from proofs by the presence of a short spine in the denticles above the AT in STATES. A few small abrasions are scattered over each side, but none are worth individual mention. (#8006)

Choice 1884 Three Dollar Gold
Rare Low-Mintage Date

4825 **1884 MS64 PCGS.** The 1884 three dollar gold coin boasts a tiny mintage of only 1,000 pieces, all delivered on December 13, 1884. There was little demand for the coins, other than as Christmas gifts, and it is likely that some examples were melted at a later date. Harry Bass considered the 1884 the rarest business-strike date of the series in terms of total number of pieces known, but a few dates are more difficult to locate in high grade.

The present coin is a well-detailed Choice specimen, with copper-gold surfaces that show only minor signs of contact. The fields display prooflike reflectivity in most areas. Housed in a green label holder. Population: 26 in 64, 7 finer (5/12). (#8006)

1887 Three Dollar, MS63
Highly Lustrous, Colorful Surfaces

4826 **1887 MS63 PCGS.** Near the end of the series, mintages dwindled down to nearly nothing. For example, just 6,000 business strikes were produced in 1887, and that was actually the highest annual production from 1879 to 1889. This example has light yellow luster and above average design definition, with lovely pale orange peripheral toning. (#8009)

1888 Three Dollar, Semiprooflike MS61+

4827 **1888 MS61+ NGC.** Numerous wispy abrasions and a few small digs affect this three dollar gold piece from the denomination's penultimate issue, yet the overall preservation and eye appeal are better than a "flat" MS61 coin. Softly struck but with prominently reflective fields that are pale yellow-gold. (#8010)

Select 1888 Three Dollar Gold
Strong Mint Luster and Visual Appeal

4828 **1888 MS63 NGC.** The 1888 three dollar gold piece is easier to locate than its small mintage of just 5,000 pieces would suggest. Fortunately for present-day numismatists, turn-of-the-century collector George Earle preserved many three dollar coins that he found in banking channels. This attractive Select example is well-detailed and brightly lustrous, with outstanding eye appeal. (#8010)

Choice 1888 Three Dollar Gold
Vibrant Mint Luster

4829 **1888 MS64 PCGS.** The 1888 three dollar gold piece is one of the more available dates of the late series, despite its small mintage of 5,000 pieces. Coin dealers like J.W. Scott purchased many examples from the Mint, and sold them to collectors for many years. This well-detailed, brightly lustrous Choice example possesses outstanding eye appeal. (#8010)

1889 Three Dollar, MS65
Frosted Mint Luster

4830 **1889 MS65 NGC.** Only 2,300 circulation strikes were produced in this final year of this curious denomination. And of that already low number many were never released, leaving an unknown number actually distributed in December 1889. This coin lacks the often-seen semiprooflikeness of many dates in the series; instead the finish is frosted with coruscating mint luster that is more akin to that seen on 1878 threes. The mint luster has taken on a lovely reddish tinge with faint traces of lilac also present. The strike is unusually sharp with strong definition over each side. Problem-free throughout. Census: 15 in 65, 8 finer (6/12). (#8011)

PROOF THREE DOLLAR GOLD PIECES

1883 Three Dollar Gold, PR58
Only 89 Pieces Struck

4831 **1883 PR58 PCGS.** A lovely proof, one of just 89 minted at Philadelphia in 1883, this piece has light high-point rub to prevent a higher grade. However, it is quite attractive, with brilliant yellow and orange proof surfaces. The fields are fully mirrored with light cameo contrast. Population: 2 in 58, 37 finer (5/12). (#8047)

1888 Three Dollar, PR64
Richly Patinated, Brightly Reflective

4832 **1888 PR64 PCGS.** The proof 1888 is scarcer than generally understood. The *Guide Book* reports a proof mintage of 291 pieces, but PCGS and NGC combined have certified just 231 pieces in all grades (5/12). Much of that quantity undoubtedly represents resubmissions over the past 26 years, particularly from PCGS to NGC in attempts to secure Cameo designations. The present piece does have noticeable contrast, particularly on the obverse, but it remains housed in the green label holder where it has resided since the 1990s. It has Breen's diagnostic, a patch of die rust on the neck seen on all 1888 proofs. Attractively toned orange-gold with the deepest shades near the rims. Gorgeously smooth despite a slender, faint grease streak (as made) near the D in UNITED. Population: 26 in 64, 40 finer (5/12).
Ex: FUN Signature (Heritage, 1/2009), lot 4027. (#8052)

1799 BD-4 Half Eagle, MS62
Rare Variety
Probably the Finest Known

4833 **1799 Small Stars Reverse MS62 NGC. Breen-6435, BD-4, R.7.** Both dies are perfect with no lapping, clash marks, or die cracks, apparently as always, and the reflective fields suggest an early strike from newly prepared dies. In *Early U.S. Gold Coin Varieties, A Study of Die States 1795-1834,* John Dannreuther described two die states, perfect or with reverse clash marks. He further suggested that a terminal die state with later reverse die damage should exist. Indeed such a coin does exist, as an example of BD-4 with two retained cuds on the reverse appeared as lot 2260 in the Bowers and Merena March 2003 auction.

Only 10 to 12 examples of this variety are known, according to Dannreuther, although the cataloger believes that fewer pieces actually exist, finding just eight auction records over the past 30 years, including an earlier appearance of the present specimen. Since the 1993 beginning of our Permanent Auction Archives, we have offered 46 1799 half eagles of all varieties and grades, and this is the first appearance of BD-4 in any of our sales.

When this piece was handled in 1989, at the same time that the first Bass gold sale was being prepared, and with both Bass specimens available for side-by-side study, the present cataloger wrote: "This is apparently a very rare variety with most examples well circulated. In fact, this example, which is nicer than either in the Harry W. Bass, Jr. Collection, may be finest known for the die marriage."

The possible status as finest known of the variety remains unchanged. Minor surface abrasions are confined to the open areas of the obverse and reverse fields. The brilliant green-gold surfaces and reflective fields of this lovely specimen host delicate splashes of pale orange toning. The present offering represents an incredible opportunity for the advanced early half eagle specialist.

Ex: Walter H. Childs Collection (Bowers and Merena, 8/1999), lot 689. (#8081)

1803/2 Half Eagle, XF Details
BD-3 Variety

4834 **1803/2 — Improperly Cleaned — NGC Details. XF. BD-3, R.4.** The BD-3 variety is characterized by the position of the 3 in the date (not touching the bust) and the position of a star pointing to the lower eagle's beak on the reverse. This still-attractive example retains much original detail and exhibits only minor contact marks. (#8084)

Original 1807 Bust Left Half Eagle
BD-8, MS64, John Reich Redesign

4835 **1807 Bust Left MS64 NGC. BD-8, R.2.** Bass-Dannreuther Die State b/b, clashed on the obverse where the curve of the eagle's wing shows, crack from rim to left of star 13 to hair. The first-year Bust Left obverse is the same for the rare BD-7 and the far more available BD-8. The reverse for the BD-8 shows the flag of the 5 in the denomination slightly left of the fletchings.

It is the very commonness of this variety and its status as a first-year coin design that make it so important for type collectors, and seldom seen in so fine a grade. When John (Johann Matthias) Reich joined the Mint as assistant engraver in 1807, he was tasked with redesigning American coinage — a slap in the face of the enfeebled chief engraver, Robert Scot. Reich turned first to the workhorse gold and silver denominations of U.S. commerce, the half eagle and half dollar, respectively. This near-Gem boasts exemplary orange-gold surfaces with greenish tinges near the rims. There are no overt marks, although a few planchet adjustment marks appear through Liberty's profile and at the lower left obverse rim, and correspondingly at the upper left reverse to a far lesser degree. Generous luster remains on each of this original coin. For first-year-of-type collectors, this piece represents an offering of real significance. (#8101)

Late-State 1810 Small Date, Tall 5 Half Eagle, BD-1, MS64

4836 **1810 Small Date, Tall 5 MS64 NGC. BD-1, High R.3.** Bass-Dannreuther Die State c/c. Numismatists who specialize in early U.S. gold probably realize it, but others may not — the Small/Large Date and Small/Large/*Tall* 5 half eagles dated 1810 do not form a neat, nifty little 2x2 matrix, hence the Tall 5 appellation as the odd man out. In reality, BD-1 1810 Small Date, Tall 5 is a die pairing that is unique to 1810, although the reverse would be reused in 1811. The BD-2 half eagles of 1810 combine a *different* Small Date obverse with a Small 5 reverse, and the BD-3 and BD-4, respectively, combine a third 1810 obverse of the Large Date style with Small 5 and Large 5 reverses. (In other words, in BD shorthand, these four die pairings are 1-A, 2-B, 3-B, and 3-C for BD-1 through BD-4.)

This frosty orange-gold near-Gem shows few overt mark on either side. A thin scrape runs under Liberty's eye to her cap, and a small copper spot appears at star 6. Planchet adjustment marks are confined to the reverse rim and scarcely visible within the shield, none on the obverse. The Tall 5 variety is easily recognized by the three shortened dentils beneath the number, where the punch actually *struck* the dentils, as John Dannreuther points out. The reverse die was reusable for 1811, even in spite of the cracks and die lumps that had formed. A beautiful example of this interesting and unusual variety. (#8106)

CLASSIC HALF EAGLES

4837 **1834 Plain 4 AU50 PCGS. Second Head, Breen-6502, McCloskey 2-B, R.3.** A scarcer die pair from the first year of Classic coinage. This sun-gold representative has peach-red patina in design recesses. The mildly bright surfaces display only minor marks save for a horizontal line above the eagle.(#8171)

4838 **1834 Plain 4 AU55 NGC. Second Head, Breen-6502, McCloskey 2-B, R.3.** This peach-gold representative displays considerable luster on the motifs and margins. The strike is good aside from the forehead curls, and no marks are worthy of description.(#8171)

4839 **1834 Plain 4 AU55 PCGS. First Head, Breen-6501, McCloskey 3-B, R.1.** A prooflike and crisply struck orange-gold Choice AU half eagle with minimally marked and luminous surfaces. The Classic type is more plentiful than its predecessors since its bullion content remained above face value until the 1860s. (#8171)

4840 **1834 Plain 4 AU58 PCGS. Second Head, Breen-6502, McCloskey 4-C, R.2.** A lemon-gold near-Mint Classic half eagle whose unmarked appearance and ample bright luster provide impressive eye appeal. A good strike overall with slight softness on the E in LIBERTY and the horizontal shield lines. (#8171)

Uncirculated 1834 Classic Half Eagle Plain 4, First Head

4841 **1834 Plain 4 MS61 PCGS. First Head, Breen-6501, McCloskey 3-B, R.1.** Bright luster illuminates the motifs and borders of this sharply struck and minimally abraded Mint State Classic type coin. A late die state with vertical cracks beneath the eye and neck curls. A reduction in tenor allowed the Classic designs to remain in circulation, unlike their rarer predecessors. (#8171)

1834 Crosslet 4 Classic Five, AU53 Seldom Found at This Grade Level

4842 **1834 Crosslet 4 AU53 NGC. Second Head, Breen-6503, McCloskey 5-D, R.4** The Crosslet 4 variety is estimated to be ten times scarcer than its Plain 4 counterpart. In addition to an absolute rarity it is also conditionally scarce. Fewer than two dozen pieces have been certified in mint condition and this is a very pricey coin in Uncirculated, even if one could be found. A pleasing AU, such as this piece, is a find for the knowledgeable Classic half eagle collector. Slight portions of mint luster can still be seen around the peripheral devices. There are no detracting marks on either side and slight reddish patina outlines the yellow-gold centers. (#8172)

4843 **1835 XF45 PCGS. First Head, Breen-6504, McCloskey 1-B, R.3.** Luster brightens design elements of this straw-gold Choice XF Classic half eagle. No marks are remotely relevant and the strike is consistent throughout.(#8173)

4844 **1835 — Improperly Cleaned — NGC Details. Unc. First Head, Breen-6504, McCloskey 1-A, R.2.** This well struck honey-gold Classic half eagle displays vibrant luster on the motifs and borders but the fields are hairlined and somewhat bright.(#8173)

1835 Classic Five, MS61
First Head, McCloskey 1-B

4845 **1835 MS61 NGC. First Head, Breen-6504, McCloskey 1-B, R.3**. The obverse shows minor clash marks behind the letters of LIBERTY, and around the ear, all from the shield. The reverse has delicate die cracks around the arrows, including two parallel cracks that join the lower arrowheads. Although both sides show myriad marks, they are mostly inconsequential. The surfaces are bright yellow with full frosty mint luster. A splendid specimen. (#8173)

4846 **1836 AU58 NGC. Second Head, Large Date, Breen-6509, McCloskey 6-E, R.4.** Well struck on the major devices though the peripheral stars are incompletely brought up. There are no relevant marks and ample bright luster is evident on the eagle and margins. (#8174)

1838 Classic Head Half Eagle, AU58
Large Arrows, Small 5 Variety

4847 **1838 AU58 NGC. CAC. Large Arrows, Small 5, McCloskey 1-A.** Only the slightest traces of circulation show on this attractive, near-Mint half eagle, from a mintage of 286,588 pieces. Mingled green and orange-gold hues accent the surfaces, which retain much original mint luster. A few star centers are weak, but the design elements are sharply detailed in other areas. (#8176)

1838-D Classic Five, VF25
The Only D-Mint in the Classic Series

4848 **1838-D VF25 PCGS. CAC. Variety 1-A, McCloskey 1-A, R.3** The 1838-D is one of the keys to the Classic five series, and is avidly pursued in all grades. This is an especially nice coin for the grade. The high points of the design show even wear from side to side, and there are no obvious or detracting abrasions.
From The Old Holder Collection. (#8178)

1838-D Classic Head Five, AU53
Important Mintmark Type Issue

4849 **1838-D AU53 PCGS. CAC. Variety 1-A, McCloskey 1-A.** The 1838-D is always popular as the first half eagle, and the only example of the Classic Head type, to be produced at the Dahlonega Mint. The surviving population numbers no more than 300-350 examples in all grades. This lightly circulated copper-gold specimen is sharply detailed in the centers, but a little softness shows on the peripheries. Population: 20 in 53, 40 finer (6/12). (#8178)

LIBERTY HALF EAGLES

4850 **1840-C VF35 NGC. Variety 2.** This early Charlotte Mint half eagle is from a measly mintage of 18,992 pieces. The typically struck yellow-gold surfaces are minimally abraded though a slender strike-through is noted near the mintmark and a speck of translucent debris is near star 5.(#8196)

Choice XF 1841-C Half Eagle
Strong Central Detail, Vivid Color

4851 **1841-C XF45 PCGS. CAC. Variety 1.** From a mintage of 21,467 pieces, the 1841-C is one of the more available early C-mint half eagles, with an estimated surviving population of 125-150 examples in all grades. This well-detailed Choice XF specimen displays lustrous orange-gold surfaces, with only minor abrasions. Housed in a green label holder. Population: 17 in 45, 43 finer (6/12).
From The Old Holder Collection. (#8203)

4852 **1842-D Small Date — Improperly Cleaned — NGC Details. AU.** Olive-gold overall with golden-brown luster in design crevices. Cloudy from hairlines but nicely detailed. The Small Date and Large Date varieties divide a Dahlonega mintage of less than 60,000 pieces.(#8210)

Choice XF 1843-C Half Eagle

4853 **1843-C XF45 PCGS. Variety 2.** A sun-gold representative of this scarcer Charlotte issue. The curls and the eagle's neck and fletchings are softly brought up but bright luster outlines stars and letters and fills the vertical shield lines. Lightly abraded overall with a few minor thin marks near the left (facing) wing. Population: 20 in 45, 40 finer (6/12). (#8214)

4854 **1843-D Medium D VF30 NGC.** Golden-brown toning visits the borders of this otherwise olive-gold Dahlonega type coin. The wings are richly detailed though Liberty's hair is worn. Marks are inconsequential save for an obverse rim nick at 3 o'clock. (#8215)

1844-D Half Eagle, AU50
Semiprooflike Fields

4855 **1844-D AU50 NGC. Variety 11-H.** Doug Winter estimates that only 38 to 43 survivors exist in this grade range. Boldness of strike is seen in the well-detailed devices and luster surrounds the reliefs. Light yellow-gold semiprooflike fields are peppered with numerous small abrasions. Given the minuscule number of Mint State examples existing of this Dahlonega date, this coin may be close to the highest grade accessible. (#8221)

4856 **1844-O XF45 PCGS. Variety 3.** Five different die pairs are confirmed. This butter-gold No Motto half eagle is well defined and moderately abraded. An original example of a collectible New Orleans issue.
From The Color Collection.(#8222)

4857 **1845 AU58 NGC. CAC.** Reflective fields are evident on both sides of this lightly worn near-Mint specimen. The devices offer an above average strike for the issue. Faint hairlines and trivial surface marks are inconsequential.(#8223)

Well-Struck 1845-D Five, AU58

4858 **1845-D AU58 PCGS. Variety 12-I.** This nearly Uncirculated Dahlonega example has a sun-gold obverse and a honey-gold reverse. Well struck by the standards of the branch facility, and the luminous surfaces are unabraded save for two hair-thin vertical marks near the left border of Liberty's neck. Population: 23 in 58, 18 finer (6/12). (#8224)

1845-O Half Eagle, AU50
Variety 1, the Only Dies

4859 **1845-O AU50 NGC. Variety 1.** The only variety known for 1845-O half eagles, featuring a delicately repunched 8 in the date. The large O mintmark is tilted slightly to the left. This attractive specimen has light greenish-yellow surfaces with ample remaining luster and slight field reflectivity on each side. Myriad marks on each side are entirely trivial. (#8225)

4860 **1846-C Fine 12 PCGS. CAC.** Deep apricot toning visits this rare and low mintage Charlotte half eagle. Lightly abraded for the grade with only a few hair-thin marks on the upper reverse field worthy of mention. Certified in a green label holder.
From The Old Holder Collection.(#8227)

4861 **1846-D XF45 NGC. Variety 14-I.** This Choice XF Dahlonega type coin displays rich orange toning and has pleasing sharpness for the grade. Small marks are distributed but none merits singular description.
Ex: FUN Signature (Heritage, 1/2007), lot 5846, which realized $2,300.(#8228)

4862 **1847 MS61 PCGS.** The PCGS insert states "RPD 7/7" since the top of the 7 in the date is repunched. Unlisted in *Cherrypickers'*, although four other MPD or RPD varieties for the 1847 are in that popular reference. This is a well struck canary-gold No Motto type coin with clean surfaces and bountiful luster on the borders and devices.(#8231)

1847 Half Eagle, Misplaced Date, MS62

4863 **1847 MS62 PCGS. FS-304.** A coruscating sun-gold example that lacks the surface marks usually present for the grade. Several repunched or misplaced date varieties are known for 1847 half eagles. The present MPD variety is undesignated on the holder but shows the foot of a 1 protruding from the bust tip. Struck from moderately rotated dies. Population: 42 in 62, 24 finer (6/12). (#8231)

4864 **1847-C — Obverse Graffiti — NGC Details. AU.** Sole known dies. The initials AW are pinscratched on the left obverse field, and the field behind Liberty's neck has an additional two pinscratches. Otherwise, a crisply struck and attractive green-gold example of a scarce Charlotte issue.(#8233)

4865 **1847-D XF40 NGC. Variety 16-M.** Orange-tinged luster enriches much of this typically struck and lightly circulated XF Dahlonega half eagle. Void of consequential contact. A good choice for a quality but affordable type example from the legendary Georgian facility.(#8234)

Choice XF 1849-D Half Eagle
Only 125-250 Pieces in All Grades

4866 **1849-D XF45 NGC. Variety 22-L.** Four die pairs are confirmed despite a mintage of fewer than 40,000 pieces. This caramel-gold Dahlonega five has its share of glimmering luster within design elements. We note minor rim dings at 2:30 on the obverse and 4 o'clock on the reverse. (#8242)

4867 **1850-C VF35 NGC. CAC. Variety 4.** This die pair is sometimes designated as a Weak C by the third party services. The mintmark is fully outlined and easily seen beneath a loupe, but its low relief makes it faint to the unaided eye. A canary-gold Charlotte five with smooth luminous surfaces and mahogany-red toning in design recesses.(#8244)

Elusive AU55 1850-D Half Eagle

4868 **1850-D AU55 NGC. Variety 24-P.** A sun-gold example of a collectible yet scarce Dahlonega type issue. The luminous surfaces are lightly abraded except for a single curved line on the lower cheek. Luster dominates the devices and reverse periphery. NGC has certified only four pieces as Mint State. Census: 32 in 55, 26 finer (6/12). (#8245)

1850-D Five Dollar, AU58
Scarce in High Grades

4869 **1850-D AU58 NGC. Variety 24-P.** Even though 43,984 pieces were struck from two die marriages, the 1850-D is a scarce coin in all grades and especially so in AU and mint condition. Only 40-50 pieces are estimated extant in AU, and a paltry 4-5 pieces in Uncirculated. This near-Mint example represents excellent value. The bright orange-gold surfaces retain significant portions of mint luster around the devices and there are no obvious or detracting abrasions, unlike most examples examined. The mintmark is lightly punched in but fully apparent, requiring no imagination to see. (#8245)

Popular XF45 1851-D Half Eagle

4870 **1851-D XF45 PCGS. Variety 26-R.** This luminous butter-gold Dahlonega half eagle lacks mentionable marks and has the expected light strike on the curls and fletchings. The '51-D is scarcer than the '52-D through 54-D but is nonetheless often selected as a type representative by Southern gold collectors. Population: 22 in 45, 47 finer (6/12). (#8248)

Originally Toned XF45 1853-C Five

4871 **1853-C XF45 PCGS. CAC. Variety 1.** Rich orange, olive, and gunmetal toning embraces this sharply struck and unblemished Choice XF Charlotte half eagle. The patient buyer may locate a higher graded example, but finding a more original coin would be a truly arduous task. The usual dies for the '53-C, though two other rare marriages are known. (#8254)

4872 **1853-C AU50 NGC. Variety 3.** The rare "Weak C" reverse with the mintmark above the E in FIVE. The C is fully outlined but has low relief and appears faint to the unaided eye. However, the Weak C merits a premium as it is much more elusive than Variety 1. The present yellow-gold piece has smooth surfaces and is softly impressed near the E in LIBERTY.(#8254)

1853-D Five Dollar, AU53
A Bright, Well-Struck D-Mint Type Coin

4873 **1853-D Large D AU53 PCGS. Variety 29-V.** This Large D coin is part of the most frequently encountered of all Dahlonega fives. Starting with a mintage of 89,678 pieces, it is estimated that 275 to 325 (or more) examples are known today. Most are in VF-XF condition, but AU and even Mint State pieces are occasionally encountered for the type collector. This bright yellow-gold coin has slightly reflective fields and minimal abrasions, except for a few light field marks to the right of the eagle's right (facing) wing. Well struck overall.
From The Old Holder Collection. (#8255)

Scarce 1854-C Five, XF45

4874 **1854-C XF45 NGC. Variety 2.** This reverse variety is sometimes certified as a "Weak C," although the entire outline of the low relief mintmark is apparent. The engraver lightly but evenly punched the mintmark into the working die. The present Charlotte Mint example is yellow-gold overall with golden-brown remaining luster and traces of dark patina in protected areas. (#8257)

Scarce AU55 1854-D Half Eagle
Large D Mintmark

4875 **1854-D Large D AU55 NGC. Variety 31-X.** This wheat-gold better grade Dahlonega half eagle is well struck at the borders and on the shield. The curls and fletchings show softness. Luster beckons from the margins and motifs. Free from any remotely relevant marks despite its brief stint in Georgian antebellum commerce.
Ex: FUN Signature (Heritage, 1/2006), lot 5196. (#8258)

4876 **1855-D Medium D VF35 PCGS. Variety 32-W.** A charming orange-gold example with only a single mentionable mark, a vertical line on the lovelock. Wear is moderate though the curls and eagle's neck are softly defined due to the strike. There are two varieties of '55-D fives, the Medium D and Large D. The Medium D is much more prevalent, but PCGS has nonetheless certified most examples with the Large D PCGS number.(#98263)

4877 **1856-D — Cleaning — Genuine PCGS. XF Details.** Like many Dahlonega half eagles, the present coin has been brightened to remove debris and make the remaining luster more conspicuous. The eagle's extremities and Liberty's curls show a typical strike though the stars are crisp. No marks are evident on either side. (#8268)

1858 Five Dollar, MS64
Low-Mintage No Motto Issue

4878 **1858 MS64 PCGS.** A rare issue and the first year in a twenty-year run of scarce, low mintage half eagles from the Philadelphia Mint. The mintage of this difficult No Motto five dollar was a mere 15,136 pieces and it is very elusive in all grades, but especially so in mint condition. This is a clean, well-balanced coin that is sharply defined in all areas and shows light reddish color on each side. Noticeable striations in the obverse fields are indicative of an early die state. *Ex: Central States Signature (Heritage, 5/2000), lot 7656; Philadelphia 2000 Signature (Heritage, 8/2000), lot 7250.* (#8276)

1858-C Half Eagle, AU55
Elusive Variety 2

4879 **1858-C AU55 NGC. Variety 2.** The mintmark is centered over the left upright of the E in FIVE on this rare variety, and it is centered over the right top of the V on the more plentiful Variety 1. This Choice AU example has numerous grade-consistent marks on its light yellow surfaces with faint greenish overtones. (#8277)

4880 **1858-D VF30 PCGS. Variety 35-DD.** This low mintage Dahlonega half eagle has surprisingly sharp definition on the wings for the VF30 grade. The curls are typically struck, but the caramel-gold surfaces are minimally abraded. Housed in an old green label holder.(#8278)

1858-D Half Eagle, AU53
Variety 35-DD

4881 **1858-D AU53 NGC. Variety 35-DD.** A single obverse die was combined with two reverse dies, and Reverse DD has a prominent die line through the T in UNITED. This attractive AU example has traces of light green on its brilliant yellow surfaces with delicate rose peripheral toning. Census: 9 in 53, 77 finer (6/12). (#8278)

4882 **1859-C — Improperly Cleaned — NGC Details. XF.** A single die pair is known for this late Charlotte issue. The present lot is a bit bright from cleaning but lacks obtrusive marks. The eagle and portrait are typically impressed while peripheral elements have sharp definition.(#8281)

Choice XF 1859-C Five

4883 **1859-C XF45 PCGS.** An orange-gold Choice XF representative of this scarce Charlotte issue. The obverse has a crisp strike but the eagle is less defined, as usual for the '59-C. No marks are remotely relevant though we note a shallow strike-through beneath the O in OF. Population: 27 in 45, 56 finer (6/12). (#8281)

Medium D 1860-D Half Eagle, AU53

4884 **1860-D Medium D AU53 PCGS. Variety 38-FF.** Ample luminous luster accompanies design recesses of this straw-gold late date Dahlonega half eagle. Nicely struck for the remote Georgian facility, though the curls and neck plumage are incompletely impressed. The surfaces are without any consequential marks. (#8286)

4885 **1861-C — Mount Removed — NGC Details. XF.** Smoothing and tooling on the obverse at 3 and 9 o'clock indicate prior use as jewelry. Bright from cleaning but an affordable example of this rare final year Charlotte issue. Actual circulation is limited though the strike is soft on the eagle's neck and fletchings.(#8289)

1867-S Half Eagle, Choice XF
Challenging in Finer Grades

4886 **1867-S XF45 NGC.** Myriad small surface abrasions pepper the surfaces on each side of this Choice XF 1867-S half eagle, produced to the extent of only 29,000 pieces in postbellum San Francisco. This piece clearly did duty in the West of the era. We also note a couple of small rim cuts. Census: 24 in 45, 28 finer (6/12). (#8314)

4887 **1869-S XF45 NGC.** Luster shimmers from the legends of this untoned Choice XF example. The obverse field is moderately abraded. A meager 31,000 pieces were struck, since West Coast merchants and bankers preferred the greater accounting convenience of the double eagle. Census: 24 in 45, 46 finer (6/12). (#8318)

1869-S Five Dollar, AU53
Scarce in High Grades

4888 **1869-S AU53 NGC.** The 1869-S five dollar is elusive in grades above XF. The bright yellow-gold surfaces on this lightly circulated example are accented by reddish patina around the margins and the peripheral devices are encircled by mint luster. Numerous small field marks are scattered over each side. Census: 8 in 53, 28 finer (6/12). (#8318)

1870 Half Eagle, AU58
Only Two Finer at PCGS

4889 **1870 AU58 PCGS.** This pleasing near-Mint specimen has reflectivity in the protected areas close to the design elements, with trivial marks in the fields as expected. The 1870 is an elusive issue that had a mintage of only 4,000 business strikes and another 35 proofs. The typical surviving specimen, and there are few, grades less than AU. This example ranks high in the PCGS data. Population: 2 in 58, 2 finer (6/12). (#8319)

4890 **1870-S XF40 PCGS. CAC.** An impressive display of delicate blue, rose, and violet toning appears on light yellow surfaces with traces of luster still visible on each side of this pleasing example. This issue began with a low mintage and nearly all of those coins entered circulation. Few survive today. Population: 11 in 40, 35 finer (6/12). (#8321)

4891 **1871-CC Fine 15 PCGS. Variety 1-A.** Rich orange toning encompasses this circulated and moderately hairlined rare date Carson City half eagle. The stars and left (facing) wing are surprisingly detailed. A mere 20,770 pieces were struck. Housed in a green label holder.(#8323)

Choice AU 1871-S Five Dollar
Only 25,000 Pieces Struck, Few Survive

4892 **1871-S AU55 NGC.** With only five examples of this scarce, low-mintage S-mint five dollar certified in Uncirculated condition, this Choice AU is a logical alternative for the collector. The surfaces are bright yellow-gold with slight reflectivity in the fields and minimal abrasions. Sharply struck, except on the center of the eagle. (#8324)

1872-CC Five, XF40
Low-Mintage Carson City Date

4893 **1872-CC XF40 PCGS. CAC. Variety 1-B.** Of the 16,980 pieces struck of the 1872-CC five, only 70-80 examples are believed known today in all grades, most of which are in VF condition. This reddish tinted example has even wear over the high points and remarkably few abrasions for the issue. The only defect of note is a diagonal scratch above the mint mark. (#8326)

Condition Rarity AU50 1872-CC Half Eagle

4894 **1872-CC AU50 PCGS. Variety 1-B.** The more accessible of two varieties recognized by the standard text, showing the mintmark lower in its exergue. Neither variety is particularly accessible, however, and the 1872-CC half eagle as a whole is a condition rarity in AU and better. While this AU50 representative has typically soft detail through the interior high points, actual wear is surprisingly minimal, as evidenced by the generous remaining luster that swirls through the apricot-laced yellow-gold fields. A pinscratch to the left of Liberty's chin precludes a finer grade within the adjectival category. Population: 10 in 50, 13 finer (6/12). (#8326)

1872-S Five Dollar, AU58
Very Scarce, Especially in High Grades

4895 **1872-S AU58 NGC.** Very few examples survive today of the 1872-S, especially in AU, which is generally the finest grade obtainable. Only three pieces have been certified (all by NGC) in mint condition. This is a lovely reddish-golden example that displays slight reflectivity in the fields and a strong strike, except on the eagle's neck and upper arrow fletchings, as usual. Only five pieces have been so graded by NGC (6/12). (#8327)

Fine 1873-CC Half Eagle
Rare Early Carson City Issue

4896 **1873-CC Fine 12 PCGS. Variety 2-A.** The rarer of the two confirmed die varieties, distinguished by a high and wide Carson City mintmark. Just 7,416 pieces were struck and they circulated heavily since the median grade at PCGS is VF25. The present example displays wear on the curls and right (facing) wing but the orange-gold and steel-gray surfaces lack mentionable marks. (#8331)

Near-Mint 1874 Five
Rare Issue in High Grade

4897 **1874 AU58 PCGS. CAC.** From a tiny mintage of 3,488 pieces, the 1874 Liberty half eagle is scarce-to-rare in all grades. This attractive near-Mint specimen displays well-struck design elements and a scattering of minor abrasions on both sides. The light yellow and rose-gold surfaces show traces of prooflike reflectivity in sheltered areas. Population: 3 in 58, 5 finer (6/12). (#8333)

1874-S Five Dollar, AU50
Unknown in Mint Condition

4898 **1874-S AU50 NGC.** A very rare coin in any grade with only 16,000 pieces struck. This is an evenly worn piece that shows numerous superficial marks and nice, light reddish-gold color. No example of this issue has been graded in Mint State by either of the major services (5/12).
Ex: Long Beach Signature (Heritage, 5/2003), lot 895. (#8335)

Choice AU 1875-S Half Eagle
Rare Low-Mintage Issue

4899 **1875-S AU55 NGC.** From a mintage of just 9,000 pieces, the 1875-S Liberty half eagle is scarce-to-rare in all grades, and high-grade specimens are extremely elusive. This attractive Choice AU example is lightly impressed on the obverse peripheries, but shows bold definition in other areas. The light greenish-gold surfaces retain much original mint luster. Census: 12 in 55, 9 finer (5/12). (#8338)

4900 **1876-S VF20 PCGS.** A problem-free orange-gold example of this rare Centennial issue. Surprisingly sharp for the VF20 level despite a typical strike. Just 4,000 pieces were coined, and none are graded as Mint State by PCGS. Certified in a first generation holder. (#8341)

4901 **1877-S AU53 NGC.** Reflectivity remains in the protected areas of this still lustrous light yellow example that shows design weakness at the upper obverse and lower reverse. Census: 15 in 53, 32 finer (6/12).(#8344)

4902 **1879-CC XF40 NGC. Variety 1-A.** Traces of luster are prevalent across the reverse periphery, and the apricot-gold fields and devices are problem-free. The high points display moderate wear but the center of the eagle is well defined. A challenging and low mintage Carson City issue.(#8349)

4903 **1879-S MS62+ PCGS. CAC.** Although both sides show the usual grade consistent marks, this lovely piece has reflective fields and sharp design elements, with faint rose overtones of lustrous yellow surfaces. Population: 55 in 62 (2 in 62+), 33 finer (6/12). (#8350)

Frosty Gem 1880 Five
One Finer at PCGS

4904 **1880 MS65 PCGS.** Frosty orange-gold surfaces show an original crusty gold look on this Gem 1880 half eagle, a piece that is well-struck and shows no overt marks, even though a few tiny signs of contact are chiefly limited to the obverse. Despite the enormous mintage exceeding 3.1 million coins, this Gem is one of only nine such at PCGS, with a sole MS66 finer (6/12). (#8351)

4905 **1880 MS62 Prooflike NGC.** Although NGC has certified more than 2,500 1880 half eagles, only eight coins carry the prooflike designation, and none are finer than this example. Both sides have bold details with light yellow surfaces. Fully mirrored fields and satin devices create attractive contrast. Census: 2 in 62 Prooflike, 0 finer (6/12).(#78351)

4906 **1880-CC XF40 NGC. Variety 2-C.** A rare die variety with the mintmark located closer to the V in FIVE than the fletchings. A mildly bright tan-gold example with the expected degree of wear on the eagle's plumage and Liberty's hair.(#8352)

4907 **1881-S MS64 PCGS.** This well-detailed Choice specimen displays intense mint luster on the well-preserved surfaces. A few roller marks on Liberty's neck are the only flaws of note. Housed in a green label holder. Population: 94 in 64 (2 in 64+), 3 finer (6/12). (#8357)

4908 **1881-S MS64 PCGS. CAC.** This orange-gold near-Gem is sharply struck and features an exceptionally well preserved obverse. Minor marks on the reverse field are all that preclude an even higher grade. Population: 95 in 64 (2 in 64+), 3 finer (6/12).(#8357)

4909 **1882-CC XF45 NGC.** Just a single die pair is known for the mintage of 82,817 pieces. The present straw-gold representative shows incompleteness of strike on the eagle's neck and fletchings. A trace of aqua patina is noted above the arrowheads. (#8359)

Near-Mint 1882-CC Half Eagle
Unusually Strong Mint Luster

4910 **1882-CC AU58 NGC. Variety 1-A.** The 1882-CC Liberty half eagle claims a mintage of 82,817 pieces, making it an available date in the context of the series and a popular choice of mintmark type collectors. The 1882-CC is slightly scarce at the AU58 level, and Mint State specimens are rare. This well-detailed yellow-gold example displays vibrant mint luster and considerable eye appeal. (#8359)

1882-S Half Eagle, MS65
Important Condition Rarity

4911 **1882-S MS65 NGC.** This example has a mintmark placed low and left, and it is leaning slightly to the left. Nearly 1 million half eagles were minted at San Francisco in 1882, and yet the combined NGC and PCGS census records just 38 Gems and only three finer pieces. This is one of those 38, exhibiting bold design motifs and exceptional surfaces with frosty yellow luster and wispy pink overtones. Census: 28 in 65, 2 finer (6/12). (#8360)

4912 **1883 MS63 PCGS.** An intricately struck and thoroughly lustrous butter-gold example of this lower mintage Philadelphia issue. Only lightly abraded save for a brief slender mark near star 12. Housed in a green label holder. Population: 71 in 63 (3 in 63+), 22 finer (6/12).(#8361)

4913 **1885-S MS65 NGC.** Although quite a few Gems survive from the 1.2 million coin mintage, few finer pieces have been certified including just 15 at NGC (6/12). The present lustrous and high grade piece is toned peach-gold with olive-green margins. (#8368)

4914 **1886 MS64 PCGS.** Virtually full design details are evident on both sides of this Choice Mint State piece. The date is a condition rarity from a substantial mintage but low survival. This example has brilliant light yellow surfaces with frosty luster. Population: 12 in 64, 3 finer (6/12).(#8369)

1888 Five Dollar, MS64
Only One Finer at NGC

4915 **1888 MS64 NGC.** An extremely important Choice Mint State specimen, surviving from a small mintage of only 18,201 business strikes, this 1888 half eagle exhibits frosty orange-gold luster with splashes of pale blue toning on each side. The surfaces host a few scattered marks that limit the grade. Dark toning spots are noted above the eagle's head. Census: 5 in 64, 1 finer (6/12). (#8372)

1890-CC Half Eagle, MS62
Unblemished Surfaces

4916 **1890-CC MS62 NGC.** This minimally abraded Carson City representative is caramel-gold with hints of olive-green. Mint luster is most prominent at the peripheries and on the motifs. Slight incompleteness of strike is confined to the centers. A scarcer issue than its '91-CC successor. (#8376)

Lustrous MS62 1890-CC Five

4917 **1890-CC MS62 NGC. Variety 1-A.** This caramel-gold half eagle displays vibrant luster and a good strike. Unabraded aside from a graze above the arrowheads and an impression of a star on the reverse at 1 o'clock. Faint roller marks (as made) are at the obverse center and tiny strike-throughs (as coined) are on the right obverse and upper reverse. (#8376)

Gem Mint State 1890-CC Half Eagle
Old West Type Coin *Extraordinaire*

4918 **1890-CC MS65 NGC.** With a decent mintage by Carson City gold standards (53,800 pieces) and a relatively sizable Mint State population, the 1890-CC half eagle is a favorite of Old West type collectors. This Gem representative is a gorgeous showcase of the Carson City Mint's capabilities in its last four years of operation. Apricot-laced gold luster has a swirling, slightly frosted quality. Small details such as the strands of Liberty's hair and the eagle's neck feathers are brought up well, if not completely. Just a few tiny marks, including a couple of reed marks below the eagle's left (facing) wing, preclude an even finer designation. Census: 6 in 65, 0 finer (6/12). (#8376)

4919 **1891-CC AU58 NGC. Variety 2-A.** Luster dominates the peripheries of this sharply struck and nearly mark-free Borderline Uncirculated Carson City five. Apricot-gold toning contributes further to the eye appeal.(#8378)

4920 **1891-CC MS62 NGC. Variety 2-A.** The scarcer of the two die pairs known for this Carson City type issue. A boldly struck and satiny almond-gold representative with smooth fields and a single thin vertical mark on the cheek.(#8378)

4921 **1892-CC MS61 NGC.** This minimally abraded and crisply struck Mint State Carson City half eagle is toned light olive-gold with glimpses of rose-red near the rims. Bright luster is abundant although a bit diminished on the open fields.(#8380)

1893-CC Liberty Five, MS63
Only Four Finer Coins at PCGS

4922 **1893-CC MS63 PCGS. Variety 1-A.** Always in demand as the final date of the Carson City series, the 1893-CC Liberty half eagle is rare in MS63 condition. This attractive Select example is sharply detailed, with strong mint luster and pleasing yellow and rose-gold surfaces. Population: 7 in 63, 4 finer (5/12). (#8384)

4923 **1893-S MS64 PCGS.** This lovely Choice Mint State Liberty half eagle is a condition rarity in the series, with PCGS and NGC having a combined population of only nine finer coins. This piece has brilliant lemon-yellow luster with bold design motifs. Population: 28 in 64 (2 in 64+), 3 finer (6/12).(#8386)

4924 **1895-S MS61 NGC.** Deep orange-gold color lends itself to luminous surfaces that show light to moderate abrasions. Well-defined with better eye appeal than the MS61 grade might suggest. Census: 18 in 61, 8 finer (6/12).(#8391)

Select 1895-S Half Eagle
Only Four PCGS Certified, Just Two Finer

4925 **1895-S MS63 PCGS.** This Select Mint State 1895-S half eagle is an important rarity from a mintage of 112,000 coins, and a low survival. The average certified grade of all 1895-S half eagles is just 52. This present piece has brilliant yellow luster with satin surfaces and faint blue peripheral toning. Trivial marks prevent a higher grade. Population: 4 in 63, 2 finer (6/12). (#8391)

4926 **1896 MS64 NGC.** At first glance, this boldly defined half eagle appears to be a Gem, and only close inspection reveals the trivial surface marks that prevent such a grade. Both sides are fully lustrous with brilliant yellow surfaces. Census: 29 in 64, 6 finer (6/12). (#8392)

4927 **1900-S MS64 PCGS. CAC.** The San Francisco Mint struck 329,000 half eagles in 1900. This example, in a green-label holder, is sharply defined with satiny yellow luster and splashes of rose toning, notably on the reverse.(#8401)

.4928 **1900-S MS64 PCGS. CAC.** Among San Francisco Mint half eagles struck from 1897 to 1906, the last 10 years of the design at that facility, only the 1904-S had a lower mintage. This green-label certified Choice Mint State piece has satiny yellow luster with a sharp strike and a few small copper toning spots on the reverse. (#8401)

4929 **1900-S MS64 PCGS. CAC.** PCGS has only certified 623 examples of this issue in all grades, including just 13 pieces finer than MS64 (6/12). This Choice Mint State piece, housed in an older green-label holder, has wisps of blue patina on the high points with a moderate copper spot near star 13. Both sides have the usual quota of trivial marks.(#8401)

4930 **1900-S MS64 PCGS. CAC.** This green-label PCGS holdered 1900-S half eagle is clearly finer than most, as the average grade of all PCGS certified examples is just MS61. This Choice specimen has frosty luster with brilliant lemon-yellow surfaces and bold design motifs. Both sides show scattered grade-consistent surface marks. The reverse has a solitary splash of copper toning. (#8401)

4931 **1900-S MS64 PCGS. CAC.** Several similar PCGS green-label 1900-S half eagles suggest that a small hoard of these pieces was uncovered some years ago. However, the date remains elusive, and is seldom found finer. This piece has frosty luster with brilliant yellow surfaces and excellent eye appeal. Scattered marks limit the grade.(#8401)

4932 **1900-S MS64 PCGS. CAC.** Housed in a green-label PCGS holder is a lovely 1900-S half eagle exhibiting with brilliant satin surfaces and delicate blue toning on bright yellow surfaces. A few scattered marks prevent a Gem grade.(#8401)

4933 **1900-S MS64 PCGS. CAC.** This important turn-of-the-century half eagle displays vibrant mint luster and sharply detailed design elements throughout. The light orange-gold surfaces show only minor signs of contact, with outstanding eye appeal. Housed in a green label holder. PCGS has graded only 13 numerically finer examples (6/12).(#8401)

4934 **1900-S MS64 PCGS. CAC.** Although the surfaces of this green-label PCGS certified piece have scattered marks, there are no copper spots evident on either side. This attractive Choice Mint State piece exhibits brilliant yellow surfaces with faint rose and hazel highlights.(#8401)

4935 **1900-S MS64 PCGS. CAC.** This wonderful 1900-S half eagle resides in a green-label PCGS holder, exhibiting frosty yellow luster and bold design motifs, with excellent eye appeal. Minor surface marks are expected at the MS64 grade level, but this piece is devoid of copper spots.(#8401)

4936 **1900-S MS64 PCGS. CAC.** Faint greenish overtones appear on the brilliant and frosty yellow-gold surfaces of this lustrous green-label specimen. A Choice Mint State example, this piece shows a lone copper spot at the back of Liberty's neck.(#8401)

4937 **1901-S MS64 PCGS. CAC.** The pleasing surfaces of this popular type issue display attractive yellow and rose-gold patina, with vibrant mint luster on both sides. the design elements are sharply detailed in most areas, with just a touch of softness on the stars. (#8404)

4938 **1902 MS64 NGC. CAC.** The 1902 Liberty half eagle is an underrated date, seldom encountered above the MS64 level. This impressive Choice example displays sharply detailed design elements and lustrous yellow and rose-gold surfaces. NGC has certified 25 numerically finer coins (6/12).(#8405)

1903 Liberty Five, MS65
Only 12 Finer at PCGS

4939 **1903 MS65 PCGS.** A few small copper toning spots are noted on each side of this highly lustrous, gorgeous Gem. Delicate hazel toning appears along the borders on each side. Here is an important condition rarity from a mintage of 226,800 coins and a low survival rate. Population: 18 in 65, 12 finer (6/12). (#8407)

Premium Gem 1906-D Half Eagle
Among the Finest Certified at NGC

4940 **1906-D MS66 NGC. CAC.** A delightful Premium Gem, with sharply detailed design elements and vibrant mint luster throughout. The attractive yellow and rose-gold surfaces show no mentionable signs of contact. Visual appeal is quite strong. The 1906-D is one of only two D-mint Liberty half eagle issues. Census: 13 in 66, 0 finer (6/12). (#8414)

4941 **1906-S MS63 NGC.** Delicate orange toning appears over shimmering yellow-gold luster on this sharply detailed Liberty half eagle. This Select Mint State piece is clearly finer than the typical example, as the average certified grade of MS60 suggests. (#8415)

4942 **1907 MS64 NGC.** Lemon-yellow surfaces host delicate blue and rose overtones on this fully brilliant and highly lustrous near-Gem. Surface marks are minimal and eye appeal is considerable. (#8416)

4943 **1907-D MS65 PCGS.** The 1907-D half eagle is extremely important to mintmark type collectors, as the last D-mint issue of the Liberty design. This sharply detailed Gem displays pleasing orange-gold surfaces, with vibrant satiny mint luster. PCGS has certified only 17 numerically finer specimens (6/12). (#8417)

1908 Half Eagle, MS67
Only 1908 Liberty Gold Issue

4944 **1908 MS67 NGC.** The 1908 Liberty half eagle is the only example of the Gobrecht Liberty design issued that year, a transitional year for the denomination. The other gold denominations were only produced in the new Indian or Saint-Gaudens design in 1908. This Superb Gem has brilliant yellow luster with satin surfaces and bold design motifs. A few minuscule marks on each side, with a solitary small reverse copper spot, are the only blemishes on this impressive half eagle. Few have been certified as fine as this example, with just 12 at this level and two finer as certified by NGC and PCGS. Census: 5 in 67, 1 finer (6/12). (#8418)

PROOF LIBERTY HALF EAGLES

1867 Half Eagle, PR63 Cameo
Only Six NGC Certified Proofs

4945 **1867 PR63 Cameo NGC.** Just 50 proof half eagles were coined in 1867, along with only 6,870 business strikes. Survivors are rare in any grade, proof or Mint State. NGC has only certified six proofs in all grades, and only 58 business strikes. That small number of certified pieces provides a good indication of the 1867 half eagle rarity. The finest NGC submissions grade PR65 and MS61.

Light cameo contrast is evident on each side with moderately mirrored fields and lustrous devices, showing only a few minor contact marks on each side. The fields retain nearly full watery texture, characteristic of proofs from the middle and late 19th century.

NGC has only certified six proofs that are graded PR65 Ultra Cameo, PR64 Ultra Cameo (2), PR63 Cameo (this piece), PR63, and PR61 (6/12). (#88462)

1896 Half Eagle, PR58

4946 **1896 PR58 PCGS.** The reason that this piece was certified less than PR60 is not immediately obvious to the observer, as there appears to be no evidence of actual rub or wear on the high points. However, the surfaces are lightly hairlined, and trivial contact marks are noted on each side. The fields are lightly mirrored with satiny yellow devices. Population: 1 in 58, 15 finer (6/12). (#8491)

Cameo Select Proof 1899 Half Eagle
One of 99 Specimens Struck

4947 **1899 PR63 Cameo PCGS.** The PCGS *Population Report* suggests a high survival rate for this issue of just 99 proofs, listing "60 to 75 known." By the strict PCGS Cameo standards, however, just 10 of the 30 coins in the *Population Report* meet Cameo or Deep Cameo criteria (6/12). This Select specimen is among those pleasingly contrasted pieces, decently frosted on the devices with black-gold glassy mirrors. The arm's-length eye appeal is gorgeous, though close inspection reveals the collected small contact marks and hairlines that account for the designation. A cloudy patch at the lower reverse comes from a holder scuff, not a problem with the coin itself. (#88494)

INDIAN HALF EAGLES

4948 **1908-S AU58 PCGS. CAC.** Only 82,000 examples of this first Indian half eagle were struck at San Francisco. This piece offers few faint marks in the fields and minimal wear that is most evident on the upper edge of the eagle's wing.(#8512)

4949 **1909-D MS64 NGC. CAC.** The CAC sticker tells a great deal about the overall quality of this coin. The surfaces are uncommonly lustrous, without the green patina so often encountered in the fields which are uniformly reddish-gold. Abrasions are scarcely to be found, an exceptional situation for a type normally seen heavily abraded. An unusually appealing, upper-end piece. (#8514)

Choice AU 1909-O Half Eagle
Final O-Mint Five

4950 **1909-O AU55 PCGS. Variety 1.** The New Orleans Mint produced only 34,200 Indian half eagles in 1909, the last year of operations for that storied facility. As the only O-mint Indian five, this date is extremely important to mintmark type collectors, as well as Southern gold specialists. Doug Winter estimates the surviving population at 800-1,000 specimens in all grades, surprisingly high for such a low-mintage issue.

The coin offered here is a well-detailed Choice AU example, with vibrant mint luster and just the slightest touch of wear on the fields. The surfaces exhibit a bright greenish-gold patina, with accents of orange and lilac. A scattering of minor contact marks on both sides is consistent with the grade. (#8515)

Near-Mint 1909-O Half Eagle
New Design at End of an Era

4951 **1909-O AU58 NGC. CAC.** The New Orleans Mint's long legacy of gold coinage came to a quiet end in 1909, the facility's last year of striking. Only 34,200 half eagles were produced, the first and last such O-mint coins bearing Bela Lyon Pratt's sunken-relief design. The 1909-O half eagle is the key date to its series and a true transition-point between the old 19th century spirit of the Mint and the new. This briefly circulated example is lightly abraded but has virtually intact yellow-to-orange luster and pleasing detail. It would make an excellent inclusion in an otherwise Mint State set. (#8515)

Elusive Mint State 1909-O Half Eagle
Last Gold Issue of New Orleans

4952 **1909-O MS60 NGC.** More than a century has passed since New Orleans struck its last coin, gold or silver, and for the former metal, only the 1909-O half eagle was struck in an American Coinage Renaissance design. Among Indian half eagles, the 1929 may be the most expensive and challenging in circulated grades, but in Mint State, the 1909-O takes the crown. This scarce O-mint example earns its numeric grade of 60 with a number of long, light abrasions and a few sharper marks, yet softly shimmering orange-gold surfaces show no wear whatsoever. Light peach, yellow, and blue-green peripheral accents further the eye appeal. (#8515)

1909-O Five Dollar Indian, MS61
Original Surfaces

4953 **1909-O MS61 PCGS. CAC.** The year 1909 is an interesting portrait of American numismatics, with one mint looking backward while the others faced resolutely forward. The New Orleans Mint's production of the 1909-O half eagle would mark the first and last time it would strike an Indian Head gold coin of any denomination, in a series already in its second year. The facility would cease operation in that same year, an outdated throwback, a crumbling shell of its former glory. In Philadelphia and San Francisco, the mints were producing the shiny first-year examples of the new Lincoln cent — but the 1909-O half eagle would be the first gold coin issue New Orleans had made since the Liberty Head eagle of 1894. This example displays original "crusty" surfaces, a feature seldom seen on this issue. Mostly yellow-gold, each side shows unbroken mint luster. The grade is primarily derived from a few larger marks scattered over both the obverse and reverse. (#8515)

1910 Indian Half Eagle, MS64
Scarce Issue in Higher Grades

4954 **1910 MS64 PCGS.** The 1910 Indian half eagle is not too difficult to locate in lower Mint State grades, but Choice examples are slightly scarce, and PCGS has graded only 19 numerically finer examples (5/12). This sharply detailed Choice specimen exhibits vibrant mint luster and attractive green and orange-gold surfaces. (#8517)

4955 **1910-D MS62 PCGS.** Delicate pink toning appears on the lustrous light yellow surfaces of this Denver half eagle. Both sides are satiny with sharp design elements.(#8518)

Select 1910-D Indian Five
Elusive Issue in Higher Grades

4956 **1910-D MS63 PCGS.** From a mintage of 193,600 pieces, the 1910-D Indian half eagle is moderately scarce in MS63 condition, and the population drops off drastically at the Choice level. This attractive Select specimen features well-detailed design elements and bright mint luster. The light orange-gold surfaces display hints of lilac and few signs of contact.. (#8518)

1910-D Half Eagle, MS63
Well-Detailed, Lustrous Surfaces

4957 **1910-D MS63 PCGS. CAC.** The 1910-D Indian half eagle was once quite rare in all Mint State grades, but after a number of pieces were discovered in a hoard in the 1970s, examples in MS63 condition can only be called scarce. Higher grades are elusive. This impressive Select piece is well-detailed and lustrous, with light yellow and rose-gold surfaces. (#8518)

1910-D Half Eagle, MS63
Elusive in Finer Grades

4958 **1910-D MS63 PCGS. CAC.** Dark patina resides on both sides of this original and fully lustrous Select Mint State Indian half eagle. The surfaces have myriad contact marks, none of consequence, on both sides, preventing a higher grade. PCGS has only certified 46 finer examples (6/12). (#8518)

MS64+ 1911 Indian Half Eagle
Strong Visual Appeal

4959 **1911 MS64+ PCGS. CAC.** From a mintage of 915,000 pieces, the 1911 Indian half eagle is a relatively available date and a popular type issue. This high-end Choice example displays sharply detailed design elements throughout, with attractive green and orange-gold surfaces that radiate vibrant mint luster. (#8520)

4960 **1911-D AU50 PCGS.** The 1911-D Indian half eagle is a scarce issue, from a low mintage of 72,500 pieces. This lightly worn example displays vivid green and rose-gold surfaces, with vibrant mint luster.(#8521)

4961 **1911-D AU55 PCGS.** An attractive Choice AU example of this low-mintage date, with light greenish-gold surfaces that exhibit highlights of rose. Vibrant mint luster adds to the generous eye appeal.(#8521)

4962 **1911-S MS61 PCGS.** Lovely honey-gold luster appears on the satin surfaces of this important half eagle. The 1911-S has one of the highest mintages in the series, yet few have survived in higher grades.(#8522)

1911-S Five Dollar Indian, MS63
Bright Mint Luster, Pronounced Color

4963 **1911-S MS63 PCGS. CAC.** This is an atypical piece for the issue. The surfaces are bright and lustrous, sharply struck overall with an especially strong mintmark, and minimal abrasions. Such pieces are definitely in the minority among 1911-S fives, and the strong eye appeal of this piece is underscored by the CAC endorsement. (#8522)

1913 Five Dollar, MS64
Lustrous, Attractive Patina

4964 **1913 MS64 PCGS.** The 1913 is one of the more obtainable type coins in the Indian half eagle series. This is a highly lustrous example that displays a subtle interplay of reddish-gold and lilac color over both sides. Each side is only lightly abraded, less so than would be expected from an MS64, and the strike is sharp throughout. (#8525)

1913 Indian Half Eagle, MS64
Elusive Date in Higher Grades

4965 **1913 MS64 NGC.** The 1913 Indian half eagle is not too difficult to locate in Choice condition, but the date is quite elusive in higher grades. This delightful MS64 example exhibits sharply detailed design elements and pleasing yellow and rose-gold surfaces, with vibrant mint luster. NGC has graded only 43 numerically finer examples (6/12). (#8525)

MS62 1913-S Five Dollar
Orange-Gold and Charcoal-Gray Surfaces

4966 **1913-S MS62 NGC.** The 1913-S half eagle is a notable rarity in the higher Mint State grades. This MS62 example offers considerable luster remaining under orange-gold surfaces with a moderate overlay of charcoal-gray patina, with a few scrapes and abrasions consistent with the grade, the most mentionable a diagonal scrape on the Indian's jawline. NGC has seen only 40 numerically finer (6/12). (#8526)

Choice 1914 Indian Half Eagle
Underrated Issue in High Grade

4967 **1914 MS64 NGC.** The 1914 is an "undervalued sleeper" in the series, according to Mike Fuljenz in his series reference, second only to the 1929 issue. This Choice piece displays frosty mattelike surfaces that show a few scattered marks mostly on the reverse. The obverse is virtually pristine, and both sides are well-struck and highly engaging. PCGS has seen only 28 numerically finer (5/12). (#8527)

1914-S Half Eagle, MS62
Rarely Found Finer

4968 **1914-S MS62 PCGS.** The 1914-S is seldom recognized for its importance in the context of Indian half eagles. However, few have been certified in finer grades than this example, with only 38 better PCGS specimens (6/12). This pleasing piece has satiny yellow luster with bold design motifs and delightful surfaces for the grade. (#8529)

1914-S Five Dollar Indian, MS62
Condition Scarcity

4969 **1914-S MS62 PCGS. CAC.** Both sides of this Select Mint State Indian half eagle exhibit hazel patina on the yellow-gold surfaces, with frosty mint luster and only trivial surface marks. The specialist will recognize the 1914-S as an important issue that is seldom found in finer grades. In fact, the average certified grade is less than 58. (#8529)

1915-S Half Eagle, MS62
Important Condition Rarity

4970 **1915-S MS62 PCGS.** Considerable dark patina resides on both sides of this conditionally scarce Indian half eagle. The surfaces exhibit frosty light yellow luster with trivial marks that limit the grade. An attractive piece with bold design motifs. PCGS has only certified 42 finer examples (6/12). (#8531)

4971 **1916-S MS61 NGC.** Dark bluish-gray patina resides on satiny yellow surfaces, attesting to the originality of this Indian half eagle. (#8532)

1916-S Five Dollar, MS62
Sharply Detailed and Lustrous

4972 **1916-S MS62 NGC.** The orange and greenish-gold surfaces of this impressive 1916-S Indian half eagle radiate vibrant mint luster and show a few hints of lilac. The design elements are sharply detailed throughout, and only minor contact marks are evident. Coinage of half eagles was suspended after 1916, and did not resume until 1929. (#8532)

Select 1916-S Indian Half Eagle
Last Issue Until 1929

4973 **1916-S MS63 NGC.** Both sides of this Select Mint State piece have radiant luster with exceptional surfaces for the grade. Straw-gold color appears on both sides, the reverse showing lovely orange toning. This is a highly attractive example that will appeal to the advanced collector. NGC has only certified 87 finer pieces (6/12). (#8532)

1909 'Roman Gold' Five Dollar Indian
Bright Green-Gold PR66+

4974 **1909 PR66+ PCGS. CAC.** After the first year of the matte finish proved so unpopular with collectors, the Mint switched to what we know today as the "Roman Finish" style of proofing for gold coins. This method did not involve treating the planchets, as with the previous matte finish. Rather, proofs were struck on unprepared planchets. The striking pressure imparted a natural brightness to the limited production runs of proof gold. In the case of the 1909 only 78 proofs were struck, and of that number it is estimated that perhaps 30 or so pieces are extant today in all grades.

The surfaces are bright and show a surprising green-gold tint, rather than expected yellow-gold. Just around the margins on each side there is a light, but still noticeable accent of reddish patina. The surfaces are unmarked as far as we can see, with one exception: A shallow, irregularly shaped planchet flake is seen in the reverse field just above the eagle's tail feathers. This identifier greatly simplifies tracing the pedigree of this important coin. Finer pieces are known, but not many. Each of the major services show only seven pieces in PR66 with a combined 10 pieces finer, one at PCGS and nine at NGC (6/12). Collectors have slowly begun to realize the absolute rarity of this two-year proofing process.

Ex: John H. Clapp Collection, directly from the Mint, December 1909; Louis E. Eliasberg, Sr.; The United States Gold Coin Collection (Bowers and Ruddy, 10/1982), lot 621; Rajj Collection (Stack's, 8/2011), lot 7697. (#8540)

1911 Indian Half Eagle, Proof
Only 139 Pieces Struck

4975 **1911 — Obverse Damage — NGC Details. Proof.** Only 139 proof Indian half eagles were struck in 1911, making the issue rare in all grades and conditions. This specimen displays well-detailed design elements, with orange-gold matte surfaces that have nonreflective luster characteristics. There is a large dent in the surface near the top of the headdress. (#8542)

EARLY EAGLE

1803 Capped Bust Right Eagle, AU53
Late Die State, BD-3 Variety

4976 **1803 Small Stars Reverse AU53 NGC. BD-3, R.4.** Bass-Dannreuther Die State c/d. The 1803 Capped Bust Right eagle claims a mintage of just 15,017 pieces, with six die varieties known for the date. This coin represents the BD-3 variety, with small reverse stars and the right foot of E in STATES over a cloud space. John Dannreuther estimates the BD-3 accounted for 7,500-10,000 pieces of the reported mintage, with a surviving population of 150-200 specimens in all grades.

The present coin is an attractive AU53 example that shows clash marks on both sides, indicating the late die state. The bright orange-gold surfaces display traces of prooflike reflectivity in sheltered areas. The design elements are well-detailed, with a little softness on the stars on both sides. Close inspection reveals light traces of adjustment marks on the obverse peripheries, but no large or distracting contact marks. This coin would be an excellent choice for a type or date set. (#8565)

LIBERTY EAGLES

1839 Large Letters Eagle, XF40
Type of 1838
Gold CAC

4977 **1839 Type of 1838, Large Letters XF40 PCGS. Gold CAC.** Housed in a green-label PCGS holder, this lovely example has an accompanying gold CAC sticker, suggesting high quality for the grade. Although scattered marks appear on each side, as expected for the grade, this lovely yellow-gold specimen has considerable luster that suggests a higher grade. Population: 17 in 40, 65 finer (6/12). *From The Old Holder Collection.* (#8576)

1842 Large Date Eagle, AU55
Only Seven Finer PCGS Coins

4978 **1842 Large Date AU55 PCGS.** A small disturbance appears in the left obverse field of this Choice AU, although the balance of this piece shows only trivial handling marks of no consequence. Considerable luster remains on the light yellow surfaces, with splashes of bright orange toning. Population: 15 in 55, 7 finer (6/12). (#8584)

4979 **1843-O AU53 NGC. Variety 2.** A sharply detailed example of this collectible No Motto New Orleans issue. The wheat-gold fields and devices are clean and display glimmering luster, especially at the borders, on the eagle, and throughout Liberty's curls.(#8589)

4980 **1844-O AU50 NGC. Variety 1.** This yellow-gold No Motto New Orleans ten features abundant design detail and shows luster on the eagle and reverse legends. Moderately abraded overall with edge marks at 1 and 7 o'clock on the reverse.(#8591)

Choice AU 1844-O Ten
Misplaced Date Variety

4981 **1844-O AU55 NGC. Variety 1.** The mintmark is lightly recut within the loop, and top of a misplaced date digit lurks within the dentils beneath the 8. Glimpses of canary-gold luster beckon from the legends and devices of this evenly struck No Motto O-mint ten. Devoid of mentionable contact except for a small mark at the tip of the nose. (#8591)

1846 Liberty Ten, AU53
Only Five Finer at PCGS

4982 **1846 AU53 PCGS.** Distinct green tinting appears on the rich yellow surfaces of this early Liberty ten, with traces of luster remaining on each side. Just 20,095 eagles were minted at Philadelphia that year, and few have survived. This piece exhibits the usual scattered marks, mostly trivial. Population: 4 in 53, 5 finer (6/12). (#8594)

4983 **1847-O XF40 PCGS. CAC.** For mintmark type collectors seeking an O-mint eagle, the available 1847-O is the most logical choice. This attractive XF specimen offers lightly circulated orange-gold surfaces with some interesting die cracks on the lower reverse. Housed in a green label holder.
From The Old Holder Collection.(#8598)

4984 **1849 XF45 NGC.** Luster illuminates the legends, date, and devices of this orange-gold No Motto eagle. The strike is consistent except for minor weakness at the obverse center. There are no detrimental marks.(#8601)

4985 **1851-O XF40 NGC. Variety 2.** This moderately circulated example of the second most commonly encountered New Orleans No Motto eagle displays the mysterious raised ring at the top of the second shield stripe that is typical of the issue. The fields are lightly abraded and traces of mint luster outline the reliefs. (#8607)

4986 **1851-O AU50 NGC. Variety 1.** A green-gold example of this more available No Motto New Orleans issue. Sharply detailed with noticeable glimpses of luster and a few faded thin obverse marks. As with all other '51-O tens, a shield ring is present atop the second vertical shield stripe.(#8607)

1851-O Liberty Eagle, AU58
Popular Mintmark Type Issue

4987 **1851-O AU58 NGC.** An attractive near-Mint specimen of this popular New Orleans type issue, with lightly marked greenish-gold surfaces that retain much original mint luster. The design elements are sharply detailed in many areas, but a touch of softness is evident on the obverse stars. NGC has graded 13 numerically finer examples (6/12). (#8607)

4988 **1852-O XF45 PCGS. Variety 1.** The 1852-O, with a mintage of 18,000 pieces, is a difficult date to find in any grade. This is a mildly bright Choice XF representative with orange-red toning in protected areas. Well defined and only lightly abraded aside from thin marks near the left (facing) wingtip and above the eagle's head. Population: 21 in 45, 36 finer (6/12).
Ex: Long Beach (Heritage, 6/2002), lot 1642; Atlanta ANA Signature (Heritage, 4/2006), lot 1986, which realized $2,530. (#8609)

4989 **1854 AU58 NGC.** By 1854, the new and more convenient double eagle denomination was favored over the eagle by bankers and traders. The mintage of eagles at Philadelphia declined to 54,250 pieces, the lowest production from the facility since 1846. This impressively sharp example features apricot-gold toning. Only lightly abraded save for a small reverse rim ding at 3:30. Census: 53 in 58 (1 in 58+), 13 finer (6/12).
Ex: Rosemont Central States (Heritage, 4/2008), lot 3587, which realized $2,530.(#8613)

1855-O Ten Dollar, Choice XF
Scarcer O-Mint, Seldom Seen Finer

4990 **1855-O XF45 NGC.** Only one variety exists for the 1855-O. This is one of the scarcer O-mint tens with a mintage of only 18,000 pieces, most of which went into circulation and stayed there. Generally XF is as fine an example as the collector will see. Very few AU or MS coins are known, and those are locked up in collections. The light orange-gold surfaces on this piece are minimally abraded and there is even friction over the high points with slight traces of luster remaining. (#8617)

1856-S Ten Dollar, Near-Mint Example
Only Two NGC-Graded Pieces Finer

4991 **1856-S AU58 NGC.** Luster dominates the peripheries of this lightly circulated early San Francisco eagle. The surfaces are richly detailed and display the expected number of small to moderate marks. Three different reverse dies are known for the '56-S. This is the high Medium S; the other varieties are a low Medium S and a Large S. The mintmark is lightly repunched within the lower loop. (#8621)

Low-Mintage 1859-S Eagle, AU53

4992 **1859-S AU53 NGC.** An often-overlooked Old West classic, this San Francisco eagle issue was struck just a few years after that city's Mint opened. Production of non-double eagle gold issues lagged in the early S-mint years; the 1859-S eagle, for example, saw production of just 7,000 pieces, and AU survivors are condition rarities. This AU53 piece is pale and radiant despite light wear. Striking softness on the obverse stars is typical, though the interiors offer better detail. Several long abrasions on and to the left of the portrait are grade-consistent but preclude a Choice AU designation. Census: 5 in 53, 5 finer (6/12). (#8630)

1860-O Eagle, AU53
Variety 1, the Only Dies

4993 **1860-O AU53 PCGS. CAC. Variety 1.** A single die pair was used to coin 11,000 eagles at New Orleans in 1860, and the limited number of survivors are usually in lower grade. A hint of green is noted on this still lustrous yellow-gold specimen, with scattered marks as expected for the grade. Population: 16 in 53, 15 finer (6/12). (#98631)

Underrated Choice AU 1860-O Eagle
Reflective and Semiprooflike

4994 **1860-O AU55 PCGS.** This Choice AU 1860-O eagle is definitely a coin that should garner a lot of collector attention, as a nice example of a distinctly underrated issue. Given the low mintage of 11,000 pieces on the eve of the Civil War, it is unsurprising that this piece shows distinct prooflike reflectivity in the protected areas around the devices and peripheral elements. Light field chatter rather than overt contact accounts for the grade. Due to the Civil War, the New Orleans Mint would not strike another eagle until the 1879-O. Population: 12 in 55, 3 finer (6/12). (#98631)

1861 Liberty Ten, MS62
Only Three Finer PCGS Coins

4995 **1861 MS62 PCGS.** A large mintage of 113,164 Liberty eagles was accomplished in 1861, the first year of the Civil War. Most coins seen today are heavily circulated, and Mint State examples are rare. This sharply detailed MS62 specimen displays strong mint luster and pleasing green and rose-gold surfaces. Population: 7 in 62, 3 finer (5/12). (#8633)

AU 1866-S Liberty Eagle
First Year of Motto Type

4996 **1866-S Motto AU50 NGC.** The 1866-S Liberty eagle claims a low mintage of 11,500 pieces, and examples are scarce-to-rare in all grades. The motto IN GOD WE TRUST was included for the first time in 1866, making the date an important one for type collectors. This well-detailed specimen displays lustrous orange-gold surfaces that show only minor signs of contact. Census: 10 in 50, 18 finer (6/12). (#8650)

4997 **1869-S VF20 NGC.** An apricot-gold rare date ten from a mintage of only 6,430 pieces. Liberty's curls are worn, but the plumage on the left wing is extensive, and no marks are noticeable. Census: 2 in 20, 43 finer (6/12).(#8656)

Rarely Seen AU 1869-S Ten Dollar

4998 **1869-S AU50 NGC.** Peach-red luster illuminates design recesses of this rare date Motto ten. Wear is minimal and the strike is even. Small marks are evident but of little overall consequence. The mintage of 6,430 pieces went into circulation and stayed there, although NGC has certified a single example as Mint State. (#8656)

Choice XF 1870 Eagle
Low-Mintage Reconstruction-Era Issue

4999 **1870 XF45 PCGS.** The low-mintage 1870 eagle was struck to the extent of a meager 3,990 coins in the Reconstruction era. Actually, *any* 1870-dated eagle regardless of mintmark is more or less rare, as Philadelphia, Carson City (in its first year), and San Francisco were largely focused on the higher- or lower-denomination gold issues. This Choice XF orange-gold 1870 Philadelphia piece displays extensive scattered but mostly light abrasions, with reflective semiprooflike areas around the protected device edges. Population: 11 in 45, 27 finer (6/12). (#8657)

Choice XF 1870-S Eagle
Only 8,000 Pieces Struck

5000 **1870-S XF45 PCGS.** From a minuscule mintage of just 8,000 pieces, the 1870-S Liberty eagle is a rare issue in all grades, and Mint State examples are virtually unobtainable. This Choice XF specimen shows only light wear on the well-detailed design elements, and the lightly abraded surfaces show a few hints of prooflike reflectivity in the satiny fields. Population: 10 in 45, 16 finer (5/12). (#8659)

1872-S Liberty Eagle, AU55
Only 15 Finer NGC Coins

5001 **1872-S AU55 NGC.** A mintage of 17,300 Liberty eagles was accomplished at the San Francisco Mint in 1872, a small total in absolute terms, but fairly generous compared to other issues of the 1870s. This lightly circulated example exhibits well-detailed devices and light greenish-gold surfaces that show traces of prooflike reflectivity around the design elements. Census: 25 in 55, 15 finer (6/12). (#8665)

5002 **1874 MS61 PCGS.** Both Liberty and the eagle appear lightly frosted and stand out from lustrous fields that bear scattered, tiny abrasions. Perhaps not a rarity but nonetheless a desirable coin. Population: 19 in 61, 15 finer (5/12).(#8669)

5003 **1874-CC VG10 PCGS. CAC.** A circulated but problem-free yellow-gold example of this elusive Carson City issue. The mintage of 16,767 pieces performed yeoman duty in Old West commerce, and only two coins are graded above AU55 by PCGS. (#8670)

5004 **1874-CC Fine 15 PCGS.** All Carson City eagles from the 1870s are rare, though the '74-CC is more collectible than other issues, particularly in well circulated grades. The present honey-gold piece has problem-free surfaces and retains much plumage detail on the left (facing) wing.(#8670)

Choice XF 1876-S Ten Dollar
Still-Lustrous Two-Toned Surfaces

5005 **1876-S XF45 PCGS.** This American Centennial S-mint eagle was struck in the surprisingly small amount of 5,000 circulation coins — and circulate they did, as 10 dollars was far too large an amount for most Old West residents to tie up. The average grade of certified survivors — presumably the top end of all existing examples — is halfway between XF40 and XF45. This Choice XF coin displays yellow-gold and golden-orange alternating on moderately abraded but still-lustrous surfaces. Population: 19 in 45, 13 finer (6/12). (#8676)

1878 Liberty Ten, MS63
Only 16 Finer at NGC

5006 **1878 MS63 NGC.** A major condition rarity in the Liberty eagle series, from a mintage of only 73,780 business strikes. Just 40 coins have been graded by NCG and PCGS in MS63 or finer grades. This Select Mint State piece has remarkable yellow luster with satin fields showing few blemishes, and with excellent design definition. Census: 8 in 63, 16 finer (6/12). (#8680)

5007 **1878-S XF45 NGC.** A mintage of only 26,100 pieces ensures the rarity of this underappreciated ten dollar issue. The present wheat-gold example has an even strike and lacks consequential marks. The surfaces are subdued but the reverse border displays bright luster.(#8682)

5008 **1882 MS62 Prooflike NGC.** The 1882 is a high mintage issue but less than 1% of NGC-certified pieces have been assigned the Prooflike designation. This is a remarkably reflective honey-gold example with a sharp strike and frosty devices. Census: 14 in 62 Prooflike, 1 finer (6/12).(#78695)

1882-CC Eagle, AU53
Especially Attractive Surfaces

5009 **1882-CC AU53 NGC.** As in some other years, the Carson City Mint in 1882 chose to focus on half eagles and double eagles at the expense of eagles, which were struck to the extent of only 6,764 coins. Mint State examples are virtually unknown; NGC and PCGS combined record three examples. This AU53 coin shows much semiprooflikeness over surfaces that exhibit few overt marks, lovely orange-gold color, a bold strike, and much eye appeal. Collectors seeking an especially nice example would do well to consider this piece. (#8696)

Near Mint 1882-O Ten Dollar
Scarcer New Orleans Issue

5010 **1882-O AU58 NGC.** Bright yellow-gold surfaces are semiprooflike and a relatively sharp strike provides most stars with bold detail. Both sides display the complement of abrasions usually seen on coins of this New Orleans issue, which researcher Doug Winter calls one of three undervalued dates produced between 1880 and 1882. Census: 46 in 58, 16 finer (5/12). (#8697)

5011 **1883-S MS61 PCGS. CAC.** A misplaced date example with the top of an errant digit (probably a 3) in the obverse dentils near 6 o'clock. This sharply struck example is primarily orange-red but has sea-green borders. The obverse field displays a few moderate marks. A low mintage issue rarely seen in Mint State. Population: 19 in 61, 22 finer (6/12).(#8702)

1885 Eagle, MS64
Important Condition Rarity

5012 **1885 MS64 PCGS.** An incredible condition rarity with a combined PCGS and NGC population of only 20 coins, with just four finer. This frosty and highly lustrous specimen exhibits brilliant yellow surfaces that have faint pinkish overtones. An impressive example destined for a high grade, specialized collection of Liberty eagles. Population: 12 in 64, 1 finer (6/12). (#8706)

Lustrous 1886-S Ten Dollar
MS64+, Among Finest Graded

5013 **1886-S MS64+ NGC.** This butter-gold example ranks among the finest certified 1886-S tens. It is sharply struck and has sweeping cartwheel sheen. The surfaces are unusually smooth for the issue aside from one bagmark beneath the beak and small marks near stars 4 and 8. Census: 20 in 64 (2 in 64+), none finer (6/12). (#8709)

MS64+ 1886-S Eagle
Highest Graded With CAC Seal

5014 **1886-S MS64+ NGC. CAC.** The 1886-S is strictly a type coin through MS62 but is a better date any finer. Only two examples have been graded as MS64+ by NGC (with none higher, as of 6/12), and both coins are in the present auction. Of the two lots, the present piece has the greater eye appeal, since the dusky apricot-gold surfaces display only trivial marks. It is also one of just three pieces at the MS64 level with a CAC seal. (#8709)

1887-S Liberty Ten, MS64
Prime Condition Rarity

5015 **1887-S MS64 NGC.** The 1887-S Liberty eagle is a plentiful issue in lower grades, but a prime condition rarity at the Choice level. This impressive MS64 specimen exhibits well-detailed design elements and lustrous greenish-gold surfaces. Only minor contact marks are evident, the worst being a scratch on Liberty's jaw. Census: 9 in 64, 1 finer (6/12). (#8711)

1888 Liberty Eagle, MS63
None Certified in Higher Grades

5016 **1888 MS63 NGC. CAC.** The 1888 Liberty eagle is an underrated date in high grade, and no coins have been certified above the MS63 level by either of the leading grading services. This attractive Select specimen is sharply detailed and lustrous, with pleasing green and rose-gold surfaces. Census: 4 in 63, 0 finer (5/12). (#8712)

5017 **1890 MS62 PCGS.** This low mintage Philadelphia eagle has beautiful peach toning and a precise strike. The fields exhibit distributed abrasions and luster dominates raised elements. Population: 85 in 62, 18 finer (6/12).(#8717)

High-End MS62 1890-CC Eagle

5018 **1890-CC MS62 NGC.** One die pair is known from the scant mintage of 17,500 pieces. Due to its later date, the 1890-CC is more available in Uncirculated grades than its Carson City predecessors, but coins of the present quality are undeniably very scarce. This is a lustrous and original pumpkin-gold ten with much nicer surfaces than the usual MS62 example. Census: 39 in 62, 9 finer (6/12). (#8718)

1890-CC Liberty Ten, MS62
Only Nine Numerically Finer Coins at NGC

5019 **1890-CC MS62 NGC. CAC.** The 1890-CC Liberty eagle claims a mintage of just 17,500, small in absolute terms, but not unusual in the context of the series. Probably 350-400 examples survive in all grades, with Mint State specimens becoming quite elusive. This well-detailed piece exhibits attractive greenish-gold surfaces with vibrant mint luster. Census: 39 in 62, 9 finer (5/12). (#8718)

5020 **1891-CC XF45 NGC. Variety 2-B.** A late die state with slender cracks throughout the margins. Pockets of bright luster brighten protected design elements. The fields display abrasions customary for the grade and a small obverse rim ding is at 9 o'clock. (#8720)

5021 **1891-CC AU55 PCGS. CAC.** The 1891-CC Liberty ten is an available date in high grade, and the number-one choice of mintmark type collectors seeking a Carson City eagle. This well-detailed greenish-gold specimen is lustrous and lightly abraded. *From The Old Holder Collection.*(#8720)

5022 **1891-CC MS62 NGC. CAC. Variety 1-A.** A fully struck Carson City ten whose lustrous pumpkin-gold fields display no more than the expected number of minor marks. A few tiny flecks of struck-in grease are near the hairbun.(#8720)

5023 **1893 MS64+ PCGS. CAC.** Apricot-gold and lime-green toning adorns this lustrous and precisely struck Liberty type coin. The fields and cheek display only delicate grazes. Many Uncirculated 1893 tens escaped the Treasury melt of the 1930s and 1940s, but examples approaching Gem quality are elusive.(#8725)

5024 **1893 MS61 Prooflike NGC.** This boldly struck Liberty eagle exhibits impressive field reflectivity despite scattered abrasions consistent with the grade. Such coins often traded as proofs prior to the 1980s and the advent of third party grading.(#78725)

Borderline Uncirculated 1893-CC Ten
Mintage of Only 14,000 Pieces

5025 **1893-CC AU58 NGC. CAC.** The final-year 1893-CC is much scarcer than the "common" Carson City issue, the 1891-CC. A scant 14,000 pieces were struck from a single die pair. This well struck and unmarked example has slight rub but the borders and devices teem with luster. Census: 44 in 58, 14 finer (6/12). (#8726)

5026 **1895 MS64 NGC.** The 1895 Liberty eagle is conditionally scarce at the MS64 level, and finer examples are very rare. This sharply detailed Choice specimen radiates satiny mint luster, and the light yellow-gold surfaces are remarkably free of contact marks. NGC has certified only 4 numerically finer examples (6/12). (#8732)

5027 **1895-S MS60 NGC.** Given its West Coast origin and a mintage of only 49,000 pieces, it is little surprise that the 1895-S is rare in Mint State. The present boldly struck honey-gold example is lightly marked for the grade except for two small reed impressions on the jaw and left of the ear. Census: 7 in 60, 11 finer (6/12). (#8734)

5028 **1897 MS64 PCGS.** The 1897 Liberty half eagle is a scarce issue in MS64 condition, and Gems are nothing short of rare. This well-detailed Choice example exhibits rose-gold surfaces, with satiny mint luster. PCGS has certified only seven numerically finer specimens (6/12).(#8737)

5029 **1898 MS64 NGC.** A fully struck khaki-gold representative that boasts coruscating luster and an absence of detrimental abrasions. The 1898 is plentiful in typical Mint State but much more elusive at the near-Gem level.(#8740)

Gem 1900 Liberty Ten
Only One Finer Coin at PCGS

5030 **1900 MS65 PCGS.** The 1900 Liberty eagle is extremely popular as a turn-of-the-century mintmark type issue. This delightful Gem displays sharply detailed design elements and vibrant mint luster, with smooth yellow and rose-gold surfaces. Eye appeal is terrific. Population: 15 in 65, 1 finer (6/12). (#8745)

1900 Eagle, MS65
PCGS Has Graded Only One Finer

5031 **1900 MS65 PCGS. CAC.** Garrett and Guth call the 1900 Liberty eagle "one of the best dates in the series" for type purposes. This delightful Gem is near the top of the grading pyramid, with sharply detailed design elements, frosty mint luster, and light orange and rose-gold surfaces that show few signs of contact. Population: 15 in 65, 1 finer (5/12). (#8745)

5032 **1901 MS64 NGC.** A peach-gold and sea-green Liberty type coin with vibrant luster and a precise strike. The fields are smooth and only inconspicuous marks on the cheek denies a higher grade. Housed in a prior generation holder.(#8747)

5033 **1901 MS65 PCGS.** The 1901 Liberty eagle is an available date and a popular type issue, but the population dwindles considerably in grades above MS65. This sharply detailed Gem displays pleasing yellow and rose-gold surfaces, with vibrant mint luster. PCGS has graded 27 numerically finer specimens (6/12).(#8747)

5034 **1901-O MS62 PCGS. Variety 1.** A beautiful sun-gold representative of this low mintage and popular New Orleans issue. Dynamic luster and smooth surfaces combine with an exemplary strike to create uncommon eye appeal.(#8748)

5035 **1901-S MS65 NGC.** This gorgeous Liberty type coin offers apple-green peripheries and pumpkin-gold centers. The strike is intricate and the reverse is essentially immaculate. Only trivial obverse grazes deny an even finer grade.(#8749)

5036 **1901-S MS65 PCGS. Breen-7075.** The date is nicely repunched, most prominently on the base of the 1. This lustrous and razor-sharp Gem is beautifully toned in lemon-gold and sea-green shades. A loupe reveals only inconsequential contact. Certified in a green label holder.
From The Old Holder Collection.(#8749)

Two-Toned MS66 1901-S Ten Dollar

5037 **1901-S MS66 PCGS.** Butter-gold centers are framed by olive-green toning. This sharply struck and highly lustrous Premium Gem has a pristine portrait and only infrequent trivial field grazes. The 1901-S is a plentiful issue, but due to a contemporary indifference to storage, the type is scarce in such outstanding preservation. (#8749)

5038 **1906-D MS64 NGC.** A lustrous lemon-gold Choice ten. The strike is exemplary and only wispy marks are present on either side. The first of only two Denver issues of the type, due to the long tenure of the facility strictly as an assay office.(#8760)

1908-D No Motto Ten, MS64
Only Seven Finer PCGS Coins

5039 **1908-D No Motto MS64 PCGS. CAC.** This Indian Head design was the work of Augustus Saint-Gaudens, with design modifications by Charles Barber, who lowered the relief on the eagles and double eagles after Mint officials determined that the initial designs drastically slowed production. The modified design appeared in 1907 and 1908, then was further updated with the addition of IN GOD WE TRUST on the reverse.

Only 210,000 eagles were struck in Denver prior to the 1908 updated design, and few of those No Motto coins have survived in higher grades. This Choice Mint State example has brilliant yellow luster, with soft, frosty surfaces and excellent eye appeal. Population: 44 in 64 (4 in 64+), 7 finer (6/12). (#8854)

5040 **1908 Motto MS63 PCGS.** This lovely light yellow specimen has excellent eye appeal with brilliant, frosty luster and minimal marks for the Select Mint State grade.(#8859)

5041 **1908-D Motto MS62 NGC.** Wheat-gold at base with a considerable apricot effect, particularly at the margins. Liberty's cheek shows a wedge-shaped mark and a few other light abrasions, accounting for the grade.(#8860)

Orange-Gold MS64 1908-D Motto Eagle
Elusive in Gem Grade

5042 **1908-D Motto MS64 PCGS.** Even though the first-year 1908-D Indian Head eagle was produced in an amount well over 800,000 pieces, examples today in Gem condition are highly elusive, a level where Garrett and Guth pronounce the issue 12th-rarest of the 32-coin series. This near-Gem is about as nice as most collectors can obtain, with beautifully lustrous orange-gold surfaces showing abundant eye appeal and impeccable preservation. PCGS has seen 18 submissions in MS64, with 21 finer — most of those in MS65, although the incredible ex: Eliasberg-Duckor MS68 PCGS example now resides in the Simpson Collection (5/12). (#8860)

5043 **1908-S AU55 NGC.** Although 1908 was a transitional year for the Indian tens, all San Francisco Mint pieces were the new With Motto style. This lightly marked Choice AU specimen has nearly full luster with attractive light yellow surfaces showing faint pink overtones.(#8861)

1909-D Ten Dollar, MS62+
Scarcer Early Issue

5044 **1909-D MS62+ PCGS. CAC.** The 1909-D is much scarcer even than its mintage of 121,540 pieces might indicate. This frosty and highly lustrous yellow-gold specimen has the usual quota of surface marks expected for the grade, exhibiting brilliant surfaces and splashes of rose and dark green patina on each side. (#8863)

Mint State 1909-S Indian Ten
Pleasing Surfaces

5045 **1909-S MS61 PCGS.** The 1909-S Indian eagle was a rare date in high grade until a number of coins surfaced in a hoard in the late 1970s. This pleasing Mint State specimen features well-detailed design elements and lustrous orange and rose-gold surfaces. The fields are surprisingly clean for the grade. (#8864)

5046 **1910 MS64 PCGS.** A mintage of just over 300,000 1910 Indian eagles was sufficient that today's collectors can obtain an example with ease, provided that quality is of little concern. However, this issue is scarce in Choice Mint State, as offered here, and elusive in finer grades, with only 76 Gem or better pieces certified at PCGS (6/12). This example is frosty and lustrous with brilliant yellow surfaces and minimal marks.(#8865)

1910-D Ten Dollar Indian, MS65
Subtly Patinated Type Coin

5047 **1910-D MS65 NGC.** The 1910-D Indian eagle was produced in large numbers and, even in grades as high as MS65, the date can only be called scarce in today's market. This attractive Gem is sharply detailed, with traces of an inner rim on both sides caused by die buckling. The lustrous surfaces display light orange-gold color, with lilac highlights. (#8866)

5048 **1910-S AU58 PCGS.** Traces of dark patina appear on this lustrous near-Mint specimen, with light yellow surfaces and delicate rose overtones.(#8867)

5049 **1911-D AU53 PCGS.** The 1911-D Indian eagle claims a low mintage of 30,100 pieces, and the date is the leading condition rarity of the series in high grade. This well-detailed AU53 specimen offers pleasing greenish-gold surfaces, with bright mint luster. (#8869)

Choice 1912 Indian Ten
Scarce in Higher Grades

5050 **1912 MS64 NGC.** While the 1912 is relatively plentiful in Choice Mint State, as offered here, finer pieces are quite rare, with only 82 higher grade NGC coins certified to date (6/12). This piece has frosty yellow luster with only a few small marks, including a minor scratch in the left obverse field. (#8871)

1914 Eagle, MS64
Rarely in Higher Grades

5051 **1914 MS64 PCGS.** A highly attractive example with frosty luster, this impressive 1914 Indian eagle has brilliant yellow surfaces with lemon overtones. The strike is sharp and the surfaces are impressive, showing only trivial contact marks. PCGS has only certified 42 finer examples of this condition scarcity (6/12). (#8875)

Frosty, Mattelike 1914-S Eagle, MS63

5052 **1914-S MS63 NGC.** Lustrous orange-gold surfaces provide plenty of eye appeal on this Select 1914-S eagle, a frosty, fairly mattelike example. A thin reverse scrape from the rim through the last A in AMERICA and into the field nearby is among few signs of contact, with the obverse showing only tiny ticks on Liberty. (#8877)

1914-S Eagle, MS63
Scarce in Finer Grades

5053 **1914-S MS63 PCGS.** The central obverse and reverse of this Select Mint State piece show minor design weakness as expected, but the overall eye appeal is strong. Both sides have rich yellow surfaces with delicate orange overtones. PCGS has only certified 75 finer pieces (6/12). (#8877)

Borderline Uncirculated 1915-S Indian Eagle
Scarce Low-Mintage Issue

5054 **1915-S AU58 PCGS.** From a small mintage of 59,000 pieces, the 1915-S Indian eagle is a scarce issue in all grades, and Mint State examples are quite elusive. This impressive near-Mint specimen shows just a trace of wear on the sharply detailed design elements, and the lustrous orange-gold surfaces exhibit only minor signs of contact. (#8879)

1915-S Eagle, AU58
Fourth Lowest Mintage Issue

5055 **1915-S AU58 NGC.** The 59,000 coin mintage was the fourth lowest of the No Periods design Indian eagle series produced from 1907 to 1933. This piece, showing a trace of rub, is typical of certified examples, having an average grade of 58. Both sides have brilliant yellow surfaces with nearly full frosty mint luster and no obvious marks. (#8879)

5056 **1916-S AU58 PCGS. CAC.** A trace of wear appears on the high points, with scattered marks on both sides of this brilliant yellow near-Mint specimen. Nearly full luster remains.(#8880)

5057 **1916-S MS61 NGC.** A low-mintage date, the 1916-S Indian eagle owes its availability to a couple of hoards that surfaced in the 1970s. This well-detailed Mint State example exhibits lustrous surfaces that are lightly marked for the grade.(#8880)

5058 **1926 MS64 NGC.** An amazing and appealing specimen, this Choice Mint State Indian ten is ideal for a type collection, with frosty lemon-yellow luster and exceptional surfaces, showing only trivial marks.(#8882)

5059 **1932 MS64 PCGS.** This Choice Mint State 1932 Indian ten exhibits a veritable artist's palette, ranging from light yellow-gold to lemon, rose, violet, and hazel, all appearing on frosty surfaces. (#8884)

5060 **1932 MS64 NGC.** A spectacular Choice example of this popular type issue, with sharply detailed design elements, attractive yellow-gold surfaces, and especially vibrant mint luster.(#8884)

5061 **1932 MS64+ NGC. CAC.** A brilliant Indian eagle destined for a high grade type set, this near-Gem has frosty light yellow luster with minimal surface marks.(#8884)

5062 **1932 MS65 NGC.** The plentiful 1932 Indian ten is ideal for type collectors, and this Gem is a lovely specimen that will be right at home with nearly any collection of gold designs. This frosty and highly lustrous specimen has brilliant yellow surfaces and excellent eye appeal.(#8884)

1932 Indian Eagle, MS65+
Frosty With Multicolored Obverse

5063 **1932 MS65+ PCGS. CAC.** Both sides of this Gem show blatant cartwheel luster for starters, but it is the multicolored obverse that gives this piece its over-the-top eye appeal. Waves of pale pastel jade and red-orange compete for territory, with a frosty, mattelike texture underneath. A loupe reveals a couple of scrapes well-hidden in the headdress, not overly bothersome and detracting not a whit from the eye appeal. (#8884)

Premium Gem 1932 Ten Dollar
Only One Finer Coin at PCGS

5064 **1932 MS66 PCGS.** The 1932 Indian eagle is the most available issue of the series, and even Premium Gem examples can only be called scarce, making this date ideal for type collectors. This memorable Premium Gem is sharply detailed on the obverse, but the eagle's leg shows a little softness. The almost-unmarked surfaces display vibrant mint luster with outstanding eye appeal. Population: 93 in 66, 1 finer (6/12). (#8884)

1850-O Twenty Dollar, AU53
Elusive New Orleans Mintmark

5065 **1850-O AU53 NGC. Variety 3.** The usually encountered die marriage for the '50-O, identified by a high mintmark that touches the eagle's tail. Although struck at New Orleans every year from the advent of the denomination until the Civil War shuttered the facility in 1861 (and again in 1879 when the mint re-opened), O-mint double eagles are very scarce relative to demand from Southern type collectors. The typical example grades XF, and Uncirculated examples are prohibitively rare. The present AU53 piece has plentiful pockets of luster and abrasions are moderate aside from a bagmark beneath obverse star 8. (#8903)

1850-O Liberty Twenty, AU53
First Date of Denomination

5066 **1850-O AU53 NGC. Variety 1.** Business-strike double eagles were struck for the first time in 1850, and the New Orleans Mint achieved a substantial production of 141,000 pieces. The issue circulated heavily in the regional economy, and few examples were saved for numismatic purposes. As a result, the 1850-O is seldom encountered in high grade, and even midlevel AU specimens are very scarce.

The present coin is an attractive AU53 example, with vivid green and orange-gold surfaces that show traces of prooflike reflectivity in sheltered areas. The well-detailed design elements show light traces of high-point rub, and a scattering of minor abrasions on both sides is consistent with the grade. Census: 46 in 53, 51 finer (6/12). (#8903)

1851 Double Eagle, XF45
Ex: *S.S. Central America*

5067 **1851 XF45 PCGS.** Ex: *S.S. Central America*, SSCA 6617. A Choice XF specimen of this Type One double eagle, recovered from the famous shipwreck. This attractive piece features pleasing greenish-gold surfaces that retain much original mint luster and show only minor abrasions. Only light wear is evident on the design elements. (#8904)

1851 Twenty Dollar, Still-Lustrous AU58

5068 **1851 AU58 NGC.** This second-year double eagle possesses nearly complete luster on the reverse, and luster is also faintly evident on the cheek and open obverse field. Refreshingly devoid of noticeable marks, though the strike is slightly soft on the left-side obverse stars. Struck from moderately rotated dies. (#8904)

Near-Mint1852 Liberty Twenty
Elusive Date in High Grade

5069 **1852 AU58 PCGS.** The 1852 Liberty double eagle enjoyed a large mintage of more than 2 million pieces, but the issue circulated heavily at the time of issue, and few high-grade specimens were saved for numismatic purposes. This well-detailed near-Mint example displays lustrous yellow and rose-gold surfaces, with the expected number of minor abrasions on both sides. Population: 79 in 58, 69 finer (6/12). (#8906)

1852 Double Eagle, AU58
Elusive in Mint State

5070 **1852 AU58 NGC.** This lovely light yellow-gold double eagle has splendid surfaces for the grade, with scattered marks of no consequence on either side. The strike is adequate and the eye appeal is excellent. NGC has only certified 89 Mint State examples of this issue (6/12). (#8906)

1852-O Liberty Twenty, XF45
Excellent Mintmark Type Coin

5071 **1852-O XF45 PCGS. Variety 1.** From a mintage of 190,000 pieces, the 1852-O double eagle is a relatively available issue and examples are quite popular with mintmark type collectors. This Choice XF specimen shows only light wear on the pleasing surfaces, with satiny mint luster and traces of prooflike reflectivity in sheltered areas. (#8907)

1853/2 Double Eagle, FS-301, AU58
Popular *Cherrypickers'* Variety

5072 **1853/2 AU58 NGC. FS-301.** Both gold specialists and variety collectors delight in the 1853/2 overdate, the only such in the Liberty Head double eagles. The diagonal of an underdigit 2 is prominent beneath the lower loop of the 3.

The variety is one that is seldom seen in Mint State. This piece features a sharp strike overall, with each side displaying significant reddish patina. Luster glows around the devices, but in keeping with light circulation, the fields are peppered with small abrasions. Census: 45 in 58 (including four from the S.S. *Republic*), 5 finer (6/12). (#8909)

1854 Small Date Twenty, AU53 Still-Lustrous and Original

5073 **1854 Small Date AU53 NGC. CAC.** A surprising amount of original mint luster remains. The surfaces are unquestionably original and display rich reddish-gold color that has a slight brownish tint. The strike is sharp throughout and the surfaces are finely marked with small, but individually unnoticeable abrasions. (#8911)

Mint State Small Date 1854 Double Eagle Surprising Eye Appeal

5074 **1854 Small Date MS60 NGC.** Taken on its own, the "Small Date" on the 1854 double eagle seems big, yet it is puny compared to the positively gargantuan "Large Date" of the same year. Though the Small Date is the more available of the two types, it is a condition rarity in Mint State nonetheless. While this well-struck example has a number of digs on and surrounding the portrait, its peach-gold luster is unaffected by wear. The thin line down from the N in UNITED is an abrasion, while the similar-seeming line through stars 6 and 7 on the obverse is a delicate copper streak instead. Census: 9 in 60, 20 finer (6/12). (#8911)

Choice AU 1854 Large Date Twenty From the S.S. *Central America*

5075 **1854 Large Date AU55 PCGS. CAC.** Ex: *S.S. Central America*. SSCA 6713. The 1857-S double eagles were, of course, not the only issue found in quantity aboard the doomed vessel, even though that issue was the largest single mintage onboard. Several other issues were recovered, including not only other S-mints but, surprisingly, P-mint issues from earlier in the 1850s, including the 1854, 1855, and 1856. This Choice AU example shows the diagnostic tiny die lump on the lower bust truncation, just left of the lowest hair curl, although a small abrasion joins the fray there. The apricot-gold surfaces show much luster remaining and a sharp strike, along with a thin straight scrape in the left obverse field, running from star 2 nearly the the front of the neck. Other marks are minor. Population: 10 in 55, 11 finer (5/12). (#98911)

Mint State 1854-S Twenty, Closed A
S.S. *Central America* Treasure Recovery

5076 **1854-S MS61 PCGS. CAC. Variety 11C.** Ex: *S.S. Central America*. SSCA 6575. The 1854-S double eagle represents the first time the denomination was struck in the San Francisco Mint, which had opened for coinage in that same year. Besides the recovery of examples from the *S.S. Central America* which sank in 1857, the 1854-S was also found aboard the *S.S. Yankee Blade*, which foundered off the California coast on October 1, 1854. Perhaps 200-300 pieces were recovered from the earlier shipwreck. The 1854-S is known in at least three reverse varieties, Broken A, Closed A, and Open A, referring to the A in STATES. This Closed A example is one of only two such certified at PCGS, with none finer (6/12). The orange-gold surfaces show a few minor abrasions on each side that account for the grade, amid generous luster and good eye appeal. (#8913)

Central America Shipwreck
MS61 1855-S Double Eagle, Broken A

5077 **1855-S MS61 PCGS. CAC. Variety 14A.** Ex. *S.S. Central America*. SSCA 6267. The A in STATES is broken, but the E is complete, hence the variety identification. S-mint double eagles from 1854 — the first year of coinage at the San Francisco Mint — through 1857 were found in the recovery of the *Central America*, which sank in a hurricane off the coast of Georgia in September 1857 with more than $2 million face value in gold on board. This piece is awash in excellent luster and deep reddish-orange color. A few distributed small marks on each side are in concert with the grade. The Slanted 5s in the date are characteristic of this era of U.S. numismatics. Population: 5 in 61, 14 finer (5/12). (#8916)

5078 **1856 XF45 PCGS. CAC.** Subdued luster appears on both sides of this lightly abraded Type One twenty, with pale green color over light yellow surfaces. The date was entered with a three-digit logotype, the 6 slightly low in relation to the 185.(#8917)

1856-S Twenty Dollar, No Serif, Left S MS62, From the *S.S. Central America*

5079 **1856-S MS62 PCGS. Variety 17O.** Ex. *S.S. Central America*. SSCA 5656. The various S-mint Liberty Head double eagle issues that were recovered from the *S.S. Central America*, dating from 1854 through 1857, are extremely popular with collectors. Our FUN 2012 offering of the Galt's Gulch Collection included some memorably high-grade examples that performed quite well at auction. The variety refers to the top left (missing) serif on the U in UNITED, with the S mintmark tilted slightly left at the top. This MS62 specimen offers copious luster over apricot-gold surfaces that show a few contact marks on the cheek and lower neck of Liberty. Population: 2 in 62, 39 finer (5/12). (#8919)

Choice AU 1857-S Double Eagle From the *S.S. Central America*

5080 **1857-S AU55 PCGS. CAC. Variety 20F.** Ex: *S.S. Central America*. SSCA 0847. The gold label holder designates the variety as "No Serif, Right S" as further explained in the July 2000 *Numismatist* article by S.S.C.A. curator Robert Evans. The curls display a hint of wear but the surfaces are only lightly abraded and much luster is retained, particularly on the reverse. (#8922)

Borderline Uncirculated 1857-S Twenty

5081 **1857-S AU58 NGC.** Overall this impressive coin is well-defined and generally lustrous with just a touch of rub across the highest parts of the design. The light yellow-gold surfaces are lightly abraded save for a few marks on the cheek and a tick on the upper part of Liberty's hair. This piece was not part of the *S.S. Central America* hoard, since the mintmark location is further to the right than on any of the varieties from that famous shipwreck.
Ex: FUN Signature (Heritage, 1/2009), lot 5686. (#8922)

Select Spiked Shield 1857-S Twenty Dollar Ex: *S.S. Central America*

5082 **1857-S MS63 PCGS. CAC. Variety 20A.** Ex: *S.S. Central America*. SSCA 0878. The "Spiked Shield" variety, associated with high grade survivors from the legendary treasure ship. Housed in its original gold label holder, the present lot appears undergraded since the sun-gold surfaces lack the scattered abrasions associated with the MS63 level. One tick on the cheekbone and a russet freckle on the E in STATES are unimportant relative to the assigned grade. (#8922)

Near-Gem 1857-S Double Eagle Formerly *S.S. Central America*

5083 **1857-S MS64 PCGS. CAC. Variety 20A.** Ex: *S.S. Central America*. SSCA 0567. A magnificent near-Gem of the popular "Spiked Shield" variety, named after the slender die line that passes through the left border of the shield. A few parallel and faint roller marks are present on the cheek but are of mint origin. Post-strike contact is negligible aside for minor abrasions near the bust tip. An important souvenir of the most famous 19th century shipwreck. (#8922)

Gem Bold S 1857-S Double Eagle From the *S.S. Central America*

5084 **1857-S MS65 PCGS. CAC. Variety 20B.** Ex: *S.S. Central America*. SSCA 0229. The Spiked Shield (first) and Bold S (second) are the most commonly seen reverse varieties among the 1857-S *Central America* double eagles, with the Narrow Serif coming in a distant third. Any Gem example of the 1857-S is a hotly contested coin when it crosses the auction block, although we know of few collectors who are actually attempting to assemble a variety set of the 1857-S coins — eight in all, according to PCGS and the July 2000 *Numismatist* article by Robert Evans describing them. This specimen displays blazing mint luster over orange-gold surfaces with a typical coloration and bold strike. PCGS has certified 49 numerically finer submissions of the Bold S variety (6/12). (#8922)

Premium Gem 1857-S Twenty Dollar Historic *S.S. Central America* Recovery

5085 **1857-S MS66 NGC. CAC.** Ex: *S.S. Central America*. The tale has been told many times how the *S.S. Central America* foundered in a terrible hurricane in 1857, hurtling lives and property alike to the bottom of the Atlantic Ocean. More than a century later, the rediscovered ship yielded more than 5,000 examples of the 1857-S double eagle, some of them in remarkably high grade due to their being tightly packed together in wooden crates which prevented their jostling about. This Premium Gem is a fine example of those recovered, showing a typical appearance, lighter-colored in the centers with slight orange-gold at the margins. Abundant luster and impeccable preservation give this coin every bit as much appeal as it undoubtedly had during the fateful year it left the San Francisco Mint. Census: 25 in 66, 4 finer (5/12). (#8922)

'Spiked Shield' 1857-S *Central America* Twenty Dollar, Stunning MS66

5086 **1857-S MS66 PCGS. CAC. Variety 20A.** Ex: *S.S. Central America*. SSCA 0571. The Spiked Shield reverse variety makes this the most generally available of the eight 1857-S double eagle die pairings, but that status also makes these *S.S. Central America* coins the ideal selection for type purposes, particularly in the higher Mint State grades, as here. The recovery of thousands of examples of the 1857-S from their watery grave made the 1857-S a Type One double eagle selection *par excellence*. This Premium Gem is bested in grade by only eight Spiked Shield pieces at PCGS (6/12). The surfaces display a typical but nonetheless stunning appearance, deeply lustrous reddish-orange color that brightens slightly at the margins of each side, with a bold strike and no singular signs of contact. (#8922)

MS63 Prooflike 1857-S Double Eagle Narrow Serif, *S.S. Central America* Coin

5087 **1857-S MS63 Prooflike PCGS. Variety 20C.** Ex: *S.S. Central America*. SSCA 4354. Even though thousands of examples of the 1857-S were eventually recovered from the wreck of the *S.S. Central America*, this piece is unusual on two counts: First, it is certified Prooflike by PCGS, putting it in a distinct minority, and the Narrow Serif attribution and Select grade further separate it from most of its fellows. The left serif atop the U in UNITED is narrow rather than nonexistent, and the S is closer to the feathers above than the legend below. The reflective surfaces show good luster and orange-red color, with an interesting hazy diagonal arc of deeper patina on each side. (#78922)

5088 **1858 — Planchet Streak Removed — Genuine PCGS.** In our opinion, this coin has the details of an AU specimen that has been cleaned and has altered surfaces. Mildly granular near 2:30 on the obverse, where traces of struck-in grease are noted. A pair of brief thin marks are beneath the date, and the straw-gold surfaces are faintly hairlined.(#8923)

1859-S Twenty Dollar, AU53
Appealing Type One Coin

5089 **1859-S AU53 NGC.** The San Francisco Mint produced a moderate mintage of double eagles in 1859 totaling 636,445 pieces, but most of them circulated widely. Today the average certified grade is about Choice XF to AU. This AU53 piece shows light abrasions, none severe, consistent with a short spate in circulation, but the orange-gold surfaces show considerable mint luster remaining and good eye appeal. A nice S-mint example of the Type One design. (#8928)

5090 **1861 AU50 PCGS.** The 1861 Liberty double eagle is an available issue from the first year of the Civil War. This lightly circulated example displays well-detailed design elements and vivid greenish-gold surfaces.(#8932)

1861 Double Eagle, AU58
Popular Civil War Era Type Coin

5091 **1861 AU58 NGC. CAC.** The 1861 Liberty twenty is an available date and a favorite choice of collectors seeking an example of the Type One double eagle. This pleasing near-Mint specimen is well-detailed and lustrous, with attractive yellow and rose-gold surfaces. Only the expected number of minor abrasions and luster grazes are evident. (#8932)

5092 **1861-S — Surfaces Tooled — PCGS Genuine.** In our opinion, this coin has the details of an AU specimen that has been tooled and cleaned. A spot at 6 o'clock on the reverse caused a prior owner to wipe the area, then attempt removal with pinscratches. Crisply struck with much luster and mildly bright surfaces.

1862-S Twenty, AU53

5093 **1862-S AU53 NGC.** The double eagle mintage at San Francisco in 1862 was more than 850,000 coins, and survivors have an average certified grade of just 49, indicating that most examples served their intended purpose in commerce. A small obverse rim mark is noted at 11 o'clock, and a few other moderate blemishes are visible on each side. This piece has dusky hazel patina over medium yellow surfaces. (#8938)

Choice AU 1862-S Double Eagle
Above Average Example

5094 **1862-S AU55 NGC. CAC.** NGC has certified 901 1862-S double eagles, and those submissions have an average grade of 51. This Choice AU is slightly nicer than the average example, exhibiting dusky hazel patina over lustrous honey-gold surfaces. Myriad inconsequential marks are noted on each side. (#8938)

1862-S Liberty Twenty, AU58
Only 13 Finer PCGS Coins

5095 **1862-S AU58 PCGS.** High-grade examples of the 1862-S Liberty double eagle were very rare before some nice coins surfaced in recent shipwreck finds. This lightly circulated near-Mint piece retains much of its original mint luster, with vivid green and orange-gold surfaces. Population: 37 in 58, 13 finer (5/12). (#8938)

AU Sharpness 1863 Double Eagle

5096 **1863 — Obverse Scratched — NGC Details. AU.** This lower mintage Civil War double eagle has a slightly bright obverse and an area of ruby-red color near the hairbun. The left obverse displays small marks, none of which appears sufficiently consequential to merit the NGC designation. The reverse is attractive and retains most of its initial luster. (#8939)

1865 Liberty Double Eagle, AU58
Final Civil War Date

5097 **1865 AU58 PCGS.** This well-detailed near-Mint double eagle shows just a touch of wear on the high points of Liberty's hair. The vivid greenish-gold surfaces display a scattering of grade-consistent minor abrasions on both sides, with vibrant mint luster and strong eye appeal for the grade. Population: 30 in 58, 29 finer (6/12). (#8943)

1865 Twenty Dollar, MS62
Triple-Punched 1 in Date

5098 **1865 MS62 PCGS.** The 1 in the date is triple-punched and has traces of earlier punches both above and below the prominent 1. This satiny representative is uncommonly well-struck, even on the often-indistinct hair curls. A reeding mark in front of Liberty's nose and a shallow abrasion to the right of stars 2 and 3 keep this attractive example from an otherwise-deserved Select rating. While the discovery of numerous 1865-dated double eagles aboard several shipwrecks has increased the issue's overall availability in Mint State, most of those coins, pedigreed to the *S.S. Republic*, were certified by NGC. The PCGS Registry Set enthusiast should give the present coin particularly close attention. Population: 9 in 62, 7 finer (6/12).
Ex: Pittsburgh Signature (Heritage, 8/2004), lot 7571; Palm Beach Signature (Heritage, 3/2005), lot 7158. (#8943)

5099 **1866-S Motto XF40 PCGS.** This tan-gold introductory year Motto San Francisco twenty is well defined and has noticeable luster on the reverse. Luster is also evident within obverse design recesses. As expected for a moderately circulated double eagle, marks are scattered, with those on Liberty's neck worthy of passing mention.(#8950)

Choice AU 1866-S Twenty
First Year With Motto

5100 **1866-S Motto AU55 PCGS.** The motto IN GOD WE TRUST appeared on the double eagle for the first time in 1866 and, although the San Francisco Mint produced a large mintage of 842,250 pieces, the issue is seldom encountered in high grade. This Choice AU specimen offers well-detailed devices and lustrous surfaces that show only minor abrasions. Population: 39 in 55, 40 finer (6/12). (#8950)

1866-S Liberty Twenty, AU58
First Year of the Type Two Design

5101 **1866-S Motto AU58 PCGS.** The year 1866 saw the introduction of the Type Two design on double eagles, with the motto IN GOD WE TRUST on the reverse. The San Francisco Mint achieved a substantial mintage of 842,250 pieces that year, and most of the coins were released into circulation in the regional economy. Few examples were saved by numismatists, and the issue is most often seen in VF and XF grades today. The 1866-S is quite scarce in AU58 condition, and Mint State examples are rare.

This attractive near-Mint specimen shows just a trace of actual wear on the well-detailed design elements. The light yellow and orange-gold surfaces retain much original mint luster, with the expected number of minor abrasions for the grade. Population: 22 in 58, 18 finer (5/12). (#8950)

1867-S Liberty Twenty, MS61
Only Five Finer at PCGS

5102 **1867-S MS61 PCGS.** Our auction archives show a total of just eight Mint State 1867-S double eagles in any previous sale since 1993, and those pieces include four MS61 NGC examples and four MS60 PCGS coins. The present piece is the finest PCGS example we have offered in the past 20 years. Liberty double eagle specialists will hardly be surprised by that analysis, as this issue is known for its condition rarity.

This pleasing specimen has brilliant yellow luster with excellent eye appeal despite a few scattered marks. A dark toning spot in the left obverse field and a few others on the reverse will aid future collectors in tracking the provenance. An impressive and highly important example. Population: 2 in 61, 5 finer (6/12). (#8952)

1868-S Twenty, Choice AU
Attractive Remaining Luster

5103 **1868-S AU55 PCGS.** While readily available in lower grades, the 1868-S is conditionally scarce in AU grade. This Choice piece has remarkably vibrant reddish-gold color. As with most examples seen, this piece has bagmarked surfaces, the most notable abrasions on the face of Liberty. Weakly defined around the margins, as usual. (#8954)

Choice AU 1868-S Double Eagle
Rare Issue in Higher Grades

5104 **1868-S AU55 PCGS. CAC.** Like many other Type Two double eagle issues, the 1868-S is not difficult to locate in lower circulated grades, but AU specimens are scarce, and Mint State examples are rare. This lightly circulated piece features well-detailed design elements and pleasing orange-gold surfaces that retain significant amounts of original mint luster. (#8954)

Near-Mint 1868-S Twenty
Notably Clean Surfaces

5105 **1868-S AU58 NGC. CAC.** As the grades climb higher and higher, there are progressively fewer and fewer nice 1868-S twenties available. This piece is certainly atypical for the issue with remarkably clean surfaces. The yellow-gold color shows just the slightest hint of red, and good remaining luster is seen around the devices on each side. (#8954)

Mint State 1869 Double Eagle
Bright Orange-Gold Surfaces

5106 **1869 MS61 PCGS.** The Reconstruction-era mintage of the 1869 Philadelphia double eagle was a moderate 175,130 business strikes, an amount about one-quarter of what San Francisco would produce in the same year. Garrett and Guth write that "most of the coins that were not melted or exported are heavily bagmarked and range in grade from Extremely Fine to About Uncirculated." This Mint State specimen is clearly exceptional, showing bright prooflike fields on the obverse; the reverse is also mirrored, but not to the same extent. The strike is sharp, and deep orange-gold color prevails throughout. Only light abrasions appear, with no marks of importance on either side. Population: 9 in 61, 15 finer (5/12). (#8955)

1869-S Twenty, AU58

5107 **1869-S AU58 PCGS.** Nearly full brilliant yellow luster is noted on this lovely near-Mint specimen, with splashes of deeper lemon-yellow on each side. The surfaces are pleasing, showing only scattered marks. Here is an important condition rarity in the Type Two double eagle series, with only 47 finer PCGS coins (6/12). (#8956)

Mint State 1869-S Twenty Dollar
Usually Seen in AU Condition

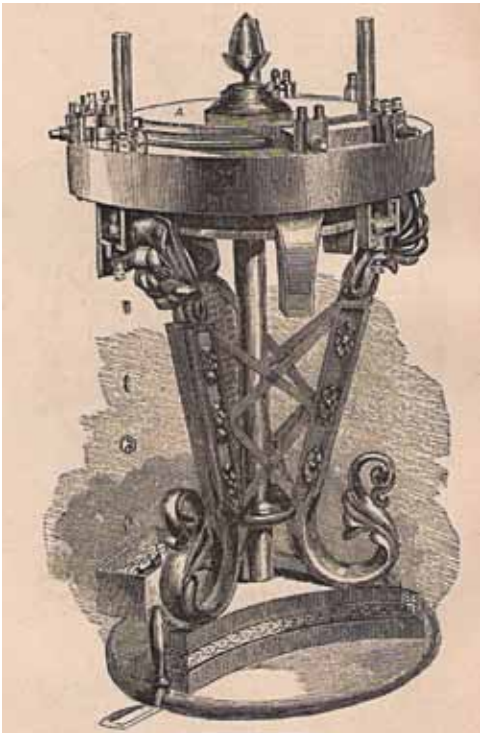

5108 **1869-S MS61 PCGS.** This early Type Three S-mint Liberty Head issue was struck in a generous amount of 686,750 pieces, but most of the coins obviously circulated in the Old West, a region built on the hard money tradition that the California Gold Rush only served to reinforce. Most 1869-S double eagles today are circulated, usually grading no more than AU or so. Mint State examples such as the present specimen are rare. This piece is weakly struck on the obverse stars that ring the periphery, with a decent impression elsewhere.

Soft frosted mint luster covers surfaces that feature reddish-tinted orange-gold color. A couple of larger field marks are in concert with the grade, but most of the surface abrasions are small and undistracting. Population: 29 in 61, 9 finer (5/12). (#8956)

Uncirculated 1871-S Double Eagle
Popular Type Two Issue

5109 **1871-S MS60 PCGS.** The 1871-S double eagle is popular as a relatively plentiful memento of the San Francisco Mint during the Reconstruction era, which roughly coincided with the 1866-1876 Type Two design. This piece is Mint State with bright mint luster and reflective fields, reddish-gold with faint hints of lilac scattered about. Myriad abrasions, mostly on the light side, account for the grade. (#8962)

1872-CC Double Eagle, AU53
Still-Lustrous Orange-Gold Surfaces

5110 **1872-CC AU53 NGC.** As always at the Carson City Mint, depositors of gold bullion could request gold coins, gold bars, or certificates of deposit drawn on San Francisco banks, according to Rusty Goe in *The Mint on Carson Street*, who further points out that in 1872 miners "requested just 16% of their deposits to be paid in gold coins," with the balance the other forms of payment noted above.

Goe estimates that only 1.5% of the 26,950 1872-CC double eagles survive today, even though some high-grade specimens survive, up to the MS62 level, where a single PCGS coin occupies the top rung. This AU53 NGC still retains most of the luster of a Mint State coin, although the orange-gold surfaces show myriad ticks and scrapes that are testament to a spell in circulation. (#8964)

5111 **1872-S AU58 PCGS.** Small squat S, one of two mintmark styles in use for twenties that year in San Francisco. The cartwheel luster is potent and nearly intact on this nicely struck honey-gold Type Two double eagle. Distributed abrasions are consistent with the grade.(#8965)

1873 Liberty Double Eagle, MS62
In-Demand Open 3 Type

5112 **1873 Open 3 MS62 NGC.** Among Type Two double eagles, the 1873 Philadelphia issue with the Open 3 in the date is probably the most available coin, and the number one choice of type collectors. This well-detailed MS62 example offers strong mint luster and light orange-gold surfaces, with rose highlights. (#8967)

Open 3 1873 Twenty, MS63
Remarkably Clean for the Grade

5113 **1873 Open 3 MS63 PCGS.** This available Type Two twenty has even luster over each side, but it is just a bit dull to warrant a higher grade. The lack of abrasions certainly suggest an even higher grade, though, with no singularly important or distracting marks on either side. Sharply struck throughout. (#8967)

AU53 1873-CC Double Eagle
Considerable Radiance

5114 **1873-CC AU53 NGC.** By 1873, the Carson City Mint's operations were ramping up, especially in the striking of gold. Compared to the early double eagle issues such as the 1870-CC and 1871-CC, the 1873-CC twenty is far more accessible. Even so, the date is conditionally scarce in AU and better grades with demand far exceeding supply. This yellow-gold example exhibits considerable remaining radiance over each side with little patina. A soft strike blends the detail on Liberty's hair, though the actual level of wear is minimal. Scattered abrasions and a few digs to the left of Liberty's chin contribute to the grade. (#8968)

5115 **1873-S Closed 3 — Surface Damage — Genuine PCGS.** In our opinion, this coin has the details of an Uncirculated specimen that has been damaged. A bright scrape on the upper left obverse field corresponds to the PCGS designation. The remainder of the wheat-gold coin is lustrous and attractive.(#8969)

Near-Mint 1873-S Liberty Twenty
Scarcer Open 3 Variety

5116 **1873-S Open 3 AU58 PCGS.** The 1873-S Liberty double eagle was produced in large numbers, but the variety with the Open 3 in the date is much more difficult to locate than its Close 3 counterpart. This lightly circulated near-Mint example displays well-detailed design elements, with an interesting die crack connecting the first four stars. The lustrous yellow-gold surfaces show only grade-consistent contact marks. (#8979)

Open 3 1873-S Double Eagle, AU58
With Generous Cartwheel Luster

5117 **1873-S Open 3 AU58 PCGS.** Almost all of the original mint luster clings to this orange-gold near-Mint coin, but quite a few mostly light abrasions appear, more so on the obverse than the reverse. The eye appeal is nice nonetheless, with cartwheel luster evident. Mint State examples are elusive. Population: 67 in 58, 49 finer (6/12). (#8979)

Scarce Uncirculated 1874-S Twenty

5118 **1874-S MS61 PCGS.** Block S, one of two mintmark styles known for the issue. This is a well struck straw-gold and olive example of a conditionally scarce date. Moderate obverse abrasions correspond to the designated grade, though the reverse is smooth and on its own merits appears to surpass the MS61 level. (#8972)

1875 Twenty, MS62, Only Readily Collectible
Gold Denomination of the Year

5119 **1875 MS62 NGC. CAC.** The 1875 Liberty double eagle is not a rare date in itself, but it benefits from association with the other gold denominations of this date, which are all noted rarities. This attractive MS62 specimen is well-detailed and brightly lustrous, with pleasing yellow and rose-gold surfaces. (#8973)

5120 **1875-CC — Improperly Cleaned — NGC Details. AU. Variety 4-A.** Eight die pairs have been confirmed for the '75-CC despite a fairly low mintage of 111,151 pieces. The present delicately hairlined Carson City double eagle has a good strike and only minor bagmarks, though we note a slender diagonal abrasion on the cheek.(#8974)

1875-CC Liberty Twenty, Unc Details
Vivid Color and Luster

5121 **1875-CC — Rim Filing — NGC Details. Unc. Variety 1-A.** The obverse rim is filed throughout, though the casual collector would likely not notice. This is a lustrous caramel-gold representative with a smooth reverse and wispy obverse grazes. The 1875-CC is one of the more available Carson City double eagles, with an estimated surviving population of 2,500-3,000 pieces in all grades. (#8974)

Borderline Uncirculated 1876-CC Twenty
Repunched Date Variety

5122 **1876-CC AU58 PCGS. Variety 4-A.** A misplaced date (probably the top of an errant 8) within the obverse dentils beneath the 8 attributes this Centennial-year Carson City twenty. This lemon-gold and lime-green example displays substantial luster. Well struck and attractive with minor abrasions near the obverse stars. (#8977)

Sharply Detailed 1876-S Twenty, MS62
Vibrant Mint Luster and Strong Eye Appeal

5123 **1876-S MS62 PCGS.** The 1876-S Liberty double eagle is extremely popular with type collectors seeking a Type Two representative for their sets. This impressive MS62 specimen is sharply detailed throughout, with vibrant mint luster and strong eye appeal. A scattering of minor contact marks on both sides explains the grade. (#8978)

1876-S Type Two Double Eagle, MS62
Blatant Eye Appeal

5124 **1876-S MS62 PCGS. CAC.** Blatant eye appeal is the hallmark of this highly lustrous two-toned MS62 1876-S twenty, orange-gold overall but with glints of jade near the rims. The flashy surfaces are relatively unabraded for the grade and show a good strike. The large mintage of nearly 1.6 million pieces has made this Type Two issue quite popular, and this example should certainly garner attention from astute collectors. (#8978)

MS63+ 1876-S Twenty Dollar
Boldly Struck Type Two Example

5125 **1876-S MS63+ PCGS. CAC.** This Type Two Centennial S-mint Liberty Head issue in high grade should appeal to a multitude of collectors as such. The 1876-S was minted in a large quantity exceeding 1.5 million pieces, although such an amount was not extraordinary for San Francisco in the 1870s, given the abundance of gold available from multiple sources during the era. Brilliant luster radiates from both sides of this high-end coin, showing mellow reddish-orange color and few marks overall, save for a small patch of contact in the lower left obverse field. The sharp strike is equally pleasing. Population: 1 in 63+, 13 finer (5/12). (#8978)

Choice AU 1877-CC Twenty
Scarce Carson City Issue

5126 **1877-CC AU55 PCGS. Variety 1-A.** Luster dominates the reverse and outlines the obverse stars. A crisply struck and moderately abraded orange-gold example of this popular Type Three Carson City issue. A low mintage, given that San Francisco struck more than 40 times as many double eagles in 1877. (#8983)

1878 Twenty, Lustrous MS62
Obtainable Early Type Three Twenty

5127 **1878 MS62 PCGS.** The 1878 was found in quantity in overseas holdings, but most are only marginal quality. This example has bright, lustrous surfaces that exhibit even reddish patina. Each side is lightly marked, the only exceptions are a scrape in the field above Liberty's head and a tiny dark dot above the eagle's right (facing) wingtip. (#8985)

MS62 1878 Double Eagle
Doubled Die Obverse and Reverse

5128 **1878 MS62 PCGS. CAC.** This honey-gold double eagle offers coruscating luster and possesses only a minimal number of marks for the MS62 level. The reverse is lightly die doubled, most evident on the bases of STATES. The obverse is also lightly die doubled, evident on LIBERTY and a few points of the upper stars. A different DDR from Breen-7270, which shows clear doubling on DOLLAR. (#8985)

1879 Twenty Dollar, MS62
Elusive Type Three Issue

5129 **1879 MS62 PCGS.** This early Type Three Liberty double eagle is a delightful example with frosty light yellow-gold luster, faint pink overtones, bold motifs, and minimal scattered surface marks in the fields and on the design elements. Population: 45 in 62, 21 finer (6/12). (#8988)

5130 **1879-S AU58 PCGS.** This sharply detailed near-Mint specimen shows just a touch of wear on the high points of the devices, with ample luster on the attractive greenish-gold surfaces. A scattering of grade-consistent abrasions is evident on both sides. (#8991)

5131 **1883-CC — Improperly Cleaned — NGC Details. AU. Variety 2-A.** The usual variety of this popular Carson City issue, moderately scarce due to a low mintage of less than 60,000 pieces. This wheat-gold example is bright from a cleaning but is free from detrimental abrasions. The high points have a rose tint and display slight wear. (#8999)

AU 1883-CC Double Eagle
Brightly Lustrous

5132 **1883-CC AU50 NGC. CAC. Variety 2-A.** A lightly circulated example of this popular Carson City emission. The curls and wings exhibit slight wear, but bright luster fills the legends and outlines individual obverse stars. One small spot is noted above the hairbun, but no marks are singularly consequential. (#8999)

1883-CC Liberty Twenty, AU58
Variety 2-A, Virtually Full Luster

5133 **1883-CC AU58 PCGS. Variety 2-A.** The obverse has small die chips near stars 8 and 9, while the mintmark is centered below the eagle's tail. The other reverse die has the mintmark left of center below the tail, but centered over the space between the Y and D in the denomination. This lustrous near-Mint specimen has a small dark spot on Liberty's cheek, and a couple of others on the reverse. Both sides have virtually full luster with soft, frosty yellow surfaces. (#8999)

1883-S Double Eagle, MS62
Vivid Color and Luster

5134 **1883-S MS62 PCGS. CAC.** Like most San Francisco double eagles of this time frame, the 1883-S was produced in large quantities, but the supply of high-grade examples has been greatly reduced by export and careless handling in storage. This attractive MS62 specimen is well-detailed and lustrous, with only minor contact marks on its pleasing orange-gold surfaces. (#9000)

5135 **1888-S MS62 PCGS. CAC.** The vivid greenish-gold surfaces of this attractive MS62 specimen show only minor contact marks and the design elements are well-detailed. Vibrant mint luster adds to the strong eye appeal.(#9009)

Near-Gem 1888-S Double Eagle
Frosty Two-Toned Example

5136 **1888-S MS64 NGC. CAC.** Type Three S-mint Liberty Head twenties are elusive regardless of date, as most examples seen are no better than MS62, as a rule. Cartwheel luster dominates each side of this 1888-S near-Gem, with orange-gold centers ceding to tinges of mint near the rims on each side. The frosty surfaces show a bold strike and only a couple of singular marks, consistent with the grade. (#9009)

1889-CC Twenty Dollar, XF40
Impressive Carson City Type Coin

5137 **1889-CC XF40 NGC. Variety 1-A.** Although Mint State examples are rare, the 1889-CC Liberty double eagle is not too difficult to locate in XF condition, and mintmark type collectors prize this issue. This attractive example features well-detailed design elements and lightly abraded greenish-gold surfaces. (#9011)

1889-CC Double Eagle, MS61
Scarce Issue in Mint State

5138 **1889-CC MS61 PCGS. Variety 1-A.** Only 30,945 Liberty double eagles were struck at the Carson City Mint in 1889, but the date is not as elusive as the small production total would suggest. The 1889-CC was represented in at least one hoard that surfaced in the 1990s, and Doug Winter estimates a surviving population of 800-900 examples in all grades. Most examples seen grade XF-AU, and specimens in MS61 condition are very scarce.

The present coin is an impressive Mint State piece, with well-detailed design elements that show just a touch of softness on the hair and some stars. The lustrous orange and greenish-gold surfaces are highlighted by hints of rose. Both sides show a scattering of minor contact marks that explain the grade. Population: 39 in 61, 61 finer (5/12). (#9011)

1890-CC Double Eagle, AU55
Pleasing Mintmark Type Coin

5139 **1890-CC AU55 NGC. Variety 1-A.** The 1890-CC Liberty double eagle is one of the more available Carson City issues, and attractive Choice AU specimens are prized by mintmark type collectors. The present coin is sharply detailed in most areas, with just a touch of softness on the obverse stars. The pleasing greenish-gold surfaces display a mixture of satiny mint luster and prooflike reflectivity. (#9014)

Near-Mint 1890-CC Double Eagle

5140 **1890-CC AU58 PCGS. CAC. Variety 1-A.** This lustrous Carson City twenty appears Uncirculated upon first glance, but close evaluation shows light rub on the cheek and near the Y in LIBERTY. Minimally abraded though traces of struck-in grease are noted above the date and beneath the hairbun. The scarce early die state with intact tail feathers. PLURIBUS and TWENTY are lightly die doubled. (#9014)

Mint State 1890-CC Twenty
Relatively Unmarked and Lustrous

5141 **1890-CC MS61 NGC.** The 1890-CC double eagle is a popular representative of the later strikes from the fabled Carson City Mint, struck in the generous amount of 91,209 pieces. Fortunately, examples survive today in grades up to MS62, and occasionally finer. This MS61 NGC-certified example shows surprisingly few marks for the grade, mostly confined to the reverse. Noticeable die polishing has removed portions of the lower-right eagle's tail. The lustrous orange-gold surfaces have a faintly prooflike character. Nice for the grade. (#9014)

5142 **1893-S MS62 NGC. CAC.** A lustrous and boldly struck butter-gold double eagle. Lightly abraded for the MS62 level aside from a slender mark on the cheek and another across the jaw into the lower obverse field. Certified in a prior generation holder. (#9024)

5143 **1896/1896 MS62 NGC. FS-301.** All four digits of the date show evidence of repunching on this popular overdate. The design elements are sharply detailed, with crisp definition on the strands of Liberty's hair. The lustrous greenish-gold surfaces show only minor contact marks.(#9029)

5144 **1896-S MS63+ NGC. CAC.** Faint greenish overtones reside on the lustrous yellow-gold surfaces of this satiny Select Mint State example that is clearly finer than the usual survivor. (#9030)

Choice 1898-S Twenty Dollar
Sea-Green and Peach-Gold Toning

5145 **1898-S MS64 PCGS. CAC.** A beautiful near-Gem with lovely sea-green and peach-gold toning. The fields are uncommonly unabraded for the MS64 level, and faint marks near the chin are all that limit the grade. The strike is bold throughout. Rare any finer, and housed in a green label holder. (#9034)

1898-S Twenty, MS64
Conditionally Scarce

5146 **1898-S MS64 PCGS. CAC.** A conditionally scarce double eagle from a mintage of more than 2.5 million coins. PCGS has only certified 94 finer examples (5/12). Housed in a green-label holder, this example has frosty orange-gold luster with bold design motifs. Traces of delicate green overtones add to the eye appeal. (#9034)

5147 **1903 MS64+ NGC.** An impressive near-Gem, this Type Three double eagle has brilliant yellow surfaces with bold design motifs and satiny luster. A few copper spots are noted, mostly on the reverse.(#9043)

5148 **1904 MS62 Prooflike NGC.** Both sides of this splendid Mint State piece are bright yellow, with fully mirrored fields around the boldly detailed devices. Trivial field marks on each side prevent a higher grade.(#79045)

5149 **1906 MS61 NGC. CAC.** Only two 20th century Liberty double eagle issues, 1902 and 1905, had mintages lower than the 69,500 pieces struck at Philadelphia in 1906. This example has excellent design definition with frosty yellow luster.(#9049)

1906 Twenty, Satiny MS62

5150 **1906 MS62 NGC.** The 1906 is a low-mintage issue with only 69,596 pieces produced. It is not as scarce as the 1902 or 1905, but it is seldom found finer than the present MS62. The mint luster is somewhat subdued and satiny with a light, even, reddish tint. The only mark of any note crosses Liberty's hair curls just behind the temple. (#9049)

1906-D Double Eagle, MS63+
First Denver Issue

5151 **1906-D MS63+ NGC.** The 1906-D Liberty double eagle is always popular as a representative of the first year of coinage at the Denver Mint. This high-end Select specimen is sharply detailed throughout, with vibrant mint luster and pleasing greenish-gold surfaces. Only a short scratch near the obverse rim at 5 o'clock prevents a higher grade. (#9050)

Choice 1906-S Liberty Twenty
Only Three Numerically Finer PCGS Coins

5152 **1906-S MS64 PCGS.** This delightful Choice specimen displays razor-sharp definition on all design elements, with vibrant mint luster and well-preserved yellow-gold surfaces. Eye appeal is exceptional. The 1906-S Liberty double eagle is scarce in Choice condition, and PCGS has graded only three coins in higher numeric grades (6/12). (#9051)

5153 **1907 MS64 PCGS.** A well-detailed Choice example of the last date of the Liberty design, this attractive coin displays lightly marked yellow and rose-gold surfaces, with vibrant satiny mint luster. PCGS has graded only 13 numerically finer examples (6/12). (#9052)

HIGH RELIEF DOUBLE EAGLES

1907 High Relief Twenty, Bright Surfaces

5154 **1907 High Relief, Wire Rim — Devices Engraved — Genuine PCGS.** The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a AU50 specimen that has been damaged, engraved, and cleaned. This is clearly an ex-jewelry piece; the tabs that held the coin in the bezel damaged the left and right reverse fields. Those areas have been smoothed, and the feathers on the back of the wing have been engraved. The surfaces are bright from cleaning, with reddish-tinted color on each side.

1907 Saint-Gaudens Twenty, AU Details
High Relief, Wire Rim, Vibrant Luster

5155 **1907 High Relief, Wire Rim — Surfaces Tooled — Genuine PCGS. AU Details.** A lightly circulated example of this famous issue, widely acclaimed as the most beautiful of all U.S. coin designs. The well-detailed design elements show just a touch of wear and the yellow and orange-gold surfaces display some minor signs of tooling. This still-attractive specimen exhibits vibrant mint luster on both sides.

MCMVII Wire Rim High Relief Twenty, MS66+
Exceptional Quality

5156 **1907 High Relief, Wire Rim MS66+ NGC.** *But coming here has been a wonderful experience, surprising in many respects, one of them being to find how much of an American I am.*
— Augustus Saint-Gaudens

Saint-Gaudens made this observation when he returned to Paris in 1886. His father was born in France, he attended the École des Beaux-Arts, and spoke fluent French. But his professional life had been consumed by the design and completion of one after another monumental sculptural works of particularly American subjects. When President Roosevelt tapped Saint-Gaudens to partially redesign America's coinage, the sculptor had one foot firmly planted in European artistic heritage and the other in the newness and vibrancy of the American century that dawned in 1900. This twofold influence is best exemplified by the High Relief double eagle of 1907. Clearly influenced by the Nike of Samothrace on exhibit in the Louvre, Saint-Gaudens took this Classical Greek statue and remodeled it into the Liberty that precedes General Sherman, now seen at the entrance to Central Park. He used this same figural element and Old World/New World dichotomy to create the design of the double eagle. Liberty strides boldly forward into the dawn of a new era with the sun rising behind her.

This is a magnificently preserved example of what is undoubtedly the best-designed and most attractive coin ever struck. The glowing, yellow-gold, satiny surfaces show no contact marks on the obverse, and on the reverse there is only a small cluster on the sun. The wire rim is almost complete around each side. Exceptional quality. Census: 25 in 66, 8 finer (6/12). (#9135)

1907 Flat Rim, High Relief, AU58
Just a Trace of the Wire Rim Shows

5157 **1907 High Relief, Flat Rim AU58 NGC.** Late in the production run the High Relief twenty the design was slightly modified in order to reduce or eliminate the wire rim seen around most examples. This was seen as a die defect by Mint Director Frank Leach and he demanded it be fixed. The "problem" of the wire rim was never fully resolved as most High Reliefs still show a remnant of extruded metal somewhere on the rim. On this coin it is only seen on the reverse rim from 7 to 10 o'clock. The surfaces are bright on both sides and there is just a bit of flatness on the high points of the design. A number of small contact marks are scattered across both sides, but none are of individual significance. (#9136)

1907 High Relief, MS62
Much Scarcer Flat Rim Variant

5158 **1907 High Relief, Flat Rim MS62 PCGS.** On December 14, 1907, Mint Director Leach ordered "that the operators be instructed to work with extreme care so as to prevent the excessive burrs on the edges of the coin." The "burrs" as Leach called them, or "fins" as other Mint personnel termed them, are more affectionately known by collectors as "wire rims." The thin rim of metal Mint officials found so troublesome was virtually eliminated in the final production runs of High Reliefs. The only trace of a "fin" on this coin is from 5 to 9 o'clock on the reverse. The surfaces on this bright, satiny example are minimally marked for the grade. Sharply struck throughout, as one would expect from three blows from a hydraulic press. (#9136)

PROOF HIGH RELIEF DOUBLE EAGLES

1907 PR61 High Relief Twenty
Bright, Exceptionally Strong Strike

5159 **1907 High Relief PR61 NGC.** The certification of proof High Reliefs remains controversial, with NGC grading such pieces and PCGS not acknowledging them. Extreme sharpness of strike is one of the criteria used for proof strikings. On this piece such sharpness is abundantly evident with fully countable pillars on the Capitol building, rounded berries, and crisp detailing on the figure of Liberty and the eagle. The surfaces are bright and ever-so-lightly hairlined, but there are no obvious or detracting contact marks on either side. A slight rim bump on the reverse rim just above the U in UNITED gives the wire rim a "folded down" appearance in that area. (#9132)

SAINT-GAUDENS DOUBLE EAGLES

5160 **1907 Arabic Numerals MS64 PCGS.** Only a few minuscule marks appear on this lovely piece, with highly lustrous yellow-gold surfaces. A weak strike seems to be the grade-limiting factor. (#9141)

5161 **1908 No Motto MS65 PCGS.** Long Rays Obverse. A lovely Gem with vibrant luster and well preserved olive-gold and peach surfaces. The strike is crisp except on the leg feathers of the eagle. (#9142)

1908 No Motto Saint-Gaudens Twenty
MS66+, Thick Mint Luster

5162 **1908 No Motto MS66+ PCGS.** This MS66+ 1908 No Motto twenty features brilliant yellow luster with delicate rose overtones and virtually perfect, pristine surfaces. While not a major condition rarity like some other series issues, the population of just 91 in MS66+ and 76 finer coins is low enough to ensure constant demand (6/12). (#9142)

1908 No Motto Double Eagle, MS67
From the Wells Fargo Hoard

5163 **1908 No Motto, Wells Fargo Nevada MS67 PCGS.** This spectacular Superb Gem 1908 No Motto double eagle traces its history to the famous Wells Fargo Hoard, discovered and marketed in the 1990s, which included many high grade examples of this issue. The present coin offers sharply detailed design elements, vibrant mint luster, and impeccable green and rose-gold surfaces. (#99142)

MS68 1908 No Motto Double Eagle
Elite Wells Fargo Example

5164 **1908 No Motto, Wells Fargo Nevada MS68 NGC.** This incredible coin traces its history to the "Wells Fargo Hoard" purchased by Ron Gillio in the 1990s. That historic gathering contained nearly 20,000 double eagles of uniformly high quality that had been stored in sealed bags since 1917. The surpassing quality of this piece stands out, even in that illustrious company.

The present coin is a magnificent MS68 example with impeccably preserved surfaces and vibrant mint luster. The rich greenish-gold surfaces are accented by highlights of rose and orange. Because of the relief of the dies, the 1908 No Motto typically shows a little flatness on Liberty's knee and the eagle's feathers. This spectacular example does show the expected softness on these devices, but is sharply detailed in other areas. An incredibly important type coin. (#99142)

1908 No Motto Twenty, Near-Perfect MS68
From the Wells Fargo Hoard

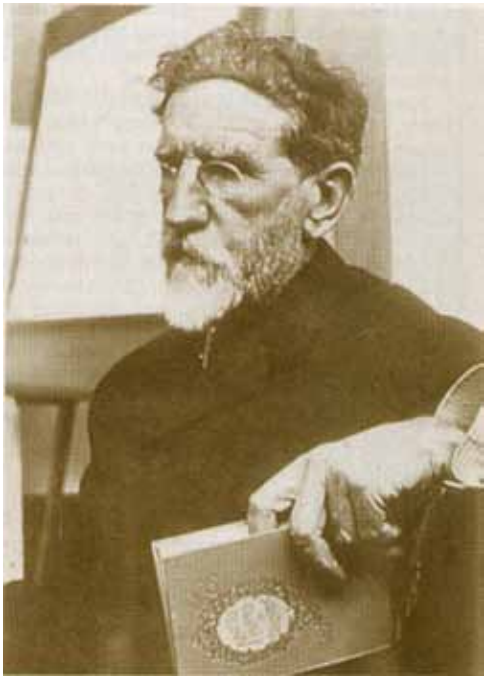

5165 **1908 No Motto, Wells Fargo Nevada MS68 PCGS.** The Wells Fargo Hoard was a treasure of nearly 20,000 examples of the 1908 No Motto double eagles, coins that had resided undisturbed — and even *unmoved* — in bank bags from 1917 until they surfaced in the numismatic market in the 1990s. The quality of the hoard was even more staggering than the quantity, with PCGS grading 10 examples in the unheard-of grade of MS69. This MS68 example displays superb bright mint luster over even, orange-gold surfaces that approach technical and aesthetic perfection, as one would expect from such a grade. As this lot makes obvious, the Wells Fargo Hoard continues to provide multiple delights for collectors today. The population data have not budged: PCGS continues to show 10 *pieces* finer (6/12). (#99142)

1909/8 Saint-Gaudens Twenty, MS62
Only 20th Century Gold Overdate

5166 **1909/8 MS62 PCGS. FS-301.** The 1909/8 Saint-Gaudens double eagle is always in demand as the only overdate in the U.S. 20th century gold series. This well-detailed MS62 example exhibits attractive green and orange-gold surfaces, with vibrant mint luster. A scattering of minor contact marks on both sides is consistent with the grade. (#9151)

1909-D Twenty, Eye-Appealing MS64
Seldom Seen Finer

5167 **1909-D MS64 PCGS. CAC.** Given all the absolute and conditional rarities within the first three years of the Saint-Gaudens double eagles — the Ultra and High Relief coins (Wire and Flat Rim), the ultralow-mintage 1908-S, the popular 1909/8 overdate — the 1909-D has a sometimes forgotten but surprisingly low mintage itself, of 52,500 pieces. It is not a melt rarity, like some later dates in the series, but the low mintage makes it a condition rarity in the higher Mint State grades. David Akers noted in our recent sale of the Duckor Collection that most of today's Choice, Gem, and finer examples came from a Central America hoard that came to market in 1983. This near-Gem displays the sharp strike and ebullient luster that higher-Mint State pieces are renowned for, with lovely orange-gold color and top-notch eye appeal. The certified populations thin out markedly above this level: PCGS has seen only 22 submissions finer (5/12). (#9152)

1910 Double Eagle, MS65
Softly Glowing Cartwheel Luster

5168 **1910 MS65 PCGS.** Softly glowing cartwheel luster complements a meticulous strike exemplified by Liberty's sharp facial features and drapery, as well as the eagle's wing feathers. Rich reddish-gold surfaces on both sides are free of obtrusive marks, though a few minor ticks can be found with a glass. Moderately scarce among early Philadelphia twenties. (#9154)

Gem 1910 Twenty Dollar, Seldom Seen Finer
Radiant Orange-Gold Surfaces

5169 **1910 MS65 PCGS.** Exactly eight submissions of the 1910 double eagle are numerically finer than the present Gem — four each at NGC and PCGS (including one MS66+, the Duckor Collection example we recently offered) (6/12). These low population numbers make the 1910 among the most conditionally sensitive or elusive issues in the entire series at Gem or finer levels. This specimen is well worthy of the grade, with beautiful orange-gold color and generous cartwheel luster over relatively unabraded and appealing surfaces. (#9154)

5170 **1910-D MS65 NGC.** A sharply detailed Gem, with vibrant mint luster and pleasing orange-gold surfaces. Visual appeal is quite strong. The 1910-D is an available date, always popular with mintmark type collectors.(#9155)

Choice 1911 Double Eagle
Underrated Date in High Grade

5171 **1911 MS64 PCGS.** The 1911 Saint-Gaudens double eagle is an underrated issue in high grade, and examples above the MS64 level are quite elusive. This attractive Choice specimen displays sharply detailed design elements and vibrant mint luster, with outstanding eye appeal. A few minor contact marks on the obverse prevent an even higher grade. (#9157)

Gem 1911-S Twenty
Sharply Detailed Lustrous Example

5172 **1911-S MS65 NGC.** The 1911-S Saint-Gaudens double eagle has become more available in high grade since a number of pieces surfaced in a hoard in the 1980s. This impressive Gem displays well-preserved orange-gold surfaces, with vibrant mint luster and sharply detailed design elements. NGC has graded 35 numerically finer coins (6/12). (#9159)

Select 1913-S Double Eagle
Low-Mintage Early Series Issue

5173 **1913-S MS63 PCGS.** The 1913-S Saint-Gaudens double eagle is not as difficult to locate as its low mintage of 34,000 pieces would suggest, but it is still a better date in the series, especially in high grade. This attractive Select specimen offers well-detailed design elements and lustrous orange-gold surfaces, with highlights of rose. (#9163)

Choice 1913-S Saint-Gaudens Twenty
Rare Issue in Higher Grades

5174 **1913-S MS64 PCGS.** The 1913-S Saint-Gaudens double eagle boasts an enticingly low mintage of 34,000 pieces, and the issue is a condition rarity above the MS64 level. This pleasing Choice example is well-detailed and lightly marked, with vibrant mint luster and attractive orange-gold surfaces. Housed in a green label holder. (#9163)

Mattelike Near-Gem 1914 Twenty Dollar
Sharply Struck and Relatively Unmarked

5175 **1914 MS64 PCGS.** This yellow-gold 1914 double eagle shows a somewhat mattelike texture on frosty surfaces that offer lots of eye appeal for the grade. Even if the strike is not absolute it is sharp overall, and only a few marks seem conservative for the grade. PCGS has seen only 39 numerically finer (6/12). (#9164)

1914 Saint-Gaudens Twenty, MS64
Elusive Low-Mintage Issue

5176 **1914 MS64 NGC.** The 1914 Saint-Gaudens double eagle claims a low mintage of 95,250 pieces, and the issue is quite elusive in high grade. This impressive Choice specimen exhibits sharply detailed design elements and the lustrous orange-gold surfaces are remarkably free of contact marks. NGC has graded only 24 numerically finer coins (6/12). (#9164)

5177 **1914-D MS65 PCGS.** This highly lustrous peach-gold Gem is precisely struck and appears pristine save for a small mark or two on the front wing. A good value at the MS65 level relative to the few pieces graded finer. Encapsulated in a green label holder. (#9165)

5178 **1914-D MS65 NGC.** This lovely Gem boasts rose and hazel toning over honey-gold surfaces with brilliant and frosty luster. A bold strike and pleasing surfaces add to the overall eye appeal. NGC has only certified 46 finer examples (6/11).(#9165)

5179 **1914-S MS65 PCGS. CAC.** A beautiful butter-gold Gem with booming luster and a bold strike. Marks emerge beneath a loupe but are minuscule and unobtrusive. Encapsulated in a green label holder.(#9166)

5180 **1916-S MS65 PCGS.** Traces of dark patina reside on the orange-gold surfaces of this fully brilliant, frosty double eagle with bold design features. Trivial grade-consistent marks are noted on both sides.(#9169)

5181 **1922 MS64 PCGS. CAC.** This impressive Choice Mint State double eagle has pristine surfaces with brilliant satin luster and exceptional eye appeal. The devices are boldly rendered in light yellow with a hint of green.(#9173)

MS64+ 1922 Double Eagle
Excellent Eye Appeal

5182 **1922 MS64+ NGC. CAC.** Excellent eye appeal — the product of a bold strike, radiant frosty luster, and near-pristine orange-gold surfaces — put this near-Gem 1922 double eagle in the top echelons, aesthetically speaking. Small but noticeable die breaks encircle much of the obverse periphery, visible under a loupe. A nice piece for the grade, an assessment with which CAC concurs. (#9173)

Gem 1922 Twenty
Only Seven Numerically Finer PCGS Coins

5183 **1922 MS65 PCGS.** The 1922 Saint-Gaudens double eagle is not difficult to locate in Gem condition, but the issue is conditionally rare in any higher grade. PCGS has certified only seven numerically finer specimens (5/12). This well-detailed Gem shows just a touch of softness on the lower left stars, with ample mint luster and attractive light orange surfaces. (#9173)

Gem 1922 Twenty Dollar
Copious Cartwheel Luster

5184 **1922 MS65 PCGS.** Copious cartwheel luster dominates on each side of this Gem 1922 double eagle, a well-made Philadelphia Mint issue that would be perfect for a nice type set — even if far less common grade-for-grade than such issues as the 1924, 1927, or 1928. A few scattered marks are grade-consistent, with a tiny dark fleck in the obverse right field and a copper spot on Liberty's sandal mentioned for accuracy. (#9173)

1923 Saint-Gaudens Twenty, MS65
Only Three PCGS Coins in Higher Grade

5185 **1923 MS65 NGC.** A delightful Gem, with well-detailed design elements and brightly lustrous orange-gold surfaces that show only minor signs of contact. The 1923 Saint-Gaudens double eagle is surprisingly elusive at the Gem level and PCGS has certified only three coins in higher numeric grades (5/12). (#9175)

Gem 1923 Double Eagle
Only Four Finer at PCGS

5186 **1923 MS65 PCGS.** A couple of ticks on Liberty's right arm and breast are among the few singular marks on this attractive Gem 1923, an available issue in this grade but virtually unobtainable numerically finer: PCGS has seen one in MS65+ and three in MS66 the finest (6/12). Radiant luster covers orange-gold surfaces to splendid effect. (#9175)

Deeply Reflective 1923-D Twenty, MS66+

5187 **1923-D MS66+ PCGS. CAC.** The 1923-D Saint-Gaudens is known as a "wonder issue" within the series, an exceptionally well-produced entry in the series, mintmarked, and with generous survival rates in the top Mint State grades. This MS66+ example shows deep reflectivity with cartwheel luster over orange-gold surfaces. It takes a loupe to see a few tiny marks. Population: 23 in 66+, 62 finer (6/12). (#9176)

1923-D Twenty, MS66+
Exceptional Preservation

5188 **1923-D MS66+ PCGS. CAC.** Well-defined for this Denver issue, among the last to be widely available to collectors and also arguably the best-produced and most attractive overall Saint-Gaudens twenties. The yellow-orange surfaces are lightly patinated, and the reverse has even livelier luster. (#9176)

5189 **1924 MS65 PCGS.** The 1924 Saint-Gaudens double eagle is an available date that usually trades as a type coin. This sharply detailed Choice example exhibits lustrous orange-gold surfaces, with accents of lilac and rose.(#9177)

MS66+ ★ 1924 Double Eagle
Lustrous Honey-Gold Surfaces

5190 **1924 MS66+ ★ NGC. CAC.** The 1924 is a plentiful Saint-Gaudens issue, but NGC has only certified three pieces with both the Star and Plus designations (6/12). A lustrous honey-gold Premium Gem that has a good strike and well preserved fields. Faint contact on the front wing is all that limits the grade. (#9177)

5191 **1925-S XF45 NGC. CAC.** Unlike its lower mintage Philadelphia cousin, the 1925-S was little distributed and most of the mintage was melted without ever leaving Treasury vaults. This example was likely a pocket piece at one time though some luster remains. A heavy die crack through the beak adds numismatic interest. Certified in a former generation holder.(#9182)

Superb Gem 1927 Saint-Gaudens Twenty

5192 **1927 MS67 NGC.** This Superb Gem exemplifies why the 1927 is such a popular coin for type purposes. Abrasions are so few they could actually be counted (we aren't going to, but you could). Each side is covered with rich frosted mint luster that has taken on an even reddish cast. Census: 48 in 67, 0 finer (6/12). (#9186)

5193 **1928 MS65 NGC.** The 1928 Saint-Gaudens twenty claims the largest mintage of the series and is a favorite choice of type collectors. This well-detailed Gem displays light yellow-gold surfaces with vibrant mint luster.(#9189)

MS66 1928 Double Eagle
Frosty Two-Toned Example

5194 **1928 MS66 PCGS. CAC.** The 1928 double eagle is one of the top selections within the Saint-Gaudens series for type purposes. This lustrous example takes a two-toned approach, greenish-gold closer to the rims complementing golden-orange centers. Full luster emanates from frosty, somewhat mattelike surfaces. (#9189)

TERRITORIAL GOLD

5195 **(1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge — Surface Damage — Genuine PCGS. AU Details. K-24, R.3.** The upper portions of both sides are mildly granular. A slightly wavy and unabraded representative of this pioneer gold coiner. No laminations are present, unlike most seen. Listed on page 374 of the 2013 *Guide Book*.

5196 **(1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge — Tooled, Cleaned — NGC Details. AU. K-24, R.3.** This well struck Bechtler type coin has little if any actual wear, but it is polished and the reverse field near 11 o'clock has an area of overlapping scratches. Listed on page 374 of the 2013 *Guide Book*.

A. Bechtler Dollar, 27G. 21C., K-24
Choice AU, Antique-Gold Color

5197 **(1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge AU55 NGC. K-24, R.3.** The 27G. 21C. A. Bechtler dollars were produced in the timeframe 1842-1852, well after the nation's branch mints in Dahlonega, Georgia, and Charlotte, North Carolina, had begun to coin gold as well. This Choice AU example displays much remaining luster over antique-gold surfaces and is remarkably free of overt contact. Listed on page 374 of the 2013 *Guide Book*. (#10040)

MS62 A. Bechtler Gold Dollar, K-24
Stunning Two-Toned Color With Prooflike Areas

5198 **(1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge MS62 NGC. K-24, R.3.** This MS62 specimen of the available K-24 Bechtler gold dollar, 27G. 21 C., plain edge, boasts remarkable eye appeal over surfaces that are reflective and prooflike in the protected areas around the device legends. Stunning orange-gold color complements accents of blue and reddish-copper. Collectors who have been waiting for an exceptional Mint State Bechtler gold dollar to add to their sets should give this piece serious consideration. Listed on page 374 of the 2013 *Guide Book*. (#10040)

AU58 C. Bechtler Gold Dollar,
Piquant N Reversed K-4 Variant

5199 **(1837-42) C. Bechtler Dollar, N Reversed AU58 NGC. K-4, R.4.** The Bechtler family provided much-needed circulating gold coinage during America's first little-known gold rush, in North Georgia and North Carolina starting in the 1820s and 1830s. The N Reversed dollar is a popular and fairly available, yet piquant reminder of the crude circumstances under which the coins were produced, yet the Bechtler coinage had an impeccable reputation that enabled the coins to circulate extensively. This K-4 piece shows moderate luster remaining under a light layer of field chatter with few overt marks. Listed on page 373 of the 2013 *Guide Book*. Census: 17 in 58, 25 finer (6/12). (#10055)

C. Bechtler Quarter Eagle
Very Rare K-11 Variety

5200 **(1837-42) C. Bechtler Quarter Eagle, 64G. 22C. — Holed and/or Plugged — Genuine PCGS. K-11, R.6.** The PCGS number ending in .84 suggests that the coin has been Holed and Plugged as a reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been holed, plugged, tooled, and repaired. Despite all the fuss this is a coin that still offers a great deal of quaint, genuine charm, and the repairs are localized to a small off-color area near the rim. This is the very rare "Uneven 22" variety, K-11, although both the Bechtler 64 G. 22C. quarter eagles are equally (very) rare. The remainder of the coin is antique-gold with considerable luster remaining. Listed on page 373 of the 2013 *Guide Book*.

AU Details 1853 Assay Office Twenty
900 Thous., K-18

5201 **1853 Assay Office Twenty Dollar, 900 Thous. — Repaired — NGC Details. AU. K-18, R.2.** A briefly circulated Assay Office piece with pleasing sharpness and ample bright luster. The reverse field is smoothed above the C in CALIFORNIA, and a spot is tooled above the eagle's head. A lamination (as coined) is at 3 o'clock on the reverse border. Listed on page 380 of the 2013 *Guide Book*. (#10013)

1853 U.S. Assay Office Twenty, AU Details
900 Thous. K-18 Variety

5202 **1853 Assay Office Twenty Dollar, 900 Thous. — Cleaning — Genuine PCGS. AU Details. K-18, R.2.** The U.S. Assay Office produced twenty dollar gold coins in large numbers in 1853, with the .900 fine K-18 being the most common variety. This lightly circulated example retains most of its original detail and shows only minor signs of contact. Listed on page 380 of the 2013 *Guide Book*. (#10013)

S.S.C.A. RELIC GOLD MEDALS

5203 **1855 SSCA Relic Gold Medal "1855 Kellogg & Co. Fifty" Gem Proof PCGS.** Struck on September 7, 2001, one of 223 pieces with that counterstamp date. A relic medal made from California Gold Rush Kellogg & Humbert 887 Fine gold ingots recovered from the *S.S. Central America*, which sank in 1857. Fully struck and flawless with exemplary cameo contrast. A California Historical Society certificate accompanies this lot, which includes all of the packaging from the original sale of these pieces.

5204 **2001 $50 SSCA Relic Gold Medal "1855 Kellogg & Co. Fifty" Gem Proof PCGS.** Struck on September 8, 2001, one of 101 pieces with that counterstamp date. A relic medal made from California Gold Rush Kellogg & Humbert 887 Fine gold ingots recovered from the *S.S. Central America*, which sank on September 12, 1857. Fully struck and flawless with exemplary cameo contrast. A certificate from the California Historical Society accompanies this lot, although no box or other packaging are included.

5205 **1857/0 $10 SSCA Relic Gold Medal "1857/0 Baldwin & Co. Ten" Deep Cameo Proof PCGS.** Gold from a Justh and Hunter ingot, recovered from the S.S. Central America shipwreck, was used to create this private modern issue. Comes in a faux-book case with slipcover as well as the Columbus-America Discovery Group certificate of authenticity.

5206 **1857/0 $10 SSCA Relic Gold Medal "1857/0 Baldwin & Co. Ten" Deep Cameo Proof PCGS.** This modern "restrike" used gold from a Justh and Hunter gold ingot that was recovered from the S.S. Central America. A Columbus-America Discovery Group certificate of authenticity accompanies this piece.

CALIFORNIA FRACTIONAL GOLD

5207 **1853 Liberty Octagonal 1 Dollar, BG-530, R.2, MS62 NGC.** Splendid orange-red and apple-green toning embraces this satiny and sharply struck octagonal dollar. The friction-free surfaces are minimally abraded for the MS62 level. Census: 24 in 62, 10 finer (6/12).(#10507)

Rare 1864 Liberty Octagonal Quarter
Unmarked MS64, Heavily Clashed BG-706

5208 **1864 Liberty Octagonal 25 Cents, BG-706, High R.5, MS64 NGC.** Crude head, 10 star obverse, always heavily clashed. This BG-706 and the BG-707 (High R.7) share a similar obverse design and identical reverse die, but the BG-706 has 10 stars on the obverse with stars distant from the nose and mouth, while the BG-707 has eight stars, including one each near the nose and mouth but none below the bust. This near-Gem is heavily clashed as apparently always, showing deep, lustrous orange-gold fairly prooflike surfaces with no mentionable marks. Census: 2 in 64, 0 finer (6/12). (#10533)

Boldly Struck MS67 Prooflike 1867 Liberty Octagonal Quarter, BG-709

5209 **1867 Liberty Octagonal 25 Cents, BG-709, R.4, MS67 Prooflike NGC.** Crude Liberty head, 9 star obverse, no berries in reverse wreath, denomination just about closes wreath at bottom serifs of 1. This very scarce variety is the " 'best made of the large Liberty Head types,' which isn't saying much," according to Breen-Gillio quoting Jay Roe. Nonetheless the 1/4 fraction, DOLLAR, and the wreath and date 1867 are all boldly impressed, even if the A's left diagonal is mostly missing. This is a boldly prooflike, highly attractive, unmarked Superb Gem with super eye appeal. (#710536)

5210 **1866 Liberty Round 25 Cents, BG-804, R.4, MS66 PCGS.** A pristine and prooflike representative with consistent butter-gold toning and an above average strike on the central reverse legends. A finer example may never be found. Population: 8 in 66, 0 finer (6/12).(#10665)

5211 **1868 Liberty Round 25 Cents, BG-806, R.3, MS66 PCGS.** A magnificent orange-gold Premium Gem of this collectible Period Two round quarter variety. Well struck and immaculate with outstanding eye appeal. Population: 21 in 66, 1 finer (6/12). (#10667)

1872 Round Liberty 25 Cents, MS65 BG-816, None Certified Finer

5212 **1872 Liberty Round 25 Cents, BG-816, R.6, MS65 PCGS.** The very rare BG-816 Round Liberty 25 cent piece was produced by Frontier & Bellemere in 1872 and discovered by Kenneth Lee in the early 1950s. This well-detailed Gem displays prooflike yellow-gold surfaces, with green and rose highlights. Population: 3 in 65, 0 finer (5/12). (#10677)

5213 **1872/1 Indian Round 25 Cents, BG-868, High R.4, MS65 PCGS.** Repunched 8, reverse with closed wreath, straight leaves. This golden-orange Gem is free of mentionable marks but softly struck through the reverse center, weak on 4 and OLLA. Certified in an old green label holder. Population: 18 in 65, 1 finer (6/12). (#10729)

5214 **1872 Indian Round 50 Cents, BG-1048, Low R.4, MS65 PCGS.** Small stars, period after L., six pairs of berries left, seven pairs right. This Gem, certified in an old green-label holder, shows a typical appearance, blazing prooflike yellow-gold. Struck in medal turn. Population: 8 in 65, 0 finer (6/12).(#10877)

5215 **1872 Indian Round 50 Cents, BG-1048, Low R.4, MS65 Prooflike NGC.** Small stars, period after L., six pairs of stars left, seven pairs right. This nice Prooflike example shows yellow-gold surfaces with a few wispy marks on the Indian's cheek. The strike is a bit soft in the center reverse.(#710877)

1871 Liberty Round Dollar, BG-1204, MS62 Rare 'Nouizillet Head' Type

5216 **1871 Liberty Round 1 Dollar, BG-1204, High R.5, MS62 PCGS.** Robert B. Gray & Co. (1858-71), makers of this piece with mark G on the obverse, were the successors of Antoine Louis Nouizillet. This variety has the so-called "Nouizillet Head," single bun, 13 stars obverse, wreath on reverse with double bow. This MS62 piece shows prooflike surfaces with deep iridescent purple, blue, and lilac, including traces of a fingerprint on the obverse. There are no mentionable marks but the centers are notably soft on each side, typical for the issue. Population: 10 in 62, 4 finer (6/12). (#10949)

1872 Round Indian Head Dollar, MS62 Prooflike BG-1207, Rotated Reverse

5217 **1872 Indian Round 1 Dollar, BG-1207, R.4, MS62 Prooflike NGC.** This Close Date 1872 dollar was first publicized by David Proskey or John Scott in the March 1884 issue of *The Coin Collector's Journal*. The BG reference states the reverse is seen both "normal" and "inverted." This particular piece appears to have rotated 45 degrees clockwise off a coin turn. As one would expect, the fields are prooflike on each side. Census: 6 in 62 Prooflike, 3 finer (6/12). (#710952)

Very Rare 1872 Indian Round Dollar, MS63 BG-1208, Exuberant Prooflike Luster

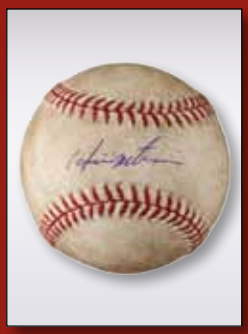

5218 **1872 Indian Round 1 Dollar, BG-1208, Low R.6, MS63 PCGS.** The Indian Head 1872 Round BG-1208 is distinguished by the presence of the word TOKEN in the reverse legend, while the BG-1206 and BG-1207 lack it. This Select piece is certified in an old green-label holder and shows exuberant luster over typically prooflike greenish-gold surfaces. The strike on reverse is soft through the center, but this is a super example for the grade. Population: 3 in 63, 1 finer (6/12). (#10953)

SESSION FOUR

Heritage Live!™, Internet, Fax, and Mail Only Session
Saturday, July 14, 2012 | 12:00PM CT | Dallas, Texas | Lots 7001 - 8984

A 15% Buyer's Premium ($14 minimum) Will Be Added To All Lots
To view full descriptions, enlargeable images and bid online, visit HA.com/1172

SPECIAL INTERNET BIDDING FEATURE

Online proxy bidding ends at HA.com two hours prior to the opening of the live auction. Check the Time Remaining on individual lots for details. After Internet proxy bidding closes, live bidding will take place through Heritage LiveTM, our bidding software that lets you bid live during the actual auction. Your secret maximum will compete against those bids, and win all ties. To maximize your chances of winning, enter realistic secret maximum bids before live bidding begins. (Important note: Due to software and Internet latency, bids placed through Live Internet Bidding may not register in time and those bidders could lose lots they would otherwise have won, so be sure to place your proxy bids in advance.)

7019 **1793 — Environmental Damage — Genuine PCGS. Poor/Fair Details.** NGC Census: (2/127). PCGS Population (0/1521). Mintage: 35,334. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fair 2 : $928. (#1000)

7020 **1794 Normal Head — Burnished, Planchet Flaw — NGC Details. Fine.** C-4a. NGC Census: (13/130). PCGS Population (24/276). Mintage: 81,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: $1,225. (#1003)

7021 **1797 Plain Edge — Burnished, Corroded — ANACS. VG8 Details.** C-1, 1 above 1. NGC Census: (4/41). PCGS Population (8/113). Mintage: 127,840. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8 : $650. (#1036)

7022 **1800 VF30 ANACS.** C-1. NGC Census: (5/120). PCGS Population (24/147). Mintage: 202,908. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: $390. (#1051)

7023 **1803 Fine 12 PCGS. CAC.** PCGS Population (10/179). NGC Census: (5/104). Mintage: 92,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: $175. (#1060)

7024 **1804 Plain 4, No Stems PCGS Genuine.** The PCGS number ending in .94 suggests Altered Surfaces as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable.

7025 **1804 Plain 4, No Stems — Major Curved Clip, Scratched — ANACS. AG3 Details.** Weight 4.47 Grams. NGC Census: (0/845). PCGS Population (0/708). Mintage: 1,055,312. Numismedia Wsl. Price for problem free NGC/PCGS coin in AG3 : $32. (#1063)

7026 **1804 Plain 4, No Stems VF30 ANACS.** C-13. NGC Census: (39/699). PCGS Population (48/554). Mintage: 1,055,312. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: $231. (#1063)

7027 **1804 Spiked Chin — Bent — NGC Details. XF.** C-8. NGC Census: (11/138). PCGS Population (40/139). Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $400. (#1075)

7028 **1804 Spiked Chin XF40 NGC.** NGC Census: (11/138). PCGS Population (40/139). Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $400. (#1075)

7029 **1804 Spiked Chin AU50 PCGS.** PCGS Population (33/68). NGC Census: (25/91). Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: $660. (#1075)

7030 **1809/6 VF35 PCGS. CAC.** PCGS Population (17/166). NGC Census: (1/149). Mintage: 1,154,572. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: $185. (#1126)

7031 **1809/6 — Corroded — NGC Details. XF.** C-5. NGC Census: (15/134). PCGS Population (32/133). Mintage: 1,154,572. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $240. (#1126)

7032 **1810 XF40 PCGS.** PCGS Population (7/53). NGC Census: (7/46). Mintage: 215,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $525. (#1132)

7033 **1811 — Corroded — NGC Details. VF.** NGC Census: (10/32). PCGS Population (11/66). Mintage: 63,140. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $1,950. (#1135)

7034 **1828 13 Stars PCGS Genuine.** The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable.

7035 **1828 13 Stars MS62 Brown NGC.** NGC Census: (221/419). PCGS Population (48/172). Mintage: 606,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: $310. (#1147)

7036 **1828 13 Stars MS62 Red and Brown PCGS.** PCGS Population (37/142). NGC Census: (48/204). Mintage: 606,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: $325. (#1148)

7037 **1832 AU50 NGC.** NGC Census: (19/434). PCGS Population (32/246). Mintage: 154,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: $125. (#1159)

7038 **1832 AU50 PCGS. CAC.** PCGS Population (32/247). NGC Census: (19/434). Mintage: 154,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: $125. (#1159)

7039 **1832 MS63 Brown PCGS. CAC.** PCGS Population (34/46). NGC Census: (60/55). Mintage: 154,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $420. (#1159)

7040 **1834 MS62 Brown NGC.** C-1. NGC Census: (61/164). PCGS Population (35/143). Mintage: 141,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: $280. (#1165)

7041 **1835 AU55 PCGS. CAC.** PCGS Population (109/476). NGC Census: (104/1091). Mintage: 398,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: $155. (#1168)
From The Norva Collection.

7042 **1851 AU58 NGC.** C-1. NGC Census: (96/346). PCGS Population (79/196). Mintage: 147,672. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: $170. (#1224)

7043 **1851 AU58 PCGS. CAC.** PCGS Population (80/196). NGC Census: (96/347). Mintage: 147,672. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: $170. (#1224)
From The Norva Collection.

7044 **1851 MS62 Brown NGC.** C-1. NGC Census: (110/184). PCGS Population (63/108). Mintage: 147,672. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: $250. (#1224)

7045 **1851 MS64 Brown NGC.** C-1. NGC Census: (70/17). PCGS Population (33/1). Mintage: 147,672. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $500. (#1224)

7046 **1851 MS65 Brown NGC.** NGC Census: (16/1). PCGS Population (0/1). Mintage: 147,672. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $825. (#1224)
From The Old Holder Collection.

7047 **1853 MS62 Brown NGC.** C-1. NGC Census: (121/472). PCGS Population (68/311). Mintage: 129,694. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: $235. (#1227)

7048 **1853 MS63 Brown PCGS. CAC.** PCGS Population (145/168). NGC Census: (153/319). Mintage: 129,694. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $340. (#1227)

7049 **1853 MS64 Brown NGC.** C-1. NGC Census: (179/140). PCGS Population (130/38). Mintage: 129,694. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $460. (#1227)

7050 **1854 AU55 PCGS. CAC.** PCGS Population (47/339). NGC Census: (16/481). Mintage: 55,358. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: $150. (#1230)

7051 **1854 MS64 Brown PCGS.** PCGS Population (65/18). NGC Census: (110/63). Mintage: 55,358. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $450. (#1230)

7052 **1855 — Questionable Color — PCGS Genuine. Unc Details.** NGC Census: (5/492). PCGS Population (5/342). Mintage: 56,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: $180. (#1233)

7053 **1855 MS63 Brown PCGS.** PCGS Population (127/148). NGC Census: (111/255). Mintage: 56,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $310. (#1233)

7054 **1855 MS64 Brown PCGS. CAC.** PCGS Population (113/35). NGC Census: (170/85). Mintage: 56,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $460. (#1233)

7055 **1857 Genuine PCGS.** The PCGS number ending in .92 suggests cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. Mintage: 35,180. (#1239)

LARGE CENTS

7056 **1794 Head of 1794 — Heavily Corroded, Rims Damaged — ANACS. Fine 12 Details.** S-49. NGC Census: (0/0). PCGS Population (34/428). Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: $875. (#901374)

7057 **1794 Head of 1794 — Environmental Damage — NGC Details. Fine.** S-43. NGC Census: (0/0). PCGS Population (34/428). Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: $875. (#901374)

7058 **1794 Head of 1794 — Corroded — NCS. Fine Details.** S-41. NGC Census: (0/0). PCGS Population (34/428). Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: $875. (#901374)

7059 **1794 Head of 1794 — Environmental Damage — NGC Details. VF.** S-22. NGC Census: (0/0). PCGS Population (53/336). Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $1,950. (#901374)

7060 **1794 Head of 1794 — Improperly Cleaned — NGC Details. VF.** S-32. NGC Census: (0/0). PCGS Population (59/147). Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $3,650. (#901374)

7061 **1795 Lettered Edge — Scratched — Genuine PCGS. Poor/Fair Details.** NGC Census: (0/28). PCGS Population (4/83). Mintage: 37,000. (#1377)

7062 **1795 Plain Edge — Corroded — NGC Details. Good.** S-78. NGC Census: (5/132). PCGS Population (21/333). Mintage: 501,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4 : $400. (#1380)

7063 **1795 Plain Edge — Improperly Cleaned — NGC Details. Good.** S-77. NGC Census: (5/132). PCGS Population (21/333). Mintage: 501,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4 : $400. (#1380)

7064 **1795 Plain Edge — Scratched — NGC Details. VF.** S-76b. NGC Census: (4/88). PCGS Population (26/195). Mintage: 501,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $1,350. (#1380)

7065 **1796 Liberty Cap — Environmental Damage — NGC Details. VG.** S-89. NGC Census: (5/73). PCGS Population (12/120). Mintage: 109,825. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8 : $625. (#1392)

7066 **1798 First Hair Style — Corroded — ANACS. XF40 Details.** NGC Census: (11/56). PCGS Population (19/34). Mintage: 1,841,745. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $1,750. (#1431)

7067 **1798 Second Hair Style Genuine PCGS.** The PCGS number ending in .97 suggests environmental damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. (#1434)

7068 **1798 Second Hair Style VF25 PCGS.** PCGS Population (20/147). NGC Census: (14/53). Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: $805. (#1434)

7069 **1800/79 Fine 12 NGC.** S-194. NGC Census: (4/29). PCGS Population (3/47). Mintage: 2,822,175. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: $400. (#1455)

7070 **1802 — Improperly Cleaned — NGC Details. Fine.** NGC Census: (26/255). PCGS Population (27/340). Mintage: 3,435,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: $240. (#1470)

7071 **1802 Fine 15 PCGS.** PCGS Population (31/307). NGC Census: (25/230). Mintage: 3,435,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: $296. (#1470)

7111 **1852 MS62 Brown NGC.** NGC Census: (93/525). PCGS Population (44/347). Mintage: 5,063,094. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: $190. (#1898)

7112 **1852 MS62 Brown NGC.** NGC Census: (93/525). PCGS Population (44/347). Mintage: 5,063,094. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: $190. (#1898)

7113 **1852 MS64 Brown PCGS.** PCGS Population (159/97). NGC Census: (191/223). Mintage: 5,063,094. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $340. (#1898)

7114 **1853 MS62 Red and Brown PCGS.** PCGS Population (15/372). NGC Census: (10/692). Mintage: 6,641,131. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: $250. (#1902)

7115 **1854 AU50 PCGS.** PCGS Population (50/403). NGC Census: (23/689). Mintage: 4,236,156. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: $100. (#1904)

7116 **1854 MS65 Brown NGC.** N-18. NGC Census: (121/42). PCGS Population (32/7). Mintage: 4,236,156. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $600. (#1904)

7117 **1855 Upright 5s MS62 Brown PCGS.** PCGS Population (46/229). NGC Census: (69/366). Mintage: 1,574,829. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: $220. (#1907)

7118 **1855 Knob on Ear Genuine PCGS.** The PCGS number ending in .97 suggests environmental damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. (#1913)

7119 **1856 Upright 5 PCGS Genuine.** The PCGS number ending in .91 suggests questionable color as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. Mintage: 2,690,463. (#1919)

7120 **1856 Upright 5 MS64 Brown NGC.** NGC Census: (217/164). PCGS Population (89/27). Mintage: 2,690,463. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $360. (#1919)

7121 **1856 Slanted 5 PCGS Genuine.** The PCGS number ending in .97 suggests environmental damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. (#1922)

7122 **1857 Large Date PCGS Genuine.** The PCGS number ending in .91 suggests questionable color as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. Mintage: 333,456. (#1928)

7123 **1857 Large Date MS61 Brown NGC.** N-1. NGC Census: (27/301). PCGS Population (5/155). Mintage: 333,456. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: $275. (#1928)

7124 **1857 Small Date PCGS Genuine.** The PCGS number ending in .92 suggests cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. (#1931)

7125 **1857 Small Date AU55 PCGS.** PCGS Population (29/39). NGC Census: (0/0). (#1931)

FLYING EAGLE CENTS

7126 **1857 XF45 PCGS. CAC.** PCGS Population (144/2875). NGC Census: (69/2304). Mintage: 17,450,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $142. (#2016)

7127 **1857 — Environmental Damage — NGC Details. AU.** NGC Census: (42/2262). PCGS Population (94/2781). Mintage: 17,450,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: $165. (#2016)

7128 **1857 AU58 NGC.** NGC Census: (136/2012). PCGS Population (200/2373). Mintage: 17,450,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: $280. (#2016)

7129 **1857 MS60 NGC.** NGC Census: (14/1998). PCGS Population (40/2332). Mintage: 17,450,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: $320. (#2016)
From The Lance Gage Collection.

7130 **1858/7 — Cleaned, Corroded — ANACS. XF Details, Net VF30.** NGC Census: (11/140). PCGS Population (9/139). Mintage: 24,600,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: $506. (#2022)

7131 **1858 Small Letters XF45 PCGS.** PCGS Population (90/747). NGC Census: (0/0). Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $153. (#2020)

7132 **1858 Small Letters AU58 NGC.** NGC Census: (0/0). PCGS Population (58/579). Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: $280. (#2020)

7133 **1858 Small Letters MS63 NGC.** NGC Census: (0/0). PCGS Population (161/328). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $785. (#2020)

INDIAN CENTS

7134 **1859 MS63 PCGS.** PCGS Population (505/730). NGC Census: (2/8). Mintage: 36,400,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $550. (#2052)
From The Norva Collection.

7135 **1861 XF45 PCGS. CAC.** PCGS Population (59/1157). NGC Census: (22/1604). Mintage: 10,100,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $94. (#2061)

7136 **1861 MS63 PCGS. CAC.** PCGS Population (213/625). NGC Census: (238/930). Mintage: 10,100,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $280. (#2061)

7137 **1862 MS63 NGC.** NGC Census: (560/1418). PCGS Population (484/863). Mintage: 28,075,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $185. (#2064)

7138 **1862 MS64 PCGS.** PCGS Population (595/273). NGC Census: (1004/418). Mintage: 28,075,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $360. (#2064)

7139 **1862 MS64+ PCGS. CAC.** PCGS Population (595/273). NGC Census: (1004/418). Mintage: 28,075,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $360. (#2064)

7140 **1862 MS65 NGC. CAC.** NGC Census: (342/76). PCGS Population (210/62). Mintage: 28,075,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $825. (#2064)

7141 **1863 MS63 PCGS.** PCGS Population (729/889). NGC Census: (918/1632). Mintage: 49,840,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $180. (#2067)
From The Norva Collection.

7142 **1863 MS63 NGC.** NGC Census: (916/1630). PCGS Population (727/888). Mintage: 49,840,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $180. (#2067)

7143 **1863 MS64 ANACS.** NGC Census: (1196/432). PCGS Population (693/196). Mintage: 49,840,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $300. (#2067)

7144 **1863 MS64 PCGS. CAC.** PCGS Population (693/196). NGC Census: (1196/432). Mintage: 49,840,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $300. (#2067)

7145 **1863 MS64 PCGS. CAC.** PCGS Population (693/196). NGC Census: (1200/432). Mintage: 49,840,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $300. (#2067)

7146 **1863 MS64 PCGS. CAC.** PCGS Population (693/196). NGC Census: (1196/432). Mintage: 49,840,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $300. (#2067)

7147 **1864 Copper-Nickel MS64 PCGS. CAC.** PCGS Population (455/117). NGC Census: (382/127). Mintage: 13,740,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $460. (#2070)

7148 **1864 L On Ribbon AU50 PCGS.** PCGS Population (84/365). NGC Census: (34/465). Mintage: 39,233,712. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: $240. (#2079)

7149 **1864/1864 L On Ribbon AU58 NGC.** FS-2301. NGC Census: (94/286). PCGS Population (72/175). Mintage: 39,233,712. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: $300. (#2079)

7150 **1864 L On Ribbon, 86/86 Bronze AU58 NGC.** FS-2306. NGC Census: (94/286). PCGS Population (72/176). Mintage: 39,233,712. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: $300. (#2079)

7151 **1864 L On Ribbon AU58 PCGS. CAC.** PCGS Population (71/175). NGC Census: (93/286). Mintage: 39,233,712. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: $300. (#2079)
From The Norva Collection.

7152 **1864 Bronze, L On Ribbon MS63 Brown NGC.** NGC Census: (89/92). PCGS Population (72/64). Mintage: 39,233,712. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $480. (#2079)

7153 **1865 Fancy 5 MS64 Brown PCGS. CAC.** PCGS Population (41/6). NGC Census: (81/35). Mintage: 35,429,288. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $175. (#2082)

7154 **1865 Fancy 5 MS63 Red and Brown PCGS. CAC.** PCGS Population (151/321). NGC Census: (131/684). Mintage: 35,429,288. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $160. (#2083)

7155 **1865 Fancy 5 MS64 Red and Brown PCGS.** PCGS Population (245/76). NGC Census: (362/322). Mintage: 35,429,288. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $275. (#2083)

7206 **1901 MS65 Red PCGS.** PCGS Population (191/55). NGC Census: (115/28). Mintage: 79,611,144. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $440. (#2210)

7207 **1904 MS65 Red NGC.** NGC Census: (256/52). PCGS Population (195/63). Mintage: 61,328,016. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $420. (#2219)

7208 **1905 MS65 Red PCGS. CAC.** PCGS Population (144/38). NGC Census: (372/120). Mintage: 80,719,160. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $500. (#2222)

7209 **1906 MS65 Red PCGS.** PCGS Population (171/16). NGC Census: (256/74). Mintage: 96,022,256. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $420. (#2225)

7210 **1908 MS65 Red NGC.** NGC Census: (282/68). PCGS Population (227/40). Mintage: 32,327,988. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $440. (#2231)

7211 **1908-S XF45 NGC.** NGC Census: (304/1100). PCGS Population (218/572). Mintage: 1,115,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $135. (#2232)

7212 **1908-S MS63 Brown NGC.** NGC Census: (180/196). PCGS Population (95/50). Mintage: 1,115,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $350. (#2232)

7213 **1908-S MS63 Red and Brown PCGS.** PCGS Population (212/475). NGC Census: (130/716). Mintage: 1,115,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $410. (#2233)

7214 **1908-S MS63 Red and Brown PCGS. CAC.** PCGS Population (212/475). NGC Census: (130/716). Mintage: 1,115,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $410. (#2233)
From The Norva Collection.

7215 **1908-S MS64 Red and Brown NGC.** NGC Census: (460/256). PCGS Population (375/100). Mintage: 1,115,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $560. (#2233)

7216 **1909 MS64 Red and Brown PCGS.** PCGS Population (598/153). NGC Census: (786/476). Mintage: 14,370,645. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $110. (#2236)

7217 **1909 MS65 Red and Brown NGC.** NGC Census: (428/48). PCGS Population (147/6). Mintage: 14,370,645. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $145. (#2236)

7218 **1909 MS65 Red and Brown NGC. CAC.** NGC Census: (428/48). PCGS Population (147/6). Mintage: 14,370,645. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $145. (#2236)

7219 **1909 MS64 Red PCGS.** PCGS Population (927/771). NGC Census: (622/562). Mintage: 14,370,645. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $175. (#2237)

7220 **1909 MS64 Red NGC.** NGC Census: (622/566). PCGS Population (927/770). Mintage: 14,370,645. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $175. (#2237)

7221 **1909 MS64 Red NGC.** NGC Census: (622/566). PCGS Population (927/770). Mintage: 14,370,645. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $175. (#2237)

7222 **1909 MS65 Red PCGS.** PCGS Population (615/155). NGC Census: (506/60). Mintage: 14,370,645. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $420. (#2237)
From The Old Holder Collection.

7223 **1909 MS65 Red PCGS. CAC.** PCGS Population (616/155). NGC Census: (504/58). Mintage: 14,370,645. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $420. (#2237)

7224 **1909-S VF20 PCGS.** PCGS Population (267/1936). NGC Census: (260/2288). Mintage: 309,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $500. (#2238)

7225 **1909-S — Environmental Damage — NGC Details. VF.** NGC Census: (260/2304). PCGS Population (269/1940). Mintage: 309,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $500. (#2238)

7226 **1909-S —Reverse Scratched — NGC Details. VF.** NGC Census: (260/2304). PCGS Population (269/1940). Mintage: 309,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $500. (#2238)

7227 **1909-S — Harshly Cleaned — NGC Details. VF.** NGC Census: (260/2288). PCGS Population (267/1936). Mintage: 309,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $500. (#2238)

7228 **1909-S — Environmental Damage — NGC Details. VF.** NGC Census: (260/2304). PCGS Population (269/1940). Mintage: 309,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $500. (#2238)

7229 **1909-S — Obverse Improperly Cleaned — NGC Details. XF.** NGC Census: (254/1268). PCGS Population (285/767). Mintage: 309,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $625. (#2238)

7230 **1909-S XF45 NGC.** NGC Census: (360/918). PCGS Population (214/553). Mintage: 309,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $643. (#2238)

7231 **1909-S — Cleaned — PCGS Genuine. XF Details.** NGC Census: (0/425). PCGS Population (0/778). Mintage: 309,000. (#2239)

7232 **1909-S — Edge Damaged — Genuine PCGS. Unc Details.** Mintage: 309,000. (#2239)

PROOF INDIAN CENTS

7233 **1864 Bronze No L PR63 Brown PCGS.** PCGS Population (5/22). NGC Census: (12/54). Mintage: 150. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: $625. (#2276)

7234 **1865 Proof PCGS Genuine.** The PCGS number ending in .91 suggests Questionable Color as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable.

7235 **1865 PR64 Red and Brown NGC.** NGC Census: (68/76). PCGS Population (69/23). Mintage: 500. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: $675. (#2283)

7236 **1867 PR64 Red and Brown PCGS. CAC.** PCGS Population (86/39). NGC Census: (112/90). Mintage: 625. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: $575. (#2289)

7237 **1867 PR64 Red and Brown PCGS. CAC.** PCGS Population (86/39). NGC Census: (112/90). Mintage: 625. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: $575. (#2289)

7238 **1879 PR63 Red and Brown NGC.** NGC Census: (34/362). PCGS Population (61/269). Mintage: 3,200. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: $240. (#2325)

7239 **1880 PR65 Red and Brown PCGS.** PCGS Population (64/24). NGC Census: (136/60). Mintage: 3,955. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR65: $535. (#2328)

7240 **1881 PR64 Red and Brown PCGS. CAC.** PCGS Population (175/97). NGC Census: (164/238). Mintage: 3,575. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: $300. (#2331)

7241 **1883 PR64 Red PCGS.** PCGS Population (42/20). NGC Census: (20/30). Mintage: 6,609. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: $530. (#2338)

7242 **1884 PR63 Brown PCGS.** PCGS Population (13/100). NGC Census: (26/246). Mintage: 3,942. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: $155. (#2339)

7243 **1884 PR66 Brown NGC. CAC.** NGC Census: (60/12). PCGS Population (18/4). Mintage: 3,942. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR66: $560. (#2339)

7244 **1886 Type One PR65 Brown PCGS.** PCGS Population (40/22). NGC Census: (99/56). Mintage: 4,290. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR65: $420. (#2345)

7245 **1886 Type One PR64 Red and Brown NGC.** NGC Census: (79/150). PCGS Population (108/99). Mintage: 4,290. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: $340. (#2346)

7246 **1887 PR63 Red and Brown PCGS.** PCGS Population (53/156). NGC Census: (28/194). Mintage: 2,960. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: $210. (#2349)

7247 **1888 PR63 Red and Brown PCGS.** PCGS Population (42/139). NGC Census: (38/152). Mintage: 4,582. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: $225. (#2352)

7248 **1897 PR65 Brown PCGS. CAC.** PCGS Population (18/13). NGC Census: (36/32). Mintage: 1,938. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR65: $300. (#2378)

7249 **1899 PR65 Red and Brown PCGS.** PCGS Population (59/32). NGC Census: (130/42). Mintage: 2,031. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR65: $400. (#2385)

7250 **1906 PR65 Brown NGC. CAC.** NGC Census: (16/2). PCGS Population (8/2). Mintage: 1,725. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR65: $240. (#2405)

7251 **1908 PR64 Brown PCGS. CAC.** PCGS Population (24/8). NGC Census: (18/18). Mintage: 1,620. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: $210. (#2411)

LINCOLN CENTS

7252 **1909 VDB MS66 Red and Brown PCGS. CAC.** PCGS Population (147/3). NGC Census: (232/24). Mintage: 27,995,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: $120. (#2424)

7253 **1909 VDB MS65 Red PCGS.** PCGS Population (4582/2148). NGC Census: (3072/1516). Mintage: 27,995,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $94. (#2425)
From The Color Collection.

7254 **1909 VDB MS66 Red PCGS.** PCGS Population (1950/207). NGC Census: (1434/103). Mintage: 27,995,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: $200. (#2425)

7255 **1909 VDB MS67 Red NGC.** NGC Census: (102/1). PCGS Population (206/1). Mintage: 27,995,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: $850. (#2425)

7256 **1909 VDB Doubled Die Obverse MS63 Brown PCGS.** FS-1101 (FS-012). PCGS Population (8/10). NGC Census: (7/11). (#82423)

7257 **1909 VDB Doubled Die Obverse MS64 Brown PCGS.** FS-1101 (FS-012). PCGS Population (10/0). NGC Census: (8/3). (#82423)

7258 **1909 VDB Doubled Die Obverse MS63 Red and Brown NGC.** FS-1101. NGC Census: (4/13). PCGS Population (4/29). (#82424)

7259 **1909-S VDB PCGS Genuine.** The PCGS number ending in .97 suggests environmental damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. Mintage: 484,000. (#2426)

7260 **1909-S VDB — Spot(s) Removed — PCGS Genuine.** Mintage: 484,000. (#2426)

7261 **1909-S Weak VDB Good 6 ANACS.** NGC Census: (45/4544). PCGS Population (33/7945). Mintage: 484,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 6 : $639. (#2426)

7262 **1909-S VDB — Improperly Cleaned — NGC Details. Fine.** NGC Census: (404/3950). PCGS Population (393/7243). Mintage: 484,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: $740. (#2426)

7263 **1909-S VDB — Corroded — ANACS. Fine 12 Details.** NGC Census: (409/3959). PCGS Population (395/7275). Mintage: 484,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: $740. (#2426)

7264 **1909-S VDB Fine 15 NGC.** NGC Census: (398/3552). PCGS Population (632/6611). Mintage: 484,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: $779. (#2426)

7265 **1909-S VDB — Improperly Cleaned — NGC Details. VF.** NGC Census: (298/3261). PCGS Population (587/6054). Mintage: 484,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $850. (#2426)

7266 **1909-S VDB VF20 NGC. CAC.** NGC Census: (298/3257). PCGS Population (582/6040). Mintage: 484,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $850. (#2426)

7267 **1909-S VDB VF25 NGC.** NGC Census: (266/2991). PCGS Population (550/5490). Mintage: 484,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: $868. (#2426)

7268 **1909-S VDB — Bent — ANACS. VF30 Details.** NGC Census: (262/2733). PCGS Population (627/4875). Mintage: 484,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: $900. (#2426)

7269 **1909-S VDB — Questionable Color — PCGS Genuine. XF Details.** NGC Census: (286/2263). PCGS Population (718/3479). Mintage: 484,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $975. (#2426)

7270 **1909-S VDB — Improperly Cleaned — NGC Details. AU.** NGC Census: (130/1759). PCGS Population (380/2301). Mintage: 484,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: $1,075. (#2426)

7271 **1909-S MS64 Brown PCGS.** PCGS Population (64/9). NGC Census: (50/19). Mintage: 1,825,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $340. (#2432)

7272 **1909-S MS64 Red and Brown PCGS.** PCGS Population (469/219). NGC Census: (210/143). Mintage: 1,825,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $460. (#2433)

7273 **1909-S MS64 Red and Brown NGC.** NGC Census: (210/143). PCGS Population (469/219). Mintage: 1,825,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $460. (#2433)

7274 **1909-S MS64 Red NGC.** NGC Census: (165/236). PCGS Population (455/545). Mintage: 1,825,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $530. (#2434)

7275 **1909-S S Over Horizontal S MS64 Red and Brown NGC.** NGC Census: (53/28). PCGS Population (103/37). (#92433)

8140 **1876 XF40 PCGS.** PCGS Population (33/457). NGC Census: (8/361). Mintage: 14,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $425. (#5299)
From The Norva Collection.

8141 **1876 — Improperly Cleaned — NGC. AU.** NGC Census: (13/332). PCGS Population (40/367). Mintage: 14,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: $475. (#5299)

EARLY QUARTERS

8142 **1805 AG3 NGC.** B-4. NGC Census: (0/239). PCGS Population (17/455). Mintage: 121,394. Numismedia Wsl. Price for problem free NGC/PCGS coin in AG3 : $271. (#5313)

8143 **1805 — Improperly Cleaned — NGC Details. Good.** B-2. NGC Census: (18/221). PCGS Population (36/419). Mintage: 121,394. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4 : $440. (#5313)

8144 **1805 Good 6 PCGS.** PCGS Population (46/373). NGC Census: (19/202). Mintage: 121,394. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 6 : $487. (#5313)
From The Norva Collection.

8145 **1806/5 VG8 PCGS.** PCGS Population (14/142). NGC Census: (11/87). Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8 : $625. (#5315)

8146 **1807 VG8 PCGS.** PCGS Population (23/214). NGC Census: (11/138). Mintage: 220,643. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8 : $550. (#5316)
From The Norva Collection.

BUST QUARTERS

8147 **1815 VG10 PCGS.** PCGS Population (13/147). NGC Census: (3/113). Mintage: 89,235. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG10: $210. (#5321)

8148 **1815 VF20 PCGS. CAC.** PCGS Population (7/114). NGC Census: (3/101). Mintage: 89,235. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $475. (#5321)
From The Norva Collection.

8149 **1818 — Improperly Cleaned — NGC Details. XF.** NGC Census: (19/267). PCGS Population (39/230). Mintage: 361,174. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $1,275. (#5322)

8150 **1819 Small 9 VG8 PCGS.** PCGS Population (10/127). NGC Census: (10/134). Mintage: 144,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8 : $125. (#5325)

8151 **1821 VG10 NGC.** B-5. NGC Census: (12/186). PCGS Population (20/231). Mintage: 216,851. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG10: $186. (#5331)

8152 **1821 Fine 12 PCGS.** PCGS Population (19/212). NGC Census: (6/180). Mintage: 216,851. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: $225. (#5331)

8153 **1825/4/(2) VF25 PCGS.** Browning 2. PCGS Population (8/38). NGC Census: (0/0). (#38975)
From The Norva Collection.

8154 **1831 Small Letters Poor 1 PCGS.** PCGS Population (1/492). NGC Census: (0/491). Mintage: 398,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Poor 1 : $13. (#5348)

8155 **1831 Small Letters VF20 PCGS. CAC.** PCGS Population (16/455). NGC Census: (7/467). Mintage: 398,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $160. (#5348)
From The Norva Collection.

8156 **1831 Small Letters VF35 PCGS.** PCGS Population (24/392). NGC Census: (7/437). Mintage: 398,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: $276. (#5348)

8157 **1831 Small Letters VF35 NGC. CAC.** NGC Census: (7/436). PCGS Population (24/391). Mintage: 398,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: $276. (#5348)

8158 **1831 Large Letters VF25 PCGS.** PCGS Population (9/68). NGC Census: (0/0). (#5349)

8159 **1831 Large Letters XF45 PCGS. CAC.** PCGS Population (8/39). NGC Census: (0/0). (#5349)
From The Norva Collection.

8160 **1833 Fine 15 PCGS. CAC.** PCGS Population (8/168). NGC Census: (1/150). Mintage: 156,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: $116. (#5352)
From The Norva Collection.

8161 **1833 AU53 PCGS.** PCGS Population (11/45). NGC Census: (11/73). Mintage: 156,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: $700. (#5352)

8162 **1834 VF35 PCGS. CAC.** PCGS Population (51/428). NGC Census: (21/360). Mintage: 286,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: $266. (#5353)
From The Norva Collection.

8163 **1834 XF40 PCGS.** PCGS Population (73/355). NGC Census: (26/332). Mintage: 286,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $340. (#5353)

8164 **1834 XF40 PCGS.** RPL, B-1, FS-901. PCGS Population (73/356). NGC Census: (27/333). Mintage: 286,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $340. (#5353)

8165 **1834 XF45 PCGS.** PCGS Population (87/268). NGC Census: (55/278). Mintage: 286,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $422. (#5353)
From The Norva Collection.

8166 **1834 AU53 PCGS.** PCGS Population (27/194). NGC Census: (19/242). Mintage: 286,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: $650. (#5353)

8167 **1835 VF30 PCGS.** PCGS Population (65/406). NGC Census: (25/353). Mintage: 1,952,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: $233. (#5354)

8168 **1835 AU55 PCGS.** PCGS Population (37/95). NGC Census: (53/138). Mintage: 1,952,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: $675. (#5354)

8169 **1836 VF30 PCGS.** PCGS Population (26/135). NGC Census: (8/103). Mintage: 472,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: $240. (#5355)
From The Norva Collection.

8170 **1837 VF25 PCGS. CAC.** PCGS Population (10/214). NGC Census: (4/202). Mintage: 252,400. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: $181. (#5356)
From The Norva Collection.

8171 **1837 AU55 PCGS.** PCGS Population (15/94). NGC Census: (13/118). Mintage: 252,400. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: $685. (#5356)

8172 **1838 VF25 PCGS. CAC.** PCGS Population (7/223). NGC Census: (2/178). Mintage: 366,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: $178. (#5357)
From The Norva Collection.

8173 **1838 XF45 NGC.** B-1. NGC Census: (19/129). PCGS Population (36/111). Mintage: 366,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $429. (#5357)

8174 **1838 AU50 PCGS.** PCGS Population (16/95). NGC Census: (10/120). Mintage: 366,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: $575. (#5357)

SEATED QUARTERS

8175 **1838 No Drapery VF30 PCGS. CAC.** PCGS Population (6/176). NGC Census: (3/150). Mintage: 466,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: $198. (#5391)
From The Norva Collection.

8176 **1839 No Drapery VF35 PCGS. CAC.** PCGS Population (10/121). NGC Census: (1/111). Mintage: 491,146. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: $259. (#5392)
From The Norva Collection.

8177 **1840-O No Drapery VF20 PCGS.** PCGS Population (7/114). NGC Census: (0/107). Mintage: 382,200. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $185. (#5393)
From The Norva Collection.

8178 **1840-O Drapery XF40 PCGS. CAC.** PCGS Population (9/52). NGC Census: (4/53). Mintage: 43,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $350. (#5398)
From The Norva Collection.

8179 **1841 XF45 PCGS. CAC.** PCGS Population (7/32). NGC Census: (1/52). Mintage: 120,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $310. (#5399)
From The Norva Collection.

8180 **1841-O VF20 PCGS.** PCGS Population (2/73). NGC Census: (1/56). Mintage: 452,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $90. (#5400)
From The Norva Collection.

8181 **1843 XF40 PCGS. CAC.** PCGS Population (4/61). NGC Census: (5/83). Mintage: 645,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $70. (#5404)
From The Norva Collection.

8182 **1846 VF25 PCGS. CAC.** PCGS Population (1/59). NGC Census: (1/65). Mintage: 510,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: $73. (#5409)
From The Norva Collection.

8183 **1850 VF20 PCGS.** PCGS Population (2/46). NGC Census: (0/31). Mintage: 190,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $120. (#5415)
From The Norva Collection.

8184 **1851 VF30 PCGS. CAC.** PCGS Population (4/42). NGC Census: (2/25). Mintage: 160,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: $214. (#5417)
From The Norva Collection.

8185 **1852 VF25 PCGS. CAC.** PCGS Population (2/54). NGC Census: (0/48). Mintage: 177,060. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: $187. (#5419)
From The Norva Collection.

8186 **1853 Arrows and Rays XF45 PCGS.** PCGS Population (133/670). NGC Census: (96/683). Mintage: 15,210,020. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $187. (#5426)

8187 **1854 Arrows XF45 PCGS. CAC.** PCGS Population (59/398). NGC Census: (47/397). Mintage: 12,380,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $122. (#5432)
From The Norva Collection.

8188 **1854 Arrows AU50 PCGS.** PCGS Population (46/352). NGC Census: (24/371). Mintage: 12,380,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: $200. (#5432)

8189 **1854-O Arrows VF25 PCGS. CAC.** PCGS Population (5/75). NGC Census: (4/65). Mintage: 1,484,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: $69. (#5433)
From The Norva Collection.

8190 **1856-O VF35 PCGS.** PCGS Population (6/50). NGC Census: (2/51). Mintage: 968,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: $105. (#5439)

8191 **1858-O XF45 PCGS. CAC.** PCGS Population (9/33). NGC Census: (4/30). Mintage: 520,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $239. (#5446)
From The Norva Collection.

8192 **1858-O XF45 PCGS. CAC.** PCGS Population (9/33). NGC Census: (4/30). Mintage: 520,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $239. (#5446)

8193 **1858-O AU50 PCGS.** PCGS Population (9/24). NGC Census: (3/27). Mintage: 520,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: $450. (#5446)

8194 **1859-O VF30 PCGS. CAC.** PCGS Population (1/45). NGC Census: (0/32). Mintage: 260,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: $127. (#5449)
From The Norva Collection.

8195 **1860-O XF45 PCGS. CAC.** PCGS Population (8/62). NGC Census: (5/57). Mintage: 388,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $192. (#5452)

8196 **1861 AU58 NGC.** NGC Census: (96/316). PCGS Population (70/333). Mintage: 4,854,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: $225. (#5454)

8197 **1861-S—Improperly Cleaned—NGC Details. VF.** NGC Census: (0/14). PCGS Population (3/23). Mintage: 96,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $275. (#5455)
From The Perry Creek Collection.

8198 **1863 — Questionable Color — PCGS Genuine. AU Details.** NGC Census: (2/49). PCGS Population (0/54). Mintage: 191,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: $340. (#5458)

8199 **1864 AU55 NGC.** NGC Census: (4/34). PCGS Population (1/48). Mintage: 93,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: $575. (#5459)

8200 **1865 VF20 PCGS. CAC.** PCGS Population (4/59). NGC Census: (2/37). Mintage: 58,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $225. (#5461)
From The Norva Collection.

8201 **1865 VF30 PCGS. CAC.** PCGS Population (6/50). NGC Census: (1/34). Mintage: 58,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: $255. (#5461)

8202 **1865 MS61 ANACS.** Re-Punched Date, Briggs-1A. NGC Census: (2/12). PCGS Population (2/20). Mintage: 58,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: $865. (#5461)

8203 **1866-S — Tooled — NGC Details. VF.** NGC Census: (2/10). PCGS Population (3/27). Mintage: 28,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $1,350. (#5469)

8204 **1867 AG3 PCGS.** PCGS Population (1/59). NGC Census: (0/21). Mintage: 20,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AG3 : $124. (#5470)

8205 **1867-S — Improperly Cleaned — NGC Details. Fine.** NGC Census: (0/10). PCGS Population (5/33). Mintage: 48,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: $875. (#5471)

8206 **1868 AU53 PCGS.** PCGS Population (3/31). NGC Census: (1/21). Mintage: 29,400. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: $585. (#5472)

8207 **1868-S VF30 PCGS. CAC.** PCGS Population (7/27). NGC Census: (0/29). Mintage: 96,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: $568. (#5473)
From The Norva Collection.

8208 **1869 Fine 15 PCGS.** PCGS Population (2/33). NGC Census: (0/18). Mintage: 16,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: $501. (#5474)
From The Norva Collection.

8209 **1869 Fine 15 PCGS.** PCGS Population (2/33). NGC Census: (0/18). Mintage: 16,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: $501. (#5474)

8210 **1872-CC — Surface Damage — PCGS Genuine.** Mintage: 22,850. (#5482)

8211 **1873 Arrows XF45 PCGS. CAC.** PCGS Population (11/205). NGC Census: (14/186). Mintage: 1,271,700. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $246. (#5491)
From The Norva Collection.

8212 **1873-S Arrows VF25 PCGS. CAC.** PCGS Population (4/47). NGC Census: (0/48). Mintage: 156,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: $201. (#5493)
From The Norva Collection.

8213 **1874-S Arrows VF35 PCGS.** PCGS Population (4/219). NGC Census: (0/143). Mintage: 392,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: $217. (#5495)
From The Norva Collection.

8214 **1875-S VF30 PCGS.** PCGS Population (3/76). NGC Census: (0/83). Mintage: 680,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: $116. (#5500)
From The Norva Collection.

8215 **1876-CC VF20 PCGS.** PCGS Population (10/314). NGC Census: (5/245). Mintage: 4,944,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $72. (#5502)

8216 **1876-CC VF30 PCGS. CAC.** PCGS Population (14/288). NGC Census: (3/233). Mintage: 4,944,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: $109. (#5502)
From The Norva Collection.

8217 **1876-S Poor 1 PCGS.** PCGS Population (2/308). NGC Census: (0/262). Mintage: 8,596,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Poor 1 : $8. (#5503)

8218 **1876-S AU55 PCGS.** PCGS Population (16/241). NGC Census: (9/238). Mintage: 8,596,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: $150. (#5503)
From The Norva Collection.

8219 **1877 XF45 PCGS. CAC.** PCGS Population (14/339). NGC Census: (6/322). Mintage: 10,911,710. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $88. (#5504)
From The Norva Collection.

8220 **1877-CC PCGS Genuine.** The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. Mintage: 4,192,000. (#5505)

8221 **1877-CC VF35 PCGS. CAC.** PCGS Population (15/466). NGC Census: (1/388). Mintage: 4,192,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: $96. (#5505)
From The Norva Collection.

8222 **1877-S MS64 PCGS.** PCGS Population (89/42). NGC Census: (85/44). Mintage: 8,996,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $700. (#5506)

8223 **1878-S Fine 12 PCGS.** PCGS Population (1/35). NGC Census: (1/26). Mintage: 140,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: $200. (#5510)

8224 **1878-S VF35 PCGS.** PCGS Population (7/23). NGC Census: (1/23). Mintage: 140,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: $518. (#5510)
From The Norva Collection.

8225 **1879 XF45 PCGS. CAC.** PCGS Population (6/212). NGC Census: (3/190). Mintage: 13,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $359. (#5511)
From The Norva Collection.

8226 **1884 VF20 PCGS. CAC.** PCGS Population (6/106). NGC Census: (0/84). Mintage: 8,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $450. (#5516)
From The Norva Collection.

8227 **1884 VF35 PCGS.** PCGS Population (3/100). NGC Census: (1/79). Mintage: 8,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: $465. (#5516)

8228 **1885 XF45 PCGS.** PCGS Population (5/105). NGC Census: (3/75). Mintage: 13,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $409. (#5517)
From The Norva Collection.

8229 **1886 Fine 15 PCGS. CAC.** PCGS Population (2/75). NGC Census: (0/37). Mintage: 5,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: $318. (#5518)
From The Norva Collection.

8230 **1890 AU50 PCGS. CAC.** PCGS Population (8/176). NGC Census: (1/170). Mintage: 80,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: $275. (#5523)
From The Norva Collection.

PROOF SEATED QUARTERS

8231 **1863 PR63 NGC.** NGC Census: (28/66). PCGS Population (42/72). Mintage: 460. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: $1,150. (#5559)

8232 **1880 PR62 PCGS.** PCGS Population (40/247). NGC Census: (14/246). Mintage: 1,355. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR62: $475. (#5581)

BARBER QUARTERS

8233 **1892 AU58 PCGS.** PCGS Population (238/1256). NGC Census: (215/1144). Mintage: 8,237,245. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: $145. (#5601)

8234 **1892 MS64+ PCGS. CAC.** PCGS Population (320/240). NGC Census: (346/261). Mintage: 8,237,245. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $525. (#5601)

From The Norva Collection.

8698 **1918 AU58 NGC.** NGC Census: (83/516). PCGS Population (106/572). Mintage: 6,634,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: $475. (#6574)

8699 **1918-D VF35 PCGS. CAC.** PCGS Population (21/783). NGC Census: (10/596). Mintage: 3,853,040. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: $184. (#6575)

8700 **1918-D XF45 PCGS.** PCGS Population (28/723). NGC Census: (16/568). Mintage: 3,853,040. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $310. (#6575)

8701 **1918-D — Improperly Cleaned — NGC Details. AU.** NGC Census: (10/558). PCGS Population (30/693). Mintage: 3,853,040. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: $440. (#6575)

8702 **1918-S — Machine Damage — Genuine PCGS. AU Details.** NGC Census: (10/686). PCGS Population (32/896). Mintage: 10,282,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: $170. (#6576)

8703 **1918-S AU55 PCGS.** PCGS Population (71/796). NGC Census: (34/637). Mintage: 10,282,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: $340. (#6576)

8704 **1918-S AU58 PCGS.** PCGS Population (111/685). NGC Census: (107/531). Mintage: 10,282,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: $375. (#6576)

8705 **1919 VF25 PCGS. CAC.** PCGS Population (17/491). NGC Census: (9/353). Mintage: 962,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: $260. (#6577)

8706 **1919 — Rim Damaged — Genuine PCGS. XF Details.** NGC Census: (13/321). PCGS Population (30/425). Mintage: 962,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $475. (#6577)

8707 **1919-D VF30 ANACS.** NGC Census: (15/360). PCGS Population (15/385). Mintage: 1,165,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: $565. (#6578)

8708 **1919-S — Cleaned, Corroded — ANACS. VF20 Details.** NGC Census: (24/295). PCGS Population (44/439). Mintage: 1,552,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $250. (#6579)

8709 **1919-S VF25 NGC.** NGC Census: (13/282). PCGS Population (24/415). Mintage: 1,552,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: $324. (#6579)

8710 **1920 XF45 PCGS.** PCGS Population (13/939). NGC Census: (6/717). Mintage: 6,372,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $93. (#6580)
From The Norva Collection.

8711 **1920 MS61 NGC.** NGC Census: (37/542). PCGS Population (7/726). Mintage: 6,372,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: $400. (#6580)

8712 **1920-S AU50 PCGS.** PCGS Population (22/381). NGC Census: (9/341). Mintage: 4,624,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: $425. (#6582)

8713 **1920-S AU55 NGC.** NGC Census: (28/299). PCGS Population (26/346). Mintage: 4,624,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: $575. (#6582)
From The Lance Gage Collection.

8714 **1920-S AU55 PCGS. CAC.** PCGS Population (26/347). NGC Census: (28/301). Mintage: 4,624,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: $575. (#6582)

8715 **1920-S AU58 PCGS.** PCGS Population (41/306). NGC Census: (54/247). Mintage: 4,624,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: $725. (#6582)

8716 **1921 — Improperly Cleaned — NGC Details. VF.** NGC Census: (14/310). PCGS Population (36/475). Mintage: 246,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $685. (#6583)

8717 **1921-D Good 4 NGC.** NGC Census: (108/755). PCGS Population (182/1337). Mintage: 208,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4 : $215. (#6584)

8718 **1921-D Good 6 NGC.** NGC Census: (147/608). PCGS Population (255/1082). Mintage: 208,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 6 : $248. (#6584)

8719 **1921-S Fine 12 PCGS. CAC.** PCGS Population (180/585). NGC Census: (85/403). Mintage: 548,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: $220. (#6585)

8720 **1927-S VF30 PCGS. CAC.** PCGS Population (19/755). NGC Census: (5/538). Mintage: 2,392,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: $81. (#6587)
From The Norva Collection.

8721 **1928-S — Cleaned — ANACS. AU50 Details.** NGC Census: (5/367). PCGS Population (17/467). Mintage: 1,940,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: $375. (#6588)

8722 **1928-S AU55 PCGS.** PCGS Population (30/422). NGC Census: (24/339). Mintage: 1,940,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: $500. (#6588)
From The Norva Collection.

8723 **1929-D AU55 NGC.** NGC Census: (47/612). PCGS Population (65/987). Mintage: 1,001,200. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: $220. (#6589)

8724 **1929-D MS63 NGC.** NGC Census: (115/288). PCGS Population (211/574). Mintage: 1,001,200. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $640. (#6589)

8725 **1929-S XF45 PCGS. CAC.** PCGS Population (23/835). NGC Census: (17/623). Mintage: 1,902,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $127. (#6590)
From The Norva Collection.

8726 **1929-S — Cleaned — ANACS. MS60 Details.** NGC Census: (2/505). PCGS Population (4/666). Mintage: 1,902,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: $425. (#6590)

8727 **1933-S AU53 PCGS.** PCGS Population (50/1171). NGC Census: (18/757). Mintage: 1,786,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: $250. (#6591)

8728 **1934 MS65 PCGS.** PCGS Population (801/571). NGC Census: (584/391). Mintage: 6,964,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $340. (#6592)

8729 **1934 MS65 PCGS.** PCGS Population (801/571). NGC Census: (584/391). Mintage: 6,964,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $340. (#6592)

8730 **1934-D MS63 NGC.** NGC Census: (214/797). PCGS Population (342/1399). Mintage: 2,361,400. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $220. (#6593)

8731 **1934-D MS63 PCGS. CAC.** PCGS Population (342/1399). NGC Census: (214/797). Mintage: 2,361,400. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $220. (#6593)
From The Norva Collection.

8732 **1934-D MS64 PCGS. CAC.** PCGS Population (805/594). NGC Census: (555/242). Mintage: 2,361,400. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $320. (#6593)

8733 **1934-S MS63 PCGS. CAC.** PCGS Population (204/723). NGC Census: (103/377). Mintage: 3,652,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $685. (#6594)
From The Norva Collection.

8734 **1935 MS64 PCGS.** PCGS Population (1163/1466). NGC Census: (737/910). Mintage: 9,162,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $85. (#6595)

8735 **1935 MS65 NGC.** NGC Census: (664/246). PCGS Population (1030/434). Mintage: 9,162,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $230. (#6595)

8736 **1935 MS66+ PCGS. CAC.** PCGS Population (413/22). NGC Census: (222/24). Mintage: 9,162,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: $440. (#6595)

8737 **1935-D MS63 NGC.** NGC Census: (122/598). PCGS Population (277/1166). Mintage: 3,003,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $235. (#6596)

8738 **1935-D MS64 NGC.** NGC Census: (444/155). PCGS Population (616/547). Mintage: 3,003,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $410. (#6596)

8739 **1935-D MS64 PCGS. CAC.** PCGS Population (617/549). NGC Census: (444/154). Mintage: 3,003,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $410. (#6596)
From The Norva Collection.

8740 **1935-S MS63 PCGS.** PCGS Population (169/873). NGC Census: (106/537). Mintage: 3,854,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $400. (#6597)
From The Norva Collection.

8741 **1936 MS65 NGC.** NGC Census: (1111/678). PCGS Population (1837/885). Mintage: 12,617,901. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $160. (#6598)
From The Color Collection.

8742 **1936 MS66 PCGS. CAC.** PCGS Population (769/116). NGC Census: (572/106). Mintage: 12,617,901. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: $220. (#6598)

8743 **1936-D MS64 PCGS. CAC.** PCGS Population (1053/1374). NGC Census: (556/730). Mintage: 4,252,400. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $140. (#6599)
From The Norva Collection.

8744 **1936-D MS65 NGC.** NGC Census: (498/231). PCGS Population (1017/358). Mintage: 4,252,400. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $410. (#6599)

8745 **1936-D MS65 PCGS. CAC.** PCGS Population (1017/357). NGC Census: (498/232). Mintage: 4,252,400. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $410. (#6599)

8746 **1936-D MS65+ PCGS. CAC.** PCGS Population (1020/357). NGC Census: (498/232). Mintage: 4,252,400. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $410. (#6599)

8747 **1936-S MS65 PCGS. CAC.** PCGS Population (682/197). NGC Census: (445/163). Mintage: 3,884,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $615. (#6600)
From The Color Collection.

8748 **1937 MS64+ PCGS. CAC.** PCGS Population (1464/2096). NGC Census: (897/1447). Mintage: 9,527,728. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $73. (#6601)
From The Norva Collection.

8749 **1937 MS65 PCGS.** PCGS Population (1396/700). NGC Census: (1006/441). Mintage: 9,527,728. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $160. (#6601)

8750 **1937 MS65 PCGS. CAC.** PCGS Population (1396/701). NGC Census: (1006/441). Mintage: 9,527,728. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $160. (#6601)

8751 **1937 MS66 PCGS.** PCGS Population (598/102). NGC Census: (364/76). Mintage: 9,527,728. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: $240. (#6601)

8752 **1937 MS66 PCGS. CAC.** PCGS Population (598/102). NGC Census: (364/76). Mintage: 9,527,728. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: $240. (#6601)
From The Old Holder Collection.

8753 **1937-D MS65 PCGS.** PCGS Population (712/329). NGC Census: (322/181). Mintage: 1,676,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $540. (#6602)

8754 **1937-D MS65 PCGS. CAC.** PCGS Population (712/329). NGC Census: (322/181). Mintage: 1,676,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $540. (#6602)

8755 **1937-D MS66 NGC.** NGC Census: (148/33). PCGS Population (291/38). Mintage: 1,676,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: $850. (#6602)

8756 **1937-S MS63 NGC.** NGC Census: (104/948). PCGS Population (243/1868). Mintage: 2,090,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $175. (#6603)

8757 **1937-S MS64 NGC.** NGC Census: (402/546). PCGS Population (738/1130). Mintage: 2,090,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $225. (#6603)

8758 **1937-S MS64+ PCGS. CAC.** PCGS Population (738/1130). NGC Census: (402/546). Mintage: 2,090,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $225. (#6603)
From The Norva Collection.

8759 **1937-S MS65 PCGS. CAC.** PCGS Population (791/339). NGC Census: (396/150). Mintage: 2,090,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $540. (#6603)

8760 **1938 MS63 NGC.** NGC Census: (160/1655). PCGS Population (349/2718). Mintage: 4,118,152. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $110. (#6604)

8761 **1938 MS66 PCGS. CAC.** PCGS Population (510/66). NGC Census: (282/38). Mintage: 4,118,152. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: $380. (#6604)
From The Old Holder Collection.

8762 **1938-D MS62 NGC.** NGC Census: (48/994). PCGS Population (69/2179). Mintage: 491,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: $465. (#6605)

8763 **1938-D MS64 PCGS. CAC.** PCGS Population (750/1152). NGC Census: (387/503). Mintage: 491,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $680. (#6605)
From The Norva Collection.

8764 **1938-D MS64 PCGS. CAC.** PCGS Population (750/1150). NGC Census: (387/503). Mintage: 491,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $680. (#6605)
From The Old Holder Collection.

8765 **1939 MS67 PCGS.** PCGS Population (219/23). NGC Census: (247/19). Mintage: 6,820,808. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: $700. (#6606)

8766 **1939-D MS65 PCGS.** PCGS Population (1938/754). NGC Census: (1105/643). Mintage: 4,267,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $160. (#6607)

8767 **1939-D MS65 PCGS. CAC.** PCGS Population (1938/754). NGC Census: (1105/643). Mintage: 4,267,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $160. (#6607)
From The Norva Collection.

8768 **1939-S MS65 NGC.** NGC Census: (718/648). PCGS Population (1315/989). Mintage: 2,552,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $265. (#6608)

8769 **1939-S MS65 NGC.** NGC Census: (717/647). PCGS Population (1313/989). Mintage: 2,552,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $265. (#6608)

8770 **1939-S MS65 PCGS. CAC.** PCGS Population (1315/989). NGC Census: (718/648). Mintage: 2,552,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $265. (#6608)
From The Norva Collection.

8771 **1939-S MS66 NGC. CAC.** NGC Census: (534/113). PCGS Population (878/111). Mintage: 2,552,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: $375. (#6608)
From The Old Holder Collection.

8772 **1939-S MS66 PCGS. CAC.** PCGS Population (878/111). NGC Census: (535/113). Mintage: 2,552,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: $375. (#6608)

8773 **1940 and 1941 MS65 PCGS.** (Total: 2 coins)

8774 **1940 MS66 NGC.** NGC Census: (744/218). PCGS Population (987/226). Mintage: 9,167,279. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: $195. (#6609)

8775 **1940-S MS65 PCGS.** PCGS Population (1253/355). NGC Census: (755/177). Mintage: 4,550,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $240. (#6610)
From The Norva Collection.

8776 **1940-S MS65 PCGS.** PCGS Population (1253/352). NGC Census: (755/177). Mintage: 4,550,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $240. (#6610)

8777 **1941 MS66 NGC.** NGC Census: (2282/547). PCGS Population (2630/473). Mintage: 24,207,412. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: $180. (#6611)

8778 **1941 MS66 NGC.** NGC Census: (2284/546). PCGS Population (2630/474). Mintage: 24,207,412. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: $180. (#6611)

8779 **1941 MS66 PCGS.** PCGS Population (2626/473). NGC Census: (2284/548). Mintage: 24,207,412. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: $180. (#6611)

8780 **1941 MS66 PCGS. CAC.** PCGS Population (2630/474). NGC Census: (2284/546). Mintage: 24,207,412. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: $180. (#6611)

8781 **1941-D MS66 NGC.** NGC Census: (1182/176). PCGS Population (1473/141). Mintage: 11,248,400. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: $200. (#6612)
From The Lance Gage Collection.

8782 **1941-S MS65 NGC. CAC.** NGC Census: (885/217). PCGS Population (2153/400). Mintage: 8,098,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $700. (#6613)

8783 **1942 MS66 NGC.** NGC Census: (2619/371). PCGS Population (2521/212). Mintage: 47,839,120. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: $180. (#6614)

8784 **1942 MS66 PCGS. CAC.** PCGS Population (2521/212). NGC Census: (2619/371). Mintage: 47,839,120. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: $180. (#6614)
From The Norva Collection.

8785 **1942 MS66 PCGS. CAC.** PCGS Population (2521/212). NGC Census: (2619/371). Mintage: 47,839,120. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: $180. (#6614)

8786 **1942-D MS65 PCGS. CAC.** PCGS Population (2768/1216). NGC Census: (1509/1017). Mintage: 10,973,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $175. (#6615)

8787 **(2)1943 MS64 PCGS; 1944 MS64 PCGS; 1945-D MS64 PCGS** and a **1946 MS64 PCGS.** (Total: 5 coins)

8974 **1967 SMS MS66 Deep Cameo PCGS.** PCGS Population (68/71). NGC Census: (67/106). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: $160. (#96847)

PROOF KENNEDY HALF DOLLARS

8975 **1964 PR68 Cameo PCGS.** PCGS Population (768/230). NGC Census: (981/1515). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR68: $63. (#86800)

8976 **1964 Accented Hair, Doubled Die Obverse PR66 PCGS.** FS-103. PCGS Population (788/1247). NGC Census: (1108/3270). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR66: $61. (#6801)

8977 **1964 Accented Hair PR67 Cameo PCGS.** FS-401. PCGS Population (193/97). NGC Census: (324/206). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR67: $160. (#86801)

8978 **1969-S PR69 Ultra Cameo NGC.** NGC Census: (706/0). PCGS Population (549/1). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR69: $140. (#96805)

8979 **1971-S Doubled Die Obverse PR67 NGC.** FS-102. NGC Census: (159/271). PCGS Population (337/454). Mintage: 3,220,733. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR67: $13. (#6807)

8980 **1977-S PR70 Deep Cameo PCGS.** PCGS Population (143). NGC Census: (20). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR70: $280. (#96815)

8981 **1993-S Clad PR70 Deep Cameo PCGS.** PCGS Population (335). NGC Census: (223). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR70: $60. (#96835)

8982 **1995-S Clad PR70 Deep Cameo PCGS.** PCGS Population (254). NGC Census: (193). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR70: $53. (#96839)

8983 **1995-S Silver PR70 Deep Cameo PCGS.** PCGS Population (225). NGC Census: (0). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR70: $135. (#96840)

EARLY DOLLARS

8984 **1795 Flowing Hair, Two Leaves — Holed — NGC Details. Good.** BB-14,B-4. NGC Census: (0/0). PCGS Population (7/529). Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4 : $1,425. (#6853)

End of Session Four

HERITAGE
WORLD & ANCIENT COINS
JANUARY 6-7, 2013 | NEW YORK | LIVE & ONLINE

THE SUNRISE COLLECTION

Painstakingly assembled over a 40-year period, the Sunrise Collection is one of the most comprehensive private collections ever put together tracing the magnificent history of Islam as a world power, with a special focus on two of its most important states—Persia and Mughal India

SESSION FIVE

Heritage Live!™, Internet, Fax, and Mail Only Session
Sunday, July 15, 2012 | 1:00PM CT | Dallas, Texas | Lots 8985 - 10617

A 15% Buyer's Premium ($14 minimum) Will Be Added To All Lots
To view full descriptions, enlargeable images and bid online, visit HA.com/1172

SPECIAL INTERNET BIDDING FEATURE

Online proxy bidding ends at HA.com two hours prior to the opening of the live auction. Check the Time Remaining on individual lots for details. After Internet proxy bidding closes, live bidding will take place through Heritage LiveTM, our bidding software that lets you bid live during the actual auction. Your secret maximum will compete against those bids, and win all ties. To maximize your chances of winning, enter realistic secret maximum bids before live bidding begins. (Important note: Due to software and Internet latency, bids placed through Live Internet Bidding may not register in time and those bidders could lose lots they would otherwise have won, so be sure to place your proxy bids in advance.)

EARLY DOLLARS

8985 **1799 7x6 Stars AG3 NGC. CAC.** NGC Census: (0/1639). PCGS Population (6/2614). Mintage: 423,515. Numismedia Wsl. Price for problem free NGC/PCGS coin in AG3 : $528. (#6878)

8986 **1799 7x6 Stars — Scratches — NGC Details. VF.** NGC Census: (82/1322). PCGS Population (237/1890). Mintage: 423,515. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $1,975. (#6878)

8987 **1800 — Improperly Cleaned — NGC Details. VG.** BB-187, B-16. NGC Census: (15/805). PCGS Population (19/975). Mintage: 220,920. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8 : $1,075. (#6887)

8988 **1800 12 Arrows — Improperly Cleaned — NGC Details. Good.** BB-196, B-17. NGC Census: (0/0). PCGS Population (0/64). (#6890)

8989 **1803 Small 3 — Obv Graffiti — NGC Details. Good.** NGC Census: (5/393). PCGS Population (1/371). Mintage: 85,634. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4 : $890. (#6900)

SEATED DOLLARS

8990 **1842 Fair 2 PCGS.** PCGS Population (2/567). NGC Census: (0/447). Mintage: 184,618. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fair 2 : $83. (#6928)

8991 **1842 Fine 15 PCGS. CAC.** PCGS Population (6/552). NGC Census: (3/438). Mintage: 184,618. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: $301. (#6928)

8992 **1842 — Improperly Cleaned — NGC Details. AU.** NGC Census: (40/273). PCGS Population (70/208). Mintage: 184,618. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: $735. (#6928)

8993 **1843 XF45 PCGS. CAC.** PCGS Population (98/225). NGC Census: (55/243). Mintage: 165,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $604. (#6929)
From The Norva Collection.

8994 **1845 XF40 PCGS.** PCGS Population (30/152). NGC Census: (10/118). Mintage: 24,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $790. (#6931)
From The Norva Collection.

8995 **1846 — Rim Damaged — NGC Details. XF.** NGC Census: (21/342). PCGS Population (67/383). Mintage: 110,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $540. (#6932)

8996 **1847 XF45 PCGS.** PCGS Population (103/296). NGC Census: (52/279). Mintage: 140,750. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $643. (#6934)
From The Norva Collection.

8997 **1848 — Polished, Rim Filing — NGC Details. VF.** NGC Census: (1/77). PCGS Population (0/164). Mintage: 15,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $600. (#6935)

8998 **1849 — Rim Damage — NGC Details. XF.** NGC Census: (6/231). PCGS Population (33/264). Mintage: 62,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $565. (#6936)

8999 **1859-O XF40 PCGS. CAC.** PCGS Population (39/647). NGC Census: (16/444). Mintage: 360,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $500. (#6947)
From The Norva Collection.

9000 **1860-O VF25 PCGS.** PCGS Population (11/1103). NGC Census: (9/692). Mintage: 515,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: $343. (#6950)

9001 **1860-O XF45 PCGS.** PCGS Population (74/928). NGC Census: (40/606). Mintage: 515,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $520. (#6950)

9002 **1860-O XF45 PCGS. CAC.** PCGS Population (73/926). NGC Census: (40/605). Mintage: 515,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $520. (#6950)
From The Norva Collection.

9003 **1860-O AU50 NGC.** NGC Census: (24/582). PCGS Population (64/864). Mintage: 515,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: $650. (#6950)

9004 **1864 — Improperly Cleaned — NGC Details. XF.** NGC Census: (6/54). PCGS Population (14/88). Mintage: 30,700. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $950. (#6954)

9005 **1871 VF35 PCGS.** PCGS Population (57/605). NGC Census: (18/453). Mintage: 1,074,760. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: $430. (#6966)

9006 **1871 XF40 NGC.** NGC Census: (38/413). PCGS Population (87/517). Mintage: 1,074,760. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $475. (#6966)

9007 **1871 XF45 PCGS.** PCGS Population (125/392). NGC Census: (70/343). Mintage: 1,074,760. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $545. (#6966)

9008 **1872 VF35 NGC.** NGC Census: (10/314). PCGS Population (43/400). Mintage: 1,106,450. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: $411. (#6968)

9009 **1872 XF40 NGC.** NGC Census: (35/278). PCGS Population (67/332). Mintage: 1,106,450. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $450. (#6968)

9010 **1872 XF45 PCGS.** PCGS Population (66/267). NGC Census: (53/226). Mintage: 1,106,450. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $546. (#6968)

9011 **1872 XF45 PCGS.** PCGS Population (66/267). NGC Census: (53/226). Mintage: 1,106,450. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $546. (#6968)

9012 **1873 XF45 PCGS.** PCGS Population (25/134). NGC Census: (6/116). Mintage: 293,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $520. (#6971)

9013 **1873 XF45 PCGS.** PCGS Population (25/134). NGC Census: (6/116). Mintage: 293,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $520. (#6971)

TRADE DOLLARS

9014 **1873 XF45 PCGS. CAC.** PCGS Population (21/181). NGC Census: (1/124). Mintage: 396,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $236. (#7031)
From The Norva Collection.

9015 **1873-CC VF35 PCGS.** PCGS Population (6/181). NGC Census: (2/104). Mintage: 124,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: $812. (#7032)
From The Color Collection.

9016 **1874-CC Chop Mark — Cleaned — ANACS. AU55 Details.** NGC Census: (0/0). PCGS Population (7/40). (#87035)

9017 **1875-CC — Chop Mark — NGC Details. XF.** NGC Census: (0/0). PCGS Population (5/48). (#87038)

9018 **1875-CC Chop Mark — Altered Surfaces — ANACS. AU50 Details.** NGC Census: (0/0). PCGS Population (9/32). (#87038)

9019 **1875-CC — Reverse Improperly Cleaned — NGC Details. XF.** NGC Census: (6/235). PCGS Population (27/331). Mintage: 1,573,700. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $490. (#7038)

9020 **1875-CC — Cleaned, Corroded — ANACS. AU55 Details.** NGC Census: (20/192). PCGS Population (41/202). Mintage: 1,573,700. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: $850. (#7038)

9021 **1875-S Chop Mark — Altered Surfaces — ANACS. AU50 Details.** NGC Census: (0/0). PCGS Population (11/124). (#87039)

9022 **1875-S XF45 PCGS.** PCGS Population (26/1053). NGC Census: (6/827). Mintage: 4,487,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $221. (#7039)
From The Norva Collection.

9023 **1875-S AU53 PCGS. CAC.** PCGS Population (24/998). NGC Census: (8/812). Mintage: 4,487,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: $285. (#7039)
From The Color Collection.

9024 **1876 — Stained — NGC Details. XF.** NGC Census: (4/358). PCGS Population (10/453). Mintage: 455,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $205. (#7041)

9025 **1876 XF45 PCGS. CAC.** PCGS Population (15/438). NGC Census: (7/351). Mintage: 455,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $230. (#7041)
From The Norva Collection.

9026 **1876 — Cleaned, Obverse Scratched — NGC Details. AU.** NGC Census: (8/346). PCGS Population (14/424). Mintage: 455,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: $275. (#7041)

9027 **1876-CC — Improperly Cleaned — NGC Details. AU.** NGC Census: (3/97). PCGS Population (12/71). Mintage: 509,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: $700. (#7042)

9028 **1876-CC Doubled Die Reverse — Improperly Cleaned — NGC Details. AU.** FS-801. NGC Census: (3/21). PCGS Population (1/14). (#97042)

9029 **1876-S AU50 NGC.** NGC Census: (20/613). PCGS Population (24/674). Mintage: 5,227,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: $250. (#7043)

9030 **1877 — Cleaned — ANACS. XF45 Details.** NGC Census: (29/362). PCGS Population (43/380). Mintage: 3,039,710. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $226. (#7044)

9031 **1877 AU50 NGC.** NGC Census: (12/350). PCGS Population (25/355). Mintage: 3,039,710. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: $265. (#7044)

9032 **1877 AU53 NGC.** NGC Census: (18/335). PCGS Population (24/333). Mintage: 3,039,710. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: $325. (#7044)

9033 **1877 AU53 NGC.** NGC Census: (17/333). PCGS Population (24/332). Mintage: 3,039,710. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: $325. (#7044)

9034 **1877 AU58 PCGS.** PCGS Population (47/235). NGC Census: (57/254). Mintage: 3,039,710. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: $500. (#7044)

9035 **1877-S VF35 NGC. CAC.** NGC Census: (23/1057). PCGS Population (49/1501). Mintage: 9,519,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: $184. (#7046)

9036 **1877-S — Improperly Cleaned — NGC Details. AU.** NGC Census: (25/960). PCGS Population (106/1205). Mintage: 9,519,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: $265. (#7046)

9037 **1877-S — Cleaned, Scratched — ANACS. AU50 Details.** NGC Census: (25/960). PCGS Population (106/1205). Mintage: 9,519,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: $265. (#7046)

9038 **1877-S AU50 NGC.** NGC Census: (25/960). PCGS Population (106/1205). Mintage: 9,519,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: $265. (#7046)

9039 **1877-S — Environmental Damage — NGC Details. AU.** NGC Census: (25/960). PCGS Population (106/1206). Mintage: 9,519,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: $265. (#7046)

9040 **1878-CC — Edge Damage — NGC Details. VF.** NGC Census: (0/75). PCGS Population (4/148). Mintage: 97,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $1,425. (#7047)

9041 **1878-S XF45 PCGS. CAC.** PCGS Population (108/771). NGC Census: (36/610). Mintage: 4,162,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $221. (#7048)
From The Norva Collection.

9042 **1878-S AU53 NGC.** NGC Census: (23/570). PCGS Population (47/656). Mintage: 4,162,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: $285. (#7048)

9043 **1878-S AU58 PCGS.** PCGS Population (118/426). NGC Census: (120/388). Mintage: 4,162,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: $550. (#7048)

MORGAN DOLLARS

9044 **1878 8TF Genuine PCGS Secure.** Top 100, VAM-9 1st Die Repair. The PCGS number ending in .92 suggests cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. Mintage: 699,300. (#7072)

9045 **1878 8TF MS62 NGC.** NGC Census: (1496/4848). PCGS Population (1916/6464). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: $135. (#7072)

9046 **1878 8TF MS62 NGC.** NGC Census: (1496/4848). PCGS Population (1916/6464). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: $135. (#7072)

9047 **1878 8TF MS62 PCGS.** VAM-21 Broken R&B. PCGS Population (1919/6471). NGC Census: (1496/4854). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: $135. (#7072)

9048 **1878 8TF MS62 PCGS Secure.** VAM-17. Diagonal in 8. PCGS Population (1919/6471). NGC Census: (1496/4854). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: $135. (#7072)

9049 **1878 8TF MS63 PCGS.** PCGS Population (3610/2851). NGC Census: (2579/2275). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $180. (#7072)

9050 **1878 8TF MS63 PCGS.** PCGS Population (3618/2853). NGC Census: (2581/2273). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $180. (#7072)

9051 **1878 8TF MS63 PCGS.** VAM-14.2 Polished Ear. PCGS Population (3618/2853). NGC Census: (2581/2273). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $180. (#7072)

9052 **1878 8TF MS63 PCGS.** VAM-18 Doubled Date. PCGS Population (3618/2853). NGC Census: (2581/2273). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $180. (#7072)

9053 **1878 8TF MS63 PCGS.** Hot-50, VAM-22 Polished LIB. PCGS Population (3618/2853). NGC Census: (2581/2273). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $180. (#7072)

9054 **1878 8TF MS63 PCGS.** VAM-4 Denticle Chip. PCGS Population (3618/2853). NGC Census: (2581/2273). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $180. (#7072)

9055 **1878 8TF MS63 PCGS.** VAM-14.1 Alligator Eye. PCGS Population (3618/2853). NGC Census: (2581/2273). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $180. (#7072)

9056 **1878 8TF MS64 PCGS.** PCGS Population (2340/511). NGC Census: (1909/361). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $420. (#7072)

9057 **1878 8TF MS64 PCGS.** PCGS Population (2342/514). NGC Census: (1920/362). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $420. (#7072)

9058 **1878 8TF MS63 Prooflike NGC.** NGC Census: (212/107). PCGS Population (235/128). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $350. (#7073)

9059 **1878 7/8TF Strong MS62 NGC.** NGC Census: (830/2532). PCGS Population (1121/3942). Mintage: 544,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: $155. (#7078)

9404 **1887-S MS64 PCGS.** PCGS Population (1674/335). NGC Census: (929/167). Mintage: 1,771,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $550. (#7180)

9405 **1887-S MS64 PCGS.** PCGS Population (1681/336). NGC Census: (929/168). Mintage: 1,771,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $550. (#7180)

9406 **1887-S MS64 PCGS. CAC.** PCGS Population (1681/336). NGC Census: (929/168). Mintage: 1,771,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $550. (#7180)
From The Color Collection.

9407 **1888 MS63 PCGS.** Doubled Ear, VAM-11. Top 100. PCGS Population (13116/16885). NGC Census: (12287/24299). Mintage: 19,183,832. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $60. (#7182)

9408 **1888 MS65+ PCGS.** PCGS Population (3206/595). NGC Census: (5537/1021). Mintage: 19,183,832. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $200. (#7182)

9409 **1888 MS65 NGC. CAC.** NGC Census: (5542/1024). PCGS Population (3209/597). Mintage: 19,183,832. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $200. (#7182)

9410 **1888-O — Improperly Cleaned — NGC Details. XF.** Double Die Obverse, Hot Lips, VAM-4, Top 100. NGC Census: (62/19632). PCGS Population (14/17493). Mintage: 12,150,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $30. (#7184)

9411 **1888-O XF40 PCGS. Secure.** Top 100, VAM-4 Hot Lips. PCGS Population (14/17513). NGC Census: (62/19659). Mintage: 12,150,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $30. (#7184)

9412 **1888-O MS65 PCGS.** PCGS Population (1705/197). NGC Census: (1312/41). Mintage: 12,150,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $500. (#7184)

9413 **1888-O MS65 PCGS.** PCGS Population (1703/197). NGC Census: (1310/41). Mintage: 12,150,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $500. (#7184)
From The Color Collection.

9414 **1888-O MS65 NGC.** NGC Census: (1313/41). PCGS Population (1706/197). Mintage: 12,150,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $500. (#7184)

9415 **1888-O MS65 Prooflike PCGS. CAC.** PCGS Population (88/8). NGC Census: (63/3). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $600. (#7185)
From The Color Collection.

9416 **1888-O Doubled Die Obverse XF45 NGC.** Hot Lips, VAM-4. NGC Census: (0/0). PCGS Population (69/146). (#7308)

9417 **1888-O Doubled Die Obverse XF45 NGC.** Top 100, VAM-4 DDO Hot Lips. NGC Census: (0/0). PCGS Population (70/146). (#7308)

9418 **1888-O Doubled Die Obverse XF45 NGC.** Top 100, VAM-4 DDO Hot Lips. NGC Census: (0/0). PCGS Population (70/146). (#7308)

9419 **1888-O Doubled Die Obverse XF45 PCGS.** PCGS Population (70/146). NGC Census: (0/0). (#7308)

9420 **1888-S — Improperly Cleaned — NGC Details. Unc.** NGC Census: (37/2829). PCGS Population (85/5047). Mintage: 657,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: $220. (#7186)

9421 **1888-S MS64 NGC.** NGC Census: (875/111). PCGS Population (1390/272). Mintage: 657,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $770. (#7186)

9422 **1888-S MS64 PCGS.** PCGS Population (1397/272). NGC Census: (875/111). Mintage: 657,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $770. (#7186)

9423 **1888-S MS64 PCGS.** PCGS Population (1397/272). NGC Census: (875/111). Mintage: 657,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $770. (#7186)

9424 **1888-S MS64 PCGS. CAC.** PCGS Population (1397/272). NGC Census: (875/111). Mintage: 657,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $770. (#7186)

9425 **1888-S MS64 Prooflike NGC.** NGC Census: (58/6). PCGS Population (67/3). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $975. (#7187)

9426 **1889 MS64 PCGS.** PCGS Population (9009/1838). NGC Census: (13568/2132). Mintage: 21,726,812. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $85. (#7188)
From The Color Collection.

9427 **1889 MS64 NGC. CAC.** NGC Census: (13568/2132). PCGS Population (9009/1838). Mintage: 21,726,812. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $85. (#7188)
From The Color Collection.

9428 **1889 MS64+ PCGS. CAC.** PCGS Population (9009/1838). NGC Census: (13568/2132). Mintage: 21,726,812. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $85. (#7188)
From The Color Collection.

9429 **1889 MS65 NGC.** NGC Census: (1931/208). PCGS Population (1647/191). Mintage: 21,726,812. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $240. (#7188)

9430 **1889 MS65 PCGS.** PCGS Population (1647/191). NGC Census: (1924/206). Mintage: 21,726,812. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $240. (#7188)

9431 **1889-CC Genuine PCGS.** The PCGS number ending in .92 suggests cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. PCGS Population (0/0). NGC Census: (0/0). Mintage: 350,000. (#7190)

9432 **1889-CC — Improperly Cleaned — NGC Details. AG.** NGC Census: (0/3230). PCGS Population (72/5065). Mintage: 350,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AG3 : $278. (#7190)

9433 **1889-CC — Rim Damage — NGC Details. Good Details.** NGC Census: (68/3148). PCGS Population (114/4931). Mintage: 350,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4 : $440. (#7190)

9434 **1889-CC Good 6 NGC.** NGC Census: (115/3033). PCGS Population (179/4752). Mintage: 350,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 6 : $473. (#7190)

9435 **1889-CC VG8 PCGS.** PCGS Population (230/4522). NGC Census: (138/2895). Mintage: 350,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8 : $535. (#7190)

9436 **1889-CC — Rim Damage — NGC Details. VG.** NGC Census: (138/2895). PCGS Population (230/4522). Mintage: 350,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8 : $535. (#7190)

9437 **1889-CC — Rev Scratched — NGC Details. VG.** NGC Census: (138/2895). PCGS Population (230/4522). Mintage: 350,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8 : $535. (#7190)

9438 **1889-CC — Rim Damage — NGC Details. VG.** NGC Census: (138/2895). PCGS Population (230/4522). Mintage: 350,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8 : $535. (#7190)

9439 **1889-CC — Rim Damaged — NGC Details. VG.** NGC Census: (138/2895). PCGS Population (230/4522). Mintage: 350,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8 : $535. (#7190)

9440 **1889-CC — Improperly Cleaned — NGC Details. Fine.** NGC Census: (211/2533). PCGS Population (337/3931). Mintage: 350,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: $745. (#7190)

9441 **1889-CC Fine 12 NGC.** NGC Census: (209/2523). PCGS Population (333/3911). Mintage: 350,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: $745. (#7190)

9442 **1889-CC — Improperly Cleaned — NGC Details. Fine Details.** NGC Census: (209/2523). PCGS Population (333/3911). Mintage: 350,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: $745. (#7190)

9443 **1889-CC — Improperly Cleaned — NGC Details. Fine.** NGC Census: (211/2533). PCGS Population (337/3931). Mintage: 350,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: $745. (#7190)

9444 **1889-CC Fine 15 NGC. CAC.** NGC Census: (183/2341). PCGS Population (407/3508). Mintage: 350,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: $843. (#7190)

9445 **1889-CC — Cleaned, Environmental Damage — NGC Details. VF.** NGC Census: (202/2144). PCGS Population (328/3190). Mintage: 350,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $1,025. (#7190)

9446 **1889-CC — Repaired — NGC Details. VF.** NGC Census: (202/2144). PCGS Population (328/3190). Mintage: 350,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $1,025. (#7190)

9447 **1889-CC — Improperly Cleaned — NGC Details. VF.** NGC Census: (202/2138). PCGS Population (325/3179). Mintage: 350,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $1,025. (#7190)

9448 **1889-CC — Repaired — NGC Details. XF.** NGC Census: (222/1438). PCGS Population (474/1620). Mintage: 350,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $2,325. (#7190)

9449 **1889-O MS64 PCGS.** PCGS Population (1424/148). NGC Census: (927/55). Mintage: 11,875,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $675. (#7192)

9450 **1889-S — Obv Improperly Cleaned — NGC Details. Unc.** NGC Census: (46/3973). PCGS Population (80/6618). Mintage: 700,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: $160. (#7194)

9451 **1889-S — Obv Scratched — NGC Details. Unc.** NGC Census: (46/3973). PCGS Population (80/6618). Mintage: 700,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: $160. (#7194)

9452 **1889-S MS64+ NGC. CAC.** NGC Census: (1257/278). PCGS Population (2069/616). Mintage: 700,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $540. (#7194.7)
From The Color Collection.

9453 **1889-S MS63 Prooflike NGC.** NGC Census: (92/72). PCGS Population (53/45). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $440. (#7195)

9454 **1890 MS64 PCGS.** PCGS Population (3384/405). NGC Census: (3929/298). Mintage: 16,802,590. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $125. (#7196)

9455 **1890 MS64 PCGS.** PCGS Population (3377/402). NGC Census: (3928/297). Mintage: 16,802,590. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $125. (#7196)
From The Color Collection.

9456 **1890 MS64 NGC.** NGC Census: (3934/299). PCGS Population (3388/405). Mintage: 16,802,590. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $125. (#7196)

9457 **1890 MS64 PCGS. CAC.** PCGS Population (3384/405). NGC Census: (3929/298). Mintage: 16,802,590. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $125. (#7196)

9458 **1890-CC — Artificial Toning — NGC Details. Unc.** NGC Census: (85/4290). PCGS Population (154/8274). Mintage: 2,309,041. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: $325. (#7198)

9459 **1890-CC — Artificial Toning — NGC Details. Unc.** NGC Census: (85/4290). PCGS Population (154/8274). Mintage: 2,309,041. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: $325. (#7198)

9460 **1890-CC — Cleaned — Genuine PCGS. Unc Details.** NGC Census: (85/4290). PCGS Population (154/8274). Mintage: 2,309,041. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: $325. (#7198)

9461 **1890-CC MS61 PCGS.** PCGS Population (569/7705). NGC Census: (450/3840). Mintage: 2,309,041. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: $450. (#7198)

9462 **1890-CC MS62 NGC.** NGC Census: (1214/2626). PCGS Population (2146/5559). Mintage: 2,309,041. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: $520. (#7198)

9463 **1890-CC MS62 PCGS.** PCGS Population (2146/5559). NGC Census: (1214/2626). Mintage: 2,309,041. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: $520. (#7198)

End of Auction

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:

- Fifteen percent (15%) on, Currency, US Coin, and World & Ancient Coin Auctions Lots. Beginning with Auctions closing after July 31, 2012 the Buyer's Premium in Currency, US Coin, and World & Ancient Coin Auctions will be 17.5%.
- Nineteen and one-half percent (19.5%) on Americana & Political, Arms & Armor, Civil War & Militaria, Comic, Manuscript, Movie Poster, Space Exploration, Sports Collectibles, Texana, Wine, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
- For lots in all other categories not listed above, twenty-five percent (25%) on the first $50,000 (minimum $14), twenty percent (20%) of any amount between $50,000 and $1,000,000, and twelve percent (12%) of any amount over $1,000,000.

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real- time telephone bidding are available to registered clients during these auctions.

Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

8. Bids in Signature® Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at HA.com/common/howtobid.php.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-443-8425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only $1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments.

Current Bid	Bid Increment	Current Bid	Bid Increment
<$10	$1	$20,000 - $29,999	$2,000
$10 - $29	$2	$30,000 - $49,999	$2,500
$30 - $49	$3	$50,000 - $99,999	$5,000
$50 - $99	$5	$100,000 - $199,999	$10,000
$100 - $199	$10	$200,000 - $299,999	$20,000
$200 - $299	$20	$300,000 - $499,999	$25,000
$300 - $499	$25	$500,000 - $999,999	$50,000
$500 - $999	$50	$1,000,000 - $1,999,999	$100,000
$1,000 - $1,999	$100	$2,000,000 - $2,999,999	$200,000
$2,000 - $2,999	$200	$3,000,000 - $4,999,999	$250,000
$3,000 - $4,999	$250	$5,000,000 - $9,999,999	$500,000
$5,000 - $9,999	$500	>$10,000,000	$1,000,000
$10,000 - $19,999	$1,000		

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.
14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40–60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (approximately 50%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 1-800-872-6467.
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot.
25. Lots delivered to you, or your representative in the States of Texas, California, New York, or other states where the Auction may be held, are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. (Note: Coins are only subject to sales tax in California on invoices under $1500 and in Texas on invoices under $1000. Check the Web site at: http://coins.ha.com/c/ref/sales-tax.zx for more details.) Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount or three percent (3%) of any installment that is past due. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 10% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 10% seller's commissions, if sold at an Auctioneer's auction.

Terms and Conditions of Auction

29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale. In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.
31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery; Shipping; and Handling Charges:

32. Buyer is liable for shipping and handling. Please refer to Auctioneer's website www.HA.com/common/shipping.php for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.
33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item'(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.
34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.
35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a $100 administration fee plus $10 daily storage for larger items and $5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.

36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay or failure to obtain any such license or permit does not relieve the buyer of timely compliance with standard payment terms. For further information, please contact Ron Brackemyre at 800- 872-6467 ext. 1312.

36B. Auctioneer shall not be liable for any loss caused by or resulting from:

a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles

37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .
39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.
42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opines, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.
44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or inconsequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.
46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.
47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.
48. Dispute Resolution for Consumers and Non-Consumers: Any claim, dispute, or controversy in connection with, relating to and /or arising out of the Auction, participation in the Auction, award of lots, damages of claims to lots, descriptions, condition reports, provenance, estimates, return and warranty rights, any interpretation of these Terms and Conditions, any alleged verbal modification of these Terms and Conditions and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation shall or any other matter: a) if presented by a consumer, be exclusively heard by, and the parties consent to, exclusive in personam jurisdiction in the State District Courts of Dallas County, Texas. THE PARTIES EXPRESSLY WAIVE ANY RIGHT TO TRIAL BY JURY. Any appeals shall be solely pursued in the appellate courts of the State of Texas; or b) for any claimant other than a consumer, the claim shall be presented in confidential binding arbitration before a single arbitrator, that the parties may agree upon, selected from the JAMS list of Texas arbitrators. The case is not to be administrated by JAMS; however, if the parties cannot agree on an arbitrator, then JAMS shall appoint the arbitrator and it shall be conducted under JAMS rules. The locale shall be Dallas Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. Any party on any claim involving the purchase or sale of numismatic or related items may elect arbitration through binding PNG arbitration. Any claim must be brought within one (1) year of the alleged breach, default or misrepresentation or the claim is waived. This agreement and any claims shall be determined and construed under Texas law. The prevailing party (party that is awarded substantial and material relief on its claim or defense) may be awarded its reasonable attorneys' fees and costs.
49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.
50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid or arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.
51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Notice as to an Auction in Ohio: Auction firm and Auctioneer are licensed by the Dept. of Agriculture, and either the licensee is bonded in favor of the state or an aggrieved person may initiate a claim against the auction recovery fund created in Section 4707.25 of the Revised Code as a result of the licensee's actions, whichever is applicable.

Terms and Conditions of Auction

Additional Terms & Conditions: COINS & CURRENCY

COINS and CURRENCY TERM A: Signature® Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-8726467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (1-800-872-6467) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price ($10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, http://www.ngccoin.com/services/writtenguarantee.asp; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, http://www.pcgs.com/guarantee.html; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Belleview Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM M: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM N: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM O: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

HERITAGE MyCollection

YOUR PERSONAL ONLINE COLLECTION INVENTORY

FREE!

Heritage's new **MyCollection** software is a private record of collectibles that you own, buy, or resell, and it's great for insurance or estate planning.

It's FREE, and...

- Stores images, description, and more.
- All items bought from Heritage are added automatically!
- Items bought elsewhere can also be added
- Allows for infinite organization of your collection.
- Exports to Excel or to print for easy reference.
- You enjoy absolute privacy. Your information will not be shared with, or sold to, any third party for any reason.
- Available in all Heritage categories

But the most exciting thing about the new **MyCollection** software is the ability to receive offers on items you purchased from Heritage at auction, including the ability to set your own "Buy Now" price.

Heritage members now have the opportunity to make an anonymous offer to the buyer of items previously purchased at auction from Heritage, directly through our Auction Results Archives. Heritage manages the transaction, maintaining privacy for both parties. Acceptance of an offer represents agreement with the terms and conditions of sale, including Heritage's commission. This service is free to the buyer (no buyer's premium), includes a 7 day return policy, protects the identity of both parties, and allows offers and counter-offers. If you receive an offer, you will have 72 hours to decline, counter-offer or accept the offer. You are under no obligation until you accept an offer or a buyer accepts your counter offer. You will receive payment for items sold within 30 days of Heritage's receipt of your item.

Annual Sales Exceed $800 Million | 700,000+ Online Bidder Members

If you are interested in a specialist role and have previous major auction house experience, please email your resume and salary history to Experts@HA.com.

The Business Climate is Perfect at Long Beach.

Join us at the Long Beach Expo • May 31 - June 2, 2012

Located within sight of major attractions like the Queen Mary and The Aquarium of the Pacific in beautiful Long Beach, California, the Expo brings together more than 10,000 dealers and collectors three times each year. The weather is great, and so is the business climate on our 100,000-square-foot bourse floor!

Literally hundreds of dealers are on hand buying and selling U.S. and World coins. And there are activities for collectors of all levels and ages at every show, including:

- A multi-millon-dollar Signature Auction held by Heritage Auctions, the official auctioneer of the Long Beach Expo
- Onsite coin grading by PCGS
- Numerous youth activities including the popular kids' treasure hunt sponsored by the Full Step Nickel Club

Join us in sunny Southern California at the *Long Beach Expo, May 31–June 2, 2012*. For more information, call **888-743-9316**, email **lbexpo@collectors.com,** or visit **www.longbeachexpo.com.**
